

North Carolina Division Boundaries, North Carolina Department of Transportation, Prioritization 7.0, July 2023

File Geodatabase Feature Class

Tags

North Carolina, Boundary, County, County, Division, DOT Division, Boundaries, Prioritization 7.0 (P7), Strategic Prioritization Office of Transportation (SPOT), North Carolina Department of Transportation (NCDOT)

Summary

North Carolina is divided into 14 regions - referred to as highway divisions - in which the N.C. Department of Transportation's Division of Highways distributes the duties of building and maintaining state-owned bridges and highways. This feature class allows 14 division polygons to be symbolized.

Description

Feature class representing the 14 DOT division boundaries in North Carolina. Most boundaries are derived from the DOT county maps which originally come from U.S. Geological Survey (USGS) but might have been updated by the county parcel maps. For the purposes of the Strategic Planning Office of Transportation Prioritization 7.0 project, data is not updated after July 2023.

For further information about domains and fields used in SPOT see the SPOT P7 Domains document here:

Use limitations

The North Carolina Department of Transportation shall not be held liable for any errors in this data. This includes errors of omission, commission, errors concerning the content of the data, and relative and positional accuracy of the data. This data cannot be construed to be a legal document. Primary sources from which this data was compiled must be consulted for verification of information contained in this data.

SPOT On!ine is the NC Department of Transportation's online project prioritization evaluation system. All data used for scoring and evaluating projects, including scores and preliminary point-in-time cost estimates either generated by the SPOT On!ine application or provided by the user, are only intended for use in the Department's Strategic Prioritization Process. All SPOT On!ine project data will be used for preliminary level planning, scoring, and evaluation purposes only, and must undergo further review prior to use in the Department's programming process. By entering SPOT On!ine, the user hereby acknowledges this statement.

TEST PASSED Yes

RESULT EXPLANATION

The dataset is converted to file geodatabase (FGDB) format using tools in ArcGIS. Quality checks were performed by the Strategic Prioritization Office of Transportation (SPOT) and the North Carolina Department of Transportation Geographic Information Systems Unit and errors were accepted as within business range or identified as exceptions.

PROCESS STEP ►

DESCRIPTION

Using the AutoCAD with the AutoCAD map file that had the most up to date linework a Topology was created that easily exports into a polygon shapefile.

RATIONALE

Division survey data was drawn as lines in AutoCAD and they needed to be converted into polygons.
