ATTN: Mr. Eric Alsmeyer
NCDOT Regulatory Coordinator

Subject: **Application for Section 404 Nationwide Permits 13, 23, and 33, Section 401 Water Quality Certification, and Neuse River Riparian Buffer Authorization** for the proposed replacement of Bridge No. 20 over Dial Creek (Lake Michie) on SR1616 (Bahama Road) in Durham County, North Carolina; TIP No. B-4943; Federal Aid Project No. BRZ-1616(10). Debit $270 from WBS 40110.1.1

Dear Sir:

The North Carolina Department of Transportation (NCDOT) proposes to replace the existing 27-foot, single-span bridge No. 20 with an 89-foot, single-span bridge on a new alignment. Traffic will be maintained on the existing bridge during construction of the replacement structure. The replacement of Bridge No. 20 will result in 0.15 acre of fill in surface water, due predominately to the shift in the causeway. An additional 0.01 acre of fill and mechanized clearing in a wetland will be impacted due to the causeway realignment. There will be 57 linear feet of bank stabilization to the jurisdictional stream portion of Dial Creek for the bridge replacement. Impacts to Neuse River Riparian buffers will result in disturbance of 10,101 square feet in zone 1 and 4,836 square feet in zone 2.

Please see enclosed copies of the Pre-Construction Notification (PCN), permit drawings, stormwater management plan and design plans for the above referenced project. A Programmatic Categorical Exclusion (PCE) was completed in April 2016, and distributed shortly after. Additional copies are available at the NCDOT website: http://207.4.62.65/PDEA/EnvironmentalDocs/

This project calls for a letting date of July 18, 2017 and a review date of May 30, 2017.

Regulatory Approvals

Section 404 Permit: We anticipate that the bridge replacement, including all approach work will be authorized under Section 404 Nationwide Permits 13, 23, and 33 in accordance with Section 404 of the Clean Water Act (33 U.S.C. 1344).

Section 401 Permit: We anticipate 401 General Certification numbers 4087, 4093, and 4094 will apply to this project. NCDOT is requesting written concurrence from the North Carolina Department of

D. Impact Justification and Mitigation

1. Avoidance and Minimization

1a. Specifically describe measures taken to avoid or minimize the proposed impacts in designing project.

NCDOT Design Standards in Sensitive Watersheds will be employed. See Stormwater Management Plans for additional measures.

1b. Specifically describe measures taken to avoid or minimize the proposed impacts through construction techniques.

The proposed bridge is 62 feet longer than the existing bridge; the replacement bridge will be a single span, so no bents in the water; the new bridge will have no deck drains or direct discharge to Dial Creek. Fill slopes of 1.5:1 will be utilized in most of the jurisdictional areas. Traffic will be maintained on the existing bridge during construction.

2. Compensatory Mitigation for Impacts to Waters of the U.S. or Waters of the State

2a. Does the project require Compensatory Mitigation for impacts to Waters of the U.S. or Waters of the State?	☐ Yes ☒ No If no, explain: Compensatory mitigation is not proposed due to minimal jurisdictional impacts.
2b. If yes, mitigation is required by (check all that apply):	☐ DWQ ☐ Corps
2c. If yes, which mitigation option will be used for this project?	☐ Mitigation bank ☐ Payment to in-lieu fee program ☐ Permittee Responsible Mitigation

5b. Have all of the 401 Unit submittal requirements been met?	☐ Yes ☐ No N/A

F. Supplementary Information		
1. Environmental Documentation (DWQ Requirement)		
1a. Does the project involve an expenditure of public (federal/state/local) funds or the use of public (federal/state) land?	☒ Yes	☐ No
1b. If you answered "yes" to the above, does the project require preparation of an environmental document pursuant to the requirements of the National or State (North Carolina) Environmental Policy Act (NEPA/SEPA)?	☒ Yes	☐ No
1c. If you answered "yes" to the above, has the document review been finalized by the State Clearing House? (If so, attach a copy of the NEPA or SEPA final approval letter.) Comments:	☒ Yes	☐ No
2. Violations (DWQ Requirement)		
2a. Is the site in violation of DWQ Wetland Rules (15A NCAC 2H .0500), Isolated Wetland Rules (15A NCAC 2H .1300), DWQ Surface Water or Wetland Standards, or Riparian Buffer Rules (15A NCAC 2B .0200)?	☐ Yes	☒ No
2b. Is this an after-the-fact permit application?	☐ Yes	☒ No
2c. If you answered "yes" to one or both of the above questions, provide an explanation of the violation(s):		
3. Cumulative Impacts (DWQ Requirement)		
3a. Will this project (based on past and reasonably anticipated future impacts) result in additional development, which could impact nearby downstream water quality?	☐ Yes ☒ No	
3b. If you answered "yes" to the above, submit a qualitative or quantitative cumulative impact analysis in accordance with the most recent DWQ policy. If you answered "no," provide a short narrative description. Due to the minimal transportation impact resulting from this bridge replacement, this project will neither influence nearby land uses nor stimulate growth. Therefore, a detailed indirect or cumulative effects study will not be necessary.		
4. Sewage Disposal (DWQ Requirement)		
4a. Clearly detail the ultimate treatment methods and disposition (non-discharge or discharge) of wastewater generated from the proposed project, or available capacity of the subject facility. not applicable		

5. Endangered Species and Designated Critical Habitat (Corps Requirement)		
5a. Will this project occur in or near an area with federally protected species or habitat?	☒ Yes	☐ No
5b. Have you checked with the USFWS concerning Endangered Species Act impacts?	☒ Yes	☐ No
5c. If yes, indicate the USFWS Field Office you have contacted.	☒ Raleigh ☐ Asheville	
5d. What data sources did you use to determine whether your site would impact Endangered Species or Designated Critical Habitat? N.C. Natural Heritage Heritage Program database; USFWS-Raleigh Field Office website; biological surveys for protected species listed for Durham County, which includes smooth coneflower and Michaux's sumac. The species received a Biological Conclusions of "No Effect", however habitat was present. Surveys for the species were conducted on 5/27/15 resulted in no specimens being found. No nesting habitat for bald eagle is present in the vicinity of the project. A programmatic biological opinion (PBO) has been issued for the northern long-eared bat for North Carolina. The PBO covers projects in Divisions 1-8. The programmatic determination for NLEB for this project is "May Affect, Likely to Adversely Affect".		
6. Essential Fish Habitat (Corps Requirement)		
6a. Will this project occur in or near an area designated as essential fish habitat?	☐ Yes	☒ No
6b. What data sources did you use to determine whether your site would impact Essential Fish Habitat? NMFS County Index		
7. Historic or Prehistoric Cultural Resources (Corps Requirement)		
7a. Will this project occur in or near an area that the state, federal or tribal governments have designated as having historic or cultural preservation status (e.g., National Historic Trust designation or properties significant in North Carolina history and archaeology)?	☐ Yes	☒ No
7b. What data sources did you use to determine whether your site would impact historic or archeological resources? NEPA Documentation		
8. Flood Zone Designation (Corps Requirement)		
8a. Will this project occur in a FEMA-designated 100-year floodplain?	☒ Yes	☐ No
8b. If yes, explain how project meets FEMA requirements: NCDOT Hydraulics Unit coordination with FEMA		
8c. What source(s) did you use to make the floodplain determination? FEMA Maps

General Project Narrative: (Description of Minimization of Water Quality Impacts)

State Project B-4943 involves the replacement of existing NCDOT Bridge #310020 on SR 1616 over Dial Creek. Bridge #310020 consists of 1@25.7' timber floor on I-beams with RC vertical abutments. The proposed bridge at #310020 will be 1@85' 33" box beam with 4'-0" caps and sloping abutments. The roadway will be realigned for the placement of the proposed bridge. The proposed bridge will provide more hydraulic opening that the existing bridge. One stormwater outfall is proposed with Rip Rap pad to dissipate energy. No deck drains are required for this bridge. Minimization and avoidance measures incorporated into the design include elimination of direct discharge, increased buffer treatment of discharges, retention of existing bridge abutments to minimize stream impacts and retain stability. Utilized open shoulder design for vegetative shoulder section to obtain water treatment.
