### Summary

This dataset was originally created in January 2019 as part of the Project ATLAS initiative at NCDOT to support the Environment Analysis Unit (EAU) with project delivery in the development phase.

This dataset is a compilation of child care facilities across the state of North Carolina.

### Description

The NC child care facilities dataset is a statewide point layer for locations of child care / daycare facilities serving the population of NC. Data from the North Carolina Department of Health and Human Services on licensed child care facilities was downloaded in June 2018. The data was then geocoded using ArcGIS functionality to create this Project ATLAS dataset. This data is current as of June 2018.

Datasets developed under Project ATLAS may not be used as a replacement for site visits / field surveys by licensed professionals and hence should be used only as a supporting platform for decision making. Use of this dataset for project scoping or screening is merely pre-decisional.

### Credits

The ATLAS EAU within NCDOT was tasked to create this dataset.

Support and maintenance of the enterprise spatial database where this data resides is handled by NCDIT's Transportation GIS Unit.

### Use limitations

The North Carolina Department of Transportation shall not be held liable for any errors in this data. This includes errors of omission, commission, errors concerning the content of the data, and relative and positional accuracy of the data. This data cannot be construed to be a legal document. Primary sources from which this data was compiled must be consulted for verification of information contained in this data.

Datasets developed under Project ATLAS may not be used as a replacement for site visits / field surveys by licensed professionals and hence should be used only as a supporting platform for decision making. Use of this dataset for project scoping or screening is merely pre-decisional.

DATA QUALITY REPORT - QUANTITATIVE ATTRIBUTE ACCURACY ▶

MEASURE DESCRIPTION

Geometry checks were conducted using ESRI's Data Reviewer tool. Overlapping geometries were reviewed and corrected where required. There are however some overlapping points present due to multiple schools (eg: pre-k / before care / after care) using the same facility.

Quality checks on the data for completeness, consistency, positional and attribute accuracy were conducted by an outside contractor.
