

Memo

Date: Wednesday, April 24, 2019

Project: NC 73 from NC 16 to Northcross Drive (SR 2316)
WBS No. 50215.1.1
Lincoln and Mecklenburg Counties, NC
Divisions 10 and 12

To: Wilson Stroud
Project Manager
NCDOT Project Management Unit

From: Coleman Marchin, HDR Engineering, Inc. of the Carolinas

Subject: **GeoEnvironmental Phase I Report**
NC 73 Improvements from NC 16 to SR 2316

HDR has completed the attached GeoEnvironmental Phase I Report. Please contact the undersigned at (704) 338-6700 if you have questions concerning this project.

Sincerely,
HDR Engineering, Inc. of the Carolinas

Coleman Marchin, PG
Environmental Geologist

GeoEnvironmental Phase I Report

HDR Engineering, Inc. of the Carolinas (HDR) GeoEnvironmental staff conducted a Limited Environmental Review (LER) for State Transportation Improvement Program (STIP) R-5721A, R-5721B, and U-5765, which propose improvements to NC 73 from NC 16 to Northcross Drive (SR 2316). NC 73, a primarily two-lane arterial, is the primary east-west route into Huntersville, North Carolina. A map showing the Project Limits is shown in **Attachment 1**.

Note that this Phase I was conducted in accordance with the scope of work for NCDOT GeoEnvironmental Phase I's. As such, it is similar to an ASTM 1527-13 compliant Phase I, but does not qualify the user for "All Appropriate Inquiry" protections.

HAZARDOUS MATERIALS EVALUATION

Purpose

The main purpose of this investigation is to identify properties within the Project Limits that are or may be contaminated, and may therefore result in increased project costs and future liability if acquired by the North Carolina Department of Transportation (NCDOT). Hazardous material impacts may include, but are not limited to, active and abandoned underground storage tank (UST) sites, hazardous waste sites, regulated landfills and unregulated dumpsites.

Techniques/Methodologies

The LER of the Project Limits included a review of environmental databases and a field reconnaissance. Environmental Data Resources, Incorporated (EDR) was contracted by HDR to complete a database search of federal, state, local, and tribal environmental records to inform the field reconnaissance performed by HDR January 4, 2019. HDR provided EDR with a map of the Project Limits and requested a database search of up to 1-mile from the Project Limits. The database search was performed by EDR on December 18, 2018. A copy of the EDR report is included in **Attachment 2**.

Information obtained from the database search and field reconnaissance were used to assign a risk ranking to sites of potential concern. General criteria used by HDR GeoEnvironmental staff in assigning risk are summarized in **Table 1** below.

Table 1 – Risk Ranking Criteria

Risk Ranking	Criteria
Low	Low risk sites will have minimal impact to proposed site redevelopment. This designation generally applies to retail petroleum sites within the Project Limits, regardless of status of release(s).
Moderate	Moderate risk sites are those that may impact project redevelopment. This designation generally applies to dry cleaning sites within or hydrogeologically up-gradient of the Project Limits that are not listed in the NCDEQ Dry-Cleaning Solvent Cleanup Act (DSCA) Program and other sites impacted by constituents deemed by the Environmental Professional as more difficult to handle/remediate.
High	High risk sites are those with observation or documentation of an environmental condition that will likely impact the project, and will require further characterization (in the form of a Phase II or possibly a Contaminated Media Management Plan) or a design change (for impact avoidance). High risk sites may include active landfill sites, closed hazardous waste landfill sites, federal brownfields sites, DSCA Program sites, and Superfund sites. These sites pose "high risk" to a project if they are located within a short distance from the Project Limits, within the Project Limits, or have a documented history of groundwater or soil contamination that is upgradient from the Project Limits.

Findings

Nineteen (19) sites of potential environmental concern were identified within the Project Limits during this hazardous materials evaluation. These sites are summarized in **Table 2** below and discussed in more detail on the following pages.

Table 2 – Sites of Potential Environmental Concern

Site No.	Site Address	EDR Report ID	NCDEQ Program ID and Status (if applicable)	Site Reconnaissance Usage	Potential Concern	Distance from Project Limits (mi.)	Risk	Database Records / Additional Information
1	7120 Highway 73 Denver, NC 28037	Murphy Express Murphy Oil USA Inc. Murphy Express 8527	NA	Retail petroleum station	Active USTs on site	PL	Low	EDR Hist Auto, UST, Financial Assurance
2	7259 Highway 73 Denver, NC 28037	Quicktrip 1017	NA	Retail petroleum station	Active USTs on site	PL	Low	UST, Financial Assurance
3	124 Highway 16 South Denver, NC 28037	Dry Cleaners Unlimited*	NA	Shopping center with no dry cleaner	Potential groundwater impacts near intersection of Hwy 16 and Hwy 73	0.02	Moderate	NA
4	7405 Highway 73 Denver, NC 28037	Circle K 2723946 Petro Express #29	NA	Retail petroleum station	Active USTs on site	PL	Low	UST, Financial Assurance, FINDS
5	7410 Highway 73 Denver, NC 28037	Prestige Shop & Save BP Amaco	NA	Retail petroleum station	Active USTs on site	PL	Low	UST, Financial Assurance, EDR Hist Auto
6	149 Cross Center Road Denver, NC 28037	Harris Teeter Fuel 121	NA	Retail petroleum station	Active USTs on site	0.02	Low	UST, Financial Assurance
7	173 Cross Center Drive Denver, NC 28037	Birkdale Cleaners	DSCA Facility ID #550002C	Active dry cleaning facility	Full service dry cleaning facility	0.15	Moderate	DRYCLEANERS
8	7558 Highway 73 #101 Denver, NC 28037	US \$2.50 Cleaners US 250 Cleaners	NCDEQ IHSB # NONCD0002924 DSCA # 550005C; Active	Multi-unit shopping center with operating dry cleaning facility	Dry cleaning facility with PCE contamination	PL	High	SHWS, DRYCLEANERS
9	117 Pilot Knob Road Denver, NC 28037	Dupree and Wilson Property	UST #27772; Closed out in 2009	Multi-unit shopping center	Historic residential UST release to soil and groundwater	PL	Low	LUST, IMD
10	7654 Highway 73 Denver, NC 28037	E. Lincoln Fire Station-Former East Lincoln Fire Station Property	UST #40323; Active	Tire and auto repair facility	Historic UST release to groundwater above GCLs	PL	Low	LUST, LUST TRUST, UIC
11	7822 Highway 73 Stanley, NC 28164	Beach's General Store	NA	Retail petroleum facility	Active USTs on site	PL	Low	UST
12	7832 Highway 73 Stanley, NC 28164	Southlake Cleaners Southlake Dry Cleaners	DSCA Facility ID #550001C	Multi-unit shopping center with former dry cleaner	Full service dry cleaning facility with potential PCE contamination	PL	Moderate	DRYCLEANERS, EDR Hist Cleaner
13	13520 Highway 73 Huntersville, NC 28078	McGuire Garage	NA	Duke Energy facility	Active USTs on site	0.06	Low	UST
14	14910 Beatties Ford Rd. Huntersville, NC 28078	Phillips 73 General Store Times #50 BP Southlake General Store	UST #9018; status unknown AST #91425; Closed out in 2017	Gasoline filling station and retail store	Active USTs on site, Historic UST release	PL	Low	UST, Financial Assurance, EDR Hist Auto, LAST, FINDS, IMD, RGA LUST
15	7725 Regency Park Dr. Huntersville, NC 28078	Dry Cleaners at Regency	NA	Multi-unit shopping center with operating dry cleaning facility	Dry cleaning facility	PL	Moderate	EDR Hist Cleaner

16	16600 Highway 73 Huntersville, NC 28078	Cashion's Quik Stop No. 5 Freeman's Grocery	UST #27870; Closed out in 1990	Gasoline filling station and retail store	Active USTs on site, Historic UST release to groundwater in 1989	PL	Low	UST, LUST, IMD
17	16639 Birkdale Commons Parkway, Suite 110 Huntersville, NC 28078	Premier Cleaners Birkdale Cleaners Inc.	DSCA Facility ID #3683	Multi-unit shopping center with operating full-service dry cleaning facility	Dry cleaning facility	PL	Moderate	DRYCLEANERS, EDR Hist Cleaner
18	9121 Sam Furr Rd., Suite 106 Huntersville, NC 28078	Northcross Dry Cleaners	DSCA Facility ID #600049C	Multi-unit shopping center with operating dry cleaning facility	Full service dry cleaning facility	PL	Moderate	DRYCLEANERS, EDR Hist Cleaner
19	9101 Sam Furr Road Huntersville, NC 28078	BP 02313 (Circle K 5102) Circle K 2705102 Circle K Corporation	UST #27697; Closed out in 2013	Gasoline filling station and retail store	On-site USTs; historic petroleum release resulting in NRP	PL	Low	IMD , LUST, UST, Financial Assurance, EDR Hist Auto

*The Drycleaners Unlimited site was not listed in the EDR Report, but was identified on the NCDEQ Division of Waste Management Site Locator Tool as a "Possible Dry-Cleaning Contamination" site.

UST/AST Facilities

Based on the HDR study, 12 sites were identified as having former or current USTs and/or as historical auto facilities within the Project Limits. A total of six NCDEQ UST Incidents have been reported at these sites (some sites with multiple incidents) within the Project Limits; four incidents are listed as closed, one is listed as active, and one for which the regulatory status is unknown. Additional information for each of these sites is provided in the "Known and Potential Hazardous Material Sites" section of this report. Each of these 12 sites are considered to pose **Low Risk** to the project.

According to the EDR report, four additional UST/AST sites were identified within the EDR search boundary (1-mile offset from the Project Limits); these sites are listed in the UST, LUST, LUST TRUST, LAST, IMD, and Financial Assurance databases. Three of these sites are located between ¼- to ¾-mile east/northeast of the Project Limits, while one site was a surficial spill from a tanker truck on I-77; thus, none are expected to pose an environmental risk to the project.

Hazardous Waste Sites / Brownfields

Based on the HDR study, one Hazardous Waste Site was identified within the Project Limits. The US \$2.50 Cleaners site is listed in both the SHWS and DRYCLEANERS databases of the EDR Report. Details of the US \$2.50 Cleaners site are provided in "Dry Cleaners" section of this report.

Landfills

There were no current or former landfill sites identified in the EDR report or during the site reconnaissance.

Dry Cleaners

Based on the HDR study, seven dry cleaner sites may operate or may have operated within the Project Limits. One of the sites, US \$2.50 Cleaners, was identified in the North Carolina Dry-Cleaning Solvent Act (NC DSCA) Program and Inactive Hazardous Sites Branch (IHSB) databases. Per documents reviewed on the NCDEQ Laserfiche WebLink, the responsible party of the US \$2.50 Cleaners site failed to apply for coverage under the DSCA Program and was thus referred to the IHSB in 2013. Additional regulatory status or site assessment details were not readily available online. Given their inclusion in the IHSB Program, this sites is considered to pose **High Risk** to the project.

Of the six remaining dry cleaners observed within the Project Limits, four have DSCA Facility IDs. Three of the six are identified on the NCDEQ Division of Waste Management Site Locator Tool as “Possible Dry-Cleaning Contamination” sites. For these reasons, each of the six sites are considered to pose a **Moderate Risk** to the project.

Other GeoEnvironmental Concerns

Ten additional sites were identified within the project limits per the EDR database report. The sites were identified in the Enforcement and Compliance History Information (ECHO), Resource Conservation and Recovery Act – Conditionally Exempt Small Quantity Generator (RCRA-CESQG), RCRA-Large Quantity Generator (RCRA-LQG), Incident Management Database (IMD), Facility Index System (FINDS), Financial Assurance Information Listing, National Pollutant Discharge Elimination System (NPDES); however, based on file review, regulatory status, distance and direction from the Project Limits, and site reconnaissance, the 10 additional sites are not considered to be a risk to the project.

Anticipated Impacts

In conclusion, there was one site identified (US \$2.50 Cleaners) that may pose a **High Risk** to the Project Limits. Six additional sites (all dry cleaner sites not in active DSCA assessment) were determined to pose a **Moderate Risk** to the Project Limits. Twelve other sites (all petroleum-related) were identified as **Low Risk** to the project based on factors such as distance and direction from the Project Limits or regulatory status. Further details of these sites are provided below.

See the table above, details below and the attached plan sheet.

Known and Potential Hazardous Material Sites

- | | | |
|----------------------------|-------------------------------------|------------------------------------|
| Site: | Murphy Express 8527 | Property Owner: |
| Address: | 7120 Highway 73
Denver, NC 28037 | Murphy Oil USA Inc.
PO Box 7300 |
| Lincoln County PIN: | 4602249664 | El Dorado, AR 71730-7300 |

The Murphy Express 8527 site is located at 7120 Highway 73 and is adjacent to the Project Limits. The site is listed in the EDR Hist Auto, UST, and Financial Assurance databases of the EDR Report. The site contains an active retail petroleum station and convenience store with 3 active USTs (one 20,000-gallon gasoline, one 12,000-gallon diesel, and one 8,000-gallon gasoline). There are no active or historic petroleum releases associated with the site, according to the EDR Report and North Carolina Department of Waste Management Site Locator Tool.

This site is anticipated to present Low GeoEnvironmental impacts to the project.

2. **Site:** Quicktrip 1027 **Property Owner:**
 Address: 7259 Highway 73 Cunningham Properties LLC
 Denver, NC 28037 Attn: Quicktrip
 Lincoln County PIN: 4602441402 PO Box 3475
 Tulsa, OK 74101

The Quicktrip 1027 site is located at 7259 Highway 73 and is adjacent to the Project Limits. The site is listed in the UST and Financial Assurance databases of the EDR Report. The site contains an active retail petroleum station and convenience store with 4 active USTs (two 20,000-gallon gasoline, one 12,000-gallon gasoline, and one 12,000-gallon diesel). There are no active or historic petroleum releases associated with the site, according to the EDR Report and North Carolina Department of Waste Management Site Locator Tool.

This site is anticipated to present Low GeoEnvironmental impacts to the project.

3. **Site:** Dry Cleaners Unlimited **Property Owner:**
 Address: 124 Highway 16 South North State Triangle LLC
 Denver, NC 28037 16930 W Catawba Ave., Suite 205
 Lincoln County PIN: 4602436372 Cornelius, NC 28031

The Dry Cleaners Unlimited site was reportedly located at 124 Highway 16 South, adjacent to the Project Limits. The site was identified in the NCDEQ Division of Waste Management Site Locator Tool as a "Possible Dry-Cleaning Contamination" site; however, the site is not listed in online NCDEQ DSCA Site and Facility Inventory lists and was not observed during the field reconnaissance. No additional information was readily available online. Based on the lack of available information and inferred hydraulically up-gradient location relative to the Project Limits, there may be potential for contact with contaminated soil or groundwater during construction.

This site is anticipated to present Moderate GeoEnvironmental impacts to the project.

4. **Site:** Circle K 2723946
Address: 7405 Highway 73
Denver, NC 28037
Lincoln County PIN: 4602535219

Property Owner:
National Retail Properties LP
450 S Orange Ave., Suite 900
Orlando, FL 32801

The Circle K 2723946 site is located at 7405 Highway 73 and is adjacent to the Project Limits. The site is listed in the UST, Financial Assurance, and FINDS databases of the EDR Report. The site contains an active retail petroleum station and convenience store with 5 active USTs (one 20,000-gallon gasoline, one 12,000-gallon gasoline, one 4,000-gallon diesel, one 4,000 gallon gasoline/aviation, and one 4,000 gallon kerosene). There are no active or historic petroleum releases associated with the site, according to the EDR Report and North Carolina Department of Waste Management Site Locator Tool.

This site is anticipated to present Low GeoEnvironmental impacts to the project.

5. **Site:** Prestige Shop and Save **Property Owner:**
Address: 7410 Highway 73 I A Enterprises of NC LLC
Denver, NC 28037 17129 Harcombe Dr.
Lincoln County PIN: 4602533025 Charlotte, NC 28277

The Prestige Shop and Save site is located at 7410 Highway 73 and is adjacent to the Project Limits. The site is listed in the UST, Financial Assurance, and EDR Hist Auto databases of the EDR Report. The site contains an active retail petroleum station and convenience store with 3 active USTs (one 12,000-gallon gasoline, one 8,000-gallon gasoline, and one 6,000 gallon diesel). There are no active or historic petroleum releases associated with the site, according to the EDR Report and North Carolina Department of Waste Management Site Locator Tool.

This site is anticipated to present Low GeoEnvironmental impacts to the project.

6. **Site:** Harris Teeter Fuel 121
Address: 7426 Highway 73
Denver, NC 28037
Lincoln County PIN: 4602527703

Property Owner:
HT Fuel NC LLC
c/o Harris Teeter Prop LLC
Attn: Real Estate Department
701 Crestdale Road
Matthews, NC 28105

The Harris Teeter Fuel 121 site is located at 7426 Highway 73 and is adjacent to the Project Limits. The site is listed in the UST and Financial Assurance databases of the EDR Report. The site contains an active retail petroleum station and convenience store with 3 active USTs (one 20,000-gallon gasoline, one 10,000-gallon diesel, and one 8,000 gallon gasoline). There are no active or historic petroleum releases associated with the site, according to the EDR Report and North Carolina Department of Waste Management Site Locator Tool.

This site is anticipated to present Low GeoEnvironmental impacts to the project.

7. **Site:** Birkdale Cleaners
Address: 173 Cross Center Road
Drive Denver, NC
Lincoln County PIN: 4602526405

Property Owner:
The Shoppes at Waterside
Crossing LLC
c/o New South Properties
1518 3rd Street, Suite 200
Charlotte, NC 28204

The Birkdale Cleaners site is located at 173 Cross Center Road and is adjacent to the Project Limits. The site is listed in the DRYCLEANERS database of the EDR Report and is identified by DSCA Facility ID #550002C. The site contains an active full-service dry cleaning facility known to use Tetrachloroethylene (PCE). There are no active or historic releases associated with the site, according to the EDR Report and North Carolina Department of Waste Management Site Locator Tool.

This site is anticipated to present Moderate GeoEnvironmental impacts to the project.

8. **Site:** US \$2.50 Cleaners
Address: 7558 Highway 73
Denver, NC 28037
Lincoln County PIN: 4602625341

Property Owner:
Pilot Knob Partners LLC
2326 Highway 16 North
Denver, NC 28037

The US \$2.50 Cleaners site is located at 7558 Highway 73 and is adjacent to the Project Limits. The site is listed in the SHWS and DRYCLEANERS databases of the EDR Report. It is also identified by the NCDEQ under IHSB #NONCD0002924 and DSCA #550005C. Tetrachloroethene (PCE) was detected in soil samples collected during a Phase II ESA in 2008. Groundwater was not sampled during the ESA, but was encountered approximately 9 feet below ground surface during advancement of soil borings. The facility reportedly operated a closed-loop dry cleaning machine that used PCE from 2006 to 2009. Few documents were available online via the NCDEQ Laserfiche WebLink, thus, the current regulatory status and potential impact to groundwater are unknown. Based on these factors, there is potential for contact with impacted soil or groundwater during construction.

This site is anticipated to present High GeoEnvironmental impacts to the project.

9. **Site:** Dupree and Wilson Property **Property Owner:**
Address: 117 Pilot Knob Road Hwy 73 Capital Group LLC
Denver, NC 28037 2326 Highway 16 North
Lincoln County PIN: 4602721369 Denver, NC 28037

The Dupree and Wilson Property site was formerly located at 117 Pilot Knob Road and was adjacent to the Project Limits. The site was been redeveloped as a multi-unit shopping center between 2005 and 2008. The site is listed in the LUST and IMD databases of the EDR Report. It is also identified by the NCDEQ under UST #27772 for a non-commercial UST release that was discovered in 2004 during completion of an environmental site assessment prior to redevelopment. Reportedly, the UST was last used in 1974. No additional information was available online via the NCDEQ Laserfiche WebLink; however, the incident number was closed in 2009. Site conditions circa 2004 are shown for reference in the aerial photograph above.

This site is anticipated to present Low GeoEnvironmental impacts to the project.

10. **Site:** Former East Lincoln Fire Station
Address: 7654 Highway 73
Denver, NC 28037
Lincoln County PIN: 4602714986

Property Owner:
Timothy Lee and Mary Wesley
Norman
8059 St. Andrews Lane
Stanley, NC 28164

The Former East Lincoln Fire Station site is located at 7654 Highway 73 and is adjacent to the Project Limits. The site was previously occupied by general merchandise and petroleum store from the 1930s until 1969 and Duckworth Wrecker Service from 1969 until 2004. The retail sale of gasoline was associated with the property until 1984 when two 500-gallon USTs were removed from the site in early 1985. Impacts associated with the former USTs were discovered during a Phase II ESA in 2014, at which time, the NCDEQ assigned UST Incident #40323. Benzene concentrations that exceeded the Gross Contaminant Level (GCL) were reported in groundwater samples collected from on-site monitoring wells in February 2018. Based on work completed by others, it appears that the GCL plume extends beneath the southern extent of Highway 73, as shown in the figure above. Based on this information, there is potential that benzene-impacted groundwater may be encountered during construction.

This site is anticipated to present Low GeoEnvironmental impacts to the project.

11. **Site:** Beach's General Store

Property Owner:

Address: 7822 Highway 73
Stanley, NC 28164
Lincoln County PIN: 4602911558

Barbara Ann Phillips
7918 Pine Cove Lane
Denver, NC 28037

The Beach's General Store site is located at 7822 Highway 73 and is adjacent to the Project Limits. The site is listed in the UST database of the EDR Report. The site contains an active retail petroleum station and convenience store with 5 USTs (one 10,000-gallon gasoline, one 8,000-gallon gasoline, one 4,000-gallon gasoline, one 4,000 gallon diesel, and one 2,000 gallon kerosene). There are no active or historic petroleum releases associated with the site, according to the EDR Report and North Carolina Department of Waste Management Site Locator Tool.

This site is anticipated to present Low GeoEnvironmental impacts to the project.

12. **Site:** Southlake Dry Cleaners **Property Owner:**
Address: 7832 Highway 73 George P. and Anna D. Mantis
Stanley, NC 28164 1315 Heather Lane
Lincoln County PIN: 4602527703 Charlotte, NC 28209

The Southlake Dry Cleaners site was formerly located at 7832 Highway 73 and is adjacent to the Project Limits. The site is listed in the DRYCLEANERS and EDR Hist Cleaner databases of the EDR Report. Additionally, the site is identified as a "Possible Dry-Cleaning Contamination" site on the NCDEQ Division of Waste Management Site Locator Tool and has been assigned a DSCA Facility ID (550001C). The facility reportedly operated as a full-service dry cleaner and used PCE on-site. No additional information was readily available via the NCDEQ Laserfiche WebLink. Given the uncertain regulatory status of the site, there is potential for contact with chlorinated solvents during construction.

This site is anticipated to present Moderate GeoEnvironmental impacts to the project.

13. **Site:** McGuire Garage
Address: 13520 Highway 73
Huntersville, NC 28078
Mecklenburg County PIN:

Property Owner:
Duke Power Company
Attn: Tax Dept. PB05B
422 S. Church St.
Charlotte, NC 28242

The McGuire Garage site is located at 13520 Highway 73 and is adjacent to the Project Limits. The site is listed in the UST database of the EDR Report. Site access was restricted at the time of the field reconnaissance, but review of aerial photographs indicates that it may be used by Duke Energy as a vehicle and boat storage facility. There are no active or historic petroleum releases associated with the site, according to the EDR Report and North Carolina Department of Waste Management Site Locator Tool.

This site is anticipated to present Low GeoEnvironmental impacts to the project.

14. **Site:** Phillips 73 General Store
Address: 14910 Beatties Ford Road
Huntersville, NC
Mecklenburg County PIN: 00902102
- Property Owner:**
MDHB Properties
PO Box 795
Lincolnton, NC 28093

The Phillips 73 General Store (Phillips) site is located at 14910 Highway 73 and is directly adjacent to the Project Limits. The Phillips site is currently a BP filling station and retail store. The Phillips site is listed in the LUST, LAST, UST, Financial Assurance, FINDS, IMD, EDR Hist Auto and RGA LUST databases. Soil contamination was discovered during the removal of two USTs in May 1992 (NCDEQ UST Incident No. 9018). A leak was reported from an AST in October 2016 (AST Incident No. 91425); however, details of the incident were not available via the NCDEQ Laserfiche WebLink. Based on the historic UST release from a tank pit located proximal to Highway 73 and the unclear regulatory status of the AST release, it is possible that petroleum-impacted soil or groundwater are encountered during construction.

This site is anticipated to present Low GeoEnvironmental impacts to the project.

15. **Site:** Dry Cleaners at Regency Park
Address: 7725 Regency Park Drive
Huntersville, NC
Mecklenburg County PIN: 00916201
- Property Owner:**
Echo Regency
560 Epsilon Drive
Pittsburgh, PA 15238

The Dry Cleaners at Regency Park site is located at 7725 Regency Park Drive and is adjacent to the Project Limits. The site operates as an active drop off dry cleaning facility in a multi-unit strip mall. The site is listed in the EDR Hist Cleaner database of the EDR Report. During site reconnaissance, no evidence of on-site dry cleaning/processing was observed, but the existence of potentially harmful dry cleaning chemicals could not be ruled out. The site does not appear to have a DSCA Facility ID number, per online research.

This site is anticipated to present Moderate GeoEnvironmental impacts to the project.

16. **Site:** Cashion's Quik Stop No. 5
Address: 16600 Highway 73
Huntersville, NC 28078
Mecklenburg County PIN: 00921153
- Property Owner:**
Cashion Properties LLC
PO Box 520
Cornelius, NC 28031

The Cashion's Quik Stop No. 5 (Cashion's) site is located at 16600 Highway 73 and is directly adjacent to the Project Limits. The Cashion's site is currently a BP filling station and retail store. The site is listed in the UST, LUST, and IMD databases of the EDR Report. Per the NCDEQ UST database, groundwater contamination was reported in 1989 (NCDEQ UST Incident No. 27870) while the facility operated as Freeman's Grocery. It appears that the incident was closed out in 1990, although monitoring wells were observed on-site during the field reconnaissance. Additional details of the incident were not available via the NCDEQ Laserfiche WebLink. Based on the historic UST release and unclear regulatory status, it is possible that petroleum-impacted soil or groundwater are encountered during construction.

This site is anticipated to present Low GeoEnvironmental impacts to the project.

17. **Site:** Premier Cleaners **Property Owner:**
Address: 16639 Birkdale Commons Parkway, Suite 110 Fairway Birkdale II LLC
Huntersville, NC 28078 Suite 210
Mecklenburg County PIN: 00917186 Birmingham, AL 35209

The Premier Cleaners site is located at 16639 Birkdale Commons Parkway and is adjacent to the Project Limits. The site is listed in the DRYCLEANERS and EDR Hist Cleaner databases of the EDR Report. Additionally, the site is identified by NCDEQ DSCA Facility ID (3683). The facility reportedly operates as a full-service dry cleaner and uses a “no-regulated solvent” on-site. There are no indications that a release has occurred at the site; however, given the uncertain regulatory status of the site, there may be potential for contact with chlorinated solvents during construction.

This site is anticipated to present Moderate GeoEnvironmental impacts to the project.

18. **Site:** Northcross Dry Cleaners **Property Owner:**
Address: 9121 Sam Furr Rd., Suite 106 IVT Northcross Center Huntersville LLC
Huntersville, NC 28078 c/o Inven Trust Properties Corp.
Mecklenburg County PIN: 00505208 2809 Butterfield Rd., Ste. 200
Oak Brook, IL 60523

The Northcross Cleaners site was formerly located at 9121 Sam Furr Road, Suite 106 and is adjacent to the Project Limits. The site is listed in the DRYCLEANERS and EDR Hist Cleaner databases of the EDR Report. Additionally, the site is identified by NCDEQ DSCA Facility ID #600049C and is identified as a “Possible Dry-Cleaning Contamination” site on the NCDEQ Division of Waste Management Site Locator Tool. The facility is no longer in operation, as a Viva Chicken restaurant now occupies Suite 106. No additional information was readily available via the NCDEQ Laserfiche WebLink. Given the uncertain regulatory status of the site, there is potential for contact with chlorinated solvents during construction.

This site is anticipated to present Moderate GeoEnvironmental impacts to the project.

19. **Site:** BP 02313 (Circle K 5102)
Address: 9101 Sam Furr Road
Huntersville, NC 28078
Mecklenburg County PIN: 00505205

Property Owner:
COLE CK PORTFOLIO IV LLC
c/o Circle K Stores
PO Box 52805
Phoenix, AZ 85072

The BP 02313 (Circle K 5102) site is located at 9101 Sam Furr Road and is directly adjacent to the Project Limits. The Circle K site is currently a Shell filling station and retail store. The site is listed in the IMD, LUST, UST, Financial Assurance, EDR Hist Auto databases of the EDR Report. Soil and groundwater contamination were reported in 2004 (NCDEQ UST Incident No. 27697) during a due diligence investigation. The incident was closed in 2013 via a Notice of Residual Petroleum (NRP). Based on the historic UST release and existing NRP, it is possible that petroleum-impacted soil or groundwater are encountered during construction.

This site is anticipated to present Low GeoEnvironmental impacts to the project.

Orphan Facilities

Facilities not plotted by EDR due to poor or inadequate address information are referred to as orphan facilities. A total of 101 orphan facilities were listed in the EDR database report. The orphan summary was reviewed by HDR to assess their potential to pose a risk to the Project Limits. Based on our review of the listings and information obtained during site reconnaissance, the following site was identified as being within the ½-mile Project Corridor search distance:

- The McGuire Nuclear Station (13225 McGuire Nuclear Station Road, Huntersville, NC) was identified in the UST, ICIS, FINDS, SPILLS, MANIFEST, Emergency Response Notification System (ERNS), IMD, and EPA WATCHLIST databases. According to the EDR report, three underground storage tanks were removed in May 1990; however, no soil or groundwater contamination was documented. Several small oil spills were documented at the nuclear station, but are not considered to pose a risk to the Project Limits.

Closing

Please note that discovery of additional sites not recorded by regulatory agencies and not reasonably discernible during the project corridor reconnaissance may occur. The GeoEnvironmental Section should be notified immediately after discovery of such sites so their potential impact(s) may be assessed.

Please do not hesitate to contact the undersigned at 704-338-6700 if you have questions or comments regarding this GeoEnvironmental Phase I Report.

Sincerely,

HDR Engineering, Inc. of the Carolinas

Coleman S. Marchin, PG
Environmental Geologist

Mark P. Filardi, PG
Senior Geologist

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D003
. Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

ESTER (OR) THIOPHANATE-METHYL

. Waste code: U411
. Waste name: PHENOL, 2-(1-METHYLETHOXY)-, METHYLCARBAMATE (OR) PROPOXUR

Date form received by agency: 12/30/2009

Site name: WALMART SUPERCENTER #4274

Classification: Small Quantity Generator

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D003
. Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BE WASTE GUNPOWDER.

Environmental Interest/Information System

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and

it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Comments: ATC ESA sampling revealed groundwater contamination as high as 1,400 ppb in benzene. Site check indicated no failures and minimal soil contamination. LSA required. LSA indicates intermediate risk - groundwater > 10 X 2B (benzene at 5000 ppb) and soil > soil-to-groundwater. SL 2004-124 letter distributed. (old coor 35.442873 80.873565)

2004 5 ft of overexcavation on each sidewall. No risk based samples taken. AWARE Environmental hired as new consultant. During a phone conversation with the consultant, it was explained that the options are to resample using risk-based methods and overexcavate if necessary or going directly to the LSA. The tank was reported to have been last used in 1974. The current owners reportedly were not aware that the tank was on their property. Consultant will send in the ESA along with the LSA. ACCEPTED TO STF ON 11/4/08

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 11/14/2018	Source: EPA
Date Data Arrived at EDR: 11/27/2018	Telephone: N/A
Date Made Active in Reports: 12/07/2018	Last EDR Contact: 11/27/2018
Number of Days to Update: 10	Next Scheduled EDR Contact: 01/14/2019
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA

Number of Days to Update: 56	Next Scheduled EDR Contact: 11/28/2011
	Data Release Frequency: No Update Planned

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 11/14/2018	Source: EPA
Date Data Arrived at EDR: 11/27/2018	Telephone: N/A
Date Made Active in Reports: 12/07/2018	Last EDR Contact: 11/27/2018
Number of Days to Update: 10	Next Scheduled EDR Contact: 01/14/2019
	Data Release Frequency: Quarterly

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/05/2017	Telephone: 703-603-8704
Date Made Active in Reports: 04/07/2017	Last EDR Contact: 07/06/2018
Number of Days to Update: 92	Next Scheduled EDR Contact: 10/15/2018
	Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 11/14/2018	Source: EPA
Date Data Arrived at EDR: 11/27/2018	Telephone: 800-424-9346
Date Made Active in Reports: 12/07/2018	Last EDR Contact: 11/27/2018
Number of Days to Update: 10	Next Scheduled EDR Contact: 01/28/2019
	Data Release Frequency: Quarterly

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 11/14/2018	Source: EPA
Date Data Arrived at EDR: 11/28/2018	Telephone: 800-424-9346

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/01/2018	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/28/2018	Telephone: (404) 562-8651
Date Made Active in Reports: 06/22/2018	Last EDR Contact: 12/03/2018

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/01/2018	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/28/2018	Telephone: (404) 562-8651
Date Made Active in Reports: 06/22/2018	Last EDR Contact: 12/03/2018
Number of Days to Update: 86	Next Scheduled EDR Contact: 01/07/2019

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/01/2018	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/28/2018	Telephone: (404) 562-8651

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/01/2018	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/28/2018	Telephone: (404) 562-8651
Date Made Active in Reports: 06/22/2018	Last EDR Contact: 12/03/2018

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 07/31/2018	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/28/2018	Telephone: 703-603-0695
Date Made Active in Reports: 09/14/2018	Last EDR Contact: 11/28/2018
Number of Days to Update: 17	Next Scheduled EDR Contact: 03/11/2019
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 07/31/2018	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/28/2018	Telephone: 703-603-0695

	Data Release Frequency: Biennially

State- and tribal - equivalent CERCLIS

NC SHWS: Inactive Hazardous Sites Inventory

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 07/19/2018	Source: Department of Environment, Health and Natural Resources

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
