

Contract C201562

Wake County

UTILITY CONFLICTS (DEPARTMENT):

The Department will be responsible for the adjustment of any utility at the bridge site prior to the date of availability.

UTILITY CONFLICTS (CONTRACTOR):

The Contractor will be responsible for contacting Progress Energy for de-energizing the overhead power lines. The power lines can be de-energized for two (2) one continuous Monday through Friday five (5) day periods. The power lines shall not be de-energized after May 31, 2006. The Contractor shall contact Baxter Matheson with Progress Energy at 919-546-6709 one- (1) week before beginning pile driving and cored slab operations.

ASPHALT BINDER FOR ASPHALT CONCRETE:

There will be no separate measurement or payment for asphalt binder required for asphalt concrete. Payment for the various types of asphalt concrete will be full compensation for the asphalt binder required for each mix type.

Utility Construction

The work of this provision consists of replacing an existing sanitary sewer with a new sanitary sewer and providing a new water line for future use.

All work and materials shall conform to the plans, the City of Raleigh requirements for water and sewer, the NCDOT 2002 Standard Specifications, and the appropriate DENR regulations.

The existing sanitary sewer line shall be properly abandoned.

The sanitary sewer line will be measured and paid for as a lump sum item. Such costs shall include excavation, trenchless excavation, foundation conditioning, furnishing and installing all materials, testing, cleaning, bedding, backfilling, abandonment of existing facilities, and incidentals to complete the work.

The water line will be measured and paid for as a lump sum item. Such costs shall include excavation, trenchless excavation, foundation conditioning, furnishing and installing all materials, testing, cleaning, sterilizing, bedding, backfilling, and incidentals to complete the work.

Payment will be made under:

8" Sanitary Sewer
12" Water Line
