

STIP Manager Report: Related Projects

NCDOT STIP

The N.C. Department of Transportation's long-range transportation plan – called the State Transportation Improvement Program (STIP) – identifies the construction funding and schedule for state transportation projects over a 10-year period. NCDOT updates the STIP approximately every two years. The data-driven process to update the STIP is called [Strategic Prioritization](#). For more information, visit [NCDOT's STIP web site](#).

Related Projects

STIP Manager provides the user with a web-based interface to view, enter, and edit data associated with the NCDOT Statewide Transportation Improvement Program (STIP). Modules are included to allow users to add and manage projects, input funding information, and to process STIP revisions through an automated workflow. Additional reporting and analysis features are included.

The Related Projects report is available and populated when any project that is a Parent or Child record is selected from the Projects interface. The STIP ID record that the user was viewing will be highlighted in the report. General project and funding information is provided. The last record in this report contains the Total Programmed for Related Projects amount. This is the sum of the Total Programmed column for the listed projects.
