Wake Forest, NC 27587

ATTN: Mr. Eric Alsmeyer
NCDOT Division 5 Project Coordinator

SUBJECT: **Application for Section 404 Nationwide Permits 13, 23, and 33; Section 401 Water Quality Certification; and Neuse River Riparian Buffer Authorization** for the I-40/440 Pavement Reconstruction – Area 3 Project, Wake County, North Carolina. Federal Aid Project Nos. IMS-040-4(147)298 and IMS-0440(13), TIP Nos. I-5338 and I-5311.

Debit $570.00 from WBS Element No. 46265.3.1

Dear Sir:

The North Carolina Department of Transportation (NCDOT) proposes pavement reconstruction of I-40/440, beginning at the I-40/US 64/US 1 interchange west of SR 1319 (Jones Franklin Road), continuing east along I-40/440 and onto I-440/US 64, and terminating north of the I-440 interchange with US 64/US 264. This construction project is comprised of three smaller projects, each of which will be permitted separately. The three smaller projects include: 1) the initial 3-lane maintenance of traffic (MOT) temporary widening project, 2) the Area 3 project, which begins near the I-40/440 interchange (Station 444+00) and continues northeast to the end of the project, just north of the I-440 interchange with US 64/US 264 (Station 628+60), and 3) the final project consisting of Areas 1, 2A, and 2B, beginning at Station 19+02 near the I-40/US 64/US 1 interchange and continuing east to Station 444+00, just west of the I-40/440 interchange.

A Neuse River Riparian Buffer Authorization and North Carolina State General Permit for Impacts to Isolated and Other Non-404 Jurisdictional Wetlands and Waters were previously requested for the initial MOT project in an application dated December 2, 2013. This Section 404/401 permit application and Neuse River Riparian Buffer Authorization request are for the Area 3 project. Subsequent applications/modifications will be submitted for Areas 1, 2A, and 2B as project design progresses.

Please find enclosed the Pre-construction Notification (PCN), Jeffrey's Warehouse Mitigation Site Debit Ledger, Stormwater Management Plan, permit drawings, buffer drawings, and roadway design plans for

the subject projects. Copies of the U.S. Army Corps of Engineers (USACE) Jurisdictional Determinations were provided with the previously-submitted MOT project permit application. A Categorical Exclusion (CE) was completed for I-5338 in December 2012 and for I-5311 in February 2012.

These TIP projects had a Design Build let date of May 13, 2013. Construction of the Area 3 project is projected to commence in December of 2013 or sooner, contingent on issuance of permits.

A copy of this permit application will be posted on the NCDOT Website at https://connect.ncdot.gov/resources/Environmental/Pages/default.aspx, under *Quick Links > Permit Applications*. Copies of the environmental documents are also available at the above website address under *Quick Links > Environmental Documents*. Thank you for your assistance with this project. If you have any questions or need additional information, please contact Jim Mason at either jsmason@ncdot.gov or (919) 707-6136.

Sincerely,

for E. L. Lusk

Richard W. Hancock, P.E., Manager
Project Development and Environmental Analysis Unit

Form Version 1.3 Dec 10 2008

Pre-Construction Notification (PCN) Form

A. Applicant Information

1. Processing

1a. Type(s) of approval sought from the Corps:	☒ Section 404 Permit	☐ Section 10 Permit
1b. Specify Nationwide Permit (NWP) number: 13 23 33 or General Permit (GP) number:		
1c. Has the NWP or GP number been verified by the Corps?	☐ Yes	☒ No

1d. Type(s) of approval sought from the DWQ (check all that apply):

☒ 401 Water Quality Certification – Regular ☐ Non-404 Jurisdictional General Permit

☐ 401 Water Quality Certification – Express ☒ Riparian Buffer Authorization

1e. Is this notification solely for the record because written approval is not required?	For the record only for DWQ 401 Certification: ☐ Yes ☒ No	For the record only for Corps Permit: ☐ Yes ☒ No
1f. Is payment into a mitigation bank or in-lieu fee program proposed for mitigation of impacts? If so, attach the acceptance letter from mitigation bank or in-lieu fee program.		☐ Yes ☒ No
1g. Is the project located in any of NC's twenty coastal counties. If yes, answer 1h below.		☐ Yes ☒ No
1h. Is the project located within a NC DCM Area of Environmental Concern (AEC)?		☐ Yes ☒ No

2. Project Information

2a. Name of project:	I-40/440 Pavement Reconstruction - Area 3 Project
2b. County:	Wake
2c. Nearest municipality / town:	Raleigh
2d. Subdivision name:	*not applicable*
2e. NCDOT only, T.I.P. or state project no:	TIP# I-5338 and TIP# I-5311

3. Owner Information

3a. Name(s) on Recorded Deed:	North Carolina Department of Transportation
3b. Deed Book and Page No.	*not applicable*
3c. Responsible Party (for LLC if applicable):	*not applicable*
3d. Street address:	1598 Mail Service Center
3e. City, state, zip:	Raleigh, NC 27699-1598
3f. Telephone no.:	(919) 707-6136
3g. Fax no.:	(919) 212-5785
3h. Email address:	jsmason@ncdot.gov

4. Applicant Information (if different from owner)	
4a. Applicant is:	☐ Agent ☐ Other, specify:
4b. Name:	*not applicable*
4c. Business name (if applicable):	
4d. Street address:	
4e. City, state, zip:	
4f. Telephone no.:	
4g. Fax no.:	
4h. Email address:	
5. Agent/Consultant Information (if applicable)	
5a. Name:	*not applicable*
5b. Business name (if applicable):	
5c. Street address:	
5d. City, state, zip:	
5e. Telephone no.:	
5f. Fax no.:	
5g. Email address:	

B. Project Information and Prior Project History	
1. Property Identification	
1a. Property identification no. (tax PIN or parcel ID):	*not applicable*
1b. Site coordinates (in decimal degrees):	Latitude: 35.767816 (DD.DDDDDD) Longitude: - 78.574221 (-DD.DDDDDD)
1c. Property size:	680 acres
2. Surface Waters	
2a. Name of nearest body of water (stream, river, etc.) to proposed project:	Crabtree Creek and Walnut Creek
2b. Water Quality Classification of nearest receiving water:	C;NSW
2c. River basin:	Neuse
3. Project Description	
3a. Describe the existing conditions on the site and the general land use in the vicinity of the project at the time of this application: Both I-40 and I-440 are classified as Interstate based on the North Carolina Functional Classification System. The project area consists of maintained NCDOT right-of-way along I-40/440 and is primarily composed of maintained fill slopes, paved shoulders and interchanges, and forested edges adjacent to the roadway. Land use within the vicinity includes forested, commercial, industrial, medium- to high-density residential, agricultural, recreational, and infrastructure-related.	
3b. List the total estimated acreage of all existing wetlands on the property: 4.9 acres jurisdictional wetland; 0.27 acre non-jurisdictional, isolated wetland	
3c. List the total estimated linear feet of all existing streams (intermittent and perennial) on the property: 12,248 LF	
3d. Explain the purpose of the proposed project: The purpose of the pavement reconstruction project is to address deteriorating road conditions by replacing deficient pavement and road-bed material in order to improve the quality of the road along the project corridor, while still maintaining traffic during project construction. The purpose of the Area 3 project is to reconstruct pavement within the Area 3 footprint, while also improving the stormwater drainage and overall hydraulic drainage system.	
3e. Describe the overall project in detail, including the type of equipment to be used: The North Carolina Department of Transportation (NCDOT) proposes pavement reconstruction of I-40/440, beginning at the I-40/US 64/US 1 interchange west of SR 1319 (Jones Franklin Road), continuing east along I-40/440 and onto I-440/US 64, and terminating north of the I-440 interchange with US 64/US 264. The Area 3 project begins near the I-40/440 interchange (Station 444+00) and continues northeast to the end of the project, just north of the I-440 interchange with US 64/US 264 (Station 628+60). Construction activities associated with the Area 3 project include pavement reconstruction, minor modifications to existing fill slopes associated with the pavement reconstruction, storm drain system pipe replacement, maintenance and protection of existing drainage structures, culvert preservation/slip lining, sediment removal from culverts and streams, temporary stream dewatering, and stream bank stabilization. All practical alternatives will be utilized to minimize the project footprint associated with the pavement reconstruction project. Standard road building equipment such as trucks, dozers, backhoes, and cranes will be used.	
4. Jurisdictional Determinations	
4a. Have jurisdictional wetland or stream determinations by the Corps or State been requested or obtained for this property / project (including all prior phases) in the past? Comments:	☒ Yes ☐ No ☐ Unknown
4b. If the Corps made the jurisdictional determination, what type of determination was made?	☒ Preliminary ☒ Final
4c. If yes, who delineated the jurisdictional areas? Name (if known): Jim Mason (I-5311); Elizabeth Workman-Maurer (I-5338)	Agency/Consultant Company: NCDOT (I-5311); RK&K (I-5338) Other:
4d. If yes, list the dates of the Corps jurisdictional determinations or State determinations and attach documentation. I-5311 Preliminary JD issued April 19, 2013 and updated on October 2, 2013; I-5338 Approved JD issued on April 1, 2013. JDs were provided with the previously-submitted MOT permit application.	

5. Project History			
5a. Have permits or certifications been requested or obtained for this project (including all prior phases) in the past?	☒ Yes	☐ No	☐ Unknown
5b. If yes, explain in detail according to "help file" instructions. A Neuse River Riparian Buffer Authorization and North Carolina State General Permit for Impacts to Isolated and Other Non-404 Jurisdictional Wetlands and Waters have been requested for the initial Maintenance of Traffic (MOT) project.			
6. Future Project Plans			
6a. Is this a phased project?	☒ Yes	☐ No	
6b. If yes, explain. This reconstruction project is comprised of three smaller projects, each of which will be permitted separately. The three smaller projects include: 1) the initial 3-lane maintenance of traffic (MOT) temporary widening project, 2) the Area 3 project, which begins near the I-40/440 interchange (Station 444+00) and continues northeast to the end of the project, just north of the I-440 interchange with US 64/US 264 (Station 628+60), and 3) the final project consisting of Areas 1, 2A, and 2B, beginning at Station 19+02 near the I-40/US 64/US 1 interchange and continuing east to Station 444+00, just west of the I-40/440 interchange. A Neuse River Riparian Buffer Authorization and North Carolina State General Permit for Impacts to Isolated and Other Non-404 Jurisdictional Wetlands and Waters were previously requested for the initial MOT project. The current Section 404/401 permit application and Neuse River Riparian Buffer Authorization request are for the Area 3 project. Subsequent applications/modifications will be submitted for Areas 1, 2A, and 2B as project design progresses.			

C. Proposed Impacts Inventory

1. Impacts Summary

1a. Which sections were completed below for your project (check all that apply):

☒ Wetlands ☒ Streams - tributaries ☒ Buffers

☐ Open Waters ☐ Pond Construction

2. Wetland Impacts

If there are wetland impacts proposed on the site, then complete this question for each wetland area impacted.

2a. Wetland impact number – Permanent (P) or Temporary (T)	2b. Type of impact	2c. Type of wetland (if known)	2d. Forested	2e. Type of jurisdiction (Corps - 404, 10 DWQ – non-404, other)	2f. Area of impact (acres)
Site 1 ☐ P ☐ T			☐ Yes ☐ No	☐ Corps ☐ DWQ	
Site 2 ☐ P ☐ T			☐ Yes ☐ No	☐ Corps ☐ DWQ	
Site 3 ☐ P ☐ T			☐ Yes ☐ No	☐ Corps ☐ DWQ	
Site 4 ☐ P ☐ T			☐ Yes ☐ No	☐ Corps ☐ DWQ	
Site 5 ☐ P ☐ T			☐ Yes ☐ No	☐ Corps ☐ DWQ	
Site 6 ☐ P ☐ T			☐ Yes ☐ No	☐ Corps ☐ DWQ	
				2g. **Total wetland impacts**	Perm.: 0 ac. Temp.: 0 ac.

2h. Comments: A total of 0.05 acres of hand clearing will occur at Site 3202 within riparian wetland WGH. Work in this area will occur on mats.

3. Stream Impacts

If there are perennial or intermittent stream impacts (including temporary impacts) proposed on the site, then complete this question for all stream sites impacted.

3a. Stream impact number - Permanent (P) or Temporary (T)	3b. Type of impact	3c. Stream name	3d. Perennial (PER) or intermittent (INT)?	3e. Type of jurisdiction (Corps - 404, 10 DWQ – non-404, other)	3f. Average stream width (feet)	3g. Impact length (linear feet)
Site 1 ☐ P ☐ T			☐ PER ☐ INT	☐ Corps ☐ DWQ		
Site 2 ☐ P ☐ T			☐ PER ☐ INT	☐ Corps ☐ DWQ		
Site 3 ☐ P ☐ T			☐ PER ☐ INT	☐ Corps ☐ DWQ		
Site 4 ☐ P ☐ T			☐ PER ☐ INT	☐ Corps ☐ DWQ		
Site 5 ☐ P ☐ T			☐ PER ☐ INT	☐ Corps ☐ DWQ		
Site 6 ☐ P ☐ T			☐ PER ☐ INT	☐ Corps ☐ DWQ		
					3h. **Total stream and tributary impacts**	Perm:45 LF Temp:831 LF

3i. Comments: See the attached stream impact table for site-by-site impacts.

4. Open Water Impacts

If there are proposed impacts to lakes, ponds, estuaries, tributaries, sounds, the Atlantic Ocean, or any other open water of the U.S. then individually list all open water impacts below.

4a. Open water impact number – Permanent (P) or Temporary (T)	4b. Name of waterbody (if applicable)	4c. Type of impact	4d. Waterbody type	4e. Area of impact (acres)
O1 ☐ P ☐ T				
O2 ☐ P ☐ T				
O3 ☐ P ☐ T				
O4 ☐ P ☐ T				
4f. Total open water impacts				Perm.: 0 Temp.: 0

4g. Comments: No open water impacts will result from the Area 3 project.

5. Pond or Lake Construction

If pond or lake construction proposed, then complete the chart below.

5a. Pond ID number	5b. Proposed use or purpose of pond	5c. Wetland Impacts (acres)			5d. Stream Impacts (feet)			5e. Upland (acres)
		Flooded	Filled	Excavated	Flooded	Filled	Excavated	Flooded
P1								
P2								
5f. Total								

5g. Comments:

5h. Is a dam high hazard permit required?	☐ Yes ☐ No If yes, permit ID no:
5i. Expected pond surface area (acres):	
5j. Size of pond watershed (acres):	
5k. Method of construction:	

6. Buffer Impacts (for DWQ)

If project will impact a protected riparian buffer, then complete the chart below. If yes, then individually list all buffer impacts below. If any impacts require mitigation, then you **MUST** fill out Section D of this form.

6a. Project is in which protected basin?			☒ Neuse ☐ Tar-Pamlico ☐ Other: ☐ Catawba ☐ Randleman		
6b. Buffer impact number – Permanent (P) or Temporary (T)	6c. Reason for impact	6d. Stream name	6e. Buffer mitigation required?	6f. Zone 1 impact (square feet)	6g. Zone 2 impact (square feet)
B1 ☐ P ☐ T			☐ Yes ☐ No		
B2 ☐ P ☐ T			☐ Yes ☐ No		
B3 ☐ P ☐ T			☐ Yes ☐ No		
		6h. **Total buffer impacts**		45,826	23,905
6i. Comments: See the attached buffer impact table for site-by-site impacts.					

D. Impact Justification and Mitigation

1. Avoidance and Minimization

1a. Specifically describe measures taken to avoid or minimize the proposed impacts in designing project.

For the Area 3 project, jurisdictional impacts to wetlands have been avoided. Jurisdictional stream impacts have been minimized to only those impacts associated with the maintenance and protection of existing drainage structures and to areas requiring bank stabilization. Sediment removal within the culverts and streams has been limited only to the areas required to achieve positive drainage. A majority of buffer impacts have also been minimized to affect only those areas where maintenance and protection of existing structures will occur.

1b. Specifically describe measures taken to avoid or minimize the proposed impacts through construction techniques.

Best Management Practices (BMP) and measures will be used to reduce stormwater impacts to receiving waters and minimize erosion and runoff from the construction sites. Where feasible, all equipment and material staging areas will be located outside of protected riparian buffers, wetlands, and streams and will be located within uplands.

2. Compensatory Mitigation for Impacts to Waters of the U.S. or Waters of the State

2a. Does the project require Compensatory Mitigation for impacts to Waters of the U.S. or Waters of the State?	☒ Yes ☐ No If no, explain:
2b. If yes, mitigation is required by (check all that apply):	☐ DWQ ☒ Corps
2c. If yes, which mitigation option will be used for this project?	☐ Mitigation bank ☐ Payment to in-lieu fee program ☒ Permittee Responsible Mitigation

3. Complete if Using a Mitigation Bank

3a. Name of Mitigation Bank: not applicable

3b. Credits Purchased (attach receipt and letter)	Type	Quantity

3c. Comments:

4. Complete if Making a Payment to In-lieu Fee Program

4a. Approval letter from in-lieu fee program is attached.	☐ Yes
4b. Stream mitigation requested:	0 linear feet
4c. If using stream mitigation, stream temperature:	☐ warm ☐ cool ☐ cold
4d. Buffer mitigation requested (DWQ only):	0 square feet
4e. Riparian wetland mitigation requested:	0 acres
4f. Non-riparian wetland mitigation requested:	0 acres
4g. Coastal (tidal) wetland mitigation requested:	0 acres

4h. Comments: The Jeffrey's Warehouse Mitigation Site will be used to offset mitigable stream impacts (10 lin. ft. @ 2:1 = 20 lin. ft. of mitigation) and buffer impacts (see impacts below) associated with these projects.

5. Complete if Using a Permittee Responsible Mitigation Plan

5a. If using a permittee responsible mitigation plan, provide a description of the proposed mitigation plan.

Please see the attached Jeffrey's Warehouse Mitigation Site Debit Ledger

6. Buffer Mitigation (State Regulated Riparian Buffer Rules) – required by DWQ

6a. Will the project result in an impact within a protected riparian buffer that requires buffer mitigation?	☒ Yes ☐ No

6b. If yes, then identify the square feet of impact to each zone of the riparian buffer that requires mitigation. Calculate the amount of mitigation required.

Zone	6c. Reason for impact	6d. Total impact (square feet)	Multiplier	6e. Required mitigation (square feet)
Zone 1	N/A	0	3 (2 for Catawba)	0
Zone 2	Parallel Impacts	2,574	1.5	3,861
		6f. **Total buffer mitigation required:**		3,861

6g. If buffer mitigation is required, discuss what type of mitigation is proposed (e.g., payment to private mitigation bank, permittee responsible riparian buffer restoration, payment into an approved in-lieu fee fund).

Permittee responsible mitigation will be used to offset mitigable buffer impacts for this project. Please see the Jeffrey's Warehouse Mitigation Site Debit Ledger.

6h. Comments:

E. Stormwater Management and Diffuse Flow Plan (required by DWQ)	
1. Diffuse Flow Plan	
1a. Does the project include or is it adjacent to protected riparian buffers identified within one of the NC Riparian Buffer Protection Rules?	☒ Yes ☐ No
1b. If yes, then is a diffuse flow plan included? If not, explain why. Comments: See attached permit drawings.	☒ Yes ☐ No
2. Stormwater Management Plan	
2a. What is the overall percent imperviousness of this project?	N/A
2b. Does this project require a Stormwater Management Plan?	☒ Yes ☐ No
2c. If this project DOES NOT require a Stormwater Management Plan, explain why:	
2d. If this project DOES require a Stormwater Management Plan, then provide a brief, narrative description of the plan: See attached Stormwater Management Plan.	
2e. Who will be responsible for the review of the Stormwater Management Plan?	☐ Certified Local Government ☐ DWQ Stormwater Program ☒ DWQ 401 Unit
3. Certified Local Government Stormwater Review	
3a. In which local government's jurisdiction is this project?	not applicable
3b. Which of the following locally-implemented stormwater management programs apply (check all that apply):	☐ Phase II ☐ NSW ☐ USMP ☐ Water Supply Watershed ☐ Other:
3c. Has the approved Stormwater Management Plan with proof of approval been attached?	☐ Yes ☐ No
4. DWQ Stormwater Program Review	
4a. Which of the following state-implemented stormwater management programs apply (check all that apply):	☐ Coastal counties ☐ HQW ☐ ORW ☐ Session Law 2006-246 ☐ Other:
4b. Has the approved Stormwater Management Plan with proof of approval been attached?	☐ Yes ☐ No n/a
5. DWQ 401 Unit Stormwater Review	
5a. Does the Stormwater Management Plan meet the appropriate requirements?	☒ Yes ☐ No N/A
5b. Have all of the 401 Unit submittal requirements been met?	☒ Yes ☐ No N/A

F. Supplementary Information		
1. Environmental Documentation (DWQ Requirement)		
1a. Does the project involve an expenditure of public (federal/state/local) funds or the use of public (federal/state) land?	☒ Yes	☐ No
1b. If you answered "yes" to the above, does the project require preparation of an environmental document pursuant to the requirements of the National or State (North Carolina) Environmental Policy Act (NEPA/SEPA)?	☒ Yes	☐ No
1c. If you answered "yes" to the above, has the document review been finalized by the State Clearing House? (If so, attach a copy of the NEPA or SEPA final approval letter.) Comments:	☒ Yes	☐ No
2. Violations (DWQ Requirement)		
2a. Is the site in violation of DWQ Wetland Rules (15A NCAC 2H .0500), Isolated Wetland Rules (15A NCAC 2H .1300), DWQ Surface Water or Wetland Standards, or Riparian Buffer Rules (15A NCAC 2B .0200)?	☐ Yes	☒ No
2b. Is this an after-the-fact permit application?	☐ Yes	☒ No
2c. If you answered "yes" to one or both of the above questions, provide an explanation of the violation(s): n/a		
3. Cumulative Impacts (DWQ Requirement)		
3a. Will this project (based on past and reasonably anticipated future impacts) result in additional development, which could impact nearby downstream water quality?	☐ Yes ☒ No	
3b. If you answered "yes" to the above, submit a qualitative or quantitative cumulative impact analysis in accordance with the most recent DWQ policy. If you answered "no," provide a short narrative description. The proposed pavement reconstruction project will modernize and improve existing transportation facilities but will not increase traffic volumes or result in additional development. Therefore, a detailed indirect or cumulative effects study will not be necessary.		
4. Sewage Disposal (DWQ Requirement)		
4a. Clearly detail the ultimate treatment methods and disposition (non-discharge or discharge) of wastewater generated from the proposed project, or available capacity of the subject facility. n/a		

5. Endangered Species and Designated Critical Habitat (Corps Requirement)		
5a. Will this project occur in or near an area with federally protected species or habitat?	☒ Yes	☐ No
5b. Have you checked with the USFWS concerning Endangered Species Act impacts?	☒ Yes	☐ No
5c. If yes, ind icate the USFWS Field Office you have contacted.	☒ Raleigh ☐ Asheville	
5d. What data sources did you use to determine whether your site would impact Endangered Species or Designated Critical Habitat? NHP, USFWS website, NCDOT habitat assessments and field surveys. Surveys/habitat assessments were conducted most recently on July 13, 2011 (I-5311) and September 16, 2011 (I-5338) for the red-cockaded woodpecker, September 19, 2013 (both I-5311 and I-5338) for Michaux's sumac, and April 7, 2011 (I-5311) and March 14, 2012 for dwarf wedgemussel. All species have a biological conclusion of No Effect.		
6. Essential Fish Habitat (Corps Requirement)		
6a. Will this project occur in or near an area designated as essential fish habitat?	☐ Yes	☒ No
6b. What data sources did you use to determine whether your site would impact Essential Fish Habitat? NMFS County Index		
7. Historic or Prehistoric Cultural Resources (Corps Requirement)		
7a. Will this project occur in or near an area that the state, federal or tribal governments have designated as having historic or cultural preservation status (e.g., National Historic Trust designation or properties significant in North Carolina history and archaeology)?	☒ Yes	☐ No
7b. What data sources did you use to determine whether your site would impact historic or archeological resources? NEPA Documentation; no construction activities, including storage of materials and equipment, will occur outside the existing right-of-way near the National Register-listed Oak View property and Samaria Baptist Church located in the vicinity of the Poole Road interchange.		
8. Flood Zone Designation (Corps Requirement)		
8a. Will this project occur in a FEMA-designated 100-year floodplain?	☒ Yes	☐ No
8b. If yes, explain how project meets FEMA requirements: NCDOT Hydraulics Unit coordination with FEMA		
8c. What source(s) did you use to make the floodplain determination? FEMA Maps

COMPENSATORY MITIGATION

The Jeffrey's Warehouse Mitigation Site is located in HUC 03020201 and was originally constructed as on-site mitigation for R-1030 (US 117 from south of NC 581 in Goldsboro to the US 264 Bypass in Wilson). There are two parcels associated with this mitigation site. The west parcel (approximately 50.2 acres) is bounded on the northwest by the Little River and on the southeast by the US 117 right-of-way. The east parcel (approximately 37.5 acres) is bounded on the northwest by the US 117 right-of-way, on the northeast by a Wayne County Board of Education school bus maintenance shop, and on the east and southeast by private property. The site was constructed in 2006 and has undergone five years of hydrologic and vegetative monitoring.

Mitigation for this project is proposed to be provided by the North Carolina Department of Transportation, which is an allowable option per the Federal Mitigation Rule, 33 CFR chapter II 332.3 (b) (1)-(6). The NCDOT has been providing mitigation for road projects for almost 20 years and has established a record of acquiring, designing, and constructing successful mitigation sites with over 225 closed out sites protected in perpetuity either through fee-simple ownership or conservation easements throughout the state. Remaining, available credits on these and other post-construction mitigation sites are tracked on the NCDOT's On-site Debit Ledger (ODL). Therefore, ODL mitigation proposals involve sites that are constructed and functioning prior to the impacts resulting in a reduced temporal lag and reduced uncertainty about project success. In addition to location and availability, the cost of the compensatory mitigation project is another general consideration when determining the most appropriate mitigation option. Acquiring advance mitigation from EEP would not be fiscally responsible when the Department has available assets on the ODL.

NCDOT proposes the use of Jeffrey's Warehouse Mitigation Site as environmentally preferable to other options, which is consistent with the criteria set forth in 332.3(a) (1) of the Rule. Jeffrey's Warehouse Mitigation site will be debited 20 linear stream feet and 3,861 sq. ft. of buffer mitigation for I-5311/I-5338 Area 3.

Project Description

Project Length (lin. Miles or feet):	3.496 mi. (Area 3 only)	**Surrounding Land Use:**	Urban

	Proposed Project	**Existing Site**
Project Built-Upon Area (ac.)	64.40 ac.	62.60 ac.
Typical Cross Section Description:	-L3- (after I40/440 interchange): 4 @ 12' lanes divided by a retained existing median barrier and 10' to 11' interior shoulders and 14' outside shoulders with lateral and cut ditches where necessary	-L3- (after I40/440 interchange): 4 @ 12' lanes divided by median barrier and 10' to 11' interior shoulder and 11' outside shoulders with lateral and cut ditches
Average Daily Traffic (veh/hr/day):	Design/Future: 184,600	Existing: 126,025

General Project Narrative:

The Design-Build project combining I5338 and I5311 consists of pavement reconstruction of I-40/440 from the I-40/US 64 Interchange west of SR 1319 (Jones Franklin Road) continuing along I-440/US 64 to north of US 64/US 264. This Storm Water Management Plan pertains to Area 3 of the project and is located in Wake County. Area 3 begins from Sta. 444+00 -L1- (immediately before the I40/440 interchange) and continues northeast to the end of the project just north of US 64/US 264 interchange. The majority of Area 3 is the replacement of the road surface with very little increase in total impervious area and storm drain systems to be replaced at the same location with the same size pipes as the existing storm drain system. BMPs were used where ever possible to minimize the effects of stormwater runoff from the project. Although the majority of the project consists of replacing existing storm drain system in place, any new pipe system outfalls were stategically located to not outlet into wetlands/buffers and incorporated BMPs for treatment where practical.

Maintence Items Causing Impacts		
Item Number	RFP Required Repairs	Proposed Repairs
M-272	Remove trees at outlet & clean out ditch & pipe to provide positive drainage	Remove trees and clean out ditch and pipe
M-564	Repair R/W fence and remove sediment build up	Repair R/W fence/no sediment to remove
M-655	Remove trees & construct dissipater	Remove trees, construct dissipator
M-665	2/3 full of slit. Clean out & daylight to drain & remove trees	Clean out pipe/stream and remove trees

Detail For Shoulder Drains

Construct median and outside shoulder drains on the low side of pavement at the following locations:

1. Throughout crest vertical curves located in cut sections
2. Throughout all sag vertical curves
3. Where grade is less than 1%

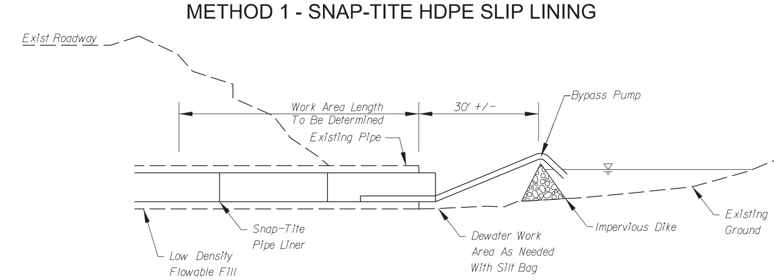
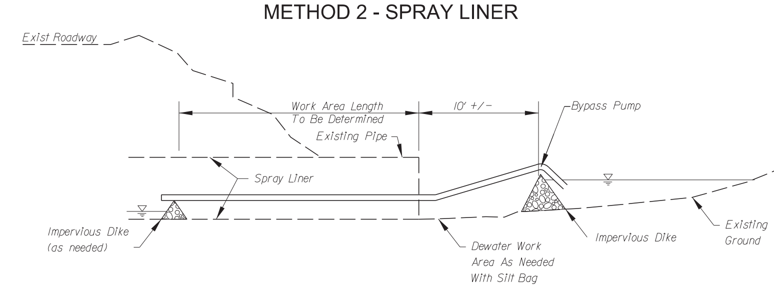
STA. 593+00 -L3- (LT)

DETAIL H
CULVERT PRESERVATION

METHOD 1 - SNAP-TITE HDPE SLIP LINING



METHOD 2 - SPRAY LINER



METHOD 3 - CURED IN PLACE PIPE LINER (BALLOON METHOD)

- Same as Spray Liner Method above expect for:
  - All curing water must be disposed offsite
  - Pipe Liner must be installed per manufacturers specificiations
  - Contractor is to remove all construction waste around pipe before pipe is placed back in service

Snap-Tite HPDE Slip Lining

- Install silt fence, special silt fence, and all other erosion control devices in area as shown on Erosion Control Plans.
- Clear a maximum of 30' wide access path to the pipe end to be slip lined with Snap-Tite as shown on Erosion Control Plans.
- Install Special Stilling Basin (silt bag) on the upstream side to dewater work area.
- Install Impervious Dike a maximum of 30' upstream of pipe to be lined to create work area.
- Clean out existing pipe as needed to install carrier pipe. Install Special Stilling Basin (silt bag) and Impervious Dike downstream during cleaning phase to pump out contaminated water. After pipe cleaning phase is complete, the downstream Impervious Dike and Special Stilling Basin (silt bag) can be removed.
- Use bypass pump to bypass water over work area and into Snap-Tite HDPE Pipe.
- After first section of Snap-Tite HDPE Pipe is installed pull hose out of first section, snap second section of pipe together and return bypass pump hose into pipe to bypass water through work area. Repeat until all pipe is lined.
- Fill void with low density flowable fill and seal off ends per manufacturer specifications.
- Remove Impervious Dike and stabilize stream bank per plans and details.
- Permanently seed and mulch access path and work area; Use erosion control matting as required to stabilize existing slope.
- Remove all erosion control measures after site is stabilized and approved by NCDOT.

Spray Lining

- Install silt fence, special silt fence, and all other erosion control devices in area as shown on Erosion Control Plans.
- Clear a maximum of 20' wide access path to the pipe end to be spray lined as shown on Erosion Control Plans.
- Install Special Stilling Basin (silt bag) to dewater work area.
- Install Impervious Dike a maximum of 10' upstream of pipe to be lined to create work area.
- Clean out existing culvert as necessary. Install Special Stilling Basin (silt bag) and Impervious Dike downstream during cleaning phase to pump out contaminated water. After culvert cleaning phase is complete, the downstream Impervious Dike and Special Stilling Basin (silt bag) can be removed.
- Install Impervious Dike within pipe culvert at either end of work area as needed to prevent backflow.
- Use bypass pump to bypass water over work area from first Impervious Dike to the second Impervious Dike.
- Remove Impervious Dikes and stabilize stream bank per Roadway Plans.
- Permanently seed and mulch access path and work area; Use erosion control matting as requred to stabilize existing slope.
- Remove all erosion control measures after site is stabilized and approved by NCDOT.

General Notes:
- Recommend slip lining pipes during low flow conditions only.
- The slip lining method used at each pipe location will be determined based on field conditions and approved by NCDOT prior to beginning work.
- Any major deviations from this sequence need prior approval by NCDOT.

DRAINAGE MAINTENANCE APPROACH

I-40 EAST 1 OF 4

Item Number	NCDOT Box #	NCDOT Station	Proposed Station	RT/LT	RFP Required Repairs	Proposed Repairs
M-44		36+00	52+45	RT	Construct concrete apron	Replace structure
M-45		38+70	54+93	RT	Replace apron, remove grass, and clean out berm ditch inlet	Replace structure
M-46	100	44+42	60+70	RT	Construct concrete apron	Replace structure
M-47	101	49+22	65+53	RT	Construct concrete apron	Replace structure
M-49		56+93	73+98	RT	Replace with masonry drainage structure and restore washed out slope	Replace structure
M-50	102	60+35	77+35	RT	Repair shoulder	Replace structure
M-51		65+10	82+10	RT	Restore washout at the end of curb	Replace structure
M-53	105	70+13	87+13	RT	Construct concrete apron	Replace structure
M-54	106	74+14	91+56	RT	Construct concrete apron and replace concrete ditch	New concrete apron and concrete ditch
M-56	108	78+31	94+71	RT	Construct concrete apron, repair drainage structure and pipe, and backfill	New concrete apron and concrete ditch
M-57	109	79+84	96+14	RT	Construct concrete apron	Replace structure
M-58		82+80	103+00	RT	Restore rusted FES and washed out slopes above cross line, remove tree and slip line pipe	Repair as stated - Remove FES and replace with standard riprap pad
M-59		88+08	105+33	RT	Restore 60' rusted pipe and slip line pipe	New slip line pipe
M-60	111	92+84	109+15	RT	Construct concrete apron	Replace structure
M-61		97+70	114+10	RT	Remove trees over pipe and at outlet, replace FES, and slip line pipe	Repair as stated - Remove FES and replace with standard riprap pad
M-62	112	104+48	120+80	RT	Construct concrete apron, repair drainage structure and pipe, and backfill	Replace structure
M-64		109+20	125+60	RT	Replace last joint of pipe, remove concrete and sediment from drainage system, and slip line pipe	Replace last joint of pipe, remove concrete and sediment, and slip line pipe
M-66	114	109+87	126+27	RT	Construct concrete apron and replace grates with correct grates for existing frame	Replace structure
M-68	116	117+75	134+15	RT	Clear trees at ard over pipe outlet, grade to drain, and replace FES	Repair as stated - Remove FES and replace with standard riprap pad
M-69	117	117+91	134+31	RT	Two pipe located here. DB Team shall replace FES and slip line crossline and construct Energy Dissipator	New energy dissipator and slip line pipe
M-70	118	120+39	136+70	RT	Restore buried grates and remove sediment from drainage ditch and system.	Will be repaired during construction
M-71	119	124+92	140+53	RT of Ramp C	Construct concrete apron	New concrete apron and concrete ditch
M-72	120	123+94	140+24	LT of Ramp C	Construct concrete apron	New concrete apron and concrete ditch
M-73	120A	123+89	140+29	Along Gorman (LT of mainline)	Construct concrete apron	New concrete apron and concrete ditch
M-75	122	121+37	137+77	Along Gorman (LT of mainline)	Construct concrete apron	New concrete apron and concrete ditch
M-78	125	125+67	142+07	RT	Remove sediment from ditch and pipe inlet and clean drainage system	Remove sediment and clean drainage system
M-79	126	128+17	144+57	LT	Construct concrete apron, repair drainage structure and pipe, and backfill	Replace structure
M-81	128	125+95	142+35	RT of Ramp B	Construct concrete apron, repair drainage structure and pipe, and backfill	New concrete apron and concrete ditch. Repair drainage structure and pipe.
M-82	129	134+66	154+61	LT	Remove tree at pipe outlet, regrade to ensure positive drainage, replace FES, and slip line pipe	Remove tree, regrade outlet, replace FES, and slip line pipe
M-84	132	123+64	140+04	RT	Clean out underdrain and daylight	Replace structure
M-87	133	125+49	141+89	Along Gorman (RT of mainline)	Construct concrete apron	New concrete apron and concrete ditch
M-90	137	121+68	138+08	LT	Replace with masonry drainage structure and repair washout behind curb	Replace structure
M-91	136			LT of Ramp A	Construct energy dissipator	Construct energy dissipator
M-92	138	119+08	135+48	RT	Repair shoulder and replace pipe	Regrade shoulder, remove pipe
M-93	139	119+38	135+78	RT	Replace with masonry drainage structure and repair shoulder washout	Replace structure
M-94		120+18	136+58	RT	Clean out underdrain and daylight	Replace structure
M-95	141	125+14	141+54	RT	Replace curb at bridge and repair asphalt shoulder	Replace structure
M-96	142	127+31	143+71	LT	Construct concrete apron	Replace structure
M-97	148	126+91	143+31	RT	Repair shoulder	Replace structure
M-98		126+39	145+00	LT	Repair separated RCP and slip line pipe	Repair pipe and slip line pipe

I-40 EAST 2 OF 4

Item Number	NCDOT Box #	NCDOT Station	Proposed Station	RT/LT	RFP Required Repairs	Proposed Repairs
M-100		127+86	143+03	RT	Slip line pipe, replace FES and remove trees from around outlet	New slip line pipe and FES. Remove trees.
M-101	144	124+62	144+52	At Ramp A (LT of mainline)	Construct concrete apron, replace concrete ditch and replace grates with correct grates for existing frame	New concrete apron, concrete ditch, and sag grates
M-104	147	127+87	143+03	RT	Repair washout/headcut (Off Gorman Street) and construct energy dissipator.	Construct energy dissipater and add riprap
M-106	149	132+28	149+25	RT	Construct concrete apron	New concrete apron and ditch
M-107	150	138+43	154+92	RT	Replace with masonry drainage structure and repair shoulder	Replace structure
M-107A		150+70	166+81	RT	Clean out drainage structure and crossline and regrade ditch line to remove sediment	Replace structure
M-108		156+72	170+92	RT	Repair separated pipe and slip line pipe	Replace structure
M-109		156+72	170+92	RT	Restore washed out slopes	Regrade slopes
M-112		164+64	180+94	RT	Grade and stabilize eroding ditch	Add riprap
M-113		164+64	180+94	RT	Repair last 2' of separated pipe, slip line pipe, replace FES and remove trees around pipe inlet	New slip line pipe and FES. Remove trees.
M-114		167+28	185+57	RT	Grade pipe outlet to drain and slip line pipe	Replace structure
M-117		183+12	199+78	RT	Replace exposed flume pipe (approximately 30' down slope) and repair slope.	Cut off pipe and place riprap
M-118		183+12	199+78	RT	Minor grading required and repair approximately 100' of chainlink fence. Repair lateral ditch and slope to culvert wing wall, remove trees behind wing wall and repair fence.	Repair lateral ditch and slope to culvert wing wall. Remove trees behind wing wall and repair ROW fence.
M-120		188+40		RT	Replace exposed flume pipe	N/A
M-121		195+60	211+74	RT	Repair pipe, drainage structure, and apron	Replace structure
M-121A		200+60	216+94	RT	Repair pipe, drainage structure, and apron	Replace structure
M-122A		205+10	221+67	RT	Repair pipe, drainage structure, and apron	Replace structure
M-122B		209+70	225+65	RT	Repair pipe, drainage structure, and apron	Replace structure
M-122C		217+70	233+97	RT	Repair pipe, drainage structure, and replace apron and concrete ditch	Replace structure
M-123	151	220+17	235+05	RT	Repair/replace damaged pipe and slip line	Repair/replace pipe and slip line
M-124	202	220+17	236+48	RT	Construct concrete apron, clean out concrete ditch and replace grates with correct grates	New concrete apron and concrete ditch. New grates.
M-125	201	224+74	241+06	RT	Construct concrete apron	New concrete apron and ditch
M-127	204	224+31	240+63	RT of Ramp C	Clean out pipe and berm ditch	Clean out pipe and ditch
M-128	151	223+42	239+74	RT of Ramp C	Construct concrete apron and replace grates with correct grates	New concrete apron and concrete ditch. New sag grate.
M-131	151	234+09	250+40	RT	Construct concrete apron and clean out ditch	Replace structure
M-134	209	251+16	267+82	RT	Pipe is too shallow. Replace if possible	Replace right side of pipe
M-136	210A	255+60	272+23	RT	Construct concrete apron and clean out ditch	Replace structure
M-137		257+50	273+89	RT	Replace floorless drainage structure.	Replace structure
M-142	213	259+59	276+02	RT	Construct concrete apron and remove sediment on shoulder	Replace structure
M-143		262+32	277+25	RT	Replace floorless drainage structure.	Replace structure
M-145		262+32	277+96	RT	Replace floorless drainage structure.	Replace structure
M-146	214	310+54	326+94	RT	Install grates	Replace structure
M-147	216	310+68	327+08	RT	Construct concrete apron	Replace structure
M-149	218	270+27	286+54	RT	Repair pipe outlet and construct dissipator.	No repair needed
M-150	218A	289+80	306+10	RT	Clean out outlet	Clean outlet
M-151	226	292+60	308+90	RT	Repair shoulder	Repair shoulder
M-152	228A	295+43	308+65	RT	Remove trees, replace concrete ditch and restore ditch	Replace concrete ditch with riprap

M-211	0327A	398+34.5	415+27		Check grate (onramp) & replace if needed	Replace structure
M-213	326	404+87.6	421+14	RT	Replace pipe with 24"-RCP & replace grate	Replace structure
M-214	328	407+14.0	423+42	RT	Construct concrete apron, repair masonry drainage structure & pipe, and backfill	Replace structure
M-221	333	432+57.0	448+76	RT	Construct concrete apron	Replace structure
M-222	334	432+55+/-	448+78	RT	Remove trees & replace headwall/BDO	Remove tree and replace headwall
M-223		433+34	450+24		Replace separated pipe. Determine if additional drainage structure & cross line are hydraulically	Replace structures
M-224		433+34	450+24		same as above (223 & 224 photos are combined)	See M-223
		441+70	457+57	RT	Construct concrete apron, repair masonry drainage structure & pipe, and backfill	Replace structure
		443+85	460+66	RT	Replace damaged joint of pipe, clean out drainage system, & repair washout	Replace guardrail and pipe
M-225		443+60	458+81		Replace drainage structures & clean out drainage system	Replace structure

I-40 EAST 4 OF 4

Item Number	NCDOT Box #	NCDOT Station	RS & H Station	RT/LT	NCDOT Request	Proposed Repairs
M-226	33	436+98+/-	453+24.15	RT	Repair pipe or replace w/ drainage inlet, ensure pipe will drain, and slip-line. Determine if additional drainage structure & crossline are hydraulically required at this location. This area floods on I-40 when heavy rains occur.	Replace structures
M-228	0335B	436+98+/-	450+18.31	RT	Regrade and replace paved ditch	Regrade and replace paved ditch
M-229	0335C	436+98+/-	450+18.31	RT	Replace ditch and remove trees	Replace ditch and remove trees
M-231	337	440+97+/-	457+24.46		Replace cracked headwall	Replace Headwall
M-232	0337A	444+04.1	460+33.36	RT	Construct concrete apron, clean out concrete ditch & grade lateral ditch to drain	Replace structure
M-235	340	447+93.4	447+10.		Construct concrete apron, repair pipe & drainage structure, & backfill	Construct concrete apron and repair pipe and drainage structure
M-238	344	455+05+/-	471+48.99	RT	Construct concrete apron	Replace structure
M-241	346	466+88.3	483+13.89	RT	Construct concrete apron, repair pipe & drainage structure, & backfill	Construct concrete apron and repair pipe and drainage structure
M-243	347	469+84.0	486+09.39	RT	Construct concrete apron	Replace structure
M-244	348	469+94+/-	486+12.32	RT	Remove debris from inlet	Remove debris
M-245	0347A	473+43.2	486+19.83		Construct concrete apron	Replace structure
		473+20	489+37.69	RT	Replace apron and slip-line pipe	Replace structure and pipe
M-248	0350A	476+96.5	493+03.68	RT	Clean out pipe inlet	Clean out inlet
M-249	350	483+54+/-	499+18.96		Construct concrete apron & remove sediment from concrete ditch	Replace structure
M-271	371	524+43	542+62.31		Construct concrete apron, clean out box, & replace missing grates	Replace structure
M-545	5	506+00	522+12.08	RT	Repair holes in slope and repair cross line	Repair slope
M-546	5	506+00	522+12.08	RT	Repair holes in slope and repair cross line	Repair slope
M-549	7	514+40	530+64.95	RT	Clean out pipe & outlet to ensure positive drainage	Abandon 18" RCP
M-550	7	514+40	530+64.95	RT	Clean out pipe & outlet to ensure positive drainage	Clean out pipe
M-556	8	519+80	536+10.83	RT	Construct concrete apron, repair pipe & drainage structure, & backfill	Replace structure
M-557	8	519+80	536+10.83	RT	Construct concrete apron, repair pipe & drainage structure, & backfill	Replace structure
		526+10	542+62.31	LT	Replace apron on structure, clean out debris in paved ditch & slip-line pipe	See M-271
M-563	10.5	527+10	543+58.39	RT	Clean out pipe & ditch to ensure positive drainage & slip-line pipe	Not addressed. Item outside of NCDOT right-of-way
M-564	10.5	527+10	541+73.26	RT	Repair R/W fence and remove sediment build up	Repair fence and remove sediment
M-568	10	526+90	543+08.25	RT	Remove trees at pipe inlet and clean out pipe	Remove trees and clean out pipe
		535+65	551+92.24	RT	Clean out paved ditch and replace apron	Replace structure
M-572	17	548+20	563+96.11	RT	Water under pipe. Construct dissipater & slip-line pipe	Slipline pipe and repair erosion
M-575	20	548+30	564+62.85	RT	Construct concrete apron, ditch, & replace grates w/ correct grates	Replace structure
M-578	23	561+33	577+61.37	RT	Construct concrete apron, repair pipe & drainage structure, & backfill	Replace structure
M-582	28	567+20	583+50.26	RT	Construct concrete apron, replace broken grate, & slip-line pipe	Replace structure and pipe
M-583	28	567+20		RT	Construct concrete apron, replace broken grate, & slip-line pipe	See M-583
M-586		576+55	592+83.21	RT	Repair erosion at end of guardrail & construct shoulder berm gutter	Install SBG
M-588		576+55	592+83.21	RT	Repair erosion at end of guardrail & construct shoulder berm gutter	Install SBG
M-591	31	577+10	593+69.9	RT	Clean out, provide positive drainage, & construct rodent guard. Clean out silt in rip rap ditch	Clean out underdrain
M-593	31	577+10	593+69.9	RT	Clean out, provide positive drainage, & construct rodent guard. Clean out silt in rip rap ditch	Clean out underdrain and ditch

DRAINAGE MAINTENANCE APPROACH

I-40 EAST 4 OF 4 continued

Item Number	NCDOT Box #	NCDOT Station	RS & H Station	RT/LT	NCDOT Request	Proposed Repairs
M-594	32	581+33	597+61.27	RT	Clean out, provide positive drainage, & construct rodent guard	Clean out underdrain
M-272		534+99	552+05.07		Remove trees a: outlet & clean out ditch & pipe to provide positive drainage	Remove trees and clean out ditch and pipe
M-273		540+27	556+75.93		Clean out around outlet & clean out ditch to provide positive drainage	Clean out ditch and outlet
M-274		545+55	560+93.09		Clean out pipe, outlet, & ditch to provide positive drainage	? Not found
M-275		550+83	565+23.99		Clean out pipe & ditch to provide positive drainage	? Not found
M-276		566+67	583+46.71		Clean out pipe & ditch to provide positive drainage	? Not found
M-277		571+95	588+48.51		Replace apron & clean out pipe & ditch to provide positive drainage	Replace structure
M-278		571+95	588+48.51		Replace apron & clean out pipe & ditch to provide positive drainage	Replace structure
M-279		577+23	594+00.99		Outlet has been undermined. Construct dissipater & remove treesaround outlet	Replace pipe and construct dissapator
M-280		577+23	594+00.99		Replace apron	Replace structure
M-281		581+34	597+89.88		Clean pipe & ditch to provide positive drainage	? Not found
M-282		581+45	598+23.76		Repair/replace FES	? Not found
M-283		585+15	599+69.82		Replace apron	Replace structure
M-284		587+79	605+11.81		Replace apron	Replace structure
M-285		593+07	608+21.28		Replace apron	Replace structure
M-286		603+63	618+31.69		Replace apron	Replace structure
M-287		608+91	625+26.12		Repair separated pipe & clean out pipe & outlet to ensure positive drainage	? Not found

I-40 WEST 1 OF 4

Item Number	NCDOT Box #	NCDOT Station	Proposed Station	RT/LT	RFP Required Repairs	Proposed Repairs
M-597		615+33	631+57	LT	Construct concrete apron, repair box & drainage structure	New concrete apron
M-600		604+00	620+45	LT	Seed behind guardrail	Install SBG and seed
M-603		603+60	619+81	LT	Seed behind guardrail	Install SBG and seed
M-605		592+10	608+30	LT	Clear trees around the outlet and over the pipe	Remove trees
M-607		592+10	608+30	LT	Clean out concrete ditch	Clean out concrete ditch
M-608		583+25	599+48	LT	Clean out pipe & daylight outlet to drain	Slipline Pipe
M-612		583+25	599+48	LT	Remove check dam	Remove check dam and lay back stream banks
M-616		583+25	599+48	LT	Repair washout	Install SBG and repair washout
M-617		583+25	599+48	LT	Repair R/W fence	Repair fence
M-618		581+00	597+26	LT	Repair washout on slope	Install SBG and repair washout
M-622		579+00	595+23	LT	Reshape shoulder & reseed & mat this area	Install SBG and reseed
M-623		582+80	599+17	LT	Construct shoulder berm gutter at the end of guardrail, repair slope & reseed	Install SBG and repair slope, reseed
M-624		577+00	593+06	LT	Repair erosion behind guardrail & reseed & mat	Install SBG and reseed
M-628		572+70-580+00	580+77 - 588+77	LT	Reshape shoulder & reseed & mat this area	Install SBG and reseed
M-634		562+80	578+88	LT	Construct concrete apron & clean out ditch	Replace structure
M-635		561+50	577+61	LT	Construct concrete apron	Replace structure
M-636		556+00 -	570+02		Repair conduit & clean out ditch under bridge & grade to drain	Clean out ditch/Conduit is non-drainage item
M-637		551+33	567+64	LT	Construct concrete apron	Replace structure
M-369		548+20	564+58	LT	Construct concrete apron	Replace structure
M-641		545+20	561+40	LT	Construct concrete apron	Replace structure
M-642		552+10	568+28	LT	Construct concrete apron	Construct concrete apron
M-644		551+85	567+70	LT	Paved ditch sunk at joint. Repair ditch	Repair concrete ditch
M-645		541+20	556+91	LT	Repair R/W fence	Repair fence
M-647		545+85	561+30	LT	Repair cracked brick headwall/outlet & slip-lines pipes	Repair headwall and slip-line pipe
M-651		545+85	561+30	LT	Repair wash out behind headwall & remove trees.	Repair washout and remove trees
M-653		534+90	551+17	LT	Construct concrete apron	Replace structure
M-655		534+80	550+99	LT	Remove trees & construct dissipater	Remove trees, construct dissipator
M-662		530+33	546+58	LT	Extend paved ditch to drainage structure, remove debris, & cleanout pipe	Install paved ditch, clean out pipe
M-664		524+35	540+63	LT	Construct concrete apron	Replace structure
M-665		523+50	539+87	LT	2/3 full of slit. Clean out & daylight to drain & remove trees	Clean out pipe and remove trees
M-671		520+80	536+95	LT	Construct concrete apron	Replace structure
M-673		516+75	532+96	LT	Construct concrete apron	Construct concrete apron
M-675		516+33	532+63	LT	Repair pipe and outlet & construct dissipater	Repair outlet, construct dissipator
M-680		515+10	531+40	LT	Clean out clogged curb & gutter & repair washout behind curb	Install SBG and repair washout
M-684		515+10	531+40	LT	Repair washout & replace failed CSP pipe	Replace pipe
M-689		506+10	522+38	LT	Remove concrete & reseed	Install SBG and reseed
M-701		506+10	518+36	LT	Buried outlet outside R/W fence. Reestablish outlet	Replace pipe and establish outlet
M-708		506+10	518+36	LT	Buried outlet outside R/W fence. Clean out pipe & grade outlet to drain	Replace pipe and establish outlet
M-709		501+40 (RSH)	518+36	LT	Clean out clogged outlet & pipe, Remove sediment buildup & regrade outlet to drain	See M-708
M-718		491+92	?	LT	Clean out outlet ditch & remove tree	Clean out ditch and remove tree

DRAINAGE MAINTENANCE APPROACH

I-40 WEST 2 OF 4

Item Number	NCDOT Box #	NCDOT Station	Proposed Station	RT/LT	RFP Required Repairs	Proposed Repairs
M-250	352	482+35.1	499+80	LT	Construct concrete apron & replace missing grate	Replace structure
M-251	353	477+66	492+69	LT	Construct concrete apron & clean out sediment around structure	? Not found
M-252	354	469+85	485+67	LT	Repair drainage structure & pipe, regrade & replace apron, & remove vegetation	Replace structure
M-253	355	469+85	485+67	LT	Repair drainage structure & pipe, regrade & replace apron, & remove vegetation	Repair structure & pipe, regrade & replace apron, & remove vegetation
M-254	355	469+21+/-	487+61	LT	Remove trees & repair dislodged FES	Remove trees and remove FES, extend pipe as needed
M-255	356	468+68+/-	485+40	LT	Remove trees a: outlet & construct dissipater	Remove trees and construct dissipator
M-256	357	469+00+/-	485+26		Remove trees a: outlet & over pipe	Remove trees
M-257	358	466+09+/-	482+18	LT	Clean out pipe & remove trees over pipe, grade outlet to drain, & remover sediment form concrete ditch	Remove trees and clean out ditch
M-258	360	461+84+/-	479+40	LT	Construct concrete apron	Replace structure
M-259	359	469+13.7	485+27	LT	Remove trees a: outlet, reset FES, & construct dissipater	Remove trees, construct dissipator, and reset FES or extend pipe
M-260	361	476+40.8	492+39	LT	Construct concrete apron & regrade ditch	Replace structure
M-262	363	472+11+/-	487+81	LT	Remove trees a: outlet & clean out pipe & drainage outlet	Remove trees and clean out pipe
M-266	367	458+79.1	475+05	LT	Construct concrete apron	Construct concrete apron
M-267	368	458+38.2	474+66	LT	Construct concrete apron & repair asphalt shoulder	Replace structure
M-268	369	457+43.3	456+60	LT	Construct concrete apron, check grates (replace if needed), clean out ditch under bridge to ensure drainage to box	Replace structure
M-269	370	356+20.9	472+50	LT	Remove trees a: pipe outlet over pipe	Remove trees
M-270		454+24.6	472+47	LT	Remove tree over pipe & cleanout adjacent pipe & daylight to drain	Remove tree and clean out pipe
M-289	373	444+98+/-	459+74	LT	Clean out underdrain & daylight	Clean out underdrain
M-290	374	444+43+/-	460+89	LT	Remove sediment loading & clean out pipes. This system causes I-40 East flooding on heavy rain events	Clean out pipes
M-291	375	443+67+/-	459+70	RT	Clean out ditch	Clean out ditch
M-292	376	456+20.9	462+80	LT	Remove tree & cleanout pipe & ensure positive drainage	Remove tree and clean out pipe
M-298	382	409+12.0	425+40	LT	Construct concrete apron	Construct concrete apron
M-299	383	407+14.4	423+42	LT	Construct concrete apron	Replace structure
M-306	389	384+65+/-	400+93		Repair shoulder washout & curb & construct additional drainage structure at this location	? Not found
M-307	390	384+65+/-	400+93		Repair shoulder	? Not found
M-308	390	384+65+/-	400+93		Remove tree, clean out outlet & pipe to ensure drainage, & slip-line pipe	? Not found
M-309	391	379+65+/-	400+93	LT	Remove trees & clean out outlet	Replace pipe
M-310	392	379+65+/-	400+93	LT	Replaces FES, clean out pipe, & slip-line pipe	Replace pipe
M-311	392	379+92+/-	396+22	LT	Clean out pipe & drainage outlet to provide positive drainage & slip-line pipe	Replace pipe
M-315	394	371+01+/-	387+11	LT	Repair should & cable pull at end of bridge	Repair shoulder and cable pull
M-317	396	370+31.6	385+40	LT	Construct concrete apron, remove trees, & clean out debris around structure	Replace structure
M-319	398	364+43.3	380+72	LT	Construct concrete apron & repair pipe & drainage structure	Replace structure
M-320	399	362+45.6	378+74	LT	Construct concrete apron & repair pipe & drainage structure	Replace structure
M-332-Old Garner Bridge		342+00	358+32	LT	Replace curb. Curb has settled at bridge below top of box elevation	Replace structure
M-333		same as 332	358+32		same as 332	Replace structure
M-331	3110	335+98.2	352+26		Clean out pipe, daylight outlet to drain, & slip-line pipe	Replace pipe
M-335	3115	336+30	349+56	LT	Repair washout behind curb & on slope	Install SBG
M-336	3116	Hammond Rd Ramp	349+56		Repair washout behind curb & on slope	Install SBG
M-342	3119	329+23.7	345+52	LT	Clean out curb line & drainage system	Replace structure
M-343	3120	329+23.7	345+52	LT	Clean out curb line & drainage system	Replace structure

DRAINAGE MAINTENANCE APPROACH

I-40 WEST 4 OF 4

Item Number	NCDOT Box #	NCDOT Station	Proposed Station	RT/LT	RFP Required Repairs	Proposed Repairs
M-430	2517	184+83	201+08	LT	Clean out ditch	Replace structure
M-432	2519	186+02	202+27	LT	Repair ditch and riprap with fabric	Install new concrete ditch
M-433	2520	179+62	195+87	LT	Remove sediment from ditch to ensure drainage	Repaired during construction
M-434	2521	179+63	195+88	LT	Construct concrete apron	New concrete apron and ditch
M-437	2524	170+07	186+32	LT	Clean out BDO	Repaired during construction
M-438	2525	165+06	181+31	LT	Clean out underdrain and daylight	Replace structure
M-439	2526	163+52	179+77	LT	Replace with drainage structure and replace 12" pipe with 15" pipe	Replace structure
M-440	2527	161+52	177+77	LT	Replace with drainage structure and replace 12" pipe with 15" pipe	Replace structure
M-441		160+12	176+37	LT	Repair slope washout	Repaired during construction
M-442	2528	159+52	175+77	LT	Replace with drainage structure and replace 12" pipe with 15" pipe	Replace structure
M-443	2529	157+52	173+77	LT	Replace with drainage structure and replace 12" pipe with 15" pipe	Replace structure
M-445	2531	153+82	170+07	LT	Remove tree at outlet and clean out pipe and daylight outlet to drain	Repaired during construction
M-448	2534	145+32	161+57	LT	Replace grates with correct grates	Replace structure
M-450		127+00	143+25	LT	Replace curb and gutter from bridge to drainage structure (Gorman St)	Repaired during construction
M-451	2536	102+77	119+02	LT	Construct concrete apron and repair pipe and box	New concrete apron and ditch
M-452	1537	101+85	118+10	LT	Remove trees at FES and over the pipe	Repaired during construction
M-453	1538	100+35	116+60	LT	Repair dislodged pipe, clean out pipe, remove tree, and grade outlet to drain	Repaired during construction
M-454	1539	97+65	113+90	LT	Remove trees at FES and over the pipe	Repaired during construction
M-455	1540	100+41	116+66	LT	Replace with drainage structure and replace 12" pipe with 15" pipe	Replace structure
M-456	1541	96+99	113+24	LT	Replace with drainage structure and replace 12" pipe with 15" pipe	Replace structure
M-458	1543	90+63	106+88	LT	Remove and replace last section of pipe and paved ditch and repairconcrete ditch	Replace concrete ditch with riprap and filter fabric
M-459	1544	90+09	106+34	LT	Replace with drainage structure and replace 12" pipe with 15" pipe	Replace structure
M-460	1545	89+11	105+36	LT	Replace with drainage structure and replace 12" pipe with 15" pipe	Replace structure
M-461	1546	88+24	104+49	LT	Repair/replace headwall and slip line pipes. Determine need for cross veins	Repair/replace bricks as needed
M-462	1547	87+26	103+51	LT	Repair washout and replace drainage	Install riprap and filter fabric
M-463	1548	87+36	103+61	LT	Repair washout	Replace structure
M-466	1551	79+84	96+09	LT	Construct concrete apron	New concrete apron and ditch
M-469	1554	70+14	85+75	LT	Construct concrete apron	New concrete apron and ditch
M-470	1555	66+46	83+25	LT	Construct concrete apron	New concrete apron and ditch
M-471	1556	66+48	83+25	LT	Remove tree at FES	Repaired during construction
M-472	1557	68+27	84+52	LT	Remove tree at pipe inlet and slip line pipe	Repaired during construction
M-473		62+44	78+69	LT	Replace with drainage structure and replace 12" pipe with 15" pipe	Repaired during construction
M-474	1558	60+18	76+43	LT	Slip line pipe	Replace structure
M-475		59+80	76+05	LT	Replace guardrail and damaged curb	Repaired during construction
M-476	1559	57+35	73+60	RT	Remove fallen trees at pipe inlet, repair cracked headwall, and slip line pipe	Repaired during construction
M-477	1560	55+18	71+43	LT	Slip line pipe and move rip rap to open drainage outlet	Repaired during construction
M-478		54+52	70+77	LT	Replace with drainage structure, replace 12" pipe with 15" pipe, repair washout on slope, and replace guardrail	Repaired during construction
M-480		51+88	68+13	LT	Replace funnel drain with drainage structure and repair washout	Repaired during construction

I-40 MEDIAN

Item Number	NCDOT Box #	NCDOT Station	Proposed Station	RT/LT	RFP Required Repairs	Proposed Repairs
M-483	1563	65+63.2	82+00	Median	Construct concrete apron, repair drainage structure and pipe, and backfill	Replace structure and pipe, repair pipe as needed
M-486	1565	72+13	91+00	Median	Construct concrete apron	Replace structure
M-488	1567	80+99	97+36	Median	Construct concrete apron, repair drainage structure and pipe, and backfill	Replace structure and pipe, repair pipe as needed
M-491	1570	89+63	106+00	Median	Construct concrete apron	Replace structure
M-493	1572	96+00	112+37	Median	Clean out shoulder drain and provide positive drainage	Remove shoulder drains - not required in this locatior
M-495	1574	103+94	120+31	Median	Construct concrete apron	Replace structure
M-496	1575	110+31	126+68	Median	Construct concrete apron	Replace structure
M-497	1576	110+48	126+85	Median	Construct concrete apron	Replace structure
M-498	1577	113+63	130+00	Median	Construct concrete apron	Replace structure
M-499	1578	120+63	137+00	Median	Construct concrete apron	Replace structure
M-500	1579	124+88	141+25	Median	Construct concrete apron and repair concrete ditch	Replace structure
M-502	1581	134+26	150+63	Median	Construct concrete apron	Replace structure
M-503	1582	138+61	154+98	Median	Construct concrete apron	Replace structure
M-504	1583	141+09	157+46	Median	Construct concrete apron	Replace structure
M-505	1584	144+99	161+36	Median	Construct concrete apron	Replace structure
M-508	1587	155+37	171+74	Median	Construct concrete apron	Replace structure
M-509	1588	156+64	173+01	Median	Clean out shoulder drain and provide positive drainage including median ditch	Remove shoulder drains - not required in this locatior, proposed 22' median with concrete barrier will provide positive drainage
M-511	1590	164+63	181+00	Median	Construct concrete apron	Replace structure
M-512	1591	169+73	186+10	Median	Construct concrete apron, repair drainage structure and pipe, and backfill	Replace structure and pipe
M-514	1593	178+64	195+01	Median	Construct concrete apron	Replace structure
M-515	1594	183+64	200+01	Median	Construct concrete apron	Replace structure
M-516	2701	188+04	204+41	Median	Construct concrete apron	Replace structure
M-517	2702	195+63	212+00	Median	Construct concrete apron, repair drainage structure and pipe, and backfill	Replace structure and pipes
M-518	2703	200+62	216+99	Median	Construct concrete apron, repair drainage structure and pipe, and backfill	Replace structure and pipes
M-519	2704	205+62	221+99	Median	Construct concrete apron	Replace structure and pipes
M-520	2705	209+63	226+00	Median	Construct concrete apron, repair drainage structure, and reset anchor unit	Replace structure and pipes, remove guiderail and anchor unit and replace
M-521	2706	214+06	230+43	Median	Construct concrete apron, repair drainage structure and pipe, and backfill	Replace structure and pipes
M-525	2710	229+65	246+02	Median	Construct concrete apron, repair drainage structure and pipe, and backfill	Replace structure and pipe

DRAINAGE MAINTENANCE APPROACH

I-40 INTERCHANGES

Item Number	NCDOT Box #	NCDOT Station	Proposed Station	RT/LT	RFP Required Repairs	Proposed Repairs
M-1		SW Quad Gorman Street			Remove trees around pipe outlet, replace FES, slip-line pipe, and grade drainage outlet	Repair as stated
M-4					Remove trees around pipe outlet and replace or slip-line pipe	Repair as stated
M-5					Remove trees around pipe outlet, clean out ditch, and remove debris from around box	Repair as stated
M-7		SE Quad Gorman Street			Replace funnel drain	New shoulder berm gutter with new drainage structures will be installed as needed
M-8					Replace funnel drain	New shoulder berm gutter with new drainage structures will be installed as needed
M-10		SW Quad Lake Wheeler Road			Replace concrete apron	Replace structure
M-11		NE Quad Lake Wheeler Road			Replace curb with shoulder berm gutter	Repair as stated
M-12					Repair washed out slope	Repair as stated
M-13					Repair washed out slope	Repair as stated
M-14					Repair washed out slope	Repair as stated
M-15		NW Quad Lake Wheeler Road			Replace funnel drain with masonry drainage structure and replace pipe	New shoulder berm gutter with new drainage structures will be installed as needed
M-16					Restore washed out area and replace funnel drain with drainage structure	New shoulder berm gutter with new drainage structures will be installed as needed
M-17					Restore washed out area and replace funnel drain with drainage structure	New shoulder berm gutter with new drainage structures will be installed as needed
M-18					Restore washed out area and replace funnel drain with drainage structure	New shoulder berm gutter with new drainage structures will be installed as needed
M-19					Restore washed out area and replace funnel drain with drainage structure	New shoulder berm gutter with new drainage structures will be installed as needed
M-20					Restore washed out area and replace funnel drain with drainage structure	New shoulder berm gutter with new drainage structures will be installed as needed
M-21		Poole Rd Interchange			Repair seperated joint of a 30" CMP, slip line pipe (located halfway up the ramp)	Slipline pipe
M-22					Slipline pipe	Slipline pipe
M-23		I-440/I-40 Interchange I-40 on Ramp			Clear tree at outlet & reset the separated joint & FES	Remove tree and reset FES or extend pipe as needed
M-24		same as 23			same as 23	See M-23
M-25					Repair box & pipe & construct a new apron	Construct concrete apron
M-26					Repair box & pipe & construct a new apron	Construct concrete apron
M-27					Construct a new apron	Construct concrete apron
M-28		Rock Quarry Interchange-Off			Repair box & pipe & construct a new apron	Replace structure
M-29					Repair box & pipe & construct a new apron	Replace structure
M-30					Repair box & pipe & construct a new apron	Replace structure
M-31		On Ramp EB			Restore washed out box	Replace structure
M-32					Restore buried/overgrown drainage system from stock pile goingeast	Restore drainage system
M-33		Off Ramp WB			Repair box & pipe & construct a new apron	Replace structure
M-34					Restore box & paved ditch that has been washed out	Restore drainage system
M-35		On Ramp WB			Restore possible sink hole over 54" pipe, draining from the gore I-40 West	Restore sink hole
M-36					Repair the curb & gutter that is settling & causing drainage issues. (Located at the end of merge lane)	Install SBG
M-43		Hammond Rd Interchange - W3 Off Ramp			Repair the gutter that has settled & restore the slope that has been washed out	Install SBG
M-44		Hammond Rd Interchange -NW			Relieve ponding water	Relieve ponding water
M-45					Rehabilitate paved ditch	Repair concrete ditch
