SUMMARY OF HISTORIC ARCHITECTURE AND LANDSCAPES REVIEW

<u>Description of review activities, results, and conclusions:</u> Review of HPO quad maps, relevant background reports, historic designations roster, and indexes was undertaken on September 19, 2019. Based on this review there are no NR, DE, LL, SL or SS in the Area of Potential Effects (APE). Aerial photos and Alleghany tax record indicates a c. 1935 house. A site visit confirmed that this house has been demolished. There are no structures over 50 years of age in the APE, other than Alleghany Bridge No. 35 which was constructed in 1970. No Survey is required at this time. <u>Why the available information provides a reliable basis for reasonably predicting that there are no unidentified significant historic architectural or landscape resources in the project area:</u> Using HPO GIS website and county tax data provides reliable information regarding the structures in the APE. These combined utilities are considered valid for the purposes of determining the likelihood of historic resources being present.
