Summary

This dataset was originally created in January 2019 and updated in June 2021 as part of the Project ATLAS initiative at NCDOT to support the Sweeping Environmental Group with project delivery in the development phase. Data is current as of June 2019.

This dataset contains critical habitat for Atlantic Sturgeon in ATLAS Hydrography river areas (double-line shorelines as available, and single-line stream centers where double-line geometry is unavailable) as identified by the National Marine Fisheries Service (NMFS). This dataset is required for Programmatic Categorical Exclusion (PCE) documentation, Nationwide Permitting and PCN generation, specifically Final Regional Conditions to Nationwide Permits, 1.0 Excluded Waters, 1.3 Sturgeon Spawning Areas Designated by the National Marine Fisheries Service (NMFS).

Description

The Atlantic Sturgeon Critical Habitat dataset is a statewide polyline layer depicting streams along which Critical Habitat has been designated for Atlantic Sturgeon.

Datasets developed under Project ATLAS do not replace any Sweeping Environmental field work for future projects and may not be used as a replacement for site visits / field surveys by licensed professionals and hence should be used only as a supporting platform for decision making. Use of this dataset for project scoping or screening is merely pre-decisional.

Credits

The ATLAS Sweeping Environmental Group within NCDOT was tasked to create this dataset.

Annual maintenance of this dataset is handled by the Sweeping Environmental Group. Support and maintenance of the enterprise spatial database where this data resides is handled by NCDIT's Transportation GIS Unit.

Use limitations

The North Carolina Department of Transportation shall not be held liable for any errors in this data. This includes errors of omission, commission, errors concerning the content of the data, and relative and positional accuracy of the data. This data cannot be construed to be a legal document. Primary sources from which this data was compiled must be consulted for verification of information contained in this data.

Datasets developed under Project ATLAS do not replace any Sweeping Environmental field work for future projects and may not be used as a replacement for site visits / field surveys by licensed professionals and hence should be used only as a supporting platform for decision making. Use of this dataset for project scoping or screening is merely pre-decisional.

SUPPLEMENTAL INFORMATION

Critical habitat includes all of the river along the specified segment, from the ordinary high water mark of one riverbank to the ordinary high water mark of the opposing riverbank of the mainstem river. For clarification of the critical habitat definition, please refer to the maps and narrative descriptions in the CFR.
