

Green Sea Turtle Potential Habitat, April 2023 - NC Department of Transportation

File Geodatabase Feature Class

Tags

Green sea turtle, *Chelonia mydas*, expert model, Transportation, United States Fish and Wildlife Service, USFWS, National Heritage Program, NHP, NRTR, NCDOT, Environment, Location, North Carolina, ATLAS

Summary

This dataset was originally created in August 2022 as part of the Project ATLAS initiative at NCDOT to support the Environmental Analysis Unit (EAU) Mitigation and Modeling Unit with project delivery in the development phase.

This model identifies year-round potential suitable habitat for the species. Model range output is for "high" potential habitat areas only. Areas not within the "high" range are not considered suitable habitat for green sea turtle.

The Optimal survey window is April to August.

This dataset supports the production of the Natural Resources Technical Report (NRTR). This dataset also contains information that may assist biologists in preparing background information for field surveys, in order to address protected species for Threatened & Endangered Species Survey Reports, and/or Biological Assessments.

Description

The Green Sea Turtle Potential Habitat dataset is a polygon layer depicting high potential habitat locations for Green Sea Turtle in NC counties that have a United States Fish and Wildlife Service (USFWS) "current" status listing.

Green Sea Turtle (*Chelonia mydas*) is found in temperate and tropical oceans and seas. Nesting in North America is limited to small communities on the east coast of Florida requiring beaches with minimal disturbances and a sloping platform for nesting (they do not nest in NC). The green sea turtle can be found in shallow waters. They are attracted to lagoons, reefs, bays, mangrove swamps, and inlets where an abundance of marine grasses can be found, as this is the principal food source for the green sea turtle.

Natural Heritage Program (NHP) Tier 2 data from 2018 indicate 17 Elemental Occurrences (EOs) for green sea turtle in North Carolina. Two of the 17 records are historic. NHP records used at the time of model were from January 2018.

County Information

- NHP listed counties: Brunswick, Carteret, Currituck, Dare, Hyde, New Hanover, Onslow, Pender
- USFWS current listed counties: Beaufort, Brunswick, Carteret, Craven, Currituck, Dare, Hyde, New Hanover, Onslow, Pamlico, Pender
- Additions proposed by reviewers: Camden and Pasquotank – comments provided by Matthew Godfrey (NCWRC)

DATA QUALITY REPORT - QUANTITATIVE ATTRIBUTE ACCURACY ►

MEASURE DESCRIPTION

- ArcGIS Online (AGOL) Review
 - o A model prediction file was shared with select reviewers on ArcGIS Online. Points were placed within the USFWS potential habitat as well as the model potential habitat in order to solicit feedback. Reviewers could place additional comments for consideration by modeler.
 - o AGOL review was completed in May 2019 on draft version of this model.

- Independent Data Review
 - o Describe data sources – Natural Heritage Program element occurrences, Phase 1 and 2 open waters, DCM shorelines (2009 and 2016).
 - o Describe methods – Current aerial imagery was used to determine likelihood of habitat. Open water layers were used to verify potential open water habitat

Lineage ►

LINEAGE STATEMENT

ArcGIS Model Builder version 10.4.1 was used to build a model

Input Layers:

Layer 1

- Layer name: Phase_I_Open_Water and Phase_II_Open_Water
- Layer description:
 - o Layer obtained from Sweeping Environmental ATLAS team.
 - o Vector layer for all open water areas throughout the state. Two parts but combined in model.
- Layer selection justification:
 - o This data contains open waters for the state that have been merged from two files into one and then selected for any polygons large enough to consist of bays (Pamlico Sound, Core Sound, etc.) and ocean waters.
- "Habitat" versus "Nonhabitat" designations:
 - o Areas of open coastal water are potential habitat for the green turtle

Layer 2

- Layer name: CountyBoundaryShoreline

- Layer description:
 - o Select Water from County Boundary shapefile.
- Layer selection justification:
 - o Species possible within areas designated "Water" in CountyBoundaryShoreline layer.
- "Habitat" versus "Nonhabitat" designations:
 - o Species possible within areas designated "Water" in CountyBoundaryShoreline layer. Refined in 2022 V1 model to only include green turtle counties.

Layer 3

- Layer name: nheo_tier2
- Layer description:
 - o July 2018 Tier 2 dataset acquired from the NC Natural Heritage Program.
- Layer selection justification:
 - o Data layer was incorporated into the model with any green turtle records selected and merged into the final merged output file.
- "Habitat" versus "Nonhabitat" designations:
 - o Potential habitat are polygon areas delineated in the July 2018 NC NHP Tier 2 dataset.

Layer 4

- Layer name: dcm_oceanfront_shorelines
- Layer description:
 - o Division of Coastal Management shoreline data from 2009 and 2016. This range was selected to ensure complete coverage of the coastline across NC.
- Layer selection justification:
 - o Data layer was incorporated into the model with 2009 and 2016 shorelines (to ensure complete coverage of coast) buffered 1400 feet. DCM shorelines were variable in their actual distance from shorelines on aerial photography. 1400 feet was selected to ensure all coastal beaches, including the primary dune line were included in the model.
- "Habitat" versus "Nonhabitat" designations
 - o Area within buffer is potential habitat.

PROCESS STEP

DESCRIPTION

Select all coastal open water areas, natural heritage data, buffered DCM shorelines (2009 and 2016) and selected counties and merge all layers to produce the model.
Model was refined in 2022 to include green sea turtle counties only.

CONSTRAINTS

LIMITATIONS OF USE

The North Carolina Department of Transportation shall not be held liable for any errors in this metadata. This includes errors of omission, commission, errors concerning the content of the data, and relative and positional accuracy of the data. This data cannot be construed to be a legal document. Primary sources from which this data was compiled must be consulted for verification of information contained in this data. Datasets developed under Project ATLAS do not replace any NRTR work for future projects and may not be used as a replacement for site visits / field surveys by qualified professionals and hence should be used only as a supporting platform for decision making. Use of this dataset for project scoping or screening is merely pre-decisional.
