MEMORANDUM TO: Jamie J. Lancaster, PE
Project Executive
Priority Projects Unit

FROM: Terry W. Fox, LG *TWF*
GeoEnvironmental Project Manager
GeoEnvironmental Section
Geotechnical Engineering Unit

TIP NO: B-5778
WBS: 45734.1.1
COUNTY: Rowan
DIVISION: 9
DESCRIPTION: Bridge 61 over Fourth Creek on NC 801

SUBJECT: **GeoEnvironmental Report for Planning**

The GeoEnvironmental Section has completed the GeoEnvironmental Report for Planning. This report has the following components and is transmitted as:

 X Hazardous Materials Report (5) pages

Please contact me if you have any questions concerning this project.

Hazardous Materials Report

The GeoEnvironmental Section of the Geotechnical Engineering Unit has investigated the above referenced project to identify hazardous material sites for inclusion in the environmental document.

HAZARDOUS MATERIALS EVALUATION

Purpose

This section presents the results of a hazardous material evaluation conducted along the above referenced project. The main purpose of this investigation is to identify properties within the project study area that are or may be contaminated and therefore result in increased project costs and future liability if acquired by the Department. Hazardous material impacts may include, but are not limited to, active and abandoned underground storage tank (UST) sites, hazardous waste sites, regulated landfills and unregulated dumpsites.

Techniques/Methodologies

The Geographical Information System (GIS) was consulted to identify known sites of concern in relation to the project corridor. GeoEnvironmental Section staff conducted a field reconnaissance within the project limits on February 24, 2016. A search of appropriate environmental agencies' databases was performed to assist in evaluating sites identified during this study.

Findings

UST Facilities

One (1) petroleum site was identified within the project limits.

Hazardous Waste Sites

No Hazardous Waste Sites were identified within the project limits.

Landfills

No apparent landfills were identified within the project limits.

Other GeoEnvironmental Concerns

No other geoenvironmental concerns were identified within the project limits.

Anticipated Impacts

The GeoEnvironmental Section observed one (1) petroleum site, a former gas station, during the field reconnaissance and regulatory agencies' records search.

1)	Property Name Former Store 1430 NC 810 Woodleaf, NC 27054	Property Owner John & Kay Head 1539 Old Mocksville Road Statesville, NC 28625
----	---	---

This closed store and possible former gas station is located on the northwest side of NC 801 and 0.1 miles northeast of the Wetmore Road intersection. This property does not appear on the UST Section Registry. No Ground Water Incidents are associated with this location. **This site is anticipated to present low geoenvironmental impacts to the project.**

Please note that discovery of additional sites not recorded by regulatory agencies and not reasonably discernible during the project reconnaissance may occur. The GeoEnvironmental Section should be notified immediately after discovery of such sites so their potential impact(s) may be assessed.

If there are questions regarding the geoenvironmental issues, please contact me, at 919-707-6870.
