I want to keep the test hole information in the SP because it is a critical part of the provisions that the existing conduits are not disturbed. Putting the test hole sheets in the SP is the only way I know that we can testify that the contractors were provided with all the information we have on the location and depth of the conduits. If they hit something it won't be because we knew it was there and didn't tell them about it.

John

John,

See question below. Please verify that the attached is the correct UBO SP and that the test hole sheets can be removed.

Thanks,

Jonathan Hefner, PE

Thanks Jonathan. Unfortunately, Alan Maness did not date the DocuSign. Please have him re-do the document and date it.

I presume the UbO did not need updating and the May 2019 version is still applicable?

Finally, do the additional documents with the photographs of the AT&T test holes need to be included? We do not typically see documents like that with the UbO.

Let us know.
Thanks,
Steve

Steve,

Attached is a revised UC special provision and also the UBO special provision.

Greg,

The SP needs to be changed to from "City of Marion Public Works" to Town of Waynesville.

John,

Please contact Mr. Andrew Buchanan for any future correspondence on this project.

Josh, Greg

Attached is a UC SP I located in the Utilities folder in SharePoint under "Disciplines". Please confirm this is still applicable for this project.

In addition, the header information needs to be added. I include an example below. Also include the company information similar to the example below. I imagine Greg is familiar with this.

Thanks.
Steve
