2 Phase Fully Actuated (Merrimon Avenue Closed Loop Signal System)

NOTES

1. Refer to "Roadway Standard Drawings NCDOT," dated January 2002, and "Standard Specifications for Roads and Structures" dated January 2002.
2. Do not program signal for late night flashing operation unless otherwise directed by the engineer.
3. Set all detector units to presence mode.
4. Place cabinet so as not to obstruct sight distance of vehicles turning right on red.
5. Maximum times shown in timing chart are for free-run operation only. Coordinated signal system timing values shall supersede these values.
6. Closed loop system data:
   Controller Asset #: 0253
7. Omit "Walk" and Flashing "Don't Walk" with no pedestrian calls.
8. Pedestrian heads P21, P22, P61, and P62 do not include a push button. Program phases 2Ped and 6Ped for Ped Recall.
9. All vehicular and pedestrian signal heads shall be dark green in color.
