

Spatial Data Viewer (SDV) User Guide – Search Tool

Note: If the search returns multiple features, the map automatically zooms to the first one on the list (e.g. "040092"). This may not be the feature you want.

Using the Search Box

1. Enter a search term in the search box.
2. Hit return or click the magnifying glass to search.
3. If multiple features meet your search term, select the correct feature from the list of results.
4. Use the Esri World Geocoder like you would use a google maps search.
5. Use the **Search In** dropdown to focus your search to within specific layers.
6. If you select a specific layer, the search box displays what you can search for. E.g. "Find Bridge Number" for the Bridge Structures layer.
