### Description:

Abstract:

Line layer containing pavement condition survey attributes dynamically attached to state maintained roads.

Purpose:

This dataset is designed to give a linear representation of the attribute information collected in the Pavement Condition Survey database. This database

consists of the Asphalt table and the Jointed Concrete Pavement (JCP) tables, with IRI (International Roughness Index) data attached. These attributes were dynamically matched to the NCDOT GIS Unit's LRSRT to produce this layer.
