SUMMARY OF HISTORIC ARCHITECTURE AND LANDSCAPES REVIEW

Description of review activities, results, and conclusions:

Review of HPO quad maps, relevant background reports, historic designations roster, and indexes was undertaken on March 7, 2017. Based on this review there are no NR, DE, LL, or SL in the Area of Potential Effects (APE). There are no standing structures in the APE which are greater than 50 years of age. Columbus County Bridge No. 188, built in 1956, does not exemplify any distinctive engineering or aesthetic type and is not eligible for the National Register of Historic Places. No survey is required.

Why the available information provides a reliable basis for reasonably predicting that there are no unidentified significant historic architectural or landscape resources in the project area:

Using HPO GIS website and county tax data provides reliable information regarding the structures in the APE. These combined utilities are considered valid for the purposes of determining the likelihood of historic resources being present.
