

NC Utility Power Providers - Universities, August 2019 - NC Department of Transportation

File Geodatabase Feature Class

Tags

Power, School, University, Electric, Transportation, NCDOT, Environment, Location, North Carolina, ATLAS, Utilities & Communication, Boundaries

Summary

This dataset was originally created in January 2019 as part of the Project ATLAS initiative at NCDOT to support the Utilities group with project delivery in the development phase. The purpose of this layer is to provide NCDOT the ability to locate Universities that are Electric Power providers.

Description

NC Electric Cooperatives, municipalities and universities play a role in generating power for their respective communities. Using data sourced from <https://www.ncelectriccooperatives.com> and <https://www.carolinacountry.com/issues/2016/energy/a-guide-to-north-carolina-s-electric-power-providers> this data was developed to support easier access to contact these providers. This data is current as of July 2018.

More than 100 separately organized electric power providers serve nearly 10 million people in North Carolina. Each covers a designated service area, and depending upon where you live, your electric service could come from a consumer-owned electric cooperative, an investor-owned utility, your city government, a university-owned utility or some other utility operating in the state. 6 of the state's universities serve their campuses with electric facilities that they own and operate within the municipal electric system structure.

Datasets developed under Project ATLAS do not replace any Utilities group work for future projects and may not be used as a replacement for site visits / field surveys by licensed professionals and hence should be used only as a supporting platform for decision making. Use of this dataset for project scoping or screening is merely pre-decisional.

Credits

The ATLAS Utilities group within NCDOT was tasked to create this dataset.

Annual maintenance of this dataset is handled by the Utilities Group. Support and maintenance of the enterprise spatial database where this data resides is handled by NCDIT's Transportation GIS Unit.

Use limitations

The North Carolina Department of Transportation shall not be held liable for any errors in this data. This includes errors of omission, commission, errors concerning the content of the data, and relative and positional accuracy of the data. This data cannot be construed to be a legal document. Primary sources from which this data was compiled must be consulted for verification of information contained in this data.
