Pre-Construction Notification (PCN) Form

For Nationwide Permits and Regional General Permits

(along with corresponding Water Quality Certifications)

September 29, 2018 Ver 3

*Please note: fields marked with a red asterisk * below are required. You will not be able to submit the form until all mandatory questions are answered.*

Also, if at any point you wish to print a copy of the E-PCN, all you need to do is right-click on the document and you can print a copy of the form.

Below is a link to the online help file.

A. Processing Information

County (or Counties) where the project is located:*

Wake

Is this project a public transportation project?*

(•) Yes ( ) No

This is any publicly funded by municipal,state or federal funds road, rail, airport transportation project.

Is this a NCDOT Project?*

(•) Yes ( ) No

(NCDOT only) T.I.P. or state project number:

B-5326

WBS #*

46040.1.1

(for NCDOT use only)

1a. Type(s) of approval sought from the Corps:*

[x] Section 404 Permit (wetlands, streams and waters, Clean Water Act)

[ ] Section 10 Permit (navigable waters, tidal waters, Rivers and Harbors Act)

1b. What type(s) of permit(s) do you wish to seek authorization?*

[x] Nationwide Permit (NWP)

[ ] Regional General Permit (RGP)

[ ] Standard (IP)

This form may be used to initiate the standard/individual permit process with the Corps. Please contact your Corps representative concerning submittals for standard permits. All required items that are not provided in the E-PCN can be added to the miscellaneous upload area located at the bottom of this form.

1c. Has the NWP or GP number been verified by the Corps?*

(•) Yes ( ) No

Nationwide Permit (NWP) Number: 03 - Maintenance

NWP Numbers (for multiple NWPS):

List all NW numbers you are applying for not on the drop down list.

1d. Type(s) of approval sought from the DWR:*

[x] 401 Water Quality Certification - Regular

[ ] Non-404 Jurisdictional General Permit

[ ] Individual Permit

[ ] 401 Water Quality Certification - Express

[x] Riparian Buffer Authorization

1e. Is this notification solely for the record because written approval is not required?

*

For the record only for DWR 401 Certification: ( ) Yes (•) No

For the record only for Corps Permit: (•) Yes ( ) No

1f. Is this an after-the-fact permit application?*

( ) Yes (•) No

1g. Is payment into a mitigation bank or in-lieu fee program proposed for mitigation of impacts?

If so, attach the acceptance letter from mitigation bank or in-lieu fee program.

○ Yes ◉ No

4. Project Description and History

4a. Describe the existing conditions on the site and the general land use in the vicinity of the project at the time of this application: *

Land use is comprised of a mix of residential, commercial, industrial, and wooded communities.

4b. Have Corps permits or DWR certifications been obtained for this project (including all prior phases) in the past? *

○ Yes ◉ No ○ Unknown

4d. Attach an 8 1/2 X 11 excerpt from the most recent version of the USGS topographic map indicating the location of the project site. (for DWR)

File type must be pdf

4f. List the total estimated acreage of all existing wetlands on the property:

0.5 acre

4g. List the total estimated linear feet of all existing streams on the property:

(intermittent and perennial)

500 linear feet

4h. Explain the purpose of the proposed project: *

To replace a functionally obsolete and structurally deficient bridge.

4i. Describe the overall project in detail, including indirect impacts and the type of equipment to be used: *

The project involves replacing a 36-foot, two span bridge with a 150-foot, three span bridge on existing alignment using an on-site detour. Standard road building equipment, such as trucks, dozers, and cranes will be used.

4j. Please upload project drawings for the proposed project.

Click the upload button or drag and drop files here to attach document

File type must be pdf

5. Jurisdictional Determinations

5a. Have the wetlands or streams been delineated on the property or proposed impact areas? *

◉ Yes ○ No ○ Unknown

Comments:

5b. If the Corps made a jurisdictional determination, what type of determination was made? *

(•) Preliminary ( ) Approved ( ) Not Verified ( ) Unknown ( ) N/A

Corps AID Number:

Example: SAW-2017-99999

SAW-2013-01348

5c. If 5a is yes, who delineated the jurisdictional areas?

Name (if known): Jason Dilday

Agency/Consultant Company: NCDOT

Other:

5d. List the dates of the Corp jurisdiction determination or State determination if a determination was made by the Corps or DWR.

6. Future Project Plans

6a. Is this a phased project? *

( ) Yes (•) No

Are any other NWP(s), regional general permit(s), or individual permits(s) used, or intended to be used, to authorize any part of the proposed project or related activity? This includes other separate and distant crossing for linear projects that require Department of the Army authorization but don't require pre-construction notification.

E. Impact Justification and Mitigation

1. Avoidance and Minimization

1a. Specifically describe measures taken to avoid or minimize the proposed impacts in designing the project: *

NCDOT Design Standards in Sensitive Watersheds will be employed. See Stormwater Management Plan for additional measures.

1b. Specifically describe measures taken to avoid or minimize the proposed impacts through construction techniques: *

The replacement structure will not have deck drains. All bridge drainage will discharge outside of the buffers. Velocities of stormwater are reduced to non-erosive flows through the use of riprap pads and 'V' ditches. 2:1 slopes will be used in wetlands.

2. Compensatory Mitigation for Impacts to Waters of the U.S. or Waters of the State

2a. Does the project require Compensatory Mitigation for impacts to Waters of the U.S. or Waters of the State?

○ Yes ◉ No

2b. If this project DOES NOT require Compensatory Mitigation, explain why:

Impacts to jurisdictional streams and wetlands within the project area do not require mitigation. Permanent impacts to streams are due to bank stabilization and do not require mitigation. Permanent impacts to wetlands are less than 0.1 acre. Mitigation is required for buffer impacts.

NC Stream Temperature Classification Maps can be found under the Mitigation Concepts tab on the Wilmington District's RIBITS website.

F. Stormwater Management and Diffuse Flow Plan (required by DWR)

*** Recent changes to the stormwater rules have required updates to this section .***

1. Diffuse Flow Plan

1a. Does the project include or is it adjacent to protected riparian buffers identified within one of the NC Riparian Buffer Protection Rules?

◉ Yes ○ No

1b. All buffer impacts and high ground impacts require diffuse flow or other form of stormwater treatment. If the project is subject to a state implemented riparian buffer protection program, include a plan that fully documents how diffuse flow will be maintained.

All Stormwater Control Measures (SCM)s must be designed in accordance with the NC Stormwater Design Manual. Associated supplement forms and other documentation shall be provided.

What type of SCM are you providing?

- ☐ Level Spreader
- ☐ Vegetated Conveyance (lower SHWT)
- ☐ Wetland Swale (higher SHWT)
- ☐ Other SCM that removes minimum 30% nitrogen
- ☐ Proposed project will not create concentrated stormwater flow through the buffer

(check all that apply)

2. Stormwater Management Plan

2a. Is this a NCDOT project subject to compliance with NCDOT's Individual NPDES permit NCS000250? *

○ Yes ◉ No

2b. Does this project meet the requirements for low density projects as defined in 15A NCAC 02H .1003(2)? *

◉ Yes ○ No

To look up low density requirement click here 15A NCAC 02H .1003(2).

2. Violations (DWR Requirement)

2a. Is the site in violation of DWR Water Quality Certification Rules (15A NCAC 2H .0500), Isolated Wetland Rules (15A NCAC 2H .1300), or DWR Surface Water or Wetland Standards or Riparian Buffer Rules (15A NCAC 2B .0200)? *

( ) Yes (•) No

3. Cumulative Impacts (DWR Requirement)

3a. Will this project (based on past and reasonably anticipated future impacts) result in additional development, which could impact nearby downstream water quality? *

( ) Yes (•) No

3b. If you answered "no," provide a short narrative description.

Due to the minimal transportation impact resulting from this bridge replacement, this project will neither influence nearby land uses nor stimulate growth. Therefore, a detailed indirect or cumulative effects study will not be necessary.

4. Sewage Disposal (DWR Requirement)

4a. Is sewage disposal required by DWR for this project? *

( ) Yes ( ) No (•) N/A

5. Endangered Species and Designated Critical Habitat (Corps Requirement)

5a. Will this project occur in or near an area with federally protected species or habitat? *

(•) Yes ( ) No

5b. Have you checked with the USFWS concerning Endangered Species Act impacts? *

(•) Yes ( ) No

5c. If yes, indicate the USFWS Field Office you have contacted.

5e. Is this a DOT project located within Division's 1-8? *

(•) Yes ( ) No

5j. What data sources did you use to determine whether your site would impact Endangered Species or Designated Critical Habitat? *

N.C. Natural Heritage Program database; USFWS-Raleigh Field Office website; biological surveys for protected species listed for Wake County, which include red-cockaded woodpecker (RCW), dwarf wedgemussel, Tar River spinymussel, yellow lance, Cape Fear shiner and Michaux's sumac. The species received biological conclusions of "No Effect". No habitat is present for RCW, Cape Fear shiner, or the three listed mussels. Habitat for Michaux's sumac exists, however no specimens were observed during a 9/22/2017 survey. There were no bald eagles or nest observed within 660 feet of the project area on 9/22/2017. General Project Narrative: (Description of Minimization of Water Quality Impacts)

State project B-5326 involves the replacement of Wake County Bridge 247 over White Oak Creek. The existing bridge consists of 2@18'-0" reinforced concrete deck on timber joists. It is to be replaced with a three span bridge (1@40', 1@70', and 1@40') with 21"/24"/21" cored slabs 51' wide (out to out) at the existing location. To facilitate the construction of the proposed bridge, an onsite detour is proposed on the upstream side of SR 2555 (Raynor Rd.).

The project includes 0.13mi of proposed roadway improvements on each end of the bridge. In accordance with Neuse River Buffer Regulations, the proposed bridge does not have deck drains and all bridge drainage is discharges outside of the buffer zones at -L- Sta. 16+70 LT in the Northwest Quadrent. The drainage is conveyed by 15" CMP with elbows that will outlet at 0% slope onto a Class 'B" RipRap Pad to minimize discharge velocity prior to the flow entering the adjacet wetlands. Additional outfalls due to the addition of Curb and Gutter have been added. At -L- 14+68 LT the drainage is conveyed by 15" another CMP with elbows that will outlet at 0% slope onto a Class 'B" RipRap Pad again to minimize discharge velocity prior to the flow entering the adjacet wetlands. At -L- Sta. 10+66 and 12+60 LT in the Northwest quadrent the drainage outfall is conveyed to the adjactent wetlands via a Standard 'V' Ditch which is designed with 0% slope for the last 25' to minimize discharge velocity prior to the flow entering the wetlands. Line ahead of the bridge at roughly -L- Sta. 18+70 LT, the southeast quadrent, drainage is collected prior to the bridge and discharged into the RipRap lined lateral ditches. The drainage structures were placed as close as possible to the approach slab to minimize spread on the bridge and ultimatly minimize bridge width. This resulted in the left side outlet being within Buffer Zone 2, however, since the ditch is RipRap lined there would be no grass swale treatement no matter where the outlet was placed. This design provides filtration in accordance with NCDOT Alternative Design Criteria.

NOTES:
All Surface Water Impacts (Detour and Mainline) are to remain after construction and therefore are all quantified and accounted for on sheets 2 & 3 and not quantified as detour impacts.
Linear Impacts are shown such that they do not double count due to impacts on both sides of the stream.
