ATTN: Mr. Ronnie Smith
NCDOT Coordinator

Dear Sirs:

Subject: **Application for Section 404 Nationwide Permits 12 and 23 and 401 Water Quality Certification** for the Replacement of Bridge No. 5 on NC 242 over Singletary Mill Branch in Bladen County, North Carolina. TIP No. B-4711. Federal Aid Project No. BRSTP-242(3); Debit $240.00 from WBS Element 38486.1.1.

Please find enclosed the Pre-Construction Notification (PCN) form, permit drawings, utility drawings, design plans, stormwater management plan, and jurisdictional determination for the above referenced project. A Programmatic Categorical Exclusion (PCE) was completed for this project on June 24, 2010 and distributed shortly thereafter. Additional copies are available upon request. The North Carolina Department of Transportation (NCDOT) proposes to replace Bridge No. 5 over Singletary Mill Branch on NC 242 in Bladen County. The project involves replacement of the existing 55-foot structure with a 121-foot long bridge in approximately the same location. There will be 0.09 acre of permanent impacts to riparian wetlands resulting from fill and mechanized clearing on this project.

The proposed let date for the project is November 20, 2012 with a review date of October 2, 2012. However, the let date may advance as additional funds become available.

Regulatory Approvals

E. REVIEW PERFORMED FOR SITE EVALUATION (CHECK ALL THAT APPLY):

☒ Office (Desk) Determination. Date: February 23, 2010
☐ Field Determination. Date(s):

1. The Corps of Engineers believes that there may be jurisdictional waters of the United States on the subject site, and the permit applicant or other affected party who requested this preliminary JD is hereby advised of his or her option to request and obtain an approved jurisdictional determination (JD) for that site. Nevertheless, the permit applicant or other person who requested this preliminary JD has declined to exercise the option to obtain an approved JD in this instance and at this time.

2. In any circumstance where a permit applicant obtains an individual permit, or a Nationwide General Permit (NWP) or other general permit verification requiring "pre-construction notification" (PCN), or requests verification for a non-reporting NWP or other general permit, and the permit applicant has not requested an approved JD for the activity, the permit applicant is hereby made aware of the following: (1) the permit applicant has elected to seek a permit authorization based on a preliminary JD, which does not make an official determination of jurisdictional waters; (2) that the applicant has the option to request an approved JD before accepting the terms and conditions of the permit authorization, and that basing a permit authorization on an approved JD could possibly result in less compensatory mitigation being required or different special conditions; (3) that the applicant has the right to request an individual permit rather than accepting the terms and conditions of the NWP or other general permit authorization; (4) that the applicant can accept a permit authorization and thereby agree to comply with all the terms and conditions of that permit, including whatever mitigation requirements the Corps has determined to be necessary; (5) that undertaking any activity in reliance upon the subject permit authorization without requesting an approved JD constitutes the applicant's acceptance of the use of the preliminary JD, but that either form of JD will be processed as soon as is practicable; (6) accepting a permit authorization (e.g., signing a proffered individual permit) or undertaking any activity in reliance on any form of Corps permit authorization based on a preliminary JD constitutes agreement that all wetlands and other water bodies on the site affected in any way by that activity are jurisdictional waters of the United States, and precludes any challenge to such jurisdiction in any administrative or judicial compliance or enforcement action, or in any administrative appeal or in any Federal court; and (7) whether the applicant elects to use either an approved JD or a preliminary JD, that JD will be processed as soon as is practicable. Further, an approved JD, a proffered individual permit (and all terms and conditions contained therein), or individual permit denial can be administratively appealed pursuant to 33 C.F.R. Part 331, and that in any administrative appeal, jurisdictional issues can be raised (see 33 C.F.R. 331.5(a)(2)). If, during that administrative appeal, it becomes necessary to make an official determination whether CWA jurisdiction exists over a site, or to provide an official delineation of jurisdictional waters on the site, the Corps will provide an approved JD to accomplish that result, as soon as is practicable. This preliminary JD finds that there *"may be"* waters of the United States on the subject project site, and identifies all aquatic features on the site that could be affected by the proposed activity, based on the following information:

MEMORANDUM TO: File

FROM: Paul F. Fisher, P.E.
Hydraulics Unit

SUBJECT: Stormwater Management Plan
B-4711, Bladen County

ROADWAY DESCRIPTION:

B-4711 consists of constructing a new bridge on NC 242 over Singletary Mill Branch. The total project length is 0.142 miles. This project is in the Lumber River Basin. The jurisdictional stream is Singletary Mill Branch.

ENVIRONMENTAL DESCRIPTION:

This project is in Bladen County, which is not a CAMA county. There are wetland sites on all four quadrants around the bridge that will be impacted by the proposed project. Surface Water Impacts will be minimized to the extent practicable.

BEST MANAGEMENT PRACTICES AND MAJOR STRUCTURES

The primary goal of Best Management Practices (BMP's) is to prevent the degradation of the State's surface waters by the location, construction and operation of the highway system. The BMP's are activities, practices and procedures taken to prevent or reduce stormwater pollution. The BMP measures used on this project to reduce stormwater impacts are:

Rip rap pads were placed at discharge points, in wetlands.

3:1 sideslopes on all new ditches.

Maintain sheet flow off fill slopes where shoulder berm gutter is not required.

B-4711 NEU Narrative

Utility Owners:

- **Power:** Four County EMC – (contact: Edward Pope 910-259-1854)
- **Telephone:** CenturyLink (contact: David Walker (910) 678-0243, ext. 717)

General Utility Relocation:

All utility lines inside the project limits will be adjusted as necessary or relocated away from construction. The power and telephone will be relocated prior to the letting.

Existing Utilities:

- **Power:** the existing Four County EMC aerial power pole line runs along east side of NC 242.

- **Telephone:** the existing CenturyLink Telephone lines (fiber optic and copper cables) are underground on the east and west side of NC 242. The telephone lines on the west side are buried up to Singletary Mill Branch then goes aerial across the creek.

Proposed Utility Relocation:

- **Power:** Four County EMC will relocate the power pole line along the proposed R/W line on the east side of NC 242 from Sta. 14+87 to Sta. 22+64.

- **Telephone:** CenturyLink will abandon the aerial and underground facilities on the east and west side of NC 242 after new fiber optic cables and conduits are installed on the east side of NC 242. The proposed underground conduits will be installed by directional bore across the wetlands.
