

# NC Proposed Right of Way Acquisition Temporary Slope Easement Right Polygon, Continuous Capture – NC Department of Transportation

## Geodatabase Feature Class

**Tags** Polygon, North Carolina, NCDOT, Transportation, Right of Way, Highway, Transportation Planning, Location, Acquisition, Parcel, Property, ROW.

### Summary

This feature class contains polygon representation of temporary slope easement in which NCDOT acquisition, in part, may be necessary for road construction or improvement. Attributes containing NCDOT Project and Parcel ID are included. These data support the NCDOT Right Of Way Management System which allows for the continuous capture of right of way data. The data entered are the latest available to the NCDOT Right Of Way Branch, but data currency may vary across the system.

### Description

The Right of Way Branch of NCDOT is responsible for the acquisition of all necessary lands and rights of way used for construction and improvements of all highways which are part of the State Highway System. This includes roads on both the primary (interstate, U.S., and N.C. routes) and secondary (SR routes) systems. Purchasing land for other public modes of transportation is also required for expansion and to accommodate increased demand.

Multiple facets make up the Right of Way business process from early NCDOT project development to appraisals and land purchases. NCDOT's "Understanding the Right of Way Process" document provides more information here:

<https://connect.ncdot.gov/business/ROW/ROWManualsandPublications/Right-of-Way-Brochure-Single%20Page%20layout.pdf>

The Right of Way Management System (ROWMS) is a web-based application that captures Right of Way (ROW) information and documents, provides workflow and reporting capabilities, and interfaces with internal systems. ROWMS supports NC legislative mandates requiring Right of Way to have a role-based, data management system used by all projects.

A major benefit ROWMS provides is a 25% workflow cycle time reduction. It also facilitates process standardization, cross-department integration, collaboration across the organization, a detailed audit trail, and contractor integration. ROWMS integrates systems such as SAP (Vendors, Invoices, POs, Asset Management, etc.), SharePoint (public documents and deeds), DocuSign (electronic signatures, eNotary), and GIS.

The GIS Unit of the North Carolina Department of Information Technology-Transportation (NCDIT-T) has developed a process to convert the Right of Way Unit's original DGN/CAD files into a GIS format, that can then be managed and disseminated to meet the ROWMS project needs. These are adjacent and nearby critical features such as existing roads, buildings, utilities, and property, affected or impacted in some way due to NCDOT's state highway system construction or improvement projects. Proposed features for ROW acquisition, proposed roads and related features are also included. This ROW data can be viewed overlaying maps in the application. The GIS capability of ROWMS enables management and dissemination of Right of Way-based spatial data.

### Credits

The North Carolina Department of Transportation, Division of Highways, Right of Way Unit.

Support and maintenance of the enterprise spatial database where this data resides is handled by the North Carolina Department of Information Technology-Transportation, GIS Unit.

## Use limitations

The North Carolina Department of Transportation shall not be held liable for any errors in this data. This includes errors of omission, commission, errors concerning the content of the data, and relative and positional accuracy of the data. This data cannot be construed to be a legal document. Primary sources from which this data was compiled must be consulted for verification of information contained in this data.

All Right of Way data is the sole property of NCDOT and any public purpose use is subject to approval and release by NCDOT. No data, whole or in part, shall be released, published, or shared without prior written approval by NCDOT. No information concerning the data shall be divulged to anyone outside the proper officials at NCDOT or the Federal Highway Administration. All Right of Way data is strictly confidential to NCDOT and its approved contractors.

**Creation date** 2018-09-13 00:00:00

**Publication date** 2018-09-13 00:00:00

## Lineage

### Lineage statement

This dataset was originally created by the North Carolina Department of Transportation, Right of Way Unit, to provide a geographic representation of temporary slope easement affected by proposed Right of Way acquisition in North Carolina. The data contained within this dataset is automatically loaded to the enterprise database environment through the data conversion process. Web mapping services are created with this data from the database. These services support the Right of Way Management System (ROWMS) online GIS data viewer which is utilized by the NCDOT's Right of Way Unit.

## Process step

**When the process occurred** 2018-09-01 00:00:00

### Description

The Right of Way data is originally created using MicroStation (CAD software). This data, known as Levels, exist as DGN format data files

## Process contact - originator

**Organization's name** North Carolina Department of Transportation, Right of Way Unit

**Contact's position** Right of Way Agent II (Real Property Conveyance Specialist)

### Contact information

**Scale** 0

### Description source

NCDOT Right of Way Unit

### Field description

Uniquely identifies a feature or table row within a geodatabase and across geodatabases.

### Description of values

Alphanumeric values will vary.

## Field ProjectParcelID

**Alias** ProjectParcelID  
**Data type** String  
**Width** 75  
**Precision** 0  
**Scale** 0

### Description source

NCDOT Right of Way Unit

### Field description

Concatenation of the NCDOT TIP Project number and the Parcel ID. Remnant parcels require a sub categorization where whole parcels are split and the parcel number stays the same for each part of the whole. A lower case letter is assigned to the end of parcel number to make it unique from the original whole parcel number.

### Description of values

Alphanumeric values will vary.

## Field IgdsFillColor

**Alias** IgdsFillColor  
**Data type** String  
**Width** 50  
**Precision** 0  
**Scale** 0

### Description source

NCDOT Right of Way Unit

### Field description

Field from original DGN format file. The element's fill color setting.

### Description of values

Values will vary.

## Field Shape\_Length

**Alias** Shape\_Length

**Data type** Double

**Width** 8

**Precision** 0

**Scale** 0

### Field description

Length of feature in internal units.

### Description source

Esri

### Description of values

Positive real numbers that are automatically generated.

## Field Shape\_Area

**Alias** Shape\_Area

**Data type** Double

**Width** 8

**Precision** 0

**Scale** 0

### Field description

Area of feature in internal units squared.

### Description source

Esri

### Description of values

Positive real numbers that are automatically generated.
