Summary

This dataset was originally created in March 2022 as part of the Project ATLAS initiative at NCDOT to support the Archaeology group with project delivery in the development phase.

This layer was created to display generalized location of archaeological sites listed on the National Register of Historic Places in North Carolina for NCDOT planning purposes. Dataset does not include National Register listed archaeological sites, structures or districts that are published on HPOweb.

Description

The NC Archaeological site hexagons dataset is a point layer in a statewide GIS dataset for depicting archaeological sites listed on the National Register of Historic Places in North Carolina.

Hexagonal areas represent the generalized location of NRHP-listed archaeological sites for the protection of archaeological site locations. This dataset was created from a fishnet tessellation of approximately 10 square mile hexagons across North Carolina. Displayed hexagon areas represent those areas with at least one NRHP site present. Hexagonal areas may include more than one NRHP site. Areas do not represent a buffer and sites can occur within any part of displayed area.

Dataset does not include sites not listed on NRHP including those on the state's Study List, Determinations of Eligibility, or those unassessed for the NRHP. These were created from source files for NRHP sites stored at the NC Office of State Archaeology.

Datasets developed under Project ATLAS may not be used as a replacement for site visits / field surveys by licensed professionals and hence should be used only as a supporting platform for decision making. Use of this dataset for project scoping or screening is merely pre-decisional.

Credits

The NC Office of State Archaeology created this dataset.

Maintenance of this dataset is handled by the NC Office of State Archaeology. Support and maintenance of the enterprise spatial database where this data resides is handled by NCDIT's Transportation GIS Unit.

Use limitations

The North Carolina Department of Transportation shall not be held liable for any errors in this data. This includes errors of omission, commission, errors concerning the content of the data, and relative and positional accuracy of the data. This data cannot be construed to be a legal document. Primary sources from which this data was compiled must be consulted for verification of information contained in this data.

Datasets developed under Project ATLAS may not be used as a replacement for site visits / field surveys by licensed professionals and hence should be used only as a supporting platform for decision making. Use of this dataset for project scoping or screening is merely pre-decisional.
