A cross-sectional diagram of a stabilized excavation. On the left, a horizontal line represents the ground surface, labeled "OFFSITE CLEAN WATER" with an arrow pointing right. Below this, a series of vertical lines represent a retaining wall. The excavation is a trapezoidal pit. The left side of the pit is labeled "1' MIN." with a vertical dimension line. The bottom of the pit is labeled "1' MIN." with a horizontal dimension line. The right side of the pit is labeled "2:1" with a slope indicator. The material inside the pit is stippled and labeled "STABILIZE EXCAVATED MATERIAL". A line points from the text "SOIL STABILIZATION GEOTEXTILE" to the bottom edge of the excavation pit.
