ATTN.: Mr. Steve Lund
NCDOT Coordinator

Subject: **APPLICATION REVISION for Individual Section 404 and 401 permits for TIP R-2616** for the proposed widening of US 601 from the South Carolina State Line to north of Marion Lee Road (SR 2105) south of Monroe in Union County; NCDOT Division 10. Federal Project No. STP-NHS-601(4), State Project No. 8.1690303, WBS Element 34485.1.1.

Dear Sir:

Please reference the July 21, 2005 Individual Permit and subsequent application modification dated October 7, 2005. Due to concerns noted by the North Carolina Division of Water Quality in a request for more information/ on hold notification dated October 17, 2005, changes in the permit drawings were necessary. A response to these concerns was sent to DWQ on February 7, 2006.

A complete set of revised hydraulic (permit) drawings, summary table, and roadway drawings are included in this modification. As impacts to wetlands have increased, an updated Ecosystem Enhancement Program mitigation acceptance letter is attached to this modification.

Below is a description of the changes for each site:

Site 2 (Permit application page 8): The temporary impacts to surface waters for this site have increased by 20 linear feet (from 20' to 40'). This change is necessary for the temporary de-watering activities for the installation of the box culverts.

Site 3 (Permit application page 12): The current sextuple barrel box culvert will be removed and replaced with a bridge. We have subtracted 39 linear feet of permanent

TRANSPORTATION BUILDING
1 SOUTH WILMINGTON STREET
RALEIGH NC

stream impact from the total permanent stream impact for the project for using a spanning structure.

Sites 5 & 6 (Permit application page 18): On the previous impact summary table, the impacts for Sites 5 & 6 were separated into corresponding Left and Right sides of the road, and adjacent wetland impacts were shown with site 6. As the same stream is impacted on the Left and Right sides, the stream impacts have been combined into Site 5, and the wetland impacts are shown solely with Site 6.

The permanent impacts to wetlands have decreased by 0.0011 acre (from 0.015 to 0.004).

The temporary stream impacts have increased by 27 feet (from 11' to 38') due to the temporary de-watering activities for the installation of the box culvert.

Site 7 (Permit application page 18): The permanent stream impacts have increased by 23 feet (from 192' to 215') due to a calculation error.

Site 12 (Permit application page 27): The permanent stream impacts have been reduced by 30 feet (from 320' to 290') due to a calculation error.

Site 13 (Permit application page 29): The temporary stream impacts have increased by 20 feet (from 20' to 40'). This change is necessary for the temporary de-watering activities for the installation of the box culverts.

Site 14 (Permit application page 29): The temporary stream impacts have increased by 30 feet (from 20' to 50'). This change is necessary for the temporary de-watering activities for the installation of the box culverts.

Site 15 (Permit application page 29): The temporary stream impacts have increased by 5 feet (from 24' to 29'). This change is necessary for the temporary de-watering activities for the installation of the box culverts.

Site 16 (Permit application page 37): Due to the installation of a bottomless culvert, we have subtracted 40 feet of permanent stream impact, which will flow on natural substrate.

Site 19 (Permit application page 43): A pond with an adjacent fringe wetland will be drained, thus removing the hydrology from the system. This wetland impact was inadvertently omitted from the original application. This de-watering will result in 0.04 acre of permanent wetland impacts. This de-watering was classified as "excavation" on the attached impact summary table.

Site 22 (Permit application page 49): The permanent stream impacts have increased by 14 feet (from 446' to 460') and temporary impacts have increased by 10 feet (from 20' to 30') due to a calculation error.

Site 23 (Permit application page 51): The permanent wetland impacts have increased by 0.09 acre (from 0.02 to 0.110 acre) due to a calculation error.

Site 24 (Permit application page 53): The temporary stream impacts have increased by 10 feet (from 20' to 30'). This change is necessary for the temporary de-watering activities for the installation of the box culverts.

The above changes are summarized below:

- 0.119 acre of additional permanent fill in wetlands
- Stream impact changes are found below:

Stream totals for July 2005 Application	Stream totals after October 2005 Application Modification	Stream totals after February 2006 Application Modification
2,969'	-185' = 2,784'	7 feet of additional permanent stream impact minus 79 feet of culvert removal. = 2,712'

- 122 feet of additional temporary surface water impact

Thank you for your assistance with this project. If you have any questions or need additional information, please contact Mr. Michael Turchy at maturchy@dot.state.nc.us or (919) 715-1468. A copy of this application will also be posted at http://www.doh.dot.state.nc.us/preconstruct/pe/.

Sincerely,

Gregory J. Thorpe, Ph.D., Environmental Management Director

Ecosystem Enhancement PROGRAM

January 31, 2006

Mr. Steve Lund
U. S. Army Corps of Engineers
Asheville Regulatory Field Office
151 Patton Avenue, Room 208
Asheville, North Carolina 28801-5006

Dear Mr. Lund:

Subject: EEP Mitigation Acceptance Letter:

R-2616, US 601 Widening, Union County; Yadkin River Basin (CU 03040105); Southern Piedmont (SP) Eco-Region

The purpose of this letter is to notify you that the Ecosystem Enhancement Program (EEP) will provide mitigation for the unavoidable impacts associated with the above referenced project. The impacts as reported by the NCDOT are as follows:

Riverine Wetland Impacts:	0.075 acre
Non-Riverine Wetland Impacts:	0.260 acre
Stream Impacts:	2,712 feet

This mitigation strategy letter replaces the mitigation strategy letter issued on July 19, 2005. The subject project is not listed in Exhibit 2 of the Memorandum of Agreement among the North Carolina Department of Environment and Natural Resources, the North Carolina Department of Transportation, and the U. S. Army Corps of Engineers, Wilmington District dated July 22, 2003. This project was accelerated and included in the NCDOT's Design Build Program.

Currently, EEP has surplus stream mitigation with sufficient assets to cover this years projected mitigation requirements plus the mitigation for the above referenced project. Therefore, the EEP intends to provide compensatory stream mitigation up to a 2:1 ratio in Cataloging Unit 03040105 of the Yadkin River Basin. Mitigation sites currently containing surplus stream mitigation assets consists of, but not inclusive of, the Camp Branch @ Bishop, Afton Run, Back Creek, and Helms Mitigation Sites.

SECTION A-A

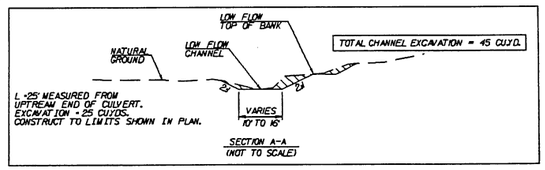
NOTES:
1. ALL STONES ARE TO BE STRUCTURE STONE.
2. GAPS BETWEEN BOULDERS SHALL BE MINIMIZED BY FITTING BOULDERS TOGETHER, PLUGGING WITH STRUCTURE STONE CLASS A AND NO.57 AND LINING WITH FILTER FABRIC.
3. DIMENSIONS AND SLOPES MAY BE ADJUSTED TO FIT BY THE ENGINEER.
4. A DOUBLE FOOTER BOULDER SHALL BE UTILIZED IN SAND BED MATERIAL.
5. FOOTER BOULDERS AND SILL BOULDERS SHALL BE NATIVE STONE OR SHOT ROCK, CUBICAL OR RECTANGULAR IN NATURE.
6. ACCEPTABLE BOULDERS SHALL HAVE THE FOLLOWING MINIMUM DIMENSIONS; 3' X 2' X 1'.



SECTION A-A

PLAN VIEW

ROCK INLET SILL
SCALE: NTS

FILTER FABRIC SHALL BE PLACED ON THE UPSTREAM SIDE OF THE STRUCTURE TO PREVENT WASHOUT OF SEDIMENT THROUGH BOULDER GAPS. FILTER FABRIC SHALL EXTEND FROM THE BOTTOM OF THE FOOTER BOULDER TO THE FINISHED GRADE ELEVATION AND SHALL BE PLACED THE ENTIRE LENGTH OF STRUCTURE.

NOTES:
1. ALL STONES ARE TO BE STRUCTURE STONE.
2. GAPS BETWEEN BOULDERS SHALL BE MINIMIZED BY FITTING BOULDERS TOGETHER, PLUGGING WITH STRUCTURE STONE CLASS A AND NO.57 AND LINING WITH FILTER FABRIC.
3. DIMENSIONS AND SLOPES MAY BE ADJUSTED TO FIT BY THE ENGINEER.
4. A DOUBLE FOOTER BOULDER SHALL BE UTILIZED IN SAND BED MATERIAL.
5. FOOTER BOULDERS AND SILL BOULDERS SHALL BE NATIVE STONE OR SHOT ROCK, CUBICAL OR RECTANGULAR IN NATURE.
6. ACCEPTABLE BOULDERS SHALL HAVE THE FOLLOWING MINIMUM DIMENSIONS; 3' X 3' X 1'.

DATUM DESCRIPTION

THE LOCALIZED COORDINATE SYSTEM DEVELOPED FOR THIS PROJECT IS BASED ON THE STATE PLANE COORDINATES ESTABLISHED BY NCDOT FOR MONUMENT "R2616-13"
WITH NAD 1983/95 STATE PLANE GRID COORDINATES OF NORTHING: 418037.380(ft) EASTING: 1562547.518(ft)
THE AVERAGE COMBINED GRID FACTOR USED ON THIS PROJECT (GROUND TO GRID) IS: 0.99986650
THE N.C. LAMBERT GRID BEARING AND LOCALIZED HORIZONTAL GROUND DISTANCE FROM "R2616-13" TO -L- STATION POC 17+71.00 IS S 23°56'23.87" E 29.167.77'
ALL LINEAR DIMENSIONS ARE LOCALIZED HORIZONTAL DISTANCES
VERTICAL DATUM USED IS NAVD 88

THE DESIGN BUILD TEAM WILL COORDINATE THE ALIGNMENT OF R-2616 WITH THE EXISTING ALIGNMENT OF SCDOT PROJECT NO. BNH-PDCB(004)

THIS IS A PARTIAL CONTROLLED ACCESS PROJECT WITH ACCESS BEING LIMITED TO ONE ENTRANCE PER PROPERTY

PROPERTIES WITH GREATER THAN 300' OF FRONTAGE MAY RECEIVE ADDITIONAL ACCESS POINTS

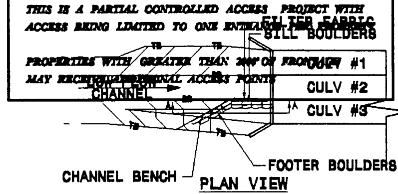
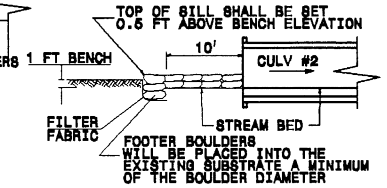
THIS IS A PARTIAL CONTROLLED ACCESS PROJECT WITH ACCESS BEING LIMITED TO ONE ENTRANCE PER PROPERTY.

PROPERTIES WITH GREATER THAN 300' OF FRONTAGE MAY RECEIVE ADDITIONAL ACCESS POINTS



ROCK INLET SILL
SCALE: NTS

FILTER FABRIC SHALL BE PLACED ON THE UPSTREAM SIDE OF THE STRUCTURE TO PREVENT WASHOUT OF SEDIMENT THROUGH BOULDER GAPS. FILTER FABRIC SHALL EXTEND FROM THE BOTTOM OF THE FOOTER BOULDER TO THE FINISHED GRADE ELEVATION AND SHALL BE PLACED THE ENTIRE LENGTH OF STRUCTURE.



SECTION A-A

NOTES:
1. ALL STONES ARE TO BE STRUCTURE STONE.
2. GAPS BETWEEN BOULDERS SHALL BE MINIMIZED BY FITTING BOULDERS TOGETHER, PLUGGING WITH STRUCTURE STONE CLASS A AND NO.57 AND LINING WITH FILTER FABRIC.
3. DIMENSIONS AND SLOPES MAY BE ADJUSTED TO FIT BY THE ENGINEER.
4. A DOUBLE FOOTER BOULDER SHALL BE UTILIZED IN SAND BED MATERIAL.
5. FOOTER BOULDERS AND SILL BOULDERS SHALL BE NATIVE STONE OR SHOT ROCK, CUBICAL OR RECTANGULAR IN NATURE.
6. ACCEPTABLE BOULDERS SHALL HAVE THE FOLLOWING MINIMUM DIMENSIONS; 3' x 2' x 1'.

	5" MONOLITHIC ISLAND
	FULL DEPTH PAVED SHOULDER
	PAVEMENT REMOVAL

SECTION A-A

FILTER FABRIC SHALL BE PLACED ON THE UPSTREAM SIDE OF THE STRUCTURE TO PREVENT WASHOUT OF SEDIMENT THROUGH BOULDER GAPS. FILTER FABRIC SHALL EXTEND FROM THE BOTTOM OF THE FOOTER BOULDER TO THE FINISHED GRADE ELEVATION AND SHALL BE PLACED THE ENTIRE LENGTH OF STRUCTURE.

PLAN VIEW

ROCK INLET SILL

SCALE: NTS

NOTES:
1. ALL STONES ARE TO BE STRUCTURE STONE.
2. GAPS BETWEEN BOULDERS SHALL BE MINIMIZED BY FITTING BOULDERS TOGETHER, PLUGGING WITH STRUCTURE STONE CLASS A AND NO.57 AND LINING WITH FILTER FABRIC.
3. DIMENSIONS AND SLOPES MAY BE ADJUSTED TO FIT BY THE ENGINEER.
4. A DOUBLE FOOTER BOULDER SHALL BE UTILIZED IN SAND BED MATERIAL.
5. FOOTER BOULDERS AND SILL BOULDERS SHALL BE NATIVE STONE OR SHOT ROCK, CUBICAL OR RECTANGULAR IN NATURE.
6. ACCEPTABLE BOULDERS SHALL HAVE THE FOLLOWING MINIMUM DIMENSIONS; 3' x 2' x 1'.

SEE SHEET 66 FOR -L- PROFILE.
