

# North Carolina Rail Track - 4th Quarter 2025 - NC Department of Transportation

## Geodatabase Feature Class

**Tags** Rail, Railroad, Transportation, Track, Rail Track, Rail Lines, NCDOT, NC, Official NCDOT, North Carolina, Railway, STRACNET

### Summary

This dataset is made available to provide a representation of state maintained railroad track for mapping and planning purposes.

### Description

The dataset provided includes line data for use in geographic information systems that represents all the standard gauge freight and passenger railroad track in North Carolina, and contains the following information: owner, operator, track type, branch, beginning milepost, ending milepost, and in service status. The linework was digitized based on the most recent statewide aerial photography provided by the State of North Carolina. Select segments representing out of service track have been added to the dataset to aid in preserved and future corridor analysis.

Note: The representation of rail lines in Western North Carolina may not reflect the actual alignment or conditions after Hurricane Helene.

## Lineage

### Lineage statement

Linework digitized by Moffatt & Nichol Engineers based on latest available NC statewide aerial photography.

Attribution accomplished by assessing several sources to determine the most recent and accurate records: North Carolina Statewide Authoritative Rail and Highway (SARAH) Crossing Database, Federal Railroad Administration Crossing Database, railroad company track charts, railroad company representatives, local municipal representatives, and internal Moffatt & Nichol databases.

Data set updated by the NCDOT Rail Division and WGI.

Line work is reviewed and updated to conform with the annual release of the North Carolina Orthoimagery Project.

Resource made available on the web by NCDIT-Transportation GIS Unit.

### List of values

**Value** Main

**Description** A track extending through yards or between stations upon which trains are operated by a timetable, train order, or both, or the use of which is governed by a rail signal system.

**Enumerated domain value definition source** FRA

**Value** Siding

**Description** An auxiliary track used for passing, switching, and/or storage, but not through movements.

**Enumerated domain value definition source** FRA

**Value** Industry

**Description** A switching track or series of tracks, used primarily for access to one or more businesses for loading and unloading rolling stock. An industry track serves the needs of the industry rather than the railroad and will typically be located on the property of the industry.

## Enumerated domain value definition source FRA

**Value** Yard

**Description** A system of tracks within defined limits used for making up or breaking up of trains, for storage of cars, and for other purposes over which movements not authorized by timetable or by train order may be made, subject to prescribed signals, rules or other special instructions. Spur track and lead track are included in this definition. Sidings and Industry track are not included, nor is main track within yard limits.
