SUMMARY OF HISTORIC ARCHITECTURE AND LANDSCAPES REVIEW

<u>Description of review activities, results, and conclusions:</u> Review of HPO quad maps, HPO GIS information, historic designations roster, and indexes was undertaken on September 17, 2019. Based on this review, there are no existing NR, SL, LD, DE, or SS properties in the Area of Potential Effects, which is defined on the following maps. There are no properties over fifty years of age within the APE that warrant further evaluation after a visual inspection of the APE. There are no National Register listed or eligible properties and no survey is required. If design plans change, additional review will be required. <u>Why the available information provides a reliable basis for reasonably predicting that there are no unidentified significant historic architectural or landscape resources in the project area:</u> HPO quad maps and GIS information recording NR, SL, LD, DE, and SS properties for the Wilkes County survey, Wilkes County GIS/Tax information, and Google Maps are considered valid for the purposes of determining the likelihood of historic resources being present. There are no National Register listed or eligible properties within the APE and no survey is required.
