## SDV 2.0 User Guide - Select Tool

- Make sure the features you wish to select are checked on in the Layers List Tool.
- **2.** Click the icon to open the Select toolbar
- **3.** To select features from a layer, it must checked and not be grayed out.
- 4. The Select button gives a list of methods to use for selection
- **5.** Click on the map and hold the button to draw the area you are selecting
- 6. Click on the 3 dots to open the Selection Actions, which gives you tools such as:
  - Exporting to different formats
  - Creating new data out of your selection in AGOL
  - Viewing selection in attribute table (6c)
- Get LRS Milepoint
- Clear the selected features to perform a new selection
