Dear Bobby & Marshall:

The UST Section in the Washington Regional Office is recommending the above noted site be referred for State Lead Cleanup because a responsible party has not been identified. According to a letter submitted by you on June 16, 2013 the reported USTs located on parcels 52 and 53 were removed prior to your acquisition of the properties. State Lead staff will review the available information and determine if the site is eligible for acceptance into the program.

It is our understanding that the NCDOT has plans to submit a receptor survey which will satisfy the Notice of Regulatory Requirements issued May 6, 2013.

Please note that the UST Section will not impede property transfer/development. If you have questions regarding the information contained in this letter, please contact me at the address or telephone number listed below.

Sincerely,

Carrie Stone  
Environmental Senior Technician
