***Geospatial data presentation form:** raster digital data

Description:

Abstract:

FEMA-DR-1969 - Bertie County tornado imagery flown by NCDOT Photogrammetry Unit

Purpose:

To collect information for NCDOT debris and system management following the severe storms and tornados on April 16, 2011.

Supplemental information:

This is a Preliminary Georeferenced Image (PGI). Mosaic was Ortho-rectified using direct GPS/IMU georeferencing without surveyed ground control. 100' gridded LiDAR data was used as the elevation data source. Mosaic has not been edited, some image distortion and mismatches may be found, particularly along roads and bridges. There is also haze in the mosaic due to the flying height and prevailing weather conditions during imagery acquisition.
