

# ATLAS Tribal Coordination, May 2024 - NC Department of Transportation

## File Geodatabase Feature Class

### Tags

Tribal coordination, NCDOT Archaeology, North Carolina Office of State Archaeology, Transportation, NRTR, NCDOT, Environment, Location, North Carolina, ATLAS, North Carolina

### Summary

This layer is the updated spatial version of the Tribal Coordination Table from NCDOT's Tribal Coordination Protocol. This layer provides which tribes (state level) should be contacted for a project based on County and/or Division.

### Description

The ATLAS Tribal Coordination layer is a polygon layer that provides information on which tribes (state level) should be contacted for a project based on County and/or Division. This is part of the [NCDOT Tribal Coordination Protocol](#) process where Tribal Coordination letters are sent out along with Start of Study letters for projects that have a federal nexus including permits, land, funding, jurisdiction, or any other direct involvement from a federal agency. This data was created in December 2023 and updated in April 2024.

Tribal Lands are defined as (A) All lands within the exterior boundaries of any Indian reservation; and (B) all dependent Indian communities 16 U.S.C. 470w(14). Tribal lands include lands held in trust by the United States for a tribe external to the boundaries of a reservation if the lands are under Federal superintendence, but does not include allotment external to the boundaries of a reservation.

Datasets developed under Project ATLAS do not replace any NRTR work for future projects and may not be used as a replacement for site visits / field surveys by qualified professionals and hence should be used only as a supporting platform for decision making. Use of this dataset for project scoping or screening is merely pre-decisional.

### Credits

The NCDOT Archaeology within NCDOT was tasked to create this dataset. Maintenance of this dataset is handled by the EAU. Support and maintenance of the enterprise spatial database where this data resides is handled by NCDIT's Transportation GIS Unit.

### Use limitations

The North Carolina Department of Transportation shall not be held liable for any errors in this data. This includes errors of omission, commission, errors concerning the content of the data, and relative and positional accuracy of the data. This data cannot be construed to be a legal document. Primary sources from which this data was compiled must be consulted for verification of information contained in this data.

Datasets developed under Project ATLAS do not replace any NRTR work for future projects and may not be used as a replacement for site visits / field surveys by qualified professionals and hence should be used only as a supporting platform for decision making. Use of this dataset for project scoping or screening is merely pre-decisional.
