Addendum No. 1

RE: Contract ID: C202355

WBS# 45075.3.ST1

F.A. # STM-0012(36)

Hyde County (R-5149)

NC-12 From The Northern Ferry Dock to Ocracoke Village

July 21, 2009 Letting

To Whom It May Concern:

Reference is made to proposal and sketch maps recently furnished to you on this project.

The following revisions have been made to the sketch maps:

On Sheet Nos. 2 and 3 the note concerning borrow material has been deleted. Please void Sheet Nos. 2 and 3 and staple the revised Sheet Nos. 2 and 3 thereto.

On Sheet No. 5 the quantity for "Borrow" has been deleted. Please void Sheet No. 5 in your sketch maps and staple the revised Sheet No. 5 thereto.

The following revisions have been made to the proposal:

On Page No. 21 the project special provision entitled "Shoulder Reconstruction" has been revised. Please void Page No. 21 in your proposal and staple the revised Page No. 21 thereto.

On Page No. 1 of the item sheets, by copy of this addendum, line item "2-010600000-E-230 Borrow Excavation" has been deleted. The contractor's bid must not include this pay item. The contract will be prepared accordingly.

The Expedite File has been updated to reflect this revision. Please download the Expedite Addendum File and follow the instructions for applying the addendum. Bid Express will not accept your bid unless the addendum has been applied.

PROJECT SPECIAL PROVISIONS

ROADWAY

SHOULDER RECONSTRUCTION:

Description

The work covered by this provision consists of reconstructing earth shoulders in accordance with the *Roadway Standard Drawing Nos. 560.01 and 560.02*, from the edge of pavement to the existing shoulder point as directed by the Engineer. Perform this work immediately after the resurfacing operations are completed as directed by the Engineer.

Materials

On any map that contains widening, use all suitable material generated from the widening operation to construct the shoulder. If any additional material is needed, the Contractor shall provide the Department the location of the proposed Borrow Source at the Pre-Construction Conference. The Department will then confirm the compatibility between the proposed shoulder borrow and the existing shoulder material. All shoulder material shall be accepted by the Engineer prior to placement.

Construction Methods

Perform shoulder reconstruction in the following order: add the earth material to the shoulder; thoroughly incorporate the proposed shoulder borrow into the existing earth material in a uniform manner to a depth of 3 inches, by method of but not limited to: Roto-tiller, Disc Harrow, etc. and compact the reconstructed shoulder to the satisfaction of the Engineer.

The Contractor shall dispose of any excess material generated by the shoulder reconstruction in an approved disposal site.

Measurement and Payment

Shoulder Reconstruction will be measured and paid for as the actual number of shoulder miles that have been constructed. Measurement will be made along the edge of each shoulder. Measurement will be made to the nearest 0.01 of a mile. Such price and payment will be full compensation for furnishing earth material, hauling, placing, compaction, and all incidentals necessary to complete construction of the shoulders.

Incidental Stone Base will be measured and paid for as provided in Article 545-6 of the *Standard Specifications*.

Seeding and Mulching will be measured and paid for as provided elsewhere in this contract.

Payment will be made under:

Pay Item	Pay Unit
Shoulder Reconstruction	Shoulder Mile
