Downloadable Data, Major Roads, Secondary, Interstate, SR, Primary, North Carolina, Centerline, NC, Highways, US, Division, Roads, Streets, County, State maintained roads, Transportation

Summary

This layer is a visual representation of public roads in the State of North Carolina. System roads (state maintained) are current through December 2018 for changes by NCDOT Petitions and Municipal Agreements processes.

Non-system roads updated this quarter: Camden (up-to-date as of 5/18/2018), Carteret (up-to-date as of 3/8/2018), Chowan (up-to-date as of 5/21/2018), EBCN (Eastern Band Cherokee Nation) Swain (up-to-date as of 9/14/2018), Macon (up-to-date as of 4/6/2018) and Tyrell (up-to-date as of 5/16/2018). Other non-system roads (maintained by local government) are up-to-date according to the most current county data as of January 2015 with some exceptions. The full list of details can be viewed in metadata section 'Resource Details'. Other state agency roads are up-to-date according to North Carolina Wildlife Resources Commission data as of February 2016, with the exception of those routes in Beaufort, Bladen, Brunswick, Camden, Carteret, Columbus, Craven, Currituck, Dare, Hyde, Jones, Onslow, Pender, Tyrrell and Washington (up-to-date as of 3/14/2018).

Description

An arc layer for visual representation of statewide road centerlines on publically-accessible roads segmented by road intersections and street names. The state road system is comprised of Interstate, US, NC, Secondary Routes, and Ramps. Each arc/record is split where road characteristics change along a route. This dataset supports the Federal Highway Administration's (FHWA) data requirements for the Highway Performance Monitoring System (HPMS). HPMS is a national level highway information system that includes data on the extent, condition, performance, use, and operating characteristics of the Nation's highways. States are required to submit an HPMS report to FHWA annually. This dataset also contains projected routes, generalized locations of routes that will become part of the National Highway System (NHS) when they are built. The non-system roads are consumed and conflated from authoritative sources, including local (i.e. county), state (i.e. parks) and federal (i.e. Forest Service) entities. This dataset is updated daily. Data quality is tracked using the revision document fields (GeoDocType and GeoDocId). Legacy data are coded as not verified in the GeoDocType field. The geometry and spatial location of new data is verified with the most current information available (i.e aerial imagery).

Credits

Spatial Data Management Group - Product creation; Data Conversion Group - System geometry, mileage, events; Local County Government - Non-system geometry, Street Name event

Use limitations

The North Carolina Department of Transportation shall not be held liable for any errors in this data. This includes errors of omission, commission, errors concerning the content of the data, and relative and positional

accuracy of the data. This data cannot be construed to be a legal document. Primary sources from which this data was compiled must be consulted for verification of information contained in this data.
