

# Traffic Management Project Limit, July 2021 Continuous Capture - NC Department of Transportation

File Geodatabase Feature Class

## Tags

North Carolina, Traffic Forecast, Traffic, Forecast, Project Limit, Study Area, Boundaries, Transportation, NCDOT, Environment, Location, North Carolina, ATLAS

## Summary

This dataset was originally created in May 2019 and updated in July 2021 as part of the Project ATLAS initiative at NCDOT to support project delivery in the development phase. This dataset is a continuously updated compilation of Traffic Forecast Project Limit lines identified during the creation of the Traffic Forecast Report for transportation projects.

## Description

The Traffic Forecast Project Limit dataset is a polyline layer in a statewide GIS dataset that defines project limits identified during the Traffic Forecast Report work during project development for NCDOT. This data is gathered per transportation project and compiled into one statewide GIS dataset to be used for future transportation planning and project development. This dataset is continuously updated with new records as Traffic Forecast Reports are completed per transportation project during environmental analysis and project development. Datasets developed under Project ATLAS do not replace any Traffic Forecast Report work for future projects and may not be used as a replacement for site visits / field surveys by licensed professionals and hence should be used only as a supporting platform for decision making. Use of this dataset for project scoping or screening is merely pre-decisional.

## Credits

Various consulting firms, contracted by NCDOT to conduct Traffic Forecast Report work for transportation projects, contribute to this dataset. Additional contributors to this dataset are members of the NCDOT Environmental Analysis Unit. Support and maintenance of the enterprise spatial database where this data resides is handled by NCDIT's Transportation GIS Unit.

## Use limitations

The North Carolina Department of Transportation shall not be held liable for any errors in this data. This includes errors of omission, commission, errors concerning the content of the data, and relative and positional accuracy of the data. This data cannot be construed to be a legal document. Primary sources from which this data was compiled must be consulted for verification of information contained in this data. Datasets developed under Project ATLAS do not replace any Traffic Forecast Report work for future projects and may not be used as a replacement for site visits / field surveys by licensed professionals and hence should be used only as a supporting platform for decision making. Use of this dataset for project scoping or screening is merely pre-decisional.

## DATA QUALITY REPORT - FORMAL CONSISTENCY ▶

MEASURE NAME Data Standards

### MEASURE DESCRIPTION

Completeness, consistency, positional and attribute accuracy are solely dependent upon entities contributing to this dataset. The NCDOT ATLAS Workbench application performs quality control checks on data coming into the enterprise database ensuring that schema is consistent. Checks are made for file name, attribute names, attribute types, attribute length/scale/precision, project number of the feature class vs the values in the ProjNumber field, and date.

### EVALUATION METHOD

Data submitted to the ATLAS gateway through the Workbench tool must follow standards outlined in the ATLAS Standards Document.

### CONFORMANCE TEST RESULTS

TEST PASSED Yes

#### RESULT EXPLANATION

The ATLAS Workbench has a validation tool that checks every dataset being uploaded to the SDE Database and rejects any that do not follow the ATLAS Standards Document.

## Lineage ►

### LINEAGE STATEMENT

Records for this dataset are collected and added as Traffic Forecast Reports and their associated geospatial data are delivered via the NCDOT ATLAS Workbench web application. When a project team, hired to complete a Traffic Forecast Report for a particular project, uploads their Traffic Forecast Report geospatial data into the ATLAS Workbench application, that data is QA/QC'd to ensure schema consistency and if schema is correct that data is appended to the Traffic Forecast Project Limit dataset in the ATLAS SDE. That data is then published as a REST service to be used by web mapping applications.

### PROCESS STEP ►

#### DESCRIPTION

Traffic Forecast Project Limits are drawn by various contractors as part of Traffic Forecast Report preparation for transportation projects. These are defined as the limits of the NEPA Study. Field staff use mapping-grade GPS units to record observations. GPS units should be loaded with the appropriate data dictionary files (.ddf) from NCDOT if they are available for the type of data being collected.

PROCESS STEP ►

DESCRIPTION

The contractor then signs on to the Sharepoint Connect site and navigates to the appropriate project and then over to the ATLAS Workbench and the appropriate discipline. In this case it is Traffic Management. The data is then uploaded via the Workbench tool by the contractor for validation of the data.

PROCESS STEP ►  
DESCRIPTION

QA/QC is conducted on the uploaded data by the ATLAS validation tool, which checks for filename, schema and geometry. If the data passes validation then it is appended to Traffic Forecast Project Limit into Edit SDE. The tool writes the URL for the layer to the Edit SDE in the DOC\_URL field. Edit SDE is replicated to Pub SDE. Data is now visible as a web service layer.

FIELD [SHAPE\\_Length ▶](#)

- \* ALIAS SHAPE\_Length
- \* DATA TYPE Double
- \* WIDTH 8
- \* PRECISION 0
- \* SCALE 0
- \* FIELD DESCRIPTION

Length of feature in internal units.

\* DESCRIPTION SOURCE

Esri

\* DESCRIPTION OF VALUES

Positive real numbers that are automatically generated.

[Hide Field SHAPE\\_Length ▲](#)

FIELD [DueDate ▶](#)

- \* ALIAS DueDate
- \* DATA TYPE Date
- \* WIDTH 8
- \* PRECISION 0
- \* SCALE 0

FIELD DESCRIPTION

When NCDOT expected the forecast to be finished, based on the typical amount of time needed to count traffic and calculate future traffic based on land use plans and existing traffic.

## Metadata Constraints ►

### SECURITY CONSTRAINTS

CLASSIFICATION unclassified

CLASSIFICATION SYSTEM None

### LIMITATIONS OF USE

The North Carolina Department of Transportation shall not be held liable for any errors in this metadata. This includes errors of omission, commission, errors concerning the content of the data, and relative and positional accuracy of the data. This data cannot be construed to be a legal document. Primary sources from which this data was compiled must be consulted for verification of information contained in this data. Datasets developed under Project ATLAS do not replace any Traffic Forecast Report work for future projects and may not be used as a replacement for site visits / field surveys by licensed professionals and hence should be used only as a supporting platform for decision making. Use of this dataset for project scoping or screening is merely pre-decisional.
