

STC Rail Bridge Polygon, February 2022 - NC Department of Transportation

File Geodatabase Feature Class

Tags

Bridge, Rail, STC, Strategic Transportation Corridor, 2022, Transportation, NCDOT, Environment, Location, North Carolina, ATLAS

Summary

This dataset was originally created in February 2022 as part of the Project ATLAS initiative at NCDOT to support the Rail Division with project delivery in the development phase.

This layer contains rail bridge polygons along the Strategic Transportation Corridor (STC) for North Carolina Department of Transportation. The data shows where the Bridge is located as well as a Bridge ID corresponding to the NC structures database.

North Carolina's Strategic Transportation Corridors form the core network of multimodal passageways. These 25 corridors move large volumes of people and freight across the regions of the state and to key markets outside the state.

Description

The STC Rail Bridge polygon dataset is a statewide polygon layer containing locations of rail bridge polygons along the Strategic Transportation Corridor.

This dataset is used to show all rail bridge polygons on the STC. Please use the Flooded Rail Bridge layer to check a particular bridge's flooding potential.

Datasets developed under Project ATLAS do not replace any field work for future projects and may not be used as a replacement for site visits / field surveys by licensed professionals and hence should be used only as a supporting platform for decision making. Use of this dataset for project scoping or screening is merely pre-decisional.

Credits

The Rail Division within NCDOT was tasked to create this dataset.

Maintenance of this dataset is handled by the Rail Division. Support and maintenance of the enterprise spatial database where this data resides is handled by NCDIT's Transportation GIS Unit.

Use limitations

The North Carolina Department of Transportation shall not be held liable for any errors in this data. This includes errors of omission, commission, errors concerning the content of the data, and relative and positional accuracy of the data. This data cannot be construed to be a legal document. Primary sources from which this data was compiled must be consulted for verification of information contained in this data.

Datasets developed under Project ATLAS do not replace any Rail division field work for future projects and may not be used as a replacement for site visits / field surveys by licensed professionals and hence should be used only as a supporting platform for decision making. Use of this dataset for project scoping or screening is merely pre-decisional.
