ARCHAEOLOGICAL SURVEY REQUIRED FORM

This form only pertains to ARCHAEOLOGICAL RESOURCES for this project. It is not valid for Historic Architecture and Landscapes. You must consult separately with the Historic Architecture and Landscapes Group.

PROJECT INFORMATION

Project No: **Str. #480282** County: **Iredell**
 WBS No: **17BP.12.R.32** Document: **PCE or MCC**
 F.A. No: **na** Funding: ☒ State ☐ Federal
 Federal Permit Required? ☒ Yes ☐ No Permit Type: **NWP 3, NWP 14, TVA**

Project Description: NCDOT intends to replace Bridge No. 282 on SR 1828, Barnard Mill Road, over North Hunting Creek. The proposal calls for the replacement of the bridge in its existing location and at the existing alignment with minor changes to right-of-way (ROW). For the purposes of the current review the Area of Potential Effects (APE) is considered to extend 300 feet (91.44 meters) from either end of the bridge and 75 feet (22.86 meters) out from centerline. Thus, the APE encompasses more than 1.03 acres (approximately .42 hectares).

SUMMARY OF ARCHAEOLOGICAL RESOURCES REVIEW: *SURVEY REQUIRED*

Brief description of review activities, results of review, and conclusions:

A review of the site maps and files archived at the North Carolina Office of State Archaeology was conducted on September 9, 2013. No previously identified archaeological resources are recorded within the APE as defined above; but, the APE does extend inside the boundary of the National Register of Historic Places-listed Welch-Nicholson House and Mill Site property. The house and mill were built in the late 18th Century and were determined as eligible for the NRHP, in part, for their association with the agrarian economy and milling industry of the region in that period. The house site which is assumed to be no longer extant, and the mill site, which burned in 1968 are both almost certainly well outside the current APE for the project. Nevertheless, an archaeological survey to establish the location and significance of any associated archaeological deposits or cultural features is necessary.

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:12,000.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service
Web Soil Survey URL: <http://websoilsurvey.nrcs.usda.gov>
Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Iredell County, North Carolina
Survey Area Data: Version 18, Jul 6, 2012

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Oct 22, 2010—Apr 30, 2011

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

Map Unit Legend

Iredell County, North Carolina (NC097)			
Map Unit Symbol	Map Unit Name	Acres in AOI	Percent of AOI
CmC2	Clifford sandy clay loam, 6 to 10 percent slopes, moderately eroded	0.5	3.0%
DaA	Dan River and Comus soils, 0 to 4 percent slopes, occasionally flooded	1.3	7.9%
FaE	Fairview sandy loam, 15 to 25 percent slopes	4.9	29.9%
FrD2	Fairview sandy clay loam, 10 to 15 percent slopes, moderately eroded	4.1	25.3%
RhF	Rhodhiss-Stott Knob complex, 25 to 60 percent slopes, stony	3.9	23.7%
W	Water	1.6	10.1%
WfD2	Woolwine-Fairview-Westfield complex, 8 to 15 percent slopes, moderately eroded	0.0	0.1%
Totals for Area of Interest		16.3	100.0%
