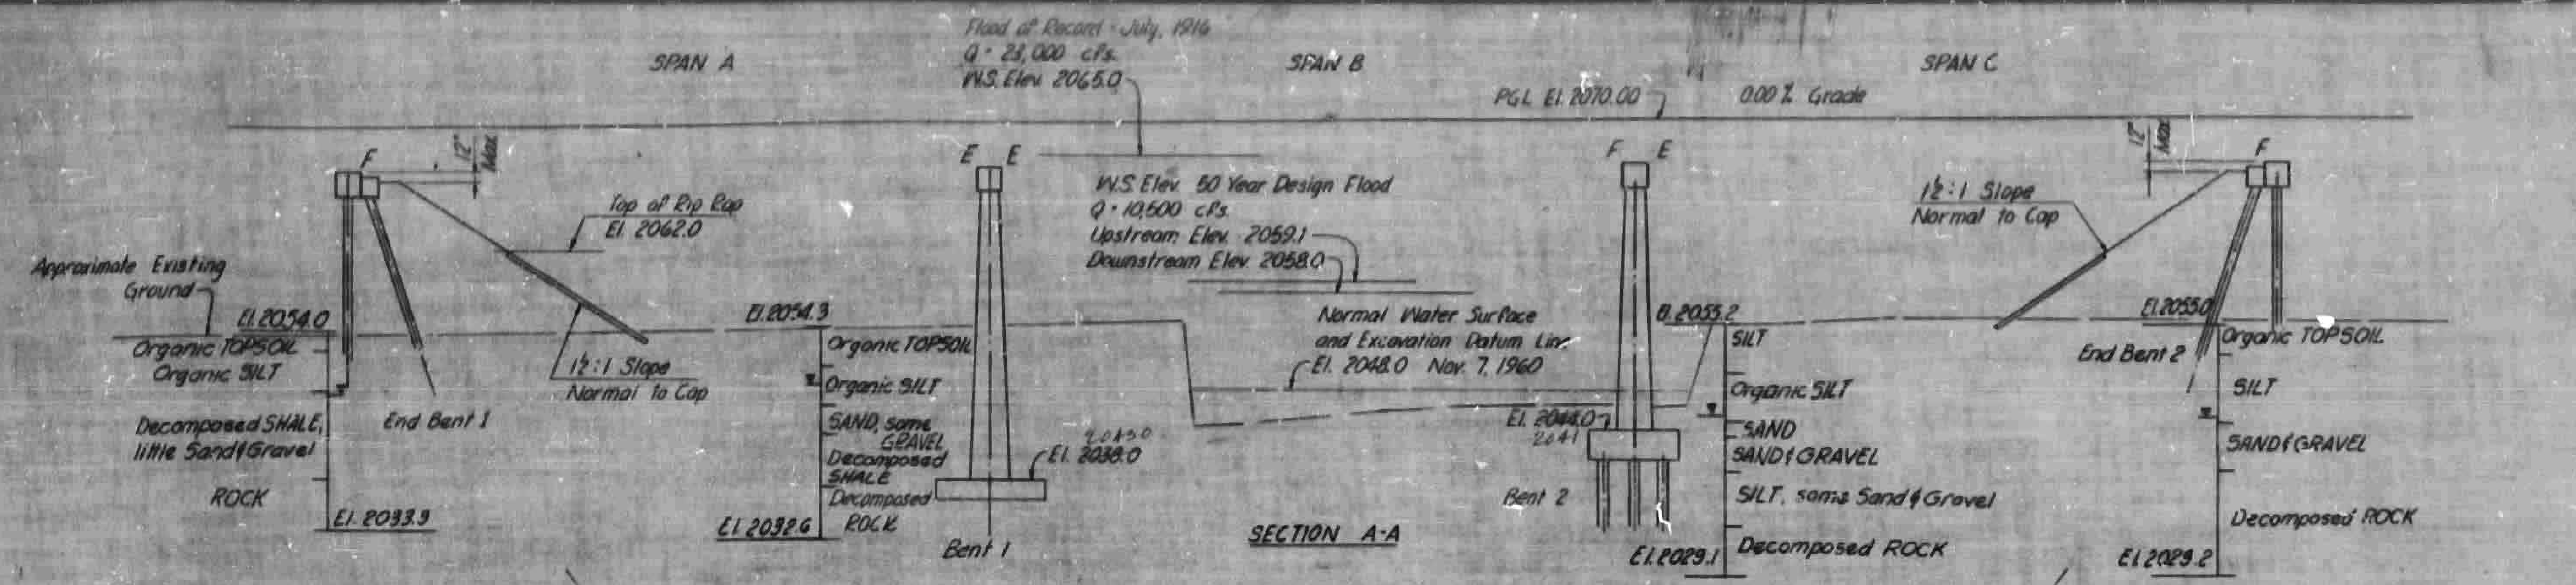
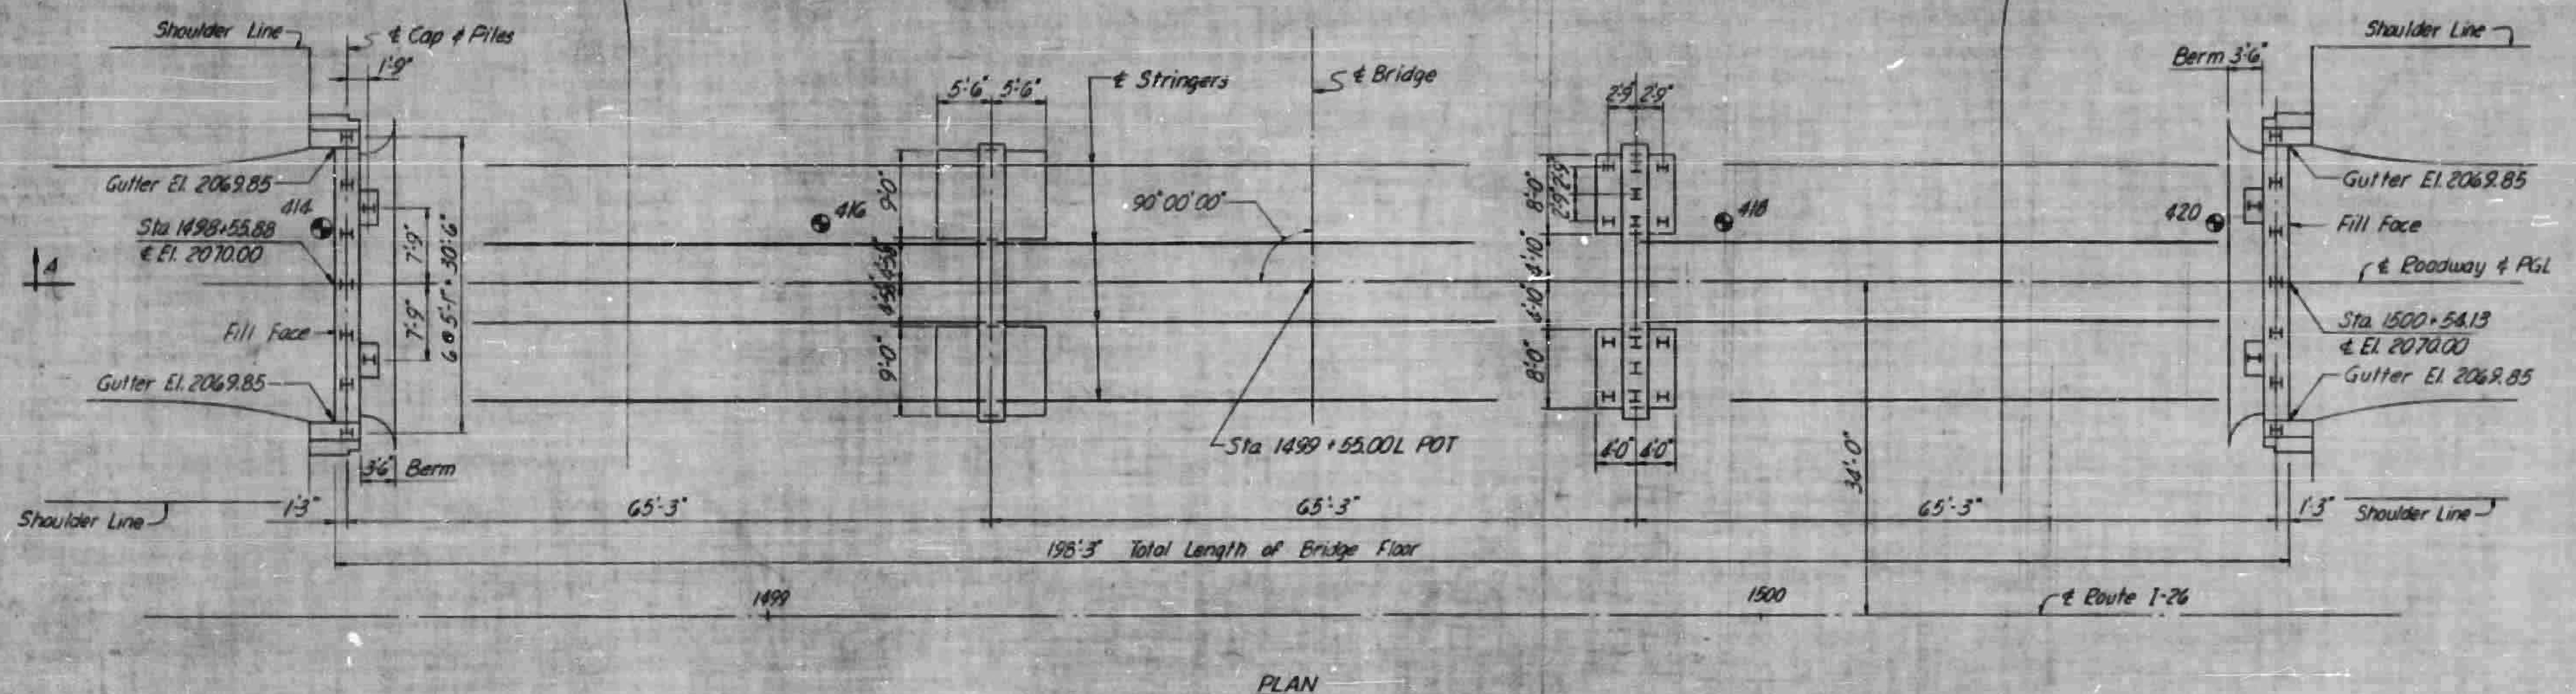
Fed. Road Dist. No.	State	Project No.
3	N. C.	8.19002
Fed. Aid Proj.	I-26-1(1)16	





NOTES

Loading: AASHO H20-S16-44 and BPR Modified Loading for Military Vehicles.

Future Surfacing: 20 lbs. per sq. ft.

Roadway Width: 28'-0" curb to curb.

For other design data and general notes see General Notes Sheet.

Concrete surfaces ~~shall be~~ given a surface finish in accordance with the Specifications.

Water Surface Elevation of Flood of Record (July, 1916) controlled by backwater from French Broad River.

The contractor ~~will be~~ required to drive one 12BP53 steel test pile, 20' long in place at Bent 2. The test ~~pile shall be paid for as linear feet of 12 BP53 Steel~~ Piles. The order lengths for all piles ~~shall be~~ given after the the test pile has been driven.

All piles at End Bents ~~shall be~~ driven through the roadway fill.

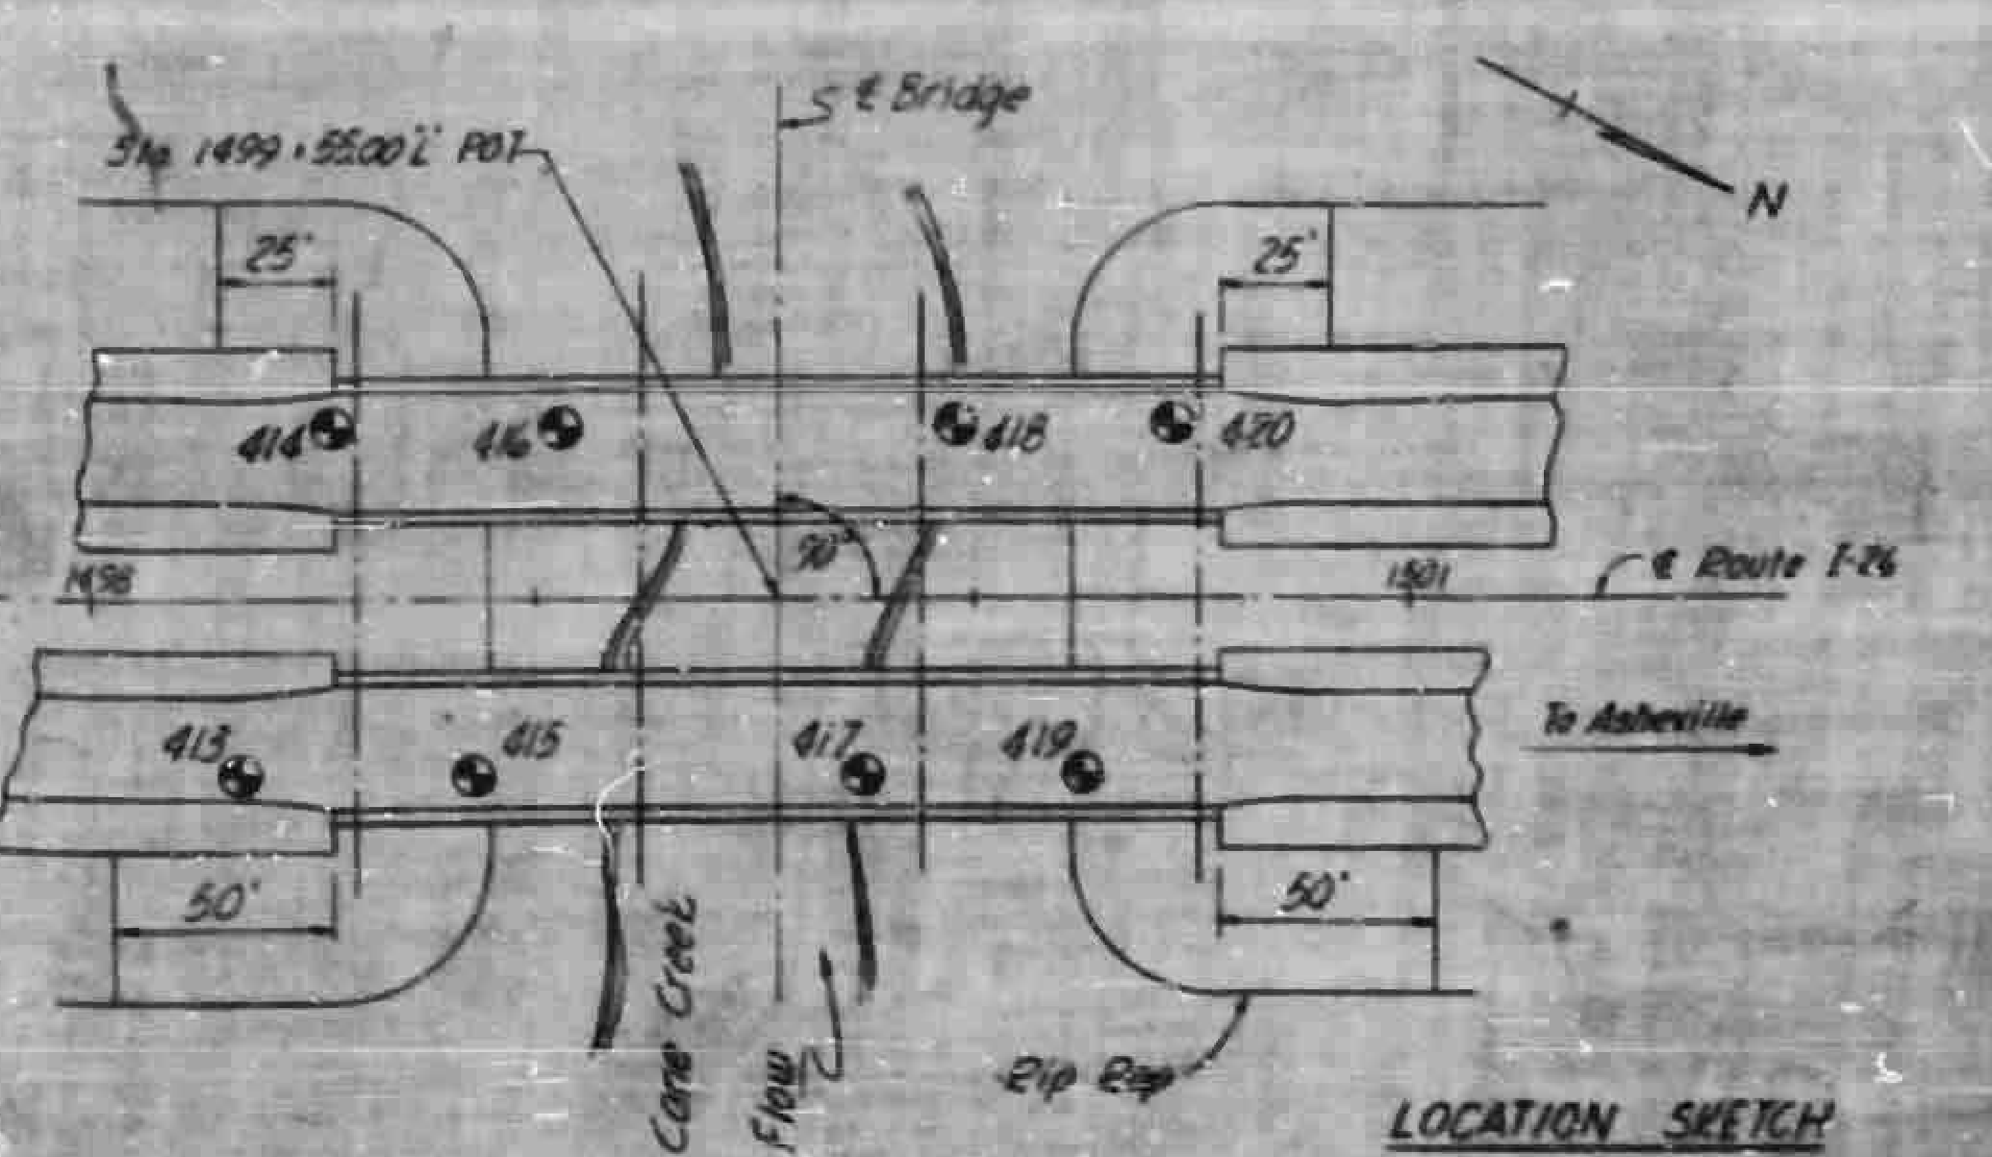
All piles ~~shall be~~ driven to a minimum bearing capacity of 30 tons.

Soil bearing footing at Bent 1 is designed for a bearing pressure of 3 tons per sq. foot.

● Indicates 2½" cased hole boring.

▼ Indicates ground water.

Benchmark: R.R. Spike in 8" Locust 150' Rt. Sta. 1499+00 Elevation 2057.09



I hereby certify that this structure was built according to revised plans

SIGNED, [signature]

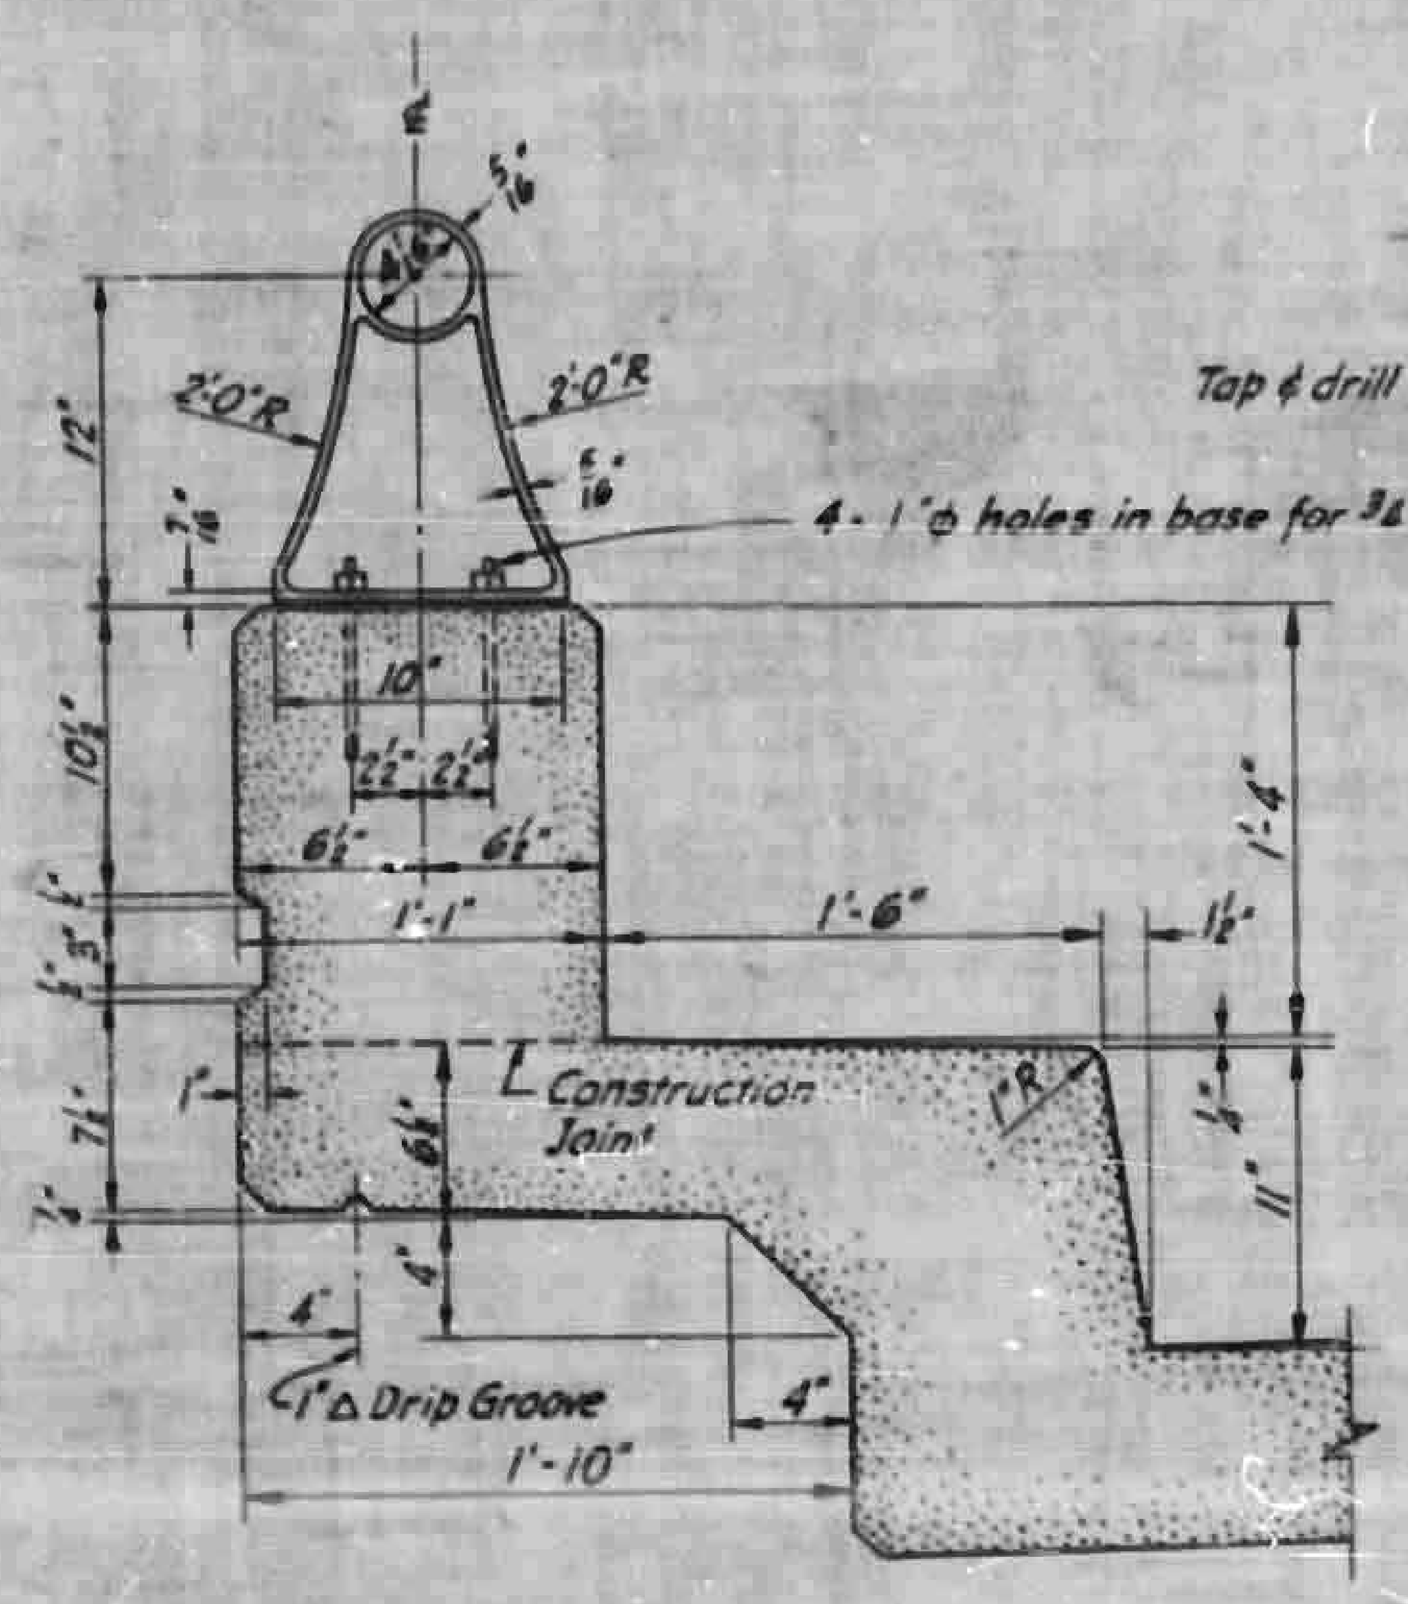
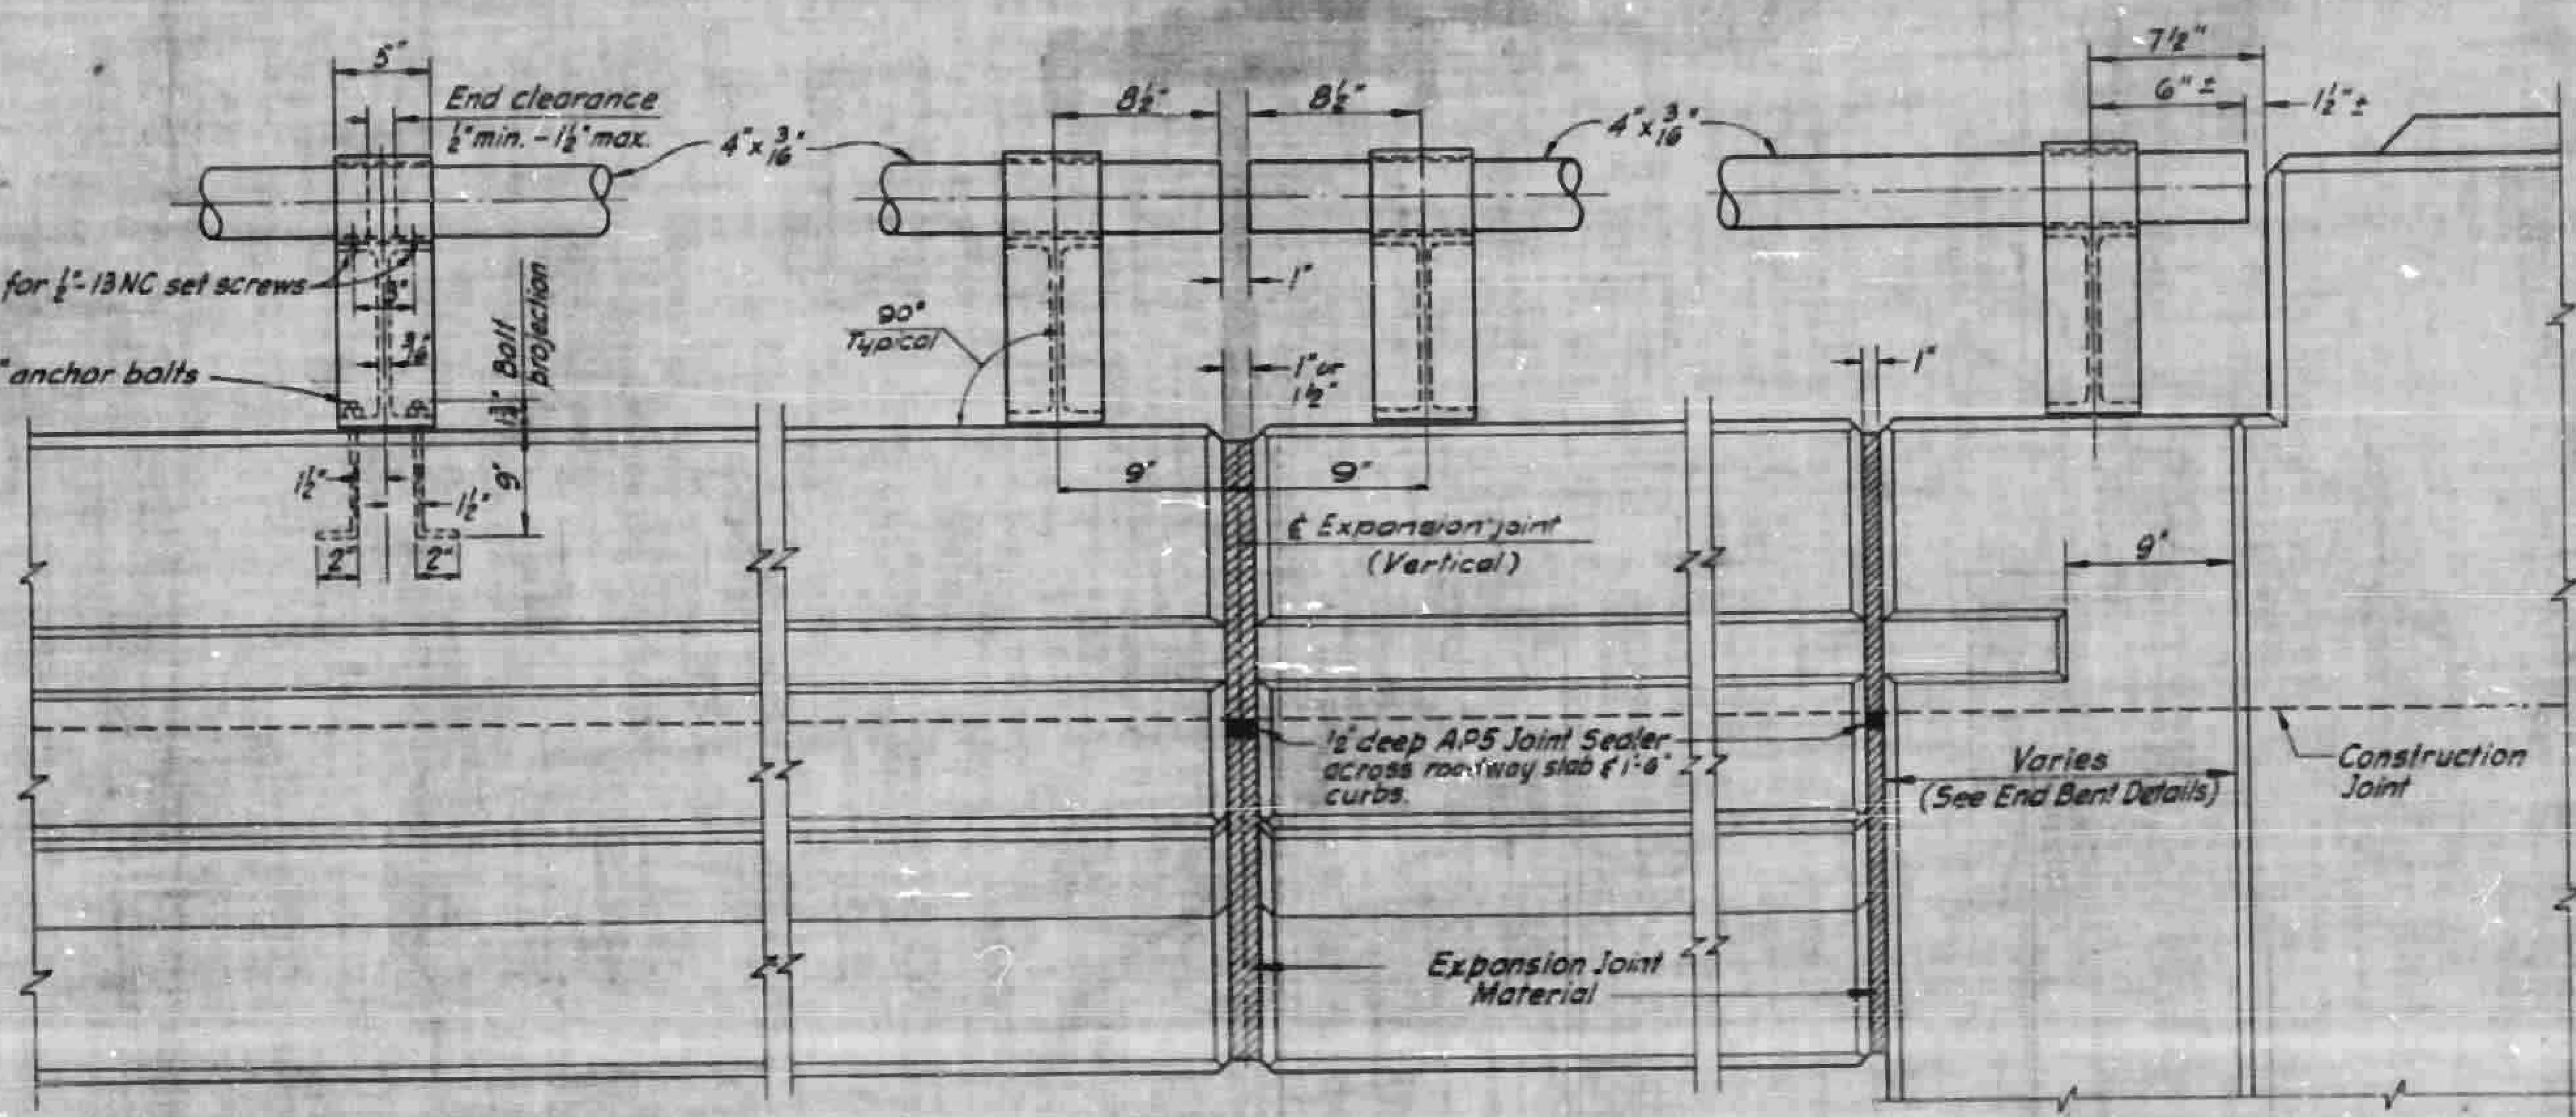
PARAPET AND RAILING ELEVATION



TYPICAL SECTION



ELEVATION

JOINT DETAILS AT BENTS

JOINT DETAILS AT END BENTS

NOTES:

Unless noted on the plans, maximum length section to be two panels plus stick thru.

End of rail to clear face of concrete End Post by 1 1/2".

For double panel runs of rail, set screws shall be set tight at center post and snug at ends to allow for expansion.

For single panel runs, set screws shall be set tight at one end and snug at the other.

3/4" ⌀ Anchor Bolts - hex. nuts and washers are steel galvanized in accordance with ASTM A-153 and painted with 2 coats of aluminum paint after erection.

Cast posts to be as shown or an approved equal.

Certified Mill reports are required for rails and posts. Shop inspection is not required.

Metal Rail Posts to be set normal to curb grade

Method of measurement for Metal Rails:
Unless otherwise stated, the length of Metal rails to be paid for shall be the continuous horizontal length measured from end to end of rail, excepting concrete posts, but without deductions for spaces between rail sections.

PARAPET AND RAILING DETAILS

At the Contractors option metal rail may be either Aluminum or Galvanized Steel in accordance with the requirements of the general notes and the following specifications for the alternate materials; however, the Contractor will be required to use the same rail material on all structures on the project for which metal rail is designated.

ALUMINUM RAILS

Aluminum alloys are to be as follows:

Cast Rail Posts	A356-T6
Round Tubular Rail	6061-T6 or 6062-T6
Set Screws	2024-T4
Closure Plates	6061-T6 or 6062-T6

Round Tubular Rails are to be of 4" O.D. with a 1/8" minimum wall thickness.

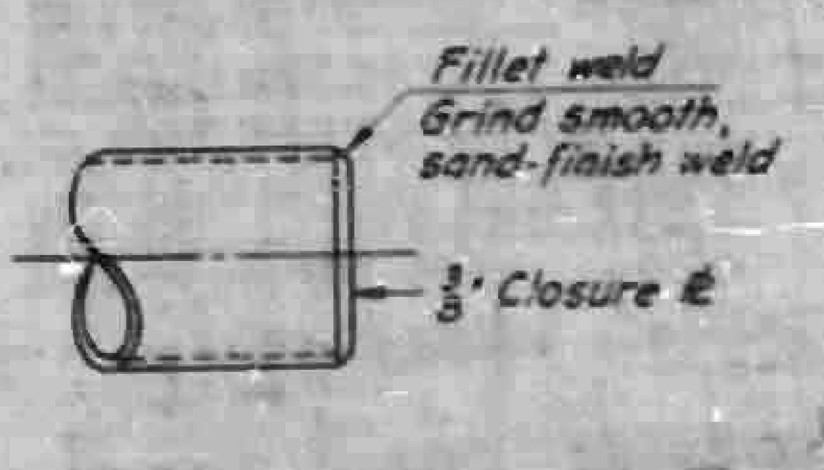
The base of rail posts, or any other aluminum surface in contact with concrete shall be thoroughly coated with an aluminum impregnated caulking compound of approved quality.

GALVANIZED STEEL RAIL

Material and galvanizing are to conform to the following specifications:

Cast Rail Post	Malleable cast Iron, ASTM A47 Grade 35018, Galvanized to ASTM A123. or Cast Steel, AASHO M192-60 Class 70. Galvanized to ASTM A-123.
4" O.D. Rail	Standard 3 1/2" Galvanized Steel Pipe, ASTM A-53
Closure Plates & Shims	Steel, ASTM A-285 Grade C, Galvanized to ASTM A-123.
Set Screws	Standard Steel Cap Screws, Galvanized to ASTM A-153

The cut ends of galvanized pipe railing, the end closure plate weld after grinding smooth and areas adjacent to the weld where spelter coating has been burned by welding shall be thoroughly cleaned by wire brushing to remove all traces of welding flux and loose or cracked spelter after which these cleaned areas shall be given two coats of Zinc paint meeting the requirements of Federal Specification MIL-P26915 (USAF) Type I.



DETAIL END CLOSURE

Note: Aluminum posts are to be furnished with test coupons attached and are to be in accordance with the requirements of AASHO Specification M 193-60.
