TEMPORARY TRAFFIC SIGNAL SYSTEM ALTERNATES:

Description:

The Contractor may use either a temporary portable traffic signal system, or a temporary stationary traffic signal system for traffic maintenance during construction of NC 194, when traffic is placed in a one-lane, two-way traffic pattern. The temporary portable traffic signal will require a system that is coordinated, to maintain safe and efficient traffic operations during project construction. Only temporary portable or stationary traffic signal systems will be allowed.

Payment:

Temporary Traffic signal System.....Day/Each
