Summary

This dataset was originally created in October 2021 as part of the Project ATLAS initiative at NCDOT to support the Value Management Office embedded under the NCDOT Construction Unit with project delivery in the development phase.

The Value Management lines layer was created to be used by the Value Management Office and other project delivery stakeholders to screen and identify line projects that meet the threshold for required value management assessments. The requirements for such a layer was Draft or Final STIP line projects that intersect with a NHS road and have an estimated construction cost of more than \$20 million.

The STIP layer depicts NCDOT's 2020-2029 Transportation Improvement Program (STIP) Projects. The NHS layer is a network of nationally significant highways approved by Congress in the National Highway System Designation Act of 1995.

Description

The Value Management lines layer is a statewide polyline layer depicting STIP project lines that intersect a NHS roadway throughout the state of North Carolina and have a STIP construction cost estimate of more than \$20 million. This layer is to assist project scoping professionals and project managers in identifying which projects need to be coordinated and scoped with the Value Management Office. Any questions about specific projects that would benefit from value management assessments or if a specific project meets the threshold, contact valuemanagementunit@ncdot.gov

Datasets developed under Project ATLAS do not replace any Value Management Office field work for future projects and may not be used as a replacement for site visits / field surveys by licensed professionals and hence should be used only as a supporting platform for decision making. Use of this dataset for project scoping or screening is merely pre-decisional.

Credits

The Value Management Office within NCDOT was tasked to create this dataset. The STIP Unit of NCDOT is responsible for the development of the NHS layer and the STIP layer.

Use limitations

The North Carolina Department of Transportation shall not be held liable for any errors in this data. This includes errors of omission, commission, errors concerning the content of the data, and relative and positional accuracy of the data. This data cannot be construed to be a legal document. Primary sources from which this data was compiled must be consulted for verification of information contained in this data.

Datasets developed under Project ATLAS do not replace any field work for future projects and may not be used as a replacement for site visits / field surveys by licensed professionals and hence should be used only as a

supporting platform for decision making. Use of this dataset for project scoping or screening is merely pre-decisional.

Lineage ▶

LINEAGE STATEMENT

This dataset was developed by intersecting the NHS Routes layer with STIP lines.

Source for NHS Layer:

https://gis11.services.ncdot.gov/arcgis/rest/services/NCDOT_NHSQtr/MapServer/0

Source for STIP layer: https://gis11.services.ncdot.gov/arcgis/rest/services/NCDOT_STIP/MapServer

The NHS layer was buffered by 100 feet. The STIP layer was filtered to only show projects > \$20 million. The buffered NHS layer was intersected with the STIP Layer. Fields were adjusted as needed by the Value Management Office.

PROCESS STEP ▶

DESCRIPTION

Geodatabase was forwarded on to the GIS Unit for publishing as part of data for project ATLAS.

SECURITY CONSTRAINTS

CLASSIFICATION unclassified

CLASSIFICATION SYSTEM None

LIMITATIONS OF USE

The North Carolina Department of Transportation shall not be held liable for any errors in this metadata. This includes errors of omission, commission, errors concerning the content of the data, and relative and positional accuracy of the data. This data cannot be construed to be a legal document. Primary sources from which this data was compiled must be consulted for verification of information contained in this data. Datasets developed under Project ATLAS do not replace any field work for future projects and may not be used as a replacement for site visits / field surveys by licensed professionals and hence should be used only as a supporting platform for decision making. Use of this dataset for project scoping or screening is merely pre-decisional.
