

“All bidders are hereby notified that the report entitled “Geotechnical Recommendations for Pavement Design” dated April 10, 2013 for project C204105 R-2814C Wake and Franklin Counties are attached and have been posted to the web as supplemental information. They include pavement cores for the existing pavement. They are in no way a part of the contract. Some of the information is based on interpretation of data and may not necessarily reflect actual conditions. The conditions may vary with time according to climatic conditions and other factors. **The Department does not warrant or guarantee the accuracy of this information or the opinions of the Department as to the actual conditions to be encountered. The prospective bidder is cautioned to make such independent investigations as he deems necessary. The Contractor shall have no claims for additional compensation or for an extension of time for any reason resulting from the use of or reliance on this information.** Please see that this information gets to the correct person within your company.”
