

STIP Manager Report: Tabular Funding Outlay (Simple)

NCDOT STIP

The N.C. Department of Transportation's long-range transportation plan – called the State Transportation Improvement Program (STIP) – identifies the construction funding and schedule for state transportation projects over a 10-year period. NCDOT updates the STIP approximately every two years. The data-driven process to update the STIP is called [Strategic Prioritization](#). For more information, visit [NCDOT's STIP web site](#).

Tabular Funding Outlay (Simple)

STIP Manager provides the user with a web-based interface to view, enter, and edit data associated with the NCDOT Statewide Transportation Improvement Program (STIP). Modules are included to allow users to add and manage projects, input funding information, and to process STIP revisions through an automated workflow. Additional reporting and analysis features are included.

The Tabular Funding Outlay (Simple) report provides funding figures for projects in a STIP over multiple years. Descriptive information is included for each project record in the table. Once a STIP and Revision (if applicable) is selected, Mode, Funding Program, STI Funded Category, and Location (Statewide, Division, County, MPO/RPO) filters are available as report configuration options. If no filter criteria are added, the report will list all projects in the selected STIP/Revision.

Point of Contact

North Carolina Department of Transportation, Office of Strategic Planning and Programming
State Transportation Improvement Program Data Manager
stipunit@ncdot.gov
1 South Wilmington Street
Raleigh, NC 27601
