

# North Carolina Rail Crossings – 3rd Quarter 2021 - North Carolina Department of Transportation

SDE Feature Class

## Tags

Transportation, Railways, Rail Crossings

## Summary

This dataset is made available to provide a representation of state-maintained railroad crossings for mapping, planning and modeling purposes. Locations are approximate and data is not guaranteed to be complete.

## Description

The dataset provided includes point data for use in GIS that represents public crossings in North Carolina. Only open and inactive crossings are included; closed crossings have been omitted. Attributes for each crossing include the crossing's FRA identification number and the latitude and longitude of the crossing. Crossing location and status were verified by cross-referencing Federal Railroad Administration public crossing database with North Carolina Department of Transportation Rail Division's crossing database, railroad company track charts and aerial imagery. Where in doubt, crossing status has been investigated by contacting the rail company, landowner or municipality within whose jurisdiction the crossing falls. The attributes are derived directly from NCDOT's State Authoritative Rail and Highway (SARAH) database.

## Credits

North Carolina Department of Transportation Rail Division, Moffatt & Nichol Engineers, Simpson Engineers and Associates

## Use limitations

The North Carolina Department of Transportation shall not be held liable for any errors in this data. This includes errors of omission, commission, errors concerning the content of the data, and relative and positional accuracy of the data. This data cannot be construed to be a legal document. Primary sources from which this data was compiled must be consulted for verification of information contained in this data.

## Extent

## Lineage ▶

##### LINEAGE STATEMENT

Moffatt & Nichol Engineers initially performed analysis to verify the location of every open public crossing in the state of North Carolina. Subsequent updates added all pedestrian and inactive crossings to the dataset. Dataset is updated by NCDOT Rail Division and offered as an online resource by the NCDOT GIS Unit. Crossing locations from several sources were compared and the probable location of each crossing was determined. Sources include NCDOT Rail Division's State Authoritative Rail and Highway (SARAH) database, Federal Railroad Administration's crossing database, NCDOT State Route LRS dataset. Where study of these resources was unable to positively locate a crossing, each crossing was individually investigated by contacting the land owner or controlling municipality or the relevant railroad company. Additional crossing attributes have been ported from the NCDOT State Authoritative Rail and Highway database (SARAH) by Simpson Engineers and Associates. These attributes are maintained as a separate data source and have been imported without any additional processing or analysis.

FIELD DESCRIPTION

Value represents the telephone number (area code and phone number) for the Emergency Notification System Contact (e.g., Law Enforcement, Railroad Emergency Contact or State Emergency Contact) associated with the crossing. Normally, this will be the ENS telephone number posted at the crossing or along the railroad branch line. This should be a 24-hour number that can be called to speak with an Emergency Notification Center who can send emergency responder(s) to the crossing in the event of problems, signal malfunctions, or other emergencies at the crossing. Note: 911 cannot be used as the Emergency Notification Telephone No.
