

# Places of Interest - Lines, February 2021 - NC Department of Transportation

## File Geodatabase Feature Class

### Tags

Places of Interest, POI, Places, Transit lines, Transit, Bus, Rail, Transit Corridor, Bike/Ped, EAU, Transportation, NCDOT, Environment, Location, North Carolina, ATLAS

### Summary

This dataset was originally created in December 2019 as part of the Project ATLAS initiative at NCDOT to support the Environmental Analysis Unit (EAU) with project delivery in the development phase.

The Places of Interest POI lines layer was created to be used in the NCDOT SPOT 6.0 process in Summer 2019, supporting identifying pedestrian destinations for the consideration of pedestrian or bicycle accommodations or improvement.

Corridor lines within the dataset are aggregated by agency name where each single feature represents the latest network of transit corridors for that agency in its entirety. The dataset does not provide individual route names or other data specific to individual transit routes and is meant only to identify the current location of operational transit corridors.

### Description

The Places of Interest lines layer is a statewide polyline layer depicting a set of line features representing bus and rail transit corridors throughout the state of North Carolina.

Datasets developed under Project ATLAS do not replace any Environmental Analysis Unit (EAU) field work for future projects and may not be used as a replacement for site visits / field surveys by licensed professionals and hence should be used only as a supporting platform for decision making. Use of this dataset for project scoping or screening is merely pre-decisional.

### Credits

The Environmental Analysis Unit (EAU) within NCDOT was tasked to create this dataset.

Annual maintenance of this dataset is handled by the Environmental Analysis Unit (EAU). Support and maintenance of the enterprise spatial database where this data resides is handled by NCDIT's Transportation GIS Unit.

### Use limitations

The North Carolina Department of Transportation shall not be held liable for any errors in this data. This includes errors of omission, commission, errors concerning the content of the data, and relative and positional accuracy of the data. This data cannot be construed to be a legal document. Primary sources from which this data was compiled must be consulted for verification of information contained in this data.

Datasets developed under Project ATLAS do not replace any field work for future projects and may not be used as a replacement for site visits / field surveys by licensed professionals and hence should be used only as a supporting platform for decision making. Use of this dataset for project scoping or screening is merely pre-decisional.

LINEAGE STATEMENT

This dataset was developed using a single source layer containing existing transit lines for all transit agencies in the state of North Carolina in 2019. The source layer was provided by the Institute for Transportation Research and Education in Raleigh, NC.

Data Source:

Layer name: AllRoutes\_01172019

Source: Institute for Transportation Research and Education

Date/Version: 2019

PROCESS STEP ►  
DESCRIPTION

To create this layer, the source layer was dissolved by agency name to merge all corridors for each transit agency into one single feature and all superfluous data fields were subsequently removed.
