

STATE OF NORTH CAROLINA  
DEPARTMENT OF TRANSPORTATION

ROY COOPER  
GOVERNOR

J. ERIC BOYETTE  
SECRETARY

DATE: February 21, 2022

TO: Andy Williams, Regulatory Specialist  
U.S. Army Corps of Engineers

FROM: Terry E. Farr, PE, Senior Project Manager  
NCDOT Project Management Unit

SUBJECT: NCDOT STIP Project No. U-5307, Sections A through D  
Improvements to US 1 (Capital Boulevard) to a controlled-access facility  
from Interstate 540 (I-540) to SR 1909 (Purnell Road) / SR 1931 (Harris  
Road)  
Wake County, North Carolina  
FA Project No. NHS-0001 (138)

Dear Mr. Williams,

The National Environmental Policy Act (NEPA)/ Section 404 Merger Application has been prepared for NCDOT STIP Project No. U-5307, Sections A through D, Improvements to US 1 (Capital Boulevard) to a controlled-access facility from Interstate 540 (I-540) to SR 1909 (Purnell Road) / SR 1931 (Harris Road), Wake County, North Carolina. The purpose of the application is to initiate the Corps and prompt the issuance of a Public Notice to aid in selection of the Least Environmentally Damaging and Practicable Alternative (LEDPA). In support of the application, a draft Public Notice and mapping for the project corridor have been completed for your consideration.

The Merger Application package and associated materials can be downloaded from either the NCDOT SharePoint project site at:

<https://connect.ncdot.gov/site/Preconstruction/division/div05/U-5307/Project%20Development%20Collaboration/U-5307%20CP3%20Merger%20Application?Web=1>

or the NCDOT Xfer site at: <https://xfer.services.ncdot.gov/pdea/MergerMeetings/U-5307/>.

Please contact me by phone at (919) 707-6017 or by email at [tefarr@ncdot.gov](mailto:tefarr@ncdot.gov) if you have any questions regarding this merger application and supporting documentation. You may also contact Charles R. Cox, PE, CPM. at either (919) 926-4100 or [charles.cox@rsandh.com](mailto:charles.cox@rsandh.com).

Regards,

*Terry Farr, PE*

Terry E. Farr, PE, Senior Project Manager

NCDOT Structures Management Unit

**17. DIRECTIONS TO THE SITE**

From USACE Wake Forest Regional Office: Take Rogers Rd to Ligon Mill Rd, turn right. Take Ligon Mill Rd to Caveness Farms Ave, turn left. Take Caveness Farms Ave to US 1, turn right. Take US 1 North approx. 3.6 mi to intersection of Purnell Rd/Harris Rd and US 1; this is the northern terminus of the project.

**18. Nature of Activity (Description of project, include all features)**

The North Carolina Department of Transportation (NCDOT) proposes to improve US 1 (Capital Blvd) to a controlled-access facility from I-540 to SR 1909 (Purnell Rd) / SR 1931 (Harris Rd) in Wake County. This project is included in NCDOT's current State Transportation Improvement Program (STIP) as Project U-5307 (Sections A through D). The Section breakdown is as follows:

- 1) U-5307A: I-540 to North of SR 2006 (Durant Rd.)
- 2) U-5307B: North of SR 2006 (Durant Rd.) to North of SR 2045 (Burlington Mills Rd.)
- 3) U-5307C: North of SR 2045 (Burlington Mills Rd.) to South of NC 98 Business
- 4) U-5307D: South of NC 98 Business to SR 1909/ SR 1931

Service roads will be provided for connectivity.

**19. Project Purpose (Describe the reason or purpose of the project, see instructions)**

The Purpose for Proposed Action is to improve traffic congestion and travel times and maintain regional mobility and local connectivity.

**USE BLOCKS 20-23 IF DREDGED AND/OR FILL MATERIAL IS TO BE DISCHARGED****20. Reason(s) for Discharge**

This project will result in the placement of fill within potentially jurisdictional waters. Road fill and infrastructure will result from road widening, intersection improvements, service roads, and hydraulic structures replacement/installation. Proposed stream and wetland impacts, based on the proposed slope stakes plus 40 feet (plus variable widths at some locations) are outlined in the Public Notice.

**21. Type(s) of Material Being Discharged and the Amount of Each Type in Cubic Yards:**

Type Amount in Cubic Yards	Type Amount in Cubic Yards	Type Amount in Cubic Yards
-------------------------------	-------------------------------	-------------------------------

To Be Determined During Final Design

**22. Surface Area in Acres of Wetlands or Other Waters Filled (see instructions)**

Acres Depends on Alternative and Section. Please see the Public Notice For details.

or

Linear Feet Depends on Alternative and Section. Please see the Public Notice For details.

**23. Description of Avoidance, Minimization, and Compensation (see instructions)**

BMPs for the Protection of Surface Waters will be employed for this project, as will Design Standards in Sensitive Watersheds. NCDOT will continue to seek ways to avoid and minimize impacts in further design efforts, potentially including, but not limited to, optimizing fill slopes near jurisdictional features and/or riparian buffers; adding retaining walls, where possible; installing bank stabilization at pipes/culverts/end bents to prevent erosion and scour; proceeding with interchange alternatives that avoid and minimize impacts to the greatest extent practicable; employing appropriate stormwater management techniques along the project corridor; and minimizing impacts to protected species habitat. If unavoidable impacts occur, compensatory mitigation will be pursued (via on-site options or NCDMS).

24. Is Any Portion of the Work Already Complete?  Yes  No IF YES, DESCRIBE THE COMPLETED WORK

DATE

The Application must be signed by the person who desires to undertake the proposed activity (applicant) or it may be signed by a duly authorized agent if the statement in block 11 has been filled out and signed.

18 U.S.C. Section 1001 provides that: Whoever, in any manner within the jurisdiction of any department or agency of the United States knowingly and willfully falsifies, conceals, or covers up any trick, scheme, or disguises a material fact or makes any false, fictitious or fraudulent statements or representations or makes or uses any false writing or document knowing same to contain any false, fictitious or fraudulent statements or entry, shall be fined not more than \$10,000 or imprisoned not more than five years or both.

**US Army Corps of  
Engineers**  
Wilmington District

# PUBLIC NOTICE

Issue Date:

Comment Deadline:

Corps Action ID Number: SAW-2016-02153

The Wilmington District, Corps of Engineers (Corps) received information from the North Carolina Department of Transportation (NCDOT) regarding a potential future requirement for Department of the Army authorization to discharge dredged or fill material into waters of the United States, associated with the proposed improvements to US 1 (Capital Boulevard) to a controlled-access facility from Interstate 540 (I-540) to SR 1909 (Purnell Road) / SR 1931 (Harris Road) in Wake County. NCDOT is preparing a federal Categorical Exclusion (CE) for the project, with the Federal Highway Administration (FHWA) as the lead federal agency. This project is included in NCDOT’s current State Transportation Improvement Program (STIP) as Project U-5307 (Sections A through D). The Section breakdown is as follows:

- 1) U-5307A: From I-540 to North of SR 2006 (Durant Rd.) in Raleigh
- 2) U-5307B: North of Durant Rd. in Raleigh to North of SR 2045 (Burlington Mills Rd.) in Wake Forest
- 3) U-5307C: North of Burlington Mills Rd. to South of NC 98 Business in Wake Forest
- 4) U-5307D: South of NC 98 Business to Purnell Rd. / Harris Rd. in Wake Forest

This project has been assigned Federal Aid Project Number NHS-0001 (138) by the FHWA. The right of way (R/W) acquisition and construction schedules are as follows for each Section:

<u>Section(s)</u>	<u>Right of Way</u>	<u>Construction</u>
U-5307A:	October 2024	October 2024
U-5307B&C:	October 2024	October 2026
U-5307D:	October 2028	Unfunded

Estimated costs for each Section are as follows:

<u>Section</u>	<u>Right of Way</u>	<u>Construction</u>	<u>Utilities</u>
U-5307A:	\$94,300,000	\$184,700,000	\$12,200,000
U-5307B:	\$74,600,000	\$84,000,000	\$6,700,000
U-5307C:	\$28,200,000	\$108,800,000	\$5,100,000
U-5307D:	\$48,900,000	\$91,900,000	\$8,300,000

The total estimated cost for the project is \$747,700,000.

Specific plans and location information are described below and shown on the attached plans. This Public Notice and all attached plans are also available on the Wilmington District website at <http://www.saw.usace.army.mil/Missions/RegulatoryPermitProgram.aspx>

**Applicant:** North Carolina Department of Transportation (NCDOT)  
Project Management Unit  
Attn: Terry E. Farr, PE  
Senior Project Manager  
1582 Mail Service Center  
Raleigh, North Carolina 27699-1582

### **Authority**

The Corps will evaluate this application to compare alternatives that have been carried forward for detailed study pursuant to applicable procedures of the following Statutory Authorities:

- Section 404 of the Clean Water Act (33 U.S.C. 1344)
- Section 10 of the Rivers and Harbors Act of 1899 (33 U.S.C. 403)
- Section 103 of the Marine Protection, Research and Sanctuaries Act of 1972 (33 U.S.C. 1413)

In order to integrate Section 404 permit requirements more fully with the National Environmental Policy Act of 1969, and to consider our required public interest review and 404(b)(1) compliance determination, the Corps is soliciting public comment on the merits of this proposal and on the alternatives considered. At the close of this comment period, the District Commander will evaluate and consider the comments received, as well as the expected adverse and beneficial effects of the proposed road construction, to select the least environmentally damaging practicable alternative (LEDPA). The District Commander is not authorizing construction of the proposed project at this time. A final Department of the Army (DA) permit may be issued only after our review process is complete, impacts to the aquatic environment have been minimized to the maximum extent practicable, and a compensatory mitigation plan for unavoidable impacts has been approved.

### **Location**

Location Description: The project extends along US 1 from I-540 to Purnell Road / Harris Road in Wake County, North Carolina. The project boundary for this project (either the approved project study area or design slope stakes plus 25 feet [40 feet at major crossings]) encompasses the proposed transportation improvements (Figure 1).

Nearest Town: Raleigh/Wake Forest  
Nearest Named Waterways: Neuse River, Horse Creek, Perry Creek, Richland Creek, Unnamed Tributary (UT) near Neuse River, Smith Creek

River Basin: Neuse  
Latitude: 35.945857  
Longitude: -78.539169

### **Existing Site Conditions**

Wake County is located within the Piedmont Physiographic Region of North Carolina. The existing project begins on the southern end at the US 1 and I-540 intersection in Raleigh and extends along US 1 north to the Purnell Road / Harris Road intersection with US 1 in Wake Forest. The project is proposing to widen US 1 and convert it to a controlled access facility. The project area is urban/suburban in nature. Residential, commercial, and industrial development is common in proximity to the project. Agricultural land is within the vicinity of the project footprint, but not within the project boundaries. Section 404/401 wetlands and streams are present within the project area, as are North Carolina Division of Water Resources (NCDWR) – enforced Neuse River Riparian Buffer Rule buffers.

The primary roadway to be improved as part of the proposed project is US 1, which is a variable four- to six-lane roadway through the project area.

US 1 is designated as an “Other Principal Arterial” per the Federal Functional Classification System established by the FHWA and updated by the NCDOT Transportation Planning Branch. “Other Principal Arterials” serve major centers of metropolitan areas, provide a high degree of mobility, and can also provide mobility through rural areas. Unlike their access-controlled counterparts, abutting land uses can be served directly. Forms of access for Other Principal Arterial roadways include driveways to specific parcels and at-grade intersections with other roadways.

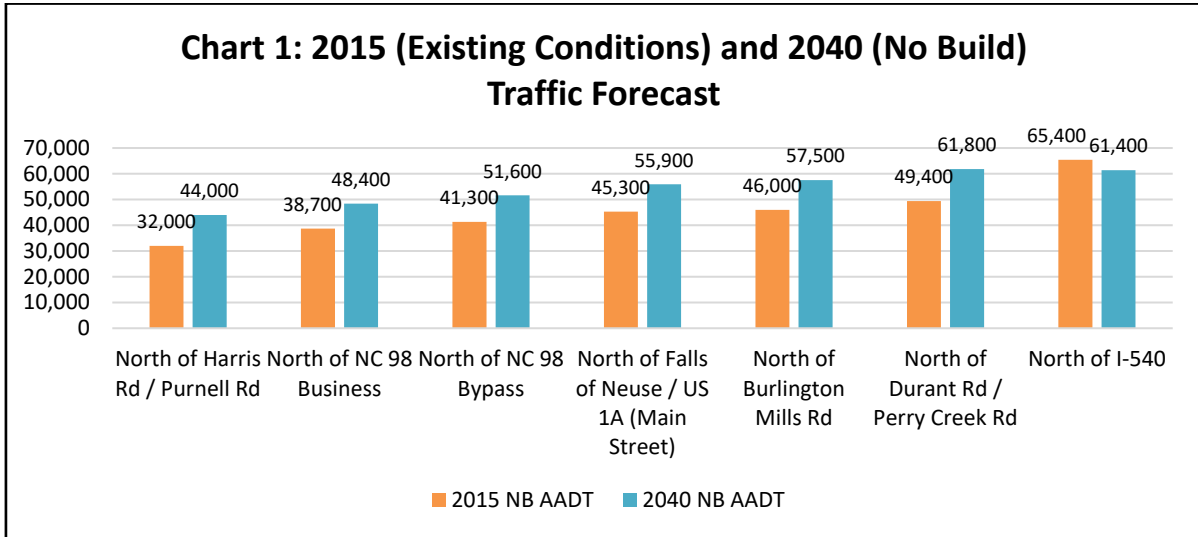

### **Applicant’s Stated Purpose**

The project purpose and need are as follows:

The **NEED** for the proposed project is:

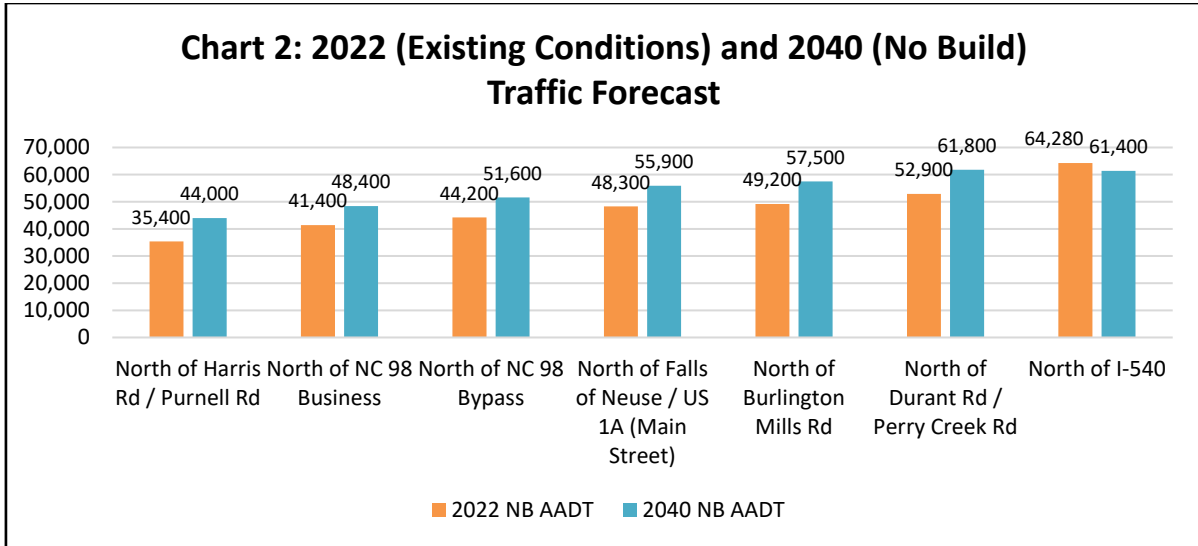

**To relieve traffic congestion, thereby improving travel times.**

The *U-5307 Traffic Operations Report* for existing and future (2040) No Build conditions from I-540 to NC 98 Bypass was approved in January 2017. The *U-5307 Traffic Operations Report* for existing and future (2040) No Build conditions for the entire study area, including the extended project area (NC 98 Bypass to Harris / Purnell Road) was completed in April 2018 (showing 2015 Existing Conditions). As of Concurrence Point (CP) 1, traffic volumes along US 1 ranged from approximately 32,000 to 39,000 vehicles per day (vpd) north of NC 98 Business (Durham Highway) to 65,000 vpd near I-540. Future projected volumes (No Build scenario) at the time of CP 1 were projected to range from approximately 44,000 – 49,000 vpd north of NC 98 Business to more than 80,000 vpd near I-540. These volumes are portrayed in **Chart 1**, seen below.

\* Note: The No Build 2040 scenario assumes a connector from Gresham Lake Road to Triangle Town Boulevard would be in place. If this roadway is not built, volumes on US 1 at I-540 are anticipated to reach approximately 80,000 in 2040.

Existing condition traffic volumes were also updated to 2022 conditions. Volumes along US 1 now range from approximately 35,000 to 42,000 vpd north of NC 98 Business (Durham Highway) to 65,000 vpd near I-540. Future projected volumes are the same as those described in the CP 1 analysis. These volumes are portrayed in **Chart 2**, seen below.

\* Note: The No Build 2040 scenario assumes a connector from Gresham Lake Road to Triangle Town Boulevard would be in place. If this roadway is not built, volumes on US 1 at I-540 are anticipated to reach approximately 80,000 in 2040.

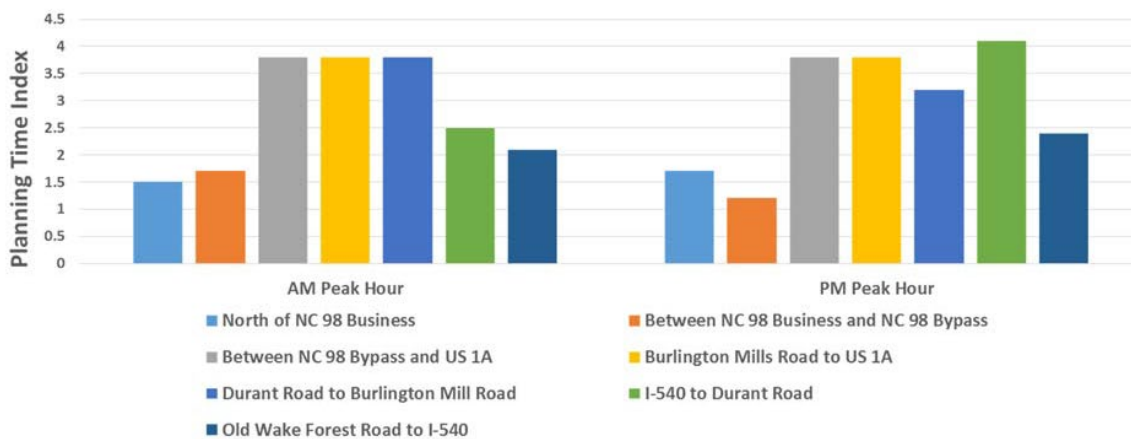

Congestion along US 1 for the 2040 No Build condition is anticipated to increase greatly from Existing Condition, showing that the current capacity of the existing roadway configuration would not be able to accommodate the future volumes.

Forecasted traffic volumes in 2040 Build conditions scenario range from approximately 55,000 vpd north of the interchange at Harris Road / Purnell Road to more than 100,000 vpd on US 1 near I-540. This volume increase is primarily due to the increase in capacity afforded to the corridor by converting US 1 to a freeway.

Trip times along US 1 are highly variable, making it difficult for drivers to plan trips. A trip in the PM peak on at least one segment of the U-5307 corridor can take up to four times longer than regular trips (non-peak times). Planning time index (**Chart 3; from CP 1 meeting**) is the ratio of the 95<sup>th</sup> percentile travel time of a given period compared to the time required to make the same trip at free-flow speeds. A value of 2, for example, means that a 15-minute free flow trip requires 30 minutes during the peak. (the average non-peak trip through the project study area usually takes approximately 15 minutes.)

**Chart 3: Planning Time Index**

2015 Planning Time Index  
US 1 (I-540 to north of NC 98 Business)

The 2040 No Build condition travel time analysis indicates that travel times during the AM and PM peak hours for 14 miles along US 1 would be 33 and 34 minutes, respectively (both for the southbound direction, which is the most congested). This converts to an average speed of approximately 25 miles per hour. Similarly, in the northbound direction, travel times in both AM and PM peak hours are anticipated to degrade by approximately 30 percent between 2015 and 2040 if no improvements are made.

Speed maps based on 2015 INRIX Data, seen in **Tables 1 and 2 (from CP 1 meeting)**, show slowdowns in both directions during both peak hours. (INRIX is a company that provides real-time traffic data using GPS-enabled devices, cell phones, and road sensors. This allows users to map and understand travel times and congestion. For more information, see

**Table 1: September 2015 Actual Speed (mph) – US 1 Southbound**

35 mph - 45 mph	Yellow
45 mph - 55 mph	Light Green
55 mph and above	Dark Green

The **PURPOSE** of the proposed project is:

To address the needs described above, the purpose of the proposed project is to **improve traffic congestion and travel times** along the corridor by upgrading US 1 to a controlled access freeway, **while maintaining regional mobility and local connectivity.**

**Project Description**

NCDOT proposes removing signals from the mainline of US 1 to create a roadway with full control of access and new interchanges at Durant Road / Perry Creek Road, Burlington Mills Road, Falls of Neuse Road / US 1A (Main Street), and Purnell Road / Harris Road. Service roads will be provided for connectivity. NCDOT also proposes the addition of a flyover carrying US 1 southbound traffic onto I-540 eastbound and the addition of a third westbound lane on I-540 (between the Triangle Town Boulevard interchange and the US 1 southbound on-ramp at I-540). The NC 98 Business intersection bridges will also be replaced, and minor intersection work will be completed at this location. Minor modifications to the existing interchanges at NC 98 Bypass and I-540, and a grade separation (bridge) at Jenkins Road / Stadium Drive will also be completed as part of this project.

## Merger Process History

A CP 1 meeting was held on June 14, 2018, where the Merger team agreed on the project Purpose and Need and Project Study Area. A CP 2 meeting was held on November 14, 2018, where Detailed Study Alternatives to be Carried Forward were discussed, including along the mainline and at interchanges. The following alternatives along US 1 were carried forward:

- US 1 Mainline
  - Conversion to a controlled-access highway; best fit alignment for centerline with consideration for maintenance of traffic during construction
- Service Roads/Connecting Streets
  - Service roads and connecting streets are under study to maintain regional mobility and local connectivity and will be presented at CP 3. The Project Team is considering a combination of existing streets and new location roads.
- I-540
  - Flyover carrying US 1 southbound to directly connect with I-540 eastbound (without loop)
  - I-540 westbound lane additional between Triangle Town Blvd. and the US 1 southbound ramp at I-540
- Durant Road / Perry Creek Road
  - Option A: Diverging Diamond Interchange (DDI) (US 1 over Perry Creek Road / Durant Road)
  - Option B: Diamond Interchange (US 1 over Perry Creek Road / Durant Road)
- Burlington Mills Road
  - Option A: DDI (US 1 under Burlington Mills Road)
  - Option B: Diamond Interchange (US 1 under Burlington Mills Road)
- Falls of Neuse Road / US 1A (Main Street)
  - DDI (US 1 over Falls of Neuse Road / US 1A)
- NC 98 Bypass
  - Ramp Modifications at the gores, keeping the existing lane configurations for the Single Point Urban Interchange (SPUI) the same
- NC 98 Business
  - Replacement of interchange bridges
  - Addition of a loop in the northeast quadrant and relocation of adjacent on-ramp
- Jenkins Road / Stadium Drive
  - Grade Separation (US 1 under Jenkins Road / Stadium Drive)
- Purnell Road / Harris Road
  - Partial Cloverleaf (US 1 under Purnell Road / Harris Road)

In February 2020, the project team and key agency team members determined that an update to the CP 2 agreement would be necessary. The CP 2 revisions include five minor study area modifications, due to adding the preliminary service road designs for connectivity, as well as revising the interchange type to carry forward at two previously agreed upon locations (US 1

at Durant Road / Perry Creek Road and US 1 at Burlington Mills Road). On March 11, 2021, the Merger Team was sent a packet via email detailing the proposed revisions to the original CP 2 agreement. After corresponding with the agencies, the Merger Team reached a consensus and signed the formal revised CP 2 Agreement on April 15, 2021. Under this agreement, the revised study area was defined and the following alternative revisions along US 1 were carried forward for two interchanges as follows:

- Durant / Perry Creek Rd.
  - Revised Option: Minimized DDI
- Burlington Mills Rd
  - Original Option B: Diamond Interchange
  - New Option C: Skewed Partial Cloverleaf Interchange

Additional considerations for the Gresham Lake Road intersection were also included for the project. The alternatives are currently being discussed between NCDOT and the City of Raleigh. These alternative options are discussed further below.

A CP 2A meeting was held on August 18, 2021, to review Hydraulic Considerations for the project. The following proposed structures were agreed upon for 12 locations along the project (Table 3):

**Table 3. Bridging and Alignment Decisions**

Site No.	Stream or Feature / Crossing Roadway	Existing	Recommended Structure
1	UT to Perry Creek / I-540	72" Reinforced Concrete Pipe (RCP)	Retain existing
2	UT to Perry Creek / I-540	2 @ 8' x 6' Reinforced Concrete Box Culvert (RCBC)	Retain existing and add 72" supplemental pipe
3	Perry Creek / Gresham Lake Road Extension	N/A	300' long bridge
4	Perry Creek / US 1	3 @ 8' x 8' RCBC	Retain and extend existing; add 84" supplemental pipe
5	UT near Neuse / US 1	2 @ 8' x 8' RCBC	Retain existing and add 84" supplemental pipe
6	UT near Neuse / Y10 (Service Road)	N/A	60' long bridge
7	UT near Neuse / Y10 (Service Road)	N/A	1 @ 6' x 7' RCBC with a notched sill
8	Neuse River / US 1	Dual 250' bridges	280' long dual bridges and service road bridge (discussion is ongoing)

**Table 3. Bridging and Alignment Decisions (continued)**

<b>Site No.</b>	<b>Stream or Feature / Crossing Roadway</b>	<b>Existing</b>	<b>Recommended Structure</b>
9	UT to Smith Creek / Y18 (Star Road Extension / Service Road)	N/A	1 @ 7' x 8' RCBC
10	Richland Creek / US 1	4 @ 10' x 11' RCBC	Retain and extend existing RCBC and 72" supplemental pipes
11	UT near Neuse / Driveway	N/A	DELETED
12	US 1 over CSX Rail Line (eligible for NR)	Dual bridges carrying US 1	300' long dual bridges and service road bridge

**Project Benefits**

- **Local and Regional Travel**

The proposed project will improve congestion and travel times due to improving US 1 in the project corridor and converting the project segment to a controlled access highway. This should improve through traffic movement and improve overall travel time for local and near-regional travelers.

- **Safety**

By converting the facility to controlled access, several signalized intersections will be removed from the L-line. This will reduce the potential for rear-end collisions in stop-and-go traffic, which is a prevalent issue with the current facility.

**Detailed Study Alternatives (DSA)**

Concurrence on the alternatives for detailed study was initially reached at the NEPA/404 Merger Team CP 2 meeting held on November 14, 2018. Revisions were required to the alternatives being brought forward and updated alternatives were presented to the Merger Team in March 2021. Concurrence was reached for the revised alternatives on April 15, 2021. The alternatives brought forward for detailed study are as follows:

- **No-Build Alternative**

The No-Build Alternative would not provide any substantial improvements to the existing corridor. Only routine maintenance activities would occur. Traffic congestion would increase, and travel time would continue to degrade as the US 1 project corridor eventually exceeds capacity even beyond peak hours.

- **US 1 Mainline**

A majority of the corridor will involve the conversion to a controlled-access highway, with a best fit alignment for centerline with consideration for maintenance of traffic during construction. The primary locations where multiple alternatives are considered are discussed below.

- **Service Roads/Connecting Streets**

Service roads and connecting streets are under study to maintain regional mobility and local connectivity and will be presented at CP 3. The Project Team is considering a combination of existing streets and new location roads.

- **I-540**

Two improvements to the I-540 interchange are being considered as part of this project:

- Flyover carrying US 1 southbound to directly connect with I-540 eastbound (without loop)
- I-540 westbound lane additional between Triangle Town Blvd. and the US 1 southbound ramp at I-540

- **Gresham Lake Road**

Four alternatives are currently being considered for this intersection:

- Option 1: Cul-de-sac Gresham Lake Road West of US 1
- Option 2: Gresham Lake Road over US 1, then cul-de-sac
- Option 3. Extending a new location road to the SPUI at Triangle Town Boulevard
- Option 4: A combination of Options 2 and 3

- **Durant / Perry Creek Road**

A minimized DDI is the only alternative being brought forward for this intersection

- **Burlington Mills Road**

Two options are being considered for this interchange with US 1:

- Option B: A Diamond Interchange
- Option C: A Skewed Partial Cloverleaf Interchange

- **Falls of Neuse Road / US 1A (Main Street)**

A DDI (US 1 over Falls of Neuse Road / US 1A) is the only option being considered for this interchange

- **NC 98 Bypass**

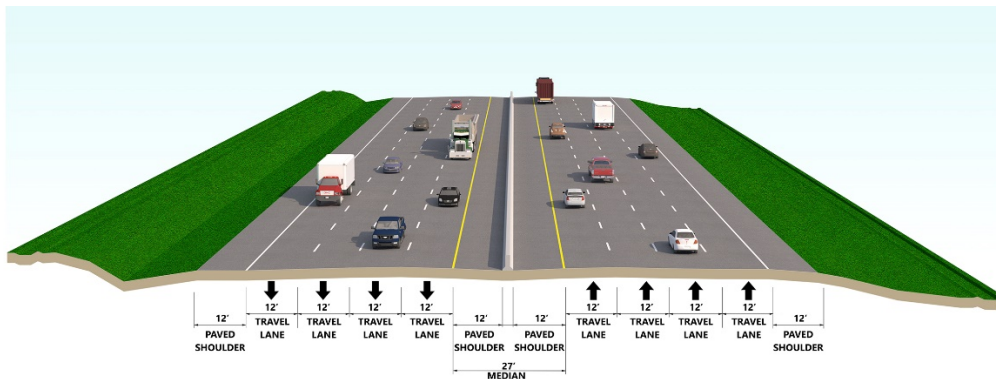

The only alternative being considered includes ramp modifications at the gores and keeping the existing lane configurations for the SPUI the same

- **NC 98 Business (Durham Road)**  
Options being brought forward include the replacement of the interchange bridges, addition of a loop in the northeast quadrant, and relocation of the adjacent on-ramp
- **Jenkins Road / Stadium Drive**  
A grade Separation (US 1 under Jenkins Road / Stadium Drive) is being proposed at this intersection
- **Purnell Road / Harris Road**  
The only alternative being brought forward is a Partial Cloverleaf (US 1 under Purnell Road / Harris Road). However, two Y-line alternatives are being reviewed for the tie-ins at the intersection.

### Typical Section

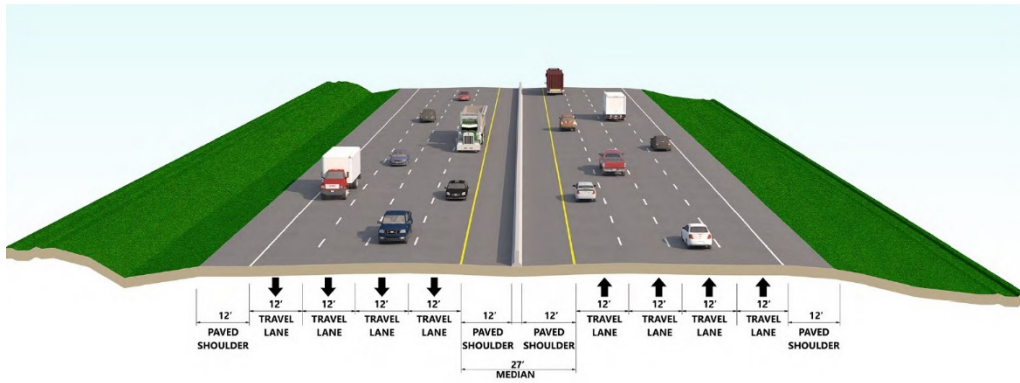

The roadway cross-section along the project corridor varies depending on the location, with variations occurring at interchanges (with added merge/exit lanes), across the Neuse River, along Y-Lines, and other locations. Detailed typical sections are included in the Appendix. However, the typical section of the main US 1 corridor will generally follow the following (per the Public Hearing No. 2 Maps):

- **I-540 North to Burlington Mills Rd**

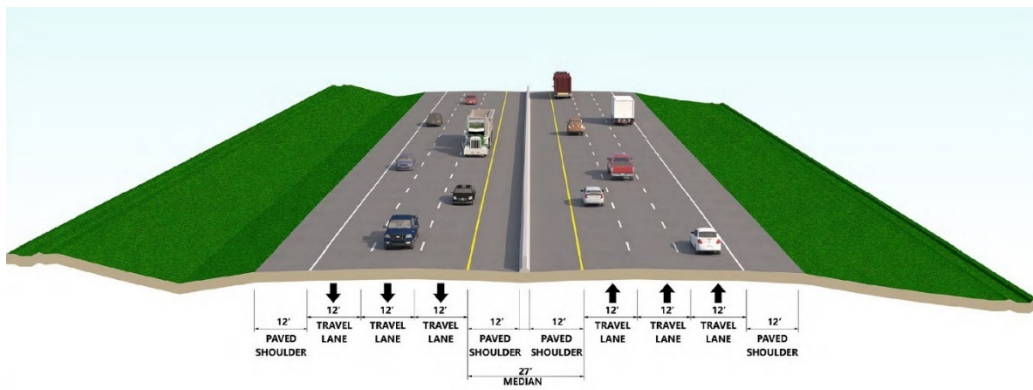

-L- U.S. 1 CAPITAL BOULEVARD

- **Burlington Mills Rd North to NC 98 Bypass**

U.S. 1 CAPITAL BOULEVARD

- **NC 98 Bypass to Purnell Road / Harris Road**

U.S. 1 CAPITAL BOULEVARD

### Potential Environmental Effects

A review of both human and natural environmental resources present within the project study area, as defined at CP 1 and revised during the re-assessment of CP 2, has been completed. Potential environmental features are identified in Tables 4 – 5 and graphically shown in the Appendix. Resources are broken down by project sections; built-upon and human resources in Table 4 are those within the project study area in proximity to the proposed project section. Potential natural resource impacts identified in Table 5 are either based on the amount within the study area (managed areas, natural environment) or the proposed project design (slope stakes plus 25 feet [40 feet at major crossings]; jurisdictional resources), the latter considering interchange alternatives brought forward.

**Table 4: Potential Built-Upon and Human Environmental Effects, Project Study Area**

## **Waters of the United States**

U-5307 has the potential to cause impacts to Section 404-regulated Waters of the United States. These impacts are summarized in Table 5 and described in detail below (Tables 6 – 21). A field verification site visit between NCDOT, the Corps, and Three Oaks Engineering (Three Oaks) staff was held on January 7, 2020, to review the jurisdictional delineations for the original project study area. NCDWR also provided a buffer applicability memorandum for the original study area on February 7, 2020. Additional information was supplied to regulatory agencies for the five new study area sections, and approved by the Corps without additional field review, on May 25, 2021 (All under Action ID No. SAW-2016-02153). Potential impacts presented below for each section reference the delineation after agency recommendations from the site visit were incorporated and provide estimated impacts both within the slope stakes plus 25 feet [40 feet at major crossings] and within just the proposed slope stakes.

### Potential Streams

NCDWR identifies the state's river and stream systems by basins and subbasins. Water resources in the study area are part of the Neuse River Basin (United States Geological Survey [USGS] Hydrologic Unit Code [HUC] 03020201).

Tables 6 – 9 identify the potential streams located within Sections A – D and the potential impacts resulting from the alternatives associated with them. Feature data, such as NCDWR Classification and Index Nos., are also included. Potential impacts are presented in linear feet.

There are no designated Outstanding Resource Waters (ORW), High-Quality Waters (HQW), or Water Supply I or II watersheds (WS-I or WS-II) within the study area or within 1.0 mile downstream of the study area. The North Carolina 2020 Final 2020 303(d) Lists of Impaired Waters does not identify any water within the project footprint or within 1.0 mile downstream of the project as impaired (i.e., Category 5).

### Potential Surface Waters

Features excavated for agricultural, roadside drainage, or other ponding purposes are located within the project area and are categorized as potential surface Waters of the United States. Tables 10-13 provide detailed information about the potential surface waters in Section A – D that may be impacted by the project. Potential impacts are presented in acres.

Wetlands

Tables 14 – 17 identify the potential wetlands located within Sections A – D and the potential impacts resulting from the alternatives associated with them. Feature data, such as wetland classification, North Carolina Wetland Assessment Method (NCWAM) designation, NCWAM rating, etc., are also included. Potential impacts are presented in acres. All wetlands in the study area are within the Neuse River Basin (USGS HUC 03020201).

Neuse River Basin Riparian Buffers

This project is located within the Neuse River Basin (USGS HUC 03020201). Therefore, NCDEQ – NCDWR-enforced Neuse River Basin riparian buffer rules apply to the subject project. Potential impacts to riparian buffers are summarized in Table 5 above and presented in detail below in Tables 18-21. Impacts are presented in square feet.

**Table 18. Potential Riparian Buffer Impacts, Section A**

## **Avoidance, Minimization, and Compensatory Mitigation**

Through development of the Detailed Study Alternative preliminary design, NCDOT has attempted to avoid or minimize impacts to the Neuse River and other streams, surface waters, and wetlands to the greatest practicable extent. However, total avoidance of potential jurisdictional features by the proposed project is not possible. Best Management Practices (BMPs) for the Protection of Surface Waters and Design Standards in Sensitive Watersheds will be employed for this project. NCDOT will continue to seek ways to avoid and minimize impacts in further design efforts, potentially including, but not limited to, optimizing fill slopes near jurisdictional features and/or riparian buffers; adding retaining walls, where possible; installing bank stabilization at pipes/culverts/end bents to prevent erosion and scour; proceeding with interchange alternatives that avoid and minimize impacts to the greatest extent practicable; employing stormwater management techniques along the project corridor; and minimizing impacts to protected species habitat.

The purpose of compensatory mitigation is to offset unavoidable functional losses to the aquatic environment resulting from project impacts to waters of the United States. NCDOT will investigate potential on-site compensatory mitigation opportunities prior to submitting a Section 404 permit application. If on-site mitigation is not feasible, or a sufficient amount of mitigation is not available on-site, mitigation will be provided by the North Carolina Department of Environmental Quality – Division of Mitigation Services (NCDEQ-DMS).

## **Construction Moratoria**

The North Carolina Wildlife Resources Commission (NCWRC) identifies the Neuse River as anadromous fish habitat. Anadromous fish have been documented all the way to the base of the Falls Lake Dam. Therefore, it is anticipated that an inland Primary Nursing Area (PNA) moratorium will apply for the project between February 1 and September 30.

## **Rivers and Harbors Act Section 10 Navigable Waters**

The Neuse River within the project area is not designated as a Navigable Water by the Corps under Section 10 of the Rivers and Harbors Act. Therefore, a Section 10 permit will not be required for this project.

## **Permits Required**

An Individual Section 404 Permit will likely be applicable. The Corps holds final discretion as to what permit will be required to authorize project construction. Since a Section 404 permit is required, then a corresponding Section 401 Water Quality Certification from NCDWR will also be required. Additionally, it is anticipated that a Neuse River Riparian Buffer Authorization will be required for the project.

## **Architectural and Archaeological Resources**

The proposed project is subject to compliance with Section 106 of the National Historic Preservation Act (NHPA) of 1966, as amended, and implemented by the Advisory Council on Historic Preservation's Regulations for Compliance with Section 106, codified as 36 CFR Part 800. Section 106 requires federal agencies to consider their undertakings (federally funded, licenses, or permitted) on properties included in or eligible for inclusion in the National Register of Historic Places (NRHP) and to afford the Advisory Council a reasonable opportunity to comments on such undertakings.

### Architectural Resources

Three National Register-listed and one National Register-eligible property are located within the area of potential effect (APE):

- 1) -Powell House (WA0040) – Listed on the National Register (NR: 1974)
- 2) Purefoy-Dunn Plantation (WA0221) – Listed on the National Register (NR: 1988)
- 3) Sutherland (Wakefields/ Home Acres) (WA0047) – Listed on the National Register (NR: 1974)
- 4) -Raleigh and Gaston Rail Corridor (NC0008) – Eligible for listing on the National Register

A Historic Pre-Effects Meeting was held on April 26, 2021, to discuss potential affects to these properties. Recommendations made at the meeting include:

- Prepare plots over an aerial that include limits, what improvements will affect, driveways being added or eliminated, service road additions and how they affect the property access and any minimization.
- Contact property owner(s) and Preservation NC, as applicable, to discuss:
  - Driveway tie in
  - C/A fence preferences
  - Retaining wall preferences
  - Replanting options
  - Drainage impacts
  - Utility impacts
- Get utility / hydraulics information (PUE is considered a 4(f) impact)
- Pier options for the bridges over the CSX / additional structure details
- Schedule information per each segment (using STIP programming data)

### Archaeological Resources

A Phase I archaeological survey of the 4,059-acre combined study area was completed. Through this investigation, four previously recorded archaeological sites were revisited, and 36 newly identified archaeological sites were recorded. Of the previously recorded sites, one is currently inundated by Gresham Lake, and another appears to have been completely destroyed by recent commercial development; however, the remaining two were revisited

during the current archaeological survey. All four previously recorded sites are recommended not eligible for listing to the NRHP. Of the 36 newly identified archaeological sites, 16 contain prehistoric components, 18 contain historic components, and two are multicomponent sites. Most of the sites with prehistoric components were lithic scatters or isolates containing only a handful of artifacts. Only one prehistoric site contained a diagnostic artifact, a plain grit-tempered ceramic sherd, dating to the Woodland Period. All prehistoric sites are recommended not eligible for listing to the NRHP due to a lack of significance and integrity. A full Programmatic Agreement Form completed to the specifications stipulated in the Programmatic Agreement between NCDOT and the State Historic Preservation Office (SHPO) will be provided at a later date.

### **Environmental Justice and Title VI Populations**

Census data indicates a notable presence of minority and low-income populations meeting the criteria for Environmental Justice (EJ) within the Demographic Study Area (as defined in the Short-form Community Impact Assessment) and minority and low-income communities were observed within the DCIA during the field visit or were noted by local planners. Census Tract (CT) 542.06, Block Group (BG) 2 and CT 540.14, BG 1 meet NCDOT's thresholds for notable EJ low-income populations and minority populations, respectively. CT 542.06, BG 2 low-income populations exceed the county percentage (6.6%) by more than 5 percentage points (21.7%). CT 540.14, BG 1 meets the 50% threshold for minority populations and exceeds the county percentage (39.7%) by more than 10 percentage points (73.1%). CT 540.15, BG 1, CT 540.18, BG 2, CT 540.14, BG 2, and CT 540.14, BG 3 all exceed NCDOT's thresholds for notable EJ minority and low-income populations. These four block groups all exceed the 50% threshold for minority populations and exceed the county percentage by more than 10 percentage points. CT 540.15, BG 1 and CT 540.18, BG 2 exceed the Wake County averages by more than five percentage points for low-income populations for groups "Below Poverty Level" and "Between 100% and 149% of Poverty Level" and CT 540.15, BG 1 exceeds county averages by more than five percentage points for the group, "Under 50% of Poverty Level." Notably adverse community impacts are anticipated with this project but appear to affect all populations equivalently; thus, impacts to minority and low-income populations do not appear to be disproportionately high and adverse. Benefits and burdens resulting from the project are anticipated to be equitably distributed throughout the community. No disparate impacts are anticipated under Title VI and related statutes.

### **Farmland**

The subject project is a federally funded action and, thus, is potentially subject to the Farmland Protection Policy Act (FPPA), enacted in 1980 and administered by the Natural Resources Conservation Service (NRCS). However, since the project area and project vicinity are urban in nature, the project meets criteria for exclusion from the FPPA. Farmland soils eligible for protection under FPPA are not present within the project footprint.

### **Hazardous Materials**

A GeoEnvironmental Phase I Report was completed for the entire project (Sections A – D) on

January 11, 2021, by the NCDOT Geotechnical Engineering Unit. Thirty-two (32) sites of concern were identified within the proposed study area. However, low to moderate monetary and scheduling impacts are anticipated due to the presence of these sites.

### Endangered Species

Pursuant to the Endangered Species Act of 1973, the Corps reviewed the project area, examined all information provided by the applicant, and consulted the latest United States Fish and Wildlife Service (USFWS) Information for Planning and Consultation (IPaC) and North Carolina Natural Heritage Program (NCNHP) data. The USFWS and National Oceanic and Atmospheric Administration (NOAA) – National Marine Fisheries Service (NMFS) list the following federally protected species within the study area, under the Endangered Species Act (ESA). Table 22 lists the species associated with the project, along with the Biological Conclusion rendered for each species.

**Table 22. ESA federally protected species listed within the project study area**

<i>Scientific Name</i>	<b>Common Name</b>	<b>Federal Status</b>	<b>Habitat Present</b>	<b>Biological Conclusion</b>
<i>Picoides borealis</i>	Red-cockaded woodpecker	E	Yes	No Effect
<i>Necturus lewisi</i>	Neuse River waterdog	T	Yes	MANLAA
<i>Acipenser oxyrinchus oxyrinchus</i>	Atlantic sturgeon <sup>1</sup>	E	Yes	No Effect
<i>Noturus furiosus</i>	Carolina madtom	E	Yes	MANLAA
<i>Fusconaia mason</i>	Atlantic pigtoe	T	Yes	MANLAA
<i>Alasmidonta heterodon</i>	Dwarf wedgemussel	E	Yes	MANLAA
<i>Rhus michauxii</i>	Michaux’s sumac	E	Yes	No Effect

E – Endangered; T – Threatened; MANLAA – May Affect, Not Likely to Adversely Affect

<sup>1</sup> – Species listed by NMFS only

Based on available information:

- The Corps determines that the proposed project would not affect federally listed endangered or threatened species or their formally designated critical habitat.

Of the species listed for the project, the following were rendered a Biological Conclusion of “No Effect” : red-cockaded woodpecker. Atlantic sturgeon, and Michaux’s sumac.

- The Corps determines that the proposed project may affect, but is not likely to adversely affect, federally listed endangered or threatened species or their formally designated critical habitat.

Of the species listed for the project, the following were rendered a Biological Conclusion of May Affect, Not Likely to Adversely Affect: Neuse River waterdog, Carolina madtom, Atlantic pigtoe, and dwarf wedgemussel. Aquatic species will be re-surveyed in 2023.

- The Corps initiates consultation under Section 7 of the ESA and will not make a permit decision until the consultation process is complete.
- The Corps determines that the proposed project may affect federally listed endangered or threatened species or their formally designated critical habitat. Consultation has been completed for this type of activity and the effects of the proposed activity have been evaluated and/or authorized by the USFWS and/or the NMFS (in the South Atlantic Regional Biological Opinion or its associated documents, including 7[a][2] & 7[d] analyses and Critical Habitat assessments. A copy of this public notice will be sent to the NMFS).

The Northern long-eared bat (NLEB), as part of the species' Programmatic Biological Opinion (PBO), has been rendered a Biological Conclusion of "May Affect, Likely to Adversely Affect." Details regarding NLEB and its PBO are detailed below.

- The Corps is not aware of the presence of species listed as threatened or endangered or their critical habitat formally designated pursuant to the Endangered Species Act of 1973 (ESA) within the project area. The Corps will make a final determination on the effects of the proposed project upon additional review of the project and completion of any necessary biological assessment and/or consultation with the U.S. Fish and Wildlife Service and/or National Marine Fisheries Service.

#### Northern Long-eared Bat

The USFWS has revised the previous programmatic biological opinion (PBO) in conjunction with FHWA, the Corps, and NCDOT for the northern long-eared bat (NLEB) (*Myotis septentrionalis*) in eastern North Carolina. The PBO covers the entire NCDOT program in Divisions 1-8, including all NCDOT projects and activities. Although this programmatic covers Divisions 1-8, NLEBs are currently only known in 22 counties, but may potentially occur in 8 additional counties within Divisions 1-8. NCDOT, FHWA, and the Corps have agreed to two conservation measures which will avoid/minimize mortality of NLEBs. These conservation measures only apply to the 30 current known/potential counties shown on Figure 2 of the PBO at this time. The programmatic determination for NLEB for the NCDOT program is May Affect,

Likely to Adversely Affect. The PBO will ensure compliance with Section 7 of the Endangered Species Act for ten years (effective through December 31, 2030) for all NCDOT projects with a federal nexus in Divisions 1-8, which includes Wake County, where U-5307 is located.

#### Bald and Golden Eagle Protection Act

The Bald and Golden Eagle Protection Act is enforced by the USFWS. Golden eagles do not nest in North Carolina. Habitat for the bald eagle primarily consists of mature forests in proximity to large bodies of open water for foraging. Large dominant trees are utilized for nesting sites, typically within 1.0 mile of open water.

A desktop-GIS assessment of the study area, as well as the area within a 1.0-mile radius of the original project study areas, was performed on September 5, 2018, using the most currently available color aerials. Water bodies large and sufficiently open enough to be considered potential feeding sources were identified. Since foraging habitat was present within the review area, a survey of the original study area and the area within 660 feet of the project limits was conducted in the Fall of 2018. Review of the five study area expansions was completed on February 8, 2021. No eagles or nests were observed during either survey effort. A review of the October 2021 NCNHP dataset revealed no known occurrences of this species within 1.0 mile of the study area. Due to the lack of nests, individuals, or known occurrences, and the minimal impact anticipated, it has been determined that this project will not affect this species.

#### **Evaluation**

The decision whether to issue a permit will be based on an evaluation of the probable impacts including cumulative impacts of the proposed activity on the public interest. That decision will reflect the national concern for both protection and utilization of important resources. The benefit which reasonably may be expected to accrue from the proposal must be balanced against its reasonably foreseeable detriments. All factors which may be relevant to the proposal will be considered including the cumulative effects thereof; among those are conservation, economics, aesthetics, general environmental concerns, wetlands, historic properties, fish and wildlife values, flood hazards, flood plain values (in accordance with Executive Order 11988), land use, navigation, shoreline erosion and accretion, recreation, water supply and conservation, water quality, energy needs, safety, food and fiber production, mineral needs, considerations of property ownership, and, in general, the needs and welfare of the people. For activities involving the discharge of dredged or fill materials in waters of the United States, the evaluation of the impact of the activity on the public interest will include application of the Environmental Protection Agency's 404(b)(1) guidelines.

#### **Commenting Information**

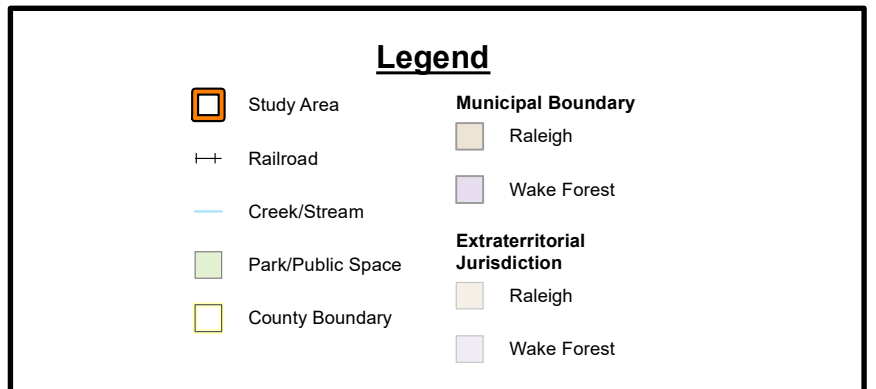

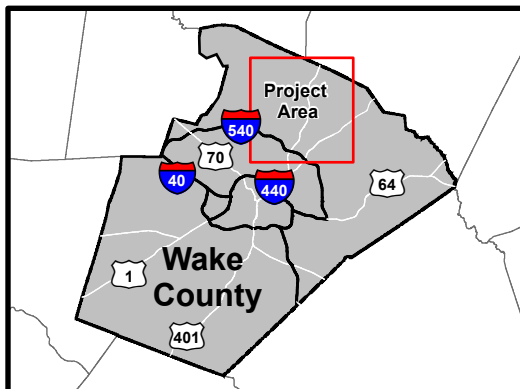

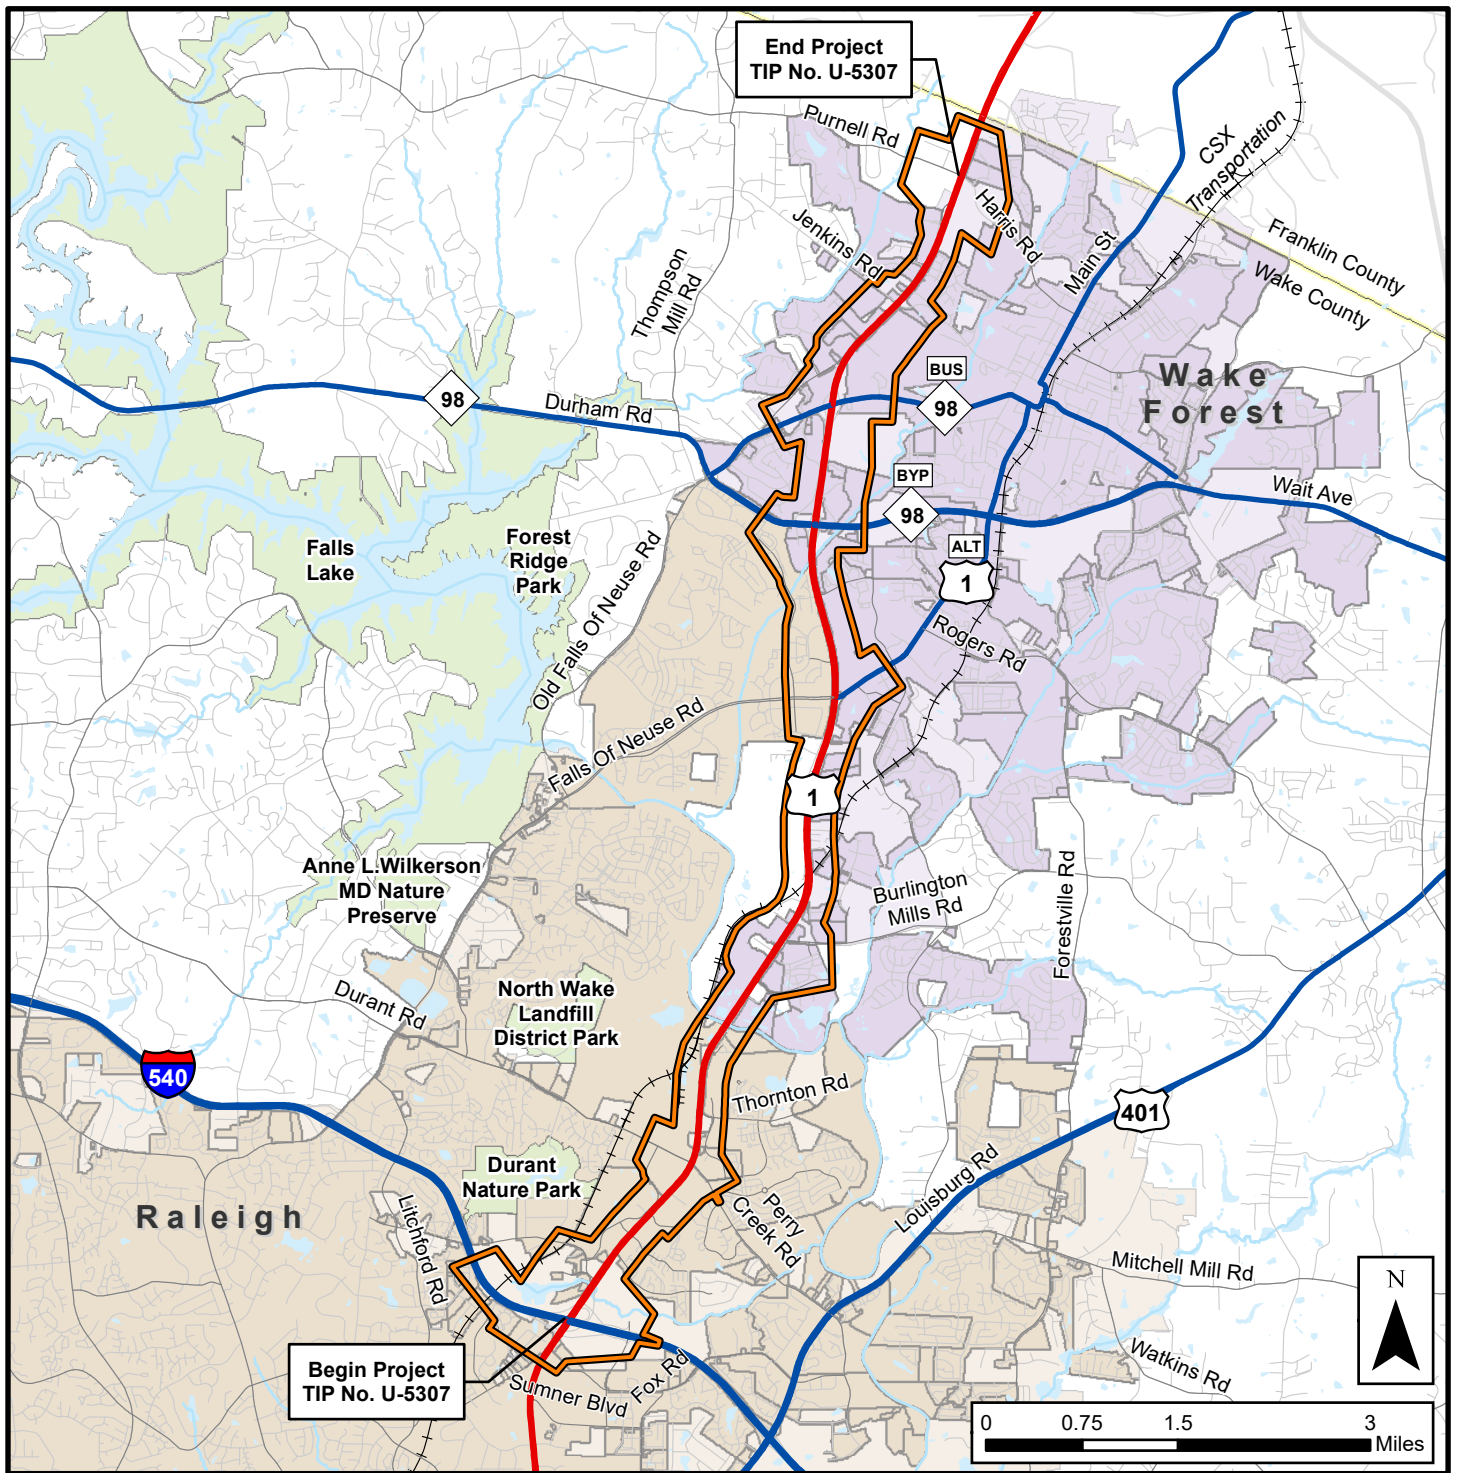

The Corps of Engineers is soliciting comments from the public; Federal, State, and local agencies and officials, including any consolidated State Viewpoint or written position of the Governor; Indian Tribes and other interested parties in order to consider and evaluate the impacts of this proposed activity. Any comments received will be considered by the Corps of Engineers to select the least environmentally damaging practicable alternative (LEDPA) for this proposal. To make

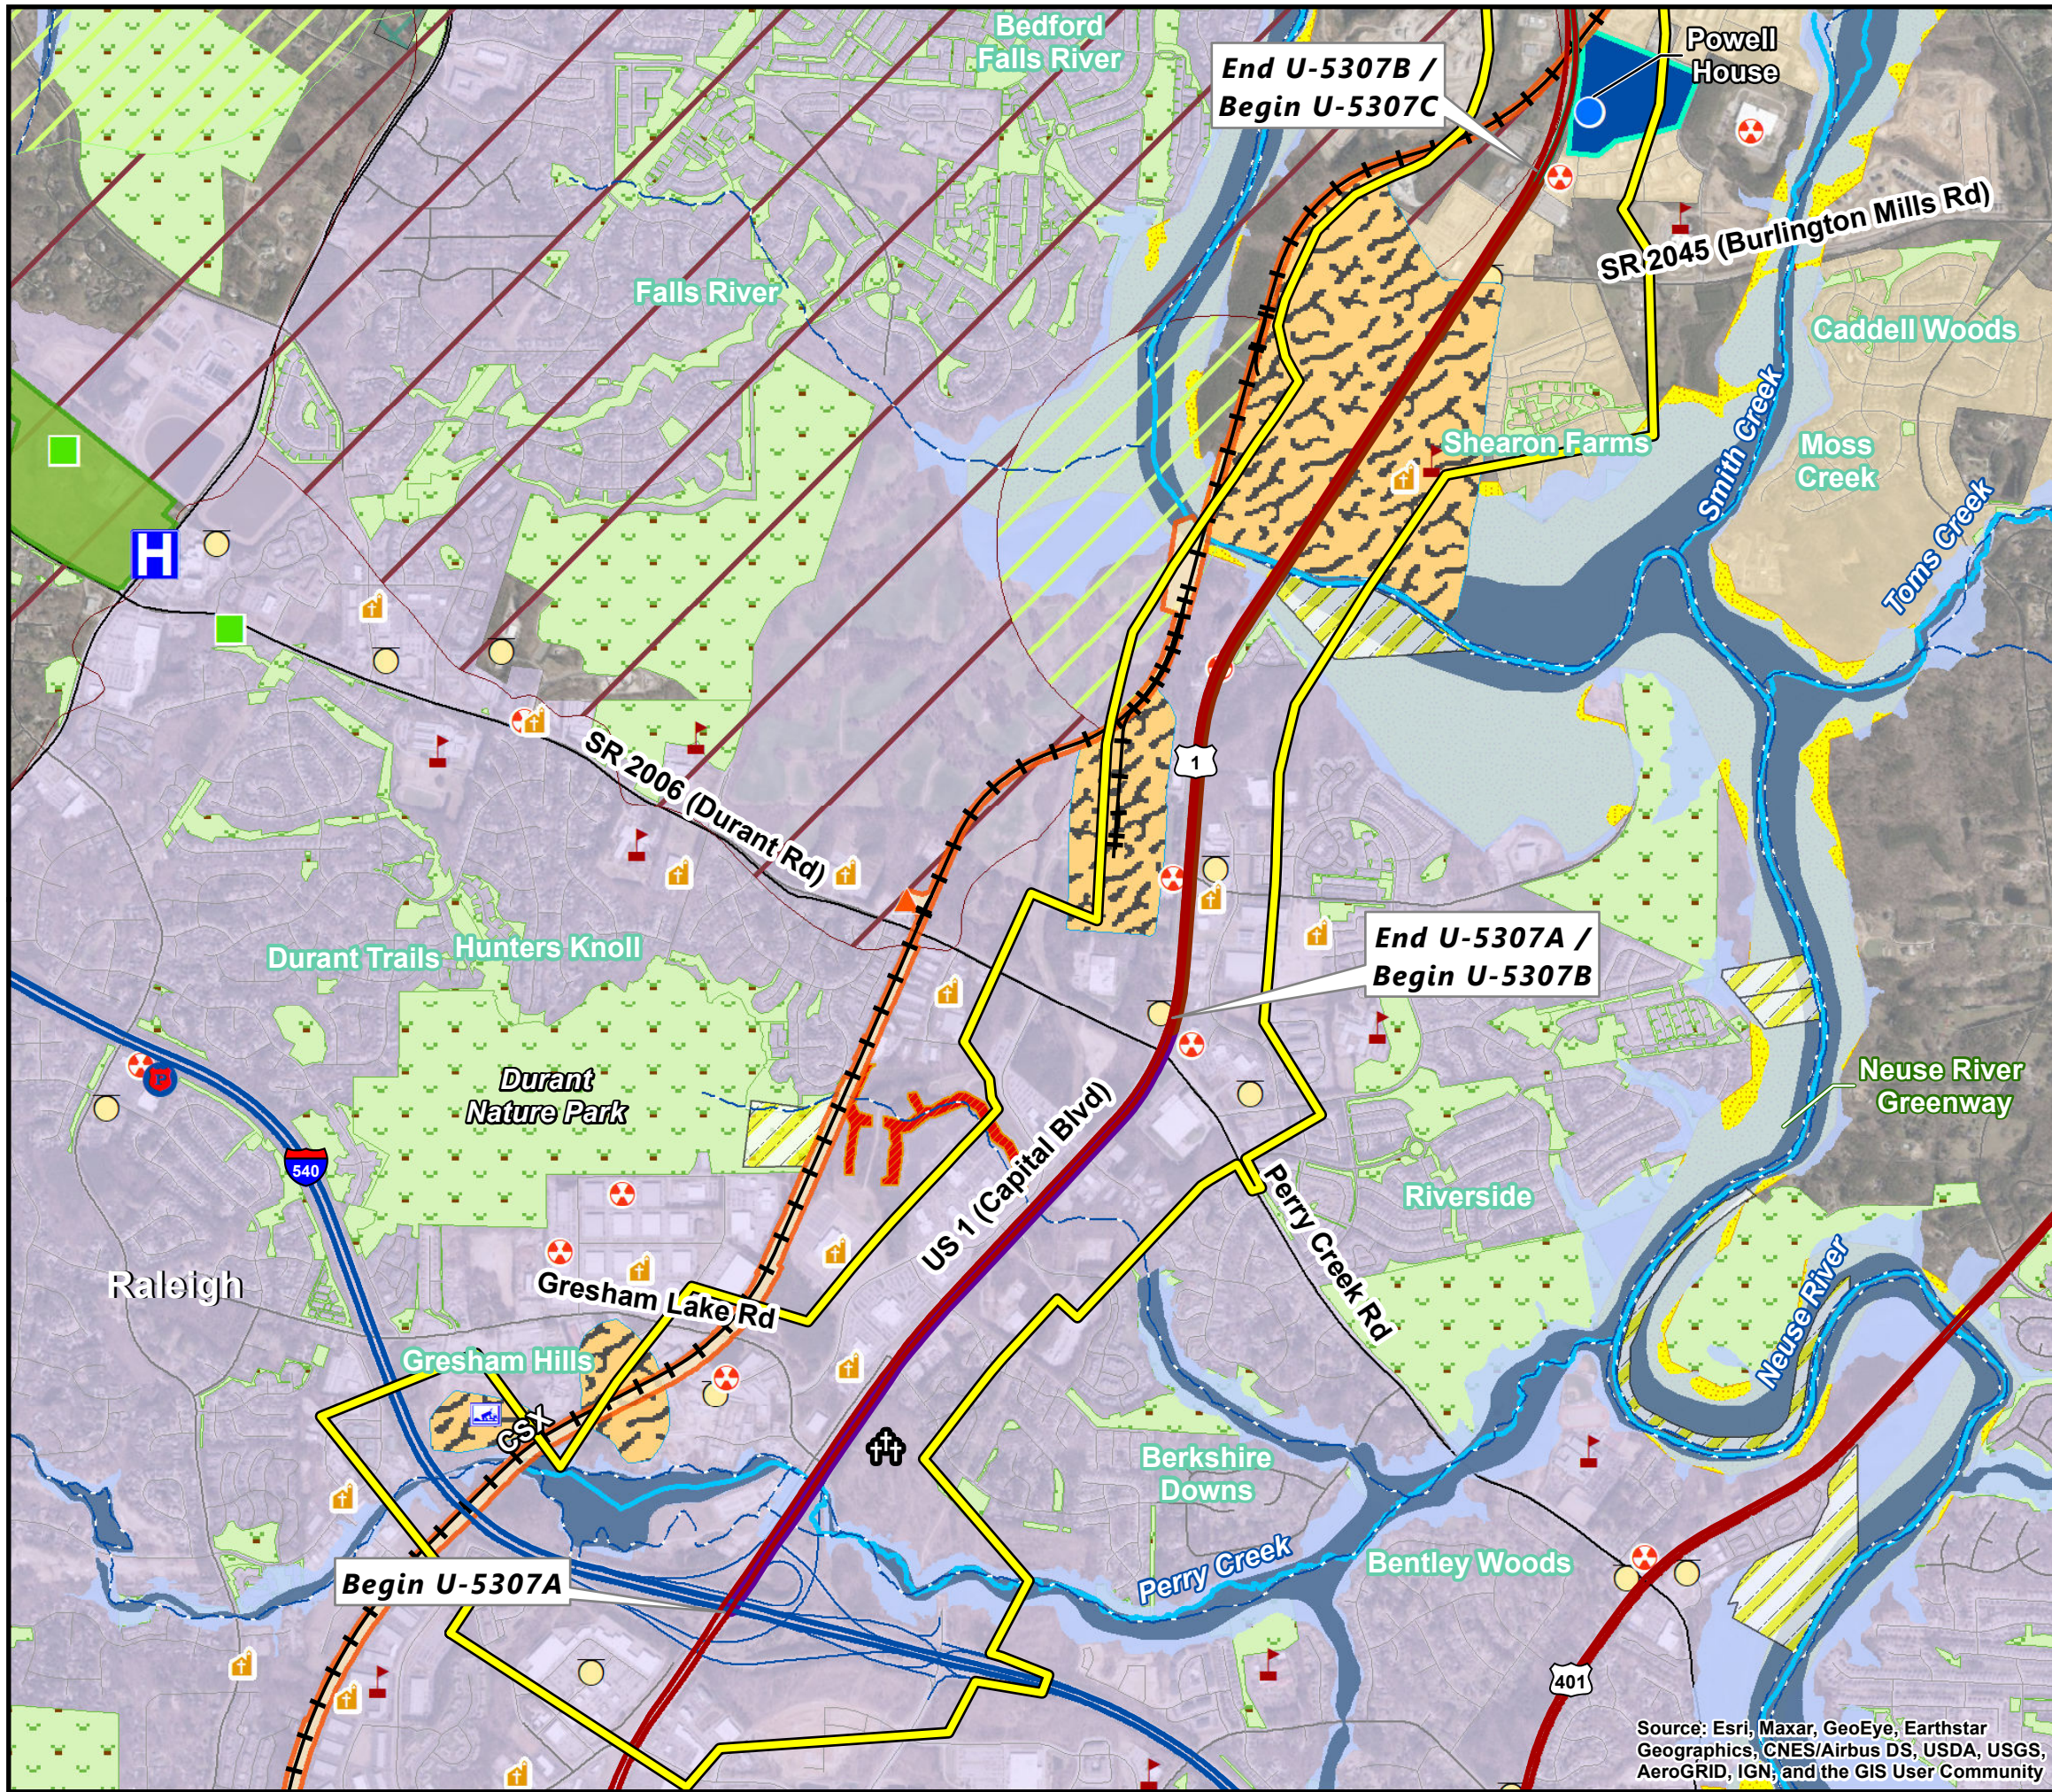

this decision, comments are used to assess impacts on endangered species, historic properties, water quality, general environmental effects and the other public interest factors listed above. Comments are used in either the preparation of an Environmental Assessment (EA) and/or an Environmental Impact Statement (EIS), or to confirm that a project is Categorical Excluded from further analysis pursuant to the National Environmental Policy Act (NEPA). Comments are also used to determine the need for a public hearing and to determine the overall public interest of the proposed activity.

### Public Meeting

NCDOT completed the first round of public meetings on October 9 and 11, 2018. A second (virtual) public meeting was completed on December 9, 2021.

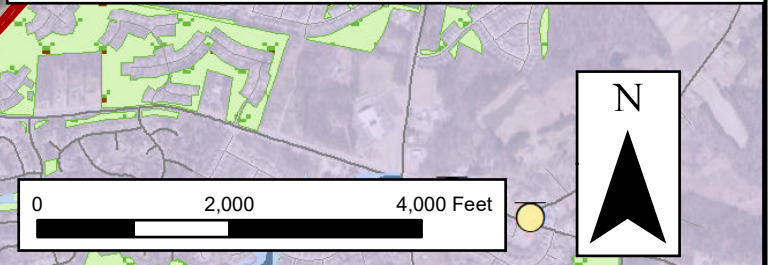

Written comments pertinent to the proposed work, as outlined above, will be received by the Corps of Engineers, Wilmington District, until 5pm, March XX, 2022. Comments should be submitted to Andy Williams, via mail at 3331 Heritage Trade Drive, Suite 105, Wake Forest, North Carolina 27587, via phone at 919.554.4884 x32, or by email to Andrew.E.Williams@usace.army.mil.

- EXISTING TRAFFIC SIGNAL
- PROPOSED TRAFFIC SIGNAL
- TRANSMISSION TOWER
- EXISTING TRAFFIC SIGNAL TO BE REMOVED

**NOTE:**  
FULL CONTROL OF ACCESS IS DEFINED AS CONNECTIONS TO A FACILITY PROVIDED ONLY VIA RAMP AT INTERCHANGES. ALL CROSS-STREETS ARE GRADE-SEPARATED. NO "PRIVATE DRIVEWAY" CONNECTIONS ARE ALLOWED.

**IMPACTS AND DRIVEWAY TIES**  
LIMITS OF CONSTRUCTION AND THEIR IMPACTS SHOWN ON THIS HEARING MAP ARE BASED OFF OF PRELIMINARY DESIGNS AND PRELIMINARY GROUND SURVEYS. DURING THE FINAL DESIGN STAGE, DESIGNERS WILL ATTEMPT TO MINIMIZE IMPACTS WHERE FEASIBLE USING FINAL GROUND SURVEYS. DRIVEWAY LOCATIONS WILL ALSO BE DETERMINED DURING FINAL DESIGN USING FINAL SURVEYS.

**UTILITY INFORMATION**  
TO PROVIDE GREATER VISUAL CLARITY EXISTING AND PROPOSED UTILITIES ARE NOT SHOWN ON THESE MAPS OR ON OTHER DISPLAYS. THE UTILITY INFORMATION SHOWN ON THESE MAPS IS LIMITED TO LOCATION OF MAJOR EXISTING AND POTENTIAL UTILITY EASEMENTS. THE DESIGNS SHOWN ON THESE MAPS, INCLUDING UTILITY EASEMENTS, ARE PRELIMINARY AND ARE SUBJECT TO CHANGE.

UTILITIES NOT DEPICTED ON THE PUBLIC MEETING MAP

THIS PROJECT IS WITHIN THE MUNICIPAL BOUNDARIES OF THE CITY OF RALEIGH AND TOWN OF WAKE FOREST
