Summary

The purpose of this dataset is to depict administrative jurisdiction for U.S. federal lands with Administrative Department Code designated as Department of Defense (DOD) in North Carolina.

It is adopted for use by NCDOT's ATLAS project as a tool to determine federal land management by project area.

Description

The Bureau of Land Management BLM Department of Defense dataset is adapted for use here by NCDOT's ATLAS project as a statewide polygon layer that represents the Department of Defense subset of the Surface Management Agency dataset.

The Surface Management Agency (SMA) Geographic Information System (GIS) dataset depicts Federal land for the United States and classifies this land by its active Federal surface managing agency. The SMA feature class covers the continental United States, Alaska, Hawaii, Puerto Rico, Guam, American Samoa and the Virgin Islands. This layer covers the state of North Carolina.

A Federal SMA agency refers to a Federal agency with administrative jurisdiction over the surface of Federal lands. Jurisdiction over the land is defined when the land is either:

- Withdrawn by some administrative or legislative action,
- or Acquired
- or Exchanged by a Federal Agency.

This layer is a dynamic assembly of spatial data layers maintained at various federal and local government offices. The GIS data contained in this dataset represents the polygon features that show the boundaries for Surface Management Agency and the surface extent of each Federal agency's surface administrative jurisdiction.

Credits

Bureau of Land Management created this dataset. The ATLAS EAU within NCDOT downloaded the dataset for NCDOT's use within ATLAS.

Support and maintenance of the enterprise spatial database where this data resides is handled by NCDIT's Transportation GIS Unit.

Use limitations

The North Carolina Department of Transportation shall not be held liable for any errors in this data. This includes errors of omission, commission, errors concerning the content of the data, and relative and positional accuracy of the data. This data cannot be construed to be a legal document. Primary sources from which this data was compiled must be consulted for verification of information contained in this data.

Datasets developed under Project ATLAS may not be used as a replacement for site visits / field surveys by licensed professionals and hence should be used only as a supporting platform for decision making. Use of this dataset for project scoping or screening is merely pre-decisional.

Lineage ▶

LINEAGE STATEMENT

The dataset this subset was extracted from was created by the Bureau of Land Management National Operation Center with input from BLM lands in the Eastern States, Fish and Wildlife Service refuges, Bureau of Indian Affairs as American Indian Reservation, and US Forest Service.

Surface Management Agency feature classes from each of the BLM State Offices was collected.

The attributes were related in the State Office feature classes to a standard attribute schema stored in master federal units attribute table.

Changes that were made to the Surface Management Agency data internally were reviewed for correctness before being applied externally. Correctness would include location and point attributes.

Layer was downloaded from <https://gbp-blm-egis.hub.arcgis.com/datasets/blm-national-sma-surface-management-agency-area-polygons/about>.

North Carolina data was extracted out of the countrywide dataset.

PROCESS STEP ▶

DESCRIPTION

Geodatabase was forwarded on to the GIS Unit for publishing as part of data for project ATLAS.
