

# NC Reference Wetlands Assessment Model (WAM) Attachments table, December 2020 - NC Department of Transportation

## File Geodatabase Table

### Tags

North Carolina Wetland Assessment Method, NC WAM, Wetlands, Wetland Functional Assessment, Reference Wetlands, High Quality Wetlands, Typical Wetlands, Transportation, NCDOT, Environment, Location, North Carolina, ATLAS

### Summary

This dataset was originally created in November 2019 as part of the Project ATLAS initiative at NCDOT to support the Sweeping Environmental Group with project delivery in the development phase.

This dataset of NC WAM reference wetlands table contains attachments for the NC WAM reference wetlands Sites point layer.

### Description

The NC Reference Wetlands Assessment Model (WAM) table dataset is a table containing various attachments for the NC Reference WAM Sites layer.

Each wetland site is linked to supporting documentation that contains

- Site Description (pdf),
- NC WAM Wetland Field Assessment Form and Results (pdf),
- Site location on topographic mapping (pdf),
- Site location on soils mapping (pdf),
- Site location on LiDAR mapping (pdf),
- Site photograph (jpg),
- When appropriate, park maps showing approximate wetland locations.

Datasets developed under Project ATLAS do not replace any Sweeping Environmental field work for future projects and may not be used as a replacement for site visits / field surveys by licensed professionals and hence should be used only as a supporting platform for decision making. Use of this dataset for project scoping or screening is merely pre-decisional.

### Credits

The ATLAS Sweeping Environmental Group within NCDOT was tasked to create this dataset. This dataset supports the production of the NRTR. Annual maintenance of this dataset is handled by the Sweeping Environmental Group. Support and maintenance of the enterprise spatial database where this data resides is handled by NCDIT's Transportation GIS Unit.

### Use limitations

The North Carolina Department of Transportation shall not be held liable for any errors in this data. This includes errors of omission, commission, errors concerning the content of the data, and relative and positional accuracy of the data. This data cannot be construed to be a legal document. Primary sources from which this data was compiled must be consulted for verification of information contained in this data.

Datasets developed under Project ATLAS do not replace any Sweeping Environmental field work for future projects and may not be used as a replacement for site visits / field surveys by licensed professionals and hence should be used only as a supporting platform for decision making. Use of this dataset for project scoping or screening is merely pre-decisional.

### PROCESS STEP ►

#### DESCRIPTION

Supporting figures were generated for each wetland site using ArcGIS: i. General site topography using USGS 7.5-minute topographic quadrangle backgrounds, ii. Site soils identifying Natural Resource Conservation Service (NRCS) soils, iii. Detailed site topography using QL2 or better LiDAR. e. When wetland sites fall within public park boundaries, wetland locations were identified on park maps and included. f. Wetland point features were linked to appropriate attachments in ArcPro with a Match Table.
