69 Darlington Avenue  
Wilmington, North Carolina 28403

ATTN: Ms. Liz Hair  
NCDOT Coordinator

Subject: **Request for Modification to Individual Section 404 and Section 401 Water Quality Certification** for Fayetteville Outer Loop from I-95 South of Fayetteville to NC 24-87, Cumberland, Hoke, and Robeson Counties. Federal Aid Project No. NHP-0620(031), TIP Nos. X-0002 B & C, and U-2519 AA, AB, BA, BB, CA, CB, DA, & E. WBS 34817.3.13

References: Section 404 Individual Permit issued October 23, 2008 (SAW-2008-01413)  
Section 401 Water Quality Certification issued October 6, 2008 (20080737)

Dear Madam:

The purpose of this modification request is to address small design changes to the U-2519 BA project that have resulted in a slight increase to the project impacts.

As you are aware, several sections of X-0002 B & C and U-2519 are constructed or currently under construction. U-2519 BA is an approximately 3.77 mile section of the Fayetteville Outer Loop that begins south of SR 1003 (Camden Road) and extends to south of SR 1104 (Strickland Bridge Road). U-2519 BB is an approximately 1.25 mile section of the Fayetteville Outer Loop that begins south of SR 1104 (Strickland Bridge Road) and extends to south of US 401.

Several changes have been made to the design plans that affect proposed wetland impact totals for U-2519BA. These changes were in the area of Camden Road (SR 1003), affecting permit site 2B. Fill in wetlands increases from 0.11 to 0.12 acre and mechanized land clearing from 0.05 to 0.09 acre, for a total increase of 0.05 acre of permanent wetland impact. Revised permit drawings are included with this modification request.

Surveys for all federally-protected species listed for Cumberland County were updated in 2020 and 2021 (2021 update report attached). A biological conclusion of "No Effect" remains current for all species except the red-cockaded woodpecker (RCW) and the northern long-eared bat. A Biological Opinion was issued on April 28, 2005; however, the 2016 report for sections U-2519 BA & BB states that "no RCW cavity trees will be impacted or 'taken' by the project."

RALEIGH, NC 27610

*Website:* [www.ncdot.gov](http://www.ncdot.gov)

The US Fish and Wildlife Service has revised the previous programmatic biological opinion (PBO) in conjunction with the Federal Highway Administration (FHWA), the US Army Corps of Engineers (USACE), and NCDOT for the northern long-eared bat (NLEB) (*Myotis septentrionalis*) in eastern North Carolina. The PBO covers the entire NCDOT program in Divisions 1-8, including all NCDOT projects and activities. Although this programmatic covers Divisions 1-8, NLEBs are currently only known in 22 counties, but may potentially occur in 8 additional counties within Divisions 1-8. NCDOT, FHWA, and USACE have agreed to two conservation measures which will avoid/minimize mortality of NLEBs. These conservation measures only apply to the 30 current known/potential counties shown on Figure 2 of the PBO at this time. The programmatic determination for NLEB for the NCDOT program is **May Affect, Likely to Adversely Affect**. The PBO will ensure compliance with Section 7 of the Endangered Species Act for ten years (effective through December 31, 2030) for all NCDOT projects with a federal nexus in Divisions 1-8, which includes Cumberland County, where U-2519 BA & BB are located.

### **Compensatory Mitigation**

Compensatory mitigation for the updated total of 7.16 acres of permanent wetland impacts for U-2519 BA has been debited from the Privateer Wetland and Stream Mitigation Site. A revised debit ledger for the Privateer Wetland and Stream Mitigation Site is attached to this modification request.

### **Utility Impacts**

At this time, no changes are proposed to utility work on this section that would involve wetland or stream impacts.

### **Regulatory Approvals**

U-2519 BA & BB have a combined letting date of June 21, 2022

Section 404: We are hereby requesting the modifications described above for the USACE Individual 404 Permit signed October 23, 2008 (SAW-2008-01413), for the above-described activities.

Section 401: We are hereby requesting a modification to the 401 Water Quality Certification from the NCDWR issued October 6, 2008 (DWQ No. 003278). In compliance with Section 143-215.3D(e) of the NCAC, please debit \$570.00 from WBS 34817.1.FR7 for processing the Section 401 permit modification.

A copy of this modification request and its distribution list will be posted on the NCDOT website at: <https://xfer.services.ncdot.gov/pdea/PermApps/>

Thank you for your assistance with this project. If you have any questions or need additional information, please contact Gordon Cashin at 919-707-6107 or [gcashin@ncdot.gov](mailto:gcashin@ncdot.gov).

Sincerely,

DocuSigned by:

WM 026-005**

The Privateer Farms Restoration Site (Site) is located in Bladen and Cumberland Counties, North Carolina, approximately fourteen miles southeast of Fayetteville. Prior to restoration, land use on the Site over the past 20 years had been primarily row crop agriculture. Stream and riparian functions on the Site had been severely impacted as a result of agricultural conversion. Harrison Creek had historically meandered through the Site, but was channelized in the early 1980s to reduce flooding and provide a drainage outlet for the extensive network of ditches excavated across the Site. Subsequent to channelization, Harrison Creek existed as a large canal running straight through the Site.

Restoration activities for the Site involved moving the stream channel back to its historic location and elevation, and filling drainage ditches to raise the local water table and restore wetland and stream hydrology. The plan also included scarification of the fields and breaking of the local plow pan to increase surface water storage and provide a range of hydrologic conditions suitable for a variety of native wetland plant species. The restoration plan for the Site predicted the restoration of 405 acres of riverine wetlands, 25 acres of riverine wetland enhancement, and 33,985 linear feet (LF) of stream restoration. Following construction, the as-built data indicated that the total area of restored riverine wetlands was 402.5 acres (excluding 2.5 acres for road accesses), with 25 acres of enhanced riverine wetlands, and 34,005 LF of restored stream channel.

As of fall 2009, the Site has met all prescribed hydrologic and vegetative monitoring criteria and been recommended for closeout.

To offset unavoidable wetland and stream impacts associated with T.I.P. U-2519 BA/BB, the Privateer Mitigation Site will be debited 1 ac of Riparian wetland for 1 acre of Riparian wetland impact, 21.33 acres of Riparian Wetland for 7.11 acre of non-riparian wetland impact, and 2142 linear feet of stream for 1428 linear of stream impacts. These debits and credits are reflected in the following ledger.

HUC	Mitigation Type	Starting Amount	Additional Notes
3030004	Stream Restoration	25676	**Out of service area ratios: 1.5:1 ratio for stream impacts 3:1 for wetland impacts
3030004	Riparian Wetland Restoration	185.58	**Out of service area ratios: 1.5:1 ratio for stream impacts 3:1 for wetland impacts

<b>TOTALS*:</b>			6.40	< 0.01	0.20	0.56	0.60	0.13	0.04	518	26	0

\*Rounded totals are sum of actual impacts

NOTES:

1. INCLUDES -Y13- DETOUR IMPACTS
2. SUMMARIZES BRIDGE & TEMPORARY WORK BRIDGE IMPACTS: PERMANENT FILL IN WETLAND IMPACT DUE TO THE PROPOSED BENTS IS 130.7 SQ. FT (<0.01 ac) (INCLUDED ABOVE)  
TEMPORARY IMPACTS DUE TO THE TEMPORARY WORK BRIDGE IS 350 SQ. FT (<0.01 ac) (INCLUDED ABOVE)
