PROJECT SPECIAL PROVISIONS

Roadway

7-1-95

SP1R01

BORROW EXCAVATION:

2-19-02

Revise the 2002 Standard Specifications as follows:

Page 2-20, Article 230-6

After the first paragraph, insert the following paragraph:

"No direct payment will be made for the work of Evaluation of Potential Wetlands and Endangered Species as outlined above. Payment at the contract unit price for the pay item 'Borrow Excavation' or 'Grading - Lump Sum' will be considered full compensation for this work.'

SP2R37

DISPOSAL OF WASTE AND DEBRIS:

2-19-02

Revise the 2002 Standard Specifications as follows:

Page 8-9, Subarticle 802-2(7. Buffer Zones:)

At the end of the last sentence in this subarticle, add the words "unless superseded by an environmental permit."

SP8R03

REMOVE EXISTING CABLE GUIDERAIL:

Dismantle and remove existing cable guiderail and anchors of any type at locations shown on the plans or established by the Engineer and in accordance with this specification.

Remove cable guiderail and posts beginning at the trailing end and continuing towards the approach end. Remove the posts immediately after the rail is removed. Complete post removal so that no posts without rail attached are present at the end of any day's operations. Exercise care not to damage adjoining structures or other appurtenances. Repair all damage at no cost to the Department.

All cable guiderail items removed, with the exception of all cable, shall be delivered to the Durham County Maintenance Facility at 3910 Guess Road, Durham, NC 27704. No separate payment shall be made for temporary stockpiling or delivery of these items. All cable removed shall become the property of the Contractor.

METHOD OF MEASUREMENT.

The quantity of cable guiderail measured will be the actual number of linear feet (linear meters) of cable guiderail which has been satisfactorily removed. Measurement will be made to the nearest 1.0 foot (meter) from center to center of the outermost post or end shoe center bolt in the length of the cable guiderail being removed. Measurement will be made prior to removing the cable guiderail.

BASIS OF PAYMENT.

The quantity measured as provided for above will be paid for at the contract unit price per linear foot (linear meter) for "Remove Existing Cable Guiderail".

Payment will be made under:

Remove Existing Cable Guiderail.....Linear Foot (Linear Meter)

GUARDRAIL POSTS AND OFFSET BLOCKS:

06-22-04

Revise the 2002 Standard Specifications as follows:

Page 10-69, Subarticle 1046-3

Delete this sub-article in its entirety and replace with the following:

1046-3 POSTS AND OFFSET BLOCKS.

(A) General:

The Contractor may at his option furnish either of the following types of steel guardrail posts. Only one type of post will be permitted at any one continuous installation. Use structural steel posts throughout the project, unless otherwise directed or detailed in the plans.

- 1. Steel W6 x 8.5 or W6 x 9.0 posts
- 2. Steel 4.5" x 6.0" "C" shape posts (C150 x 12.2 kg/m)

The Contractor may at his option furnish either of the following types of treated timber posts if specifically directed or detailed in the plans. Only one type of post will be permitted at any one continuous installation.

- 1. Timber 6" x 8" (152 mm x 203 mm) posts.
- 2. Timber 8" x 8" (203 mm x 203 mm) posts.

(B) Structural Steel Posts:

Fabricate steel posts for guardrail of the size and weight shown on the plans from structural steel complying with the requirements of Section 1072. Metal from which C shape posts are fabricated shall meet the requirements of ASTM A570 for any grade of steel, except that mechanical requirements shall meet the requirements of ASTM A36. Punch or drill the holes for connecting bolts. Burning will not be permitted. After fabrication, the posts shall be galvanized in accordance with Section 1076.

(C) Treated Timber Posts:

Timber guardrail posts shall be of treated southern pine meeting the requirements of Article 1082-2 and 1082-3.

Bore bolt holes to a driving fit for the bolts. A minus tolerance of 1 percent will be allowed in the length of the post. Perform all framing and boring before the posts receive preservative treatment.

(D) Offset Blocks:

Provide 8-inch deep recycled plastic or composite offset blocks that have been approved for use with the guardrail shown in the standard drawings and/or plans. Only one type of offset block will be permitted at any one continuous installation. Prior to beginning the installation of recycled offset block, submit the FHWA acceptance letter for each type of block to the Engineer for approval.

Treated timber offset blocks with steel beam guardrail will not be allowed unless required by Specifications, directed by the Engineer or detailed in the plans. Steel offset blocks with steel beam guardrail will not be allowed.

Recycled plastic or composite offset blocks shall be made from no less than 50% recycled plastic or composite, and shall meet the following minimum requirements:

•	Specific Gravity:	
---	-------------------	--

- Compressive Strength in Lateral Direction:...... 1600 psi (11 MPa)

- Testing...... Shall pass NCHRP Report 350, Test Level 3 by CRASH TESTING

Revise the 2002 Standard Roadway Drawings as follows:

Sheet 4 of 6, Standard 862.03, delete the note and substitute the following:

Note: The midpost and offset block of the WTR section will require special bolt hole drilling in the thrie beam offset block and line post.

SP8R57

Durham, Granville, Person, Wake Counties

GUARDRAIL ANCHOR UNITS, TYPE M-350:

04-20-04

DESCRIPTION

Furnish and install guardrail anchor units in accordance with the details in the plans, the applicable requirements of Section 862 of the Standard Specifications, and at locations shown in the plans.

MATERIALS

The Contractor may, at his option, furnish any one of the following guardrail anchor units.

The guardrail anchor unit (SRT-350) as manufactured by:

TRINITY INDUSTRIES, INC. 2525 N. STEMMONS FREEWAY DALLAS, TEXAS 75207 TELEPHONE: 1-800-644-7976

The guardrail anchor unit (FLEAT) as manufactured by:

ROAD SYSTEMS, INC. 1507 EAST 4TH STREET BIG SPRINGS, TEXAS 79720 TELEPHONE: 915-263-2435

The guardrail anchor unit (REGENT) as manufactured by:

ENERGY ABSORPTION SYSTEMS, INC. ONE EAST WACKER DRIVE CHICAGO, ILLINOIS 60601-2076 TELEPHONE: 312-467-6750

Prior to installation the Contractor shall submit to the Engineer:

- 1. FHWA acceptance letter for each guardrail anchor unit certifying it meets the requirements of NCHRP Report 350, Test Level 3, in accordance with Section 106-2 of the Standard Specifications.
- 2. Certified working drawings and assembling instructions from the manufacturer for each guardrail anchor unit in accordance with Section 105-2 of the Specifications.

No modifications shall be made to the guardrail anchor unit without the express written permission from the manufacturer. Perform installation in accordance with the details in the plans, and details and assembling instructions furnished by the manufacturer.

CONSTRUCTION

Guardrail end delineation is required on all approach and trailing end sections for both temporary and permanent installations. Guardrail end delineation consists of yellow reflective sheeting applied to the entire end section of the guardrail in accordance with Section 1088-3 of the Standard Specifications and is incidental to the cost of the guardrail anchor unit.

MEASUREMENT AND PAYMENT

Measurement and payment will be made in accordance with Articles 862-5 and 862-6 of the Standard Specifications.

Payment will be made under:

Guardrail Anchor Units, Type M-350..... Each

SP8R60

REMOVE AND RESET GUARDRAIL ANCHOR UNIT:

Remove and reset existing guardrail anchor units at locations shown in the plans and as directed by the Engineer. Guardrail anchor units to be removed and reset may be used at any location on the project where a Guardrail Anchor Unit, Type 350, is required by the plans, if such location is approved by the Engineer.

Reset guardrail anchor units in a condition that is equal to or better than the condition before the guardrail anchor unit was removed.

Reset guardrail anchor units in accordance with Section 862 of the Standard Specifications and the Project Special Provision entitled "Guardrail Anchor Units, Type 350" found elsewhere in the contract.

The quantity of remove and reset guardrail anchor unit to be paid for shall be the actual number of guardrail anchor units that have been removed, reset and accepted.

The quantity of remove and reset guardrail anchor unit, measured as provided for above, will be paid for at the contract unit price each for "Remove and Reset Guardrail Anchor Unit, Type 350".

Such price and payment shall be full compensation for all work and incidentals covered by this provision.

Payment will be made under:

GUARDRAIL ANCHOR UNITS, TYPE 350:

04-20-04

Durham, Granville, Person, Wake Counties

DESCRIPTION

Furnish and install guardrail anchor units in accordance with the details in the plans, the applicable requirements of Section 862 of the Standard Specifications, and at locations shown in the plans.

MATERIALS

The Contractor may at his option, furnish any one of the guardrail anchor units.

Guardrail anchor unit (ET-2000) as manufactured by:

TRINITY INDUSTRIES, INC. 2525 N. STEMMONS FREEWAY DALLAS, TEXAS 75207 TELEPHONE: 1-800-644-7976

The guardrail anchor unit (SKT 350) as manufactured by:

ROAD SYSTEMS, INC. 3616 OLD HOWARD COUNTY AIRPORT **BIG SPRING, TEXAS 79720** TELEPHONE: (915) 263-2435

Prior to installation the Contractor shall submit to the Engineer:

- 1. FHWA acceptance letter for each guardrail anchor unit certifying it meets the requirements of NCHRP Report 350, Test Level 3, in accordance with Section 106-2 of the Standard Specifications.
- 2. Certified working drawings and assembling instructions from the manufacturer for each guardrail anchor unit in accordance with Section 105-2 of the Specifications.

No modifications shall be made to the guardrail anchor unit without the express written permission from the manufacturer. Perform installation in accordance with the details in the plans, and details and assembling instructions furnished by the manufacturer.

CONSTRUCTION

Guardrail end delineation is required on all approach and trailing end sections for both temporary and permanent installations. Guardrail end delineation consists of yellow reflective sheeting applied to the entire end section of the guardrail in accordance with Section 1088-3 of the Standard Specifications and is incidental to the cost of the guardrail anchor unit.

MEASUREMENT AND PAYMENT

Measurement and payment will be made in accordance with Articles 862.5 and 862-6 of the Standard Specifications.

Payment will be made under:

Guardrail Anchor Units, Type 350..... Each

SP8R65

WIRE ROPE SAFETY FENCE

11-05-04

DESCRIPTION

This work shall consist of furnishing and installing NCHRP 350 compliant 4 rope type wire rope safety fence (WRSF), manufactured by Brifen, USA, in accordance with these specifications, manufacturer's recommendation and as directed by the Engineer. On the plans, WRSF will be labeled as cable guiderail.

MATERIALS

Materials for WRSF shall be obtained from:

Brifen, USA P.O. Box 9422

Oklahoma City, OK 73143 Telephone: 405-793-9500

Website: http://www.brifenusa.com

SPARE PARTS

The following material shall be delivered to the Durham County Maintenance Facility at 3910 Guess Road, Durham, NC 27704 prior to the final acceptance of the project:

- 50 Line posts socketed LEFT shoulder (A11L)
- Non Slotted 8 GA line posts LEFT shoulder (W11NL)
- 50 Excluder (A41)
- 200 Locating pegs (A42)
- 50 Post Caps (A80)
- 50 Prismatic Reflectors (Amber) (A82)
- 1 Combination Fitting Assembly for the WRGT Anchor (WRGTA1)
- 1 ea. WRGT Posts A, B1, B2, B3 LEFT shoulder

(4 total – W11AL, W11B1L, W11B2L, W11B3L)

- 1 Tension Meter (T01)
- 1 Spreader Bar (T02)
- 1 Drive Cap (T03)

CONSTRUCTION

WRSF installation shall be in accordance with the manufacturer's recommendations.

No modification shall be made to the WRSF without the express written permission from the manufacturer.

Prior to acceptance, the Contractor shall submit a certification stating that the WRSF meets the manufacturer's specifications for materials and installation.

METHOD OF MEASUREMENT

The quantity of *Median Cable Barrier (Socketed Post) (WRSF)* to be paid for will be the actual number of linear feet of cable barrier which has been satisfactorily completed and accepted exclusive of that length of cable barrier which is within the pay limits of cable anchors. Measurement will made from center to center of the outermost post in the length of cable barrier being measured.

The quantity of *Median Cable Barrier Anchor (WRSF)* to be paid for is the actual number of units which have been completed and accepted.

BASIS OF PAYMENT

The accepted quantities of *Median Cable Barrier (Socketed Post) (WRSF)* measured as provided above, will be paid for at the contract unit price per linear foot, complete-in-place, including installing all posts with caps, surface mount posts, surface mount anchorages, wire rope, fittings, reflectors, extruders, excavation, concrete, backfill, compaction, shoulder build-up, and all labor, tools, equipment and incidentals necessary to complete the work.

The accepted quantities of *Median Cable Barrier Anchor (WRSF)*, measured as provided above, will be paid for at the contract unit price per each, complete in place, including all fittings, hardware, deflection posts, excavation, forming, backfill, compaction, concrete, safety check rope, end anchors, and all other labor, tools, equipment and incidentals necessary to complete the work.

No separate payment will be made for the spare parts as they will be incidental to the wire rope safety fence pay items.

Payment will be made under:

Section 1018-2 II (b) Delete the last sentence in its entirety.

SP10R17

TRAFFIC CONTROL

01-18-05

Rev. 06/21/05

Revise the 2002 Standard Specifications as follows:

WORK ZONE SIGNS

Article 1089-1(A) General is deleted. Substitute the following:

(A) General:

Rigid sign retroreflective sheeting requirements for Types VII, VIII and IX (prismatic) fluorescent are described in Tables 1089-A, 1089-B and 1089-C. Cover the entire sign face of the sign substrate with NCDOT approved Type VII, VIII or IX (prismatic) fluorescent orange reflective sheeting. Apply the reflective sheeting in a workmanlike manner so that there are no bubbles or wrinkles in the material.

Roll-up sign retroreflective requirements are described in Table 1089-D.

1. Work Zones Signs (Stationary)

Use Type VII, VIII or IX (prismatic) fluorescent orange retroreflective sheeting that meets the following reflective requirements in Tables 1089-A, 1089-B or 1089-C respectively. Use approved composite or aluminum for sign backing. Signs and sign supports must meet or exceed NCHRP 350 requirements for Breakaway Devices.

Table 1089-A Minimum Coefficient of Retroreflection R _A for TYPE VII Fluorescent Orange Sheeting (Candelas per lux per square meter)					
Observation Angle	Entrance Angle				
	-4°	30°			
araka Premiusika kila 1889					
0.1°	300	170			
0.2°	230	130			
0.5°	72	41			

Table 1089-B Minimum Coefficient of Retroreflection R _A for TYPE VIII Fluorescent Orange Sheeting (Candelas per lux per square meter)					
Observation Angle	Entrance Angle				
	-4°	30°			
0.1°	300	135			
0.2°	210	95			
0.5°	75	35			

Table 1089-C Minimum Coefficient of Retroreflection R _A for TYPE IX Fluorescent Orange Sheeting (Candelas per lux per square meter)					
Observation Angle	Entrance Angle				
	-4°	30°			
0.1°	200	110			
0.2°	115	65			
0.5°	72	41			
1.0°	24	14			

2. Work Zones Signs (Barricade Mounted)

Use approved composite or roll-up signs for barricade mounted sign substrates. Approved composite barricade mounted warning signs (black on orange) must be Type VII, VIII or IX sheeting which meet the retroreflective requirements of Table 1089-A, 1089-B or 1089-C. Roll-up mounted barricade warning signs (black on orange) must meet the retroreflective requirements in Table 1089-D. Sign and barricade assembly must meet or exceed the requirements of NCHRP 350 for Work Zone Category II Devices.

3. Work Zones Signs (Portable)

Use approved composite or roll-up sign substrates on portable sign stands.

Composite - Use Type VII, VIII or IX (prismatic) fluorescent orange retroreflective sheeting that meets the following reflective requirements in Tables 1089-A, 1089-B or 1089-C. Signs and sign supports must meet or exceed NCHRP 350 requirements for Breakaway Devices.

Roll-up Signs - Use fluorescent orange retroreflective roll-up signs that meet the following reflective requirements:

Table 1089-D Minimum Coefficient of Retroreflection R _A for Fluorescent Orange Roll-Up Signs (Candelas per lux per square meter)						
Observation Angle	Entrance Angle					
	-4°	30°				
		Transco graphed Co.				
0.1°	300	120				
0.2°	200	80				
0.5°	90	34				

Use roll up signs that have a minimum 3/16" x 1 1/4" horizontal rib and 38" x 1 1/4" vertical rib and has been crash test to meet NCHRP 350 requirements and Traffic Control qualified by the Work Zone Traffic Control Unit.

Add the following after 1089-1(C):

(D) Warranty

Warranty requirements for rigid sign retroreflective sheeting Types VII, VIII and IX are described in Subarticle 1093-2(F). Such sheeting shall maintain 80% (Table 1093-10) of its retroreflectivity as shown in Tables 1089 A, B. and C.

Roll-up fluorescent orange retroreflective signs shall maintain 80% of its retroflectivity (Table 1089-D) for years 1-2 and 50% for year 3.

Rigid and Rollup Fluorescent orange signs shall maintain a Fluorescence Luminance Factor $(Y_F)^*$ of 13% for three (3) years.

*Fluorescence Testing Method is described in ASTM E2301 Test Methods for Fluorescent Retro reflective Sheeting.

Rigid and Roll up fluorescent orange signs shall maintain a total Luminance Factor (Y) of 25 for three (3) years and conform to the requirements of Table 1089-E when measured in accordance with ASTM D4956.

Table 1089-E Fluorescent Orange colorimetric requirements								
Color	1		2		3		4	
COIOI	X	у	X	у	X	у	X	Y
Fluorescent Orange	0.583			0.400			0.645	0.355

BARRICADES

Article 1089-3(A) General, delete both paragraphs and substitute the following:

Type III Barricades shall be constructed of perforated square steel tubing and/or angle iron. Provide Type III barricades that use a cross member or stabilization bar and meet the requirements of NCHRP 350 for Work Zone Category II Devices with composite and roll-up signs attached.

Use approved composite or plastic barricade rails that have a smooth face and have alternating orange and white retroreflective stripes that slope at an angle of 45 degrees.

Article 1089-3(C) Reflective Sheeting, delete the first paragraph only and substitute the following:

Use Type VII, VIII or IX (prismatic) retroreflective fluorescent orange sheeting on both sides of the barricade rails. The rail sheeting retroreflectivity values shall meet the retroreflectivity requirements in Table 1089-A, 1089-B or 1089-C and shall be listed on the Department's approved product list or accepted as traffic qualified by the Traffic Control Unit.

Durham, Granville, Person, Wake Counties

WORK ZONE SIGNS

01-18-05

Revise the Standard Specifications as follows:

DESCRIPTION

Page 11-5, Article 1110-1 Description

Replace the second paragraph with the following:

Furnish, install, maintain and relocate portable work zone signs and portable work zone sign stands in accordance with the plans and specifications. When portable work zone signs and portable work zone sign stands are not in use for periods longer than 30 minutes, collapse sign stand and reinstall once work begins.

Replace the last sentence in the third paragraph with the following:

Use work zone signs (portable) only with portable work zone sign stands specifically designed for one another. Work Zone Signs (portable) may be roll up or approved composite.

MATERIALS

Page 11-5, Article 1110-2 Part (A) General:

Add the following:

MATERIAL QUALIFICATIONS

Page 11-5, Article 1110-2 Part (B) Material Qualifications.

Delete the first sentence in the first paragraph and replace with the following:

Provide portable work zone sign stands, portable signs and sign sheeting which are listed on the North Carolina Department of Transportation's approved product list or accepted as traffic qualified by the Traffic Control Unit.

Delete "Traffic Control Section" in the second sentence of the first paragraph and insert "Traffic Control Unit".

CONSTRUCTION METHODS

Page 11-6, Article 1110-3 CONSTRUCTION METHODS.

Replace Article 1110-3 (B) Work Zone Signs (Barricade Mounted) with the following:

Mount approved composite or roll-up signs to barricade rails so that the signs do not cover more than 50 percent of the top two rails or 33 percent of the total area of the three rails. Signs are to be mounted a minimum of 1' from the ground to the bottom of the sign.

Replace Article 1110-3 (C, 2) Work Zone Signs (Portable) with the following:

Install portable work zone signs to carry roll-up or approved composite at a minimum height of 1' from the bottom of the sign to the ground on two lane-two way roadways.

Install portable work zone signs to carry roll-up or approved composite at a minimum height of 5' from the bottom of the sign to the ground on multi-lane roadways.

METHOD OF MEASUREMENT AND BASIS OF PAYMENT

Method of Measurement and Basis of Payment will be in accordance with Section 1110-5 and 1110-6 of the *Standard Specifications*.

SP11R15
