Re: Notice of No Further Action
15A NCAC 2L .0407(d)
Risk-based Assessment and Corrective Action
for Petroleum Underground Storage Tanks

Mary Brittain Property
200 Enola Road, Morganton
Burke County
Incident Number: 29008
Risk Classification: Low

Dear Mr. Fox:

The UST Closure Report received by the UST Section, Asheville Regional Office on January 13, 2012 has been reviewed. The review indicates that after excavation and disposal of contaminated soil, any remaining soil contamination does not exceed the residential maximum soil contaminant concentrations (MSCCs), established in Title 15A NCAC 2L .0411.

The UST Section determines that no further action is warranted for this incident. This determination shall apply unless the UST Section later finds that the discharge or release poses an unacceptable risk or a potentially unacceptable risk to human health or the environment. Pursuant to Title 15A NCAC 2L .0407(a) you have a continuing obligation to notify the Department of any changes that might affect the risk or land use classifications that have been assigned.

This No Further Action determination applies only to the subject incident; for any other incidents at the subject site, the responsible party must continue to address contamination as required.

If you have any questions regarding this notice, please contact me at the address or telephone number listed below.

Sincerely,

Dan Murphy, L.G.
Hydrogeologist
