DEPARTMENT OF TRANSPORTATION

BEVERLY EAVES PERDUE
GOVERNOR

EUGENE A. CONTI, JR.
SECRETARY

January 20, 2012

U. S. Army Corps of Engineers
Raleigh Regulatory Field Office
3331 Heritage Trade Dr., Suite 105
Raleigh, NC 27587

Attn: Mr. Eric Alsmeyer
NCDOT Coordinator

Subject: **Application for Section 404 Individual Permit and Section 401 Water Quality Certification,** US 501 from NC 49 in Roxboro to SR 1602 (Jesse Banks Road) in Person County, Division 5. Federal Aid Project No. STP-501(11), WBS Element No. 34406.2.3, TIP No. R-2241A.

Debit $570.00 from WBS 34406.2.3

Dear Sir:

The North Carolina Department of Transportation (NCDOT) proposes to improve US 501 to a multilane facility from Roxboro to the Virginia State line. This project has 3 sections, A, B and C. Section A has independent utility from the others so it is being permitted separately. Sections B and C are post-year lets. Section A of this project (4.46 miles) will provide a small amount of widening along NC 49 then will take off on new location until it merges with Halifax Road (SR 1521) and then with US 501 to SR 1602 (Jesse Banks Road). The widening section of NC 49 will be a 5-lane curb and gutter. The new location segment and widening of Halifax Road and US 501 to SR 1602 will be 4-lane divided with a shoulder section. Included in this application package are the following: (1) cover letter, (2) ENG Form 4345, (3) Ecosystem Enhancement Program (EEP) confirmation letter (4) concurrence letter from the North Carolina Department of Cultural Resources, (5) Hydraulic Design and Permit Drawing Review Meetings (CP 4B and 4C) minutes for Section A, (6) Stormwater Management Plan, (7) permit drawings, (8) and half-size roadway plans.

PURPOSE AND NEED

The purpose and need as stated in the document is still applicable to Section A of this project. The need for the project was to address industrial traffic, separate local and regional traffic and lessen traffic congestion on Madison Boulevard. The purpose of the project was to provide relief to the increased traffic demands along this northern portion of US 501 in Roxboro and to provide an adequate transportation system for the area by completing the "missing link" of this regional system by providing multilane from Roxboro to the Virginia line.

While completing just Section A of the project does not fully address completing the "missing link" of the transportation system from Roxboro to Virginia, it does address the other aspects of the purpose and need. It will still help separate local and regional traffic. With the additional through lanes, it will also still improve safety of the facility by reducing competition between tractor-trailers, passenger cars and school buses.

PROJECT SCHEDULE

This project has been divided into three sections, Section A, B and C. This permit application only covers Section A. Sections B and C are scheduled to let post-year. Section A is scheduled to let November 12, 2012 with a review date of October 2, 2012. However, the project may be accelerated if additional funds become available. NCDOT will submit permit applications for Sections B and C when funding and final design are complete.

NEPA DOCUMENT STATUS

An Environmental Assessment (EA) for all sections of R-2241 was approved in October 1997. The Finding of Significant Impact (FONSI) was approved April 2000. Merger Team meeting for Concurrence Points 2A and 4A was held May 13, 2004. Right of Way Consultation was approved May 2006. Additional copies are available upon request.

Concurrence was signed by the Merger Team on the following dates

- CP1- April 28, 2000
- CP2 April 28, 2000
- CP2A May 13, 2004
- CP3 April 28, 2000
- CP4A May 13, 2004

INDEPENDENT UTILITY

The subject project complies with 23 CFR Part 771.111(f), which lists the Federal Highway Administration (FHWA) characteristics of independent utility of a project:

1) The project connects logical termini and is of sufficient length to address environmental matters on a broad scope;

Due to Section A of the project starting at the US 501/NC 49 intersection and ending at the US 501 /SR 1521 intersection, the project meets the definition of logical termini. These are rational endpoints for both transportation improvements and for a review of the environmental impacts. The project improvement is primarily related to congestion due to traffic generators, and the choice of termini based on these generators may be appropriate.

2) The project is usable and a reasonable expenditure, even if no additional transportation improvements are made in the area;

Section A from the US 501/NC 49 intersection to the US 501/SR 1521 intersection has independent utility in that it serves as an identified need for the project area due to current congestion along existing US 501. Improvements on Section A will not force immediate transportation improvements on sections B and C, which will be constructed at future dates. Improvements on Section A are mostly on new location. The proposed improvements along Section A should not impact the operation of traffic along Sections B and C.

3) The project does not restrict consideration of alternatives for other reasonably foreseeable transportation improvements.

The proposed improvements for Section A do not restrict consideration of alternatives for other reasonably foreseeable transportation improvements. Section A is the endpoint of the overall improvements which allows for a range of alternatives for the remainder of the proposed project.

RESOURCE STATUS

Wetland and stream determinations were re-verified for Section A in January 2010. NCDOT received a final JD from the U.S. Army Corps of Engineers (USACE) on December 30, 2010 and it expires December 30, 2015. Wetlands were re-verified using the field delineation method outlined in the Interim Regional Supplement to the Corps of Engineers Wetland Delineation Manual: Eastern Mountains and Piedmont Region. The North Carolina Division of Water Quality's (DWQ) Identification Methods for the Origins of Intermittent and Perennial Streams was used to make stream determinations.

Changes made to the jurisdictional sites from what was presented in the EA and FONSI are included in the section below. The "JD Package ID" column in the tables refer to the final JD package (January 2010) sent to the USACE for Section A.

IMPACTS TO WATERS OF THE UNITED STATES

Impacts to wetlands and streams are higher than stated in the FONSI. This is most likely due to the increase in number and size of wetlands and the increase in the number of streams delineated during the latest reverification of jurisdictional resources.

Wetlands

Wetland impacts occur in the Roanoke River Basin in HUC 03010104. Permanent riparian wetland impacts total 2.38 acres. Table 1 lists permanent impacts which include fill, excavation, and mechanized clearing.

Table 1. R-2241A Wetland Impacts

Permit Site No.	Wetland ID in EA[1]	JD package ID	Riparian or Non-riparian	Permanent Impacts (ac)
2	*	1A	Riparian	0.18
5	W-5	2A, 3A	Riparian	0.28
7	W-6	5A, 6A, 7A	Riparian	0.13
8	*	9A, 10A, 10.5A	Riparian	0.05
11	*	15A	Riparian	<0.01
12	W-20	15.5A	Riparian	0.12
13	W-13	16A	Riparian	0.24
14	W-14	17A	Riparian	0.09
15	W-15	18A, 18.5A, 19A	Riparian	0.39
17	*	1B	Riparian	0.80
19	*	2B	Riparian	0.11
Total				**2.38[2]**

*not stated in EA [1]Location IDs are a best guess based on EA map [2]Total impacts due to rounding

Surface Waters

Surface water impacts occur in the Roanoke River Basin in HUC 03010104. Permanent stream impacts are 3,832 linear feet and surface water impacts are 0.45 acres. Table 2 lists the site number, reference number, stream name, stream status and amount of permanent and temporary impacts.

Marlowe Creek and Mitchell Creek are classified as Class C streams. Marlowe Creek is listed in the Final 2010 303(d) report from its source to Mitchell Creek for ecological/biological integrity benthos. No other streams within 1.0 mile of the project area are listed as 303(d). No streams within one mile of the project are classified as ORW, HQW, WS-I or WS-II.

Utility Impacts: Impacts will occur at Site 1 from the crossing of a 10 inch sewer line and an 8 inch water line. The pipes will be trenched through the streambed but impacts will be temporary as the streambed will be restored to its original elevation and contours. These impacts are beyond any of the construction impacts at Site 1 for the box culvert. Temporary impacts to each pipe will be 3 feet for a total amount of 6 feet.

Table 2. R-2241A Streams Impacted

Permit Site No.	Stream ID in EA[1]	JD Package ID	Stream Name	Intermittent/ Perennial	Permanent Impacts		Temporary Impacts	Impacts requiring mitigation[3]
1	S-13	1A	Marlowe Creek	Perennial	Fill	138	26	138
					SBS[2]	125		
Utility Site 1	S-13	1A	Marlowe Creek	Perennial	0		6	0
3	*	2A	UT to Marlowe Creek	Intermittent	Fill	23	0	0
4	S-14	3A	UT to Marlowe Creek	Perennial	Fill	112	39	112
					SBS	59		
6	*	4A	UT to Marlowe Creek	Intermittent	Fill	23	30	0
					SBS	16

					SBS	36		
13	S-23	14A	UT to Mitchell Creek	Perennial	Fill	246	72	246
14	S-24	15A, 16A	UT to Mitchell Creek	Both Perennial	Fill	262	23	262
					SBS	13		
15	S-25	17A	Mitchell Creek	Perennial	Fill	653	75	653
					SBS	13		
17	*	2B	UT to Mitchell Creek	Perennial	Fill	148	62	148
					SBS	36		
18	*	3B, 4B	UT to Mill Creek	Both Perennial	Fill	364	203	364**
					SBS	10		
Total					**Fill**	**3,393**	**858**	**3,196**
					SBS	**439**		

*Not stated in EA **The 10 feet of mitigation for SBS does required mitigation from DWQ but not counted here because total mitigation for the USACE exceeds DWQ mitigation

[1]Location IDs are a best guess based on EA map

[2]Stream Bank Stabilization [3]Mitigation required by USACE

PROTECTED SPECIES

The United States Fish and Wildlife Service (USFWS) list one federally protected species for Person County as of September 22, 2010 (Table 3).

Table 3. Federally Protected Species in Person County

Scientific Name	Common Name	Federal Status	Habitat Present	Biological Conclusion
Alasmidonta heterodon	Dwarf wedgemussel	E	No	No Effect

This species was not listed when the EA and FONSI were approved. Surveys were completed in March of 2002 and no habitat is present. This is explained in the Right of Way consultation, dated May 2006. There will be no effect to this species from this project.

CULTURAL RESOURCES

Archaeology

A letter dated December 7, 1995 (C-16 in EA) and a letter dated December 3, 1998 (enclosed) concur that there will be no effect upon eligible archeology sites and no additional investigations are necessary.

Historic Architecture

There are two historic properties within Section A of this project: Cal-Vel Village and the Will Walker House. Since the project does not improve existing US 501, there are no effects to either property (because both are located along existing US 501). The effects form (2006) in the EA states that there would have been adverse effects if NCDOT had chosen to Alt. 1 (Improve existing), which it did not. The other two properties listed on the form: Holloway Jones Day House and the John H. Merritt Homeplace are in Section B of this project.

FEMA COMPLIANCE

The project will be coordinated with appropriate state and local officials and the Federal Emergency Management Agency (FEMA) to assure compliance with FEMA, state, and local floodway regulations.

INDIRECT AND CULMULATIVE EFFECTS

The May 4, 2005 Qualitative Indirect and Cumulative Effects Assessment for R-2241 concluded the following:

- Despite the presence of abundant land that is or could be service by public utilities, TIP Project R-2241 has a low likelihood of influencing intraregional land development due to the availability of competing sites that are closer to interstate corridors (I-85 and I-40) and larger urban centers (particularly Durham and Raleigh).
- Development resulting from the project would likely come in the form of industrial facilities with direct access to the upgraded facility, commercial development along the five-lane portion of the new US 501 near Roxboro, or

highway commercial development at key intersections north of Roxboro. Sporadic low-density housing could take place as well, particularly along arterials feeding into US 501.

- Any indirect or cumulative growth along the new location portion of the project should be tempered by the proposed partial control of access.
- Because of the low amount of potential growth that could result from the project, the Neuse River Basin riparian buffer regulations, water supply watershed regulations, and the limited access proposed for the new location and widening sections of the project, the water quality of the area should remain relatively unharmed from any indirect or cumulative impacts associated with TIP Project R-2241.

MITIGATION OPTIONS

The NCDOT is committed to incorporating all reasonable and practicable design features to avoid and minimize jurisdictional impacts, and to provide either on-site or compensatory mitigation of all remaining, unavoidable jurisdictional impacts. Avoidance measures were taken during the planning and NEPA compliance stages; minimization measures were incorporated as part of the project design.

Avoidance and Minimization

All jurisdictional features were delineated, field verified and surveyed within the right of way for R-2241A. NCDOT employs many strategies to avoid and minimize impacts to jurisdictional areas in all of its designs. Many of these strategies have been incorporated into BMP documents that have been reviewed and approved by the resource agencies and which will be followed throughout construction. Individual avoidance and minimization items are as follows:

- The project was designed to avoid or minimize disturbance to aquatic life movements.
- Wetland and stream impacts were avoided and minimized during the planning process (see EA and FONSI)
- NCDOT will minimize long-term water quality impacts using the most recent Best Management Practices for Protection of Surface Waters,
- The use of preformed scour holes were used where applicable.
- Grass swales are utilized to provide stormwater treatment. These are summarized in the Stormwater Management Plan.
- Energy dissipators were used
- The wetland impacts at Site 19 were significantly reduced due to realigning the roadway since the 4C meeting.
- The alignment was shifted further north in order to avoid several wetlands being impacted from original design (see 2A/4A concurrence packet and meeting minutes, additional copies available upon request).
- Impacts to wetlands and streams are higher than stated in the FONSI. This is most likely due to the increase in number and size of wetlands and the increase in the number of streams delineated during the latest reverification of jurisdictional resources.
- The use of 2:1 fill slopes in jurisdictional areas where possible.

Compensation

As described above and in the EA and FONSI, the NCDOT has avoided and minimized impacts to jurisdictional resources to the greatest extent possible. Total riparian wetland impacts requiring mitigation are 2.38 acres. Mitigation for these impacts will come from EEP

Permanent stream impacts are 3,832 linear feet of which 439 linear feet are for streambank stabilization. NCDOT is not proposing mitigation for the streambank stabilization. Streams at Sites 3, 6, 10 and 18 did not require mitigation from the USACE based on the field visit January 25, 2010. Stream impacts at Sites 3, 6, and 10 are below 150 feet so no mitigation is proposed for these sites from DWQ. Impacts at Site 18 are greater than 150 feet so these impacts to the total stream will require mitigation from DWQ.

Total amount of stream impacts requiring mitigation from DWQ are 3,206 feet at 1:1. Total amount of stream impacts requiring mitigation from USACE are 3,196 feet at 2:1. The total amount of stream impacts that will be offset by the EEP are 3,196 feet (2:1). This amount will exceed the required amount of mitigation from DWQ so the 10 feet of mitigation required for Site 18 is not included in the total. A copy of the EEP Acceptance Letter is included with this application.

REGULATORY APPROVALS

Application is hereby made for a USACE Individual 404 Permit as required for the above-described activities. Application is hereby made for a Section 401 Water Quality Certification from the N. C. Division of Water Quality. In compliance with Section 143-215.3D(e) of the NCAC we have provided a method of debiting $570, as noted in the subject line of this application, as payment for processing the Section 401 Water Quality Certification modification application. We are providing five copies of this application to DWQ, for their use.

A copy of this permit application will be posted on the DOT website at: http://www.ncdot.org/doh/preconstruct/pe/neu/permit.html. If you have any questions or need additional information, please contact Rachelle Beauregard at rbeauregard@ncdot.gov or (919) 707-6105.

Sincerely,

E. L. Lusk

APPLICATION FOR DEPARTMENT OF THE ARMY PERMIT

(33 CFR 325)

OMB APPROVAL NO. 0710-0003
EXPIRES: 31 AUGUST 2012

Public reporting for this collection of information is estimated to average 11 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of the collection of information, including suggestions for reducing this burden, to Department of Defense, Washington Headquarters, Executive Services and Communications Directorate, Information Management Division and to the Office of Management and Budget, Paperwork Reduction Project (0710-0003). Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to any penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number. Please DO NOT RETURN your form to either of those addresses. Completed applications must be submitted to the District Engineer having jurisdiction over the location of the proposed activity.

PRIVACY ACT STATEMENT

Authorities: Rivers and Harbors Act, Section 10, 33 USC 403; Clean Water Act, Section 404, 33 USC 1344; Marine Protection, Research, and Sanctuaries Act, Section 103, 33 USC 1413; Regulatory Programs of the Corps of Engineers; Final Rule 33 CFR 320-332. Principal Purpose: Information provided on this form will be used in evaluating the application for a permit. Routine Uses: This information may be shared with the Department of Justice and other federal, state, and local government agencies, and the public and may be made available as part of a public notice as required by Federal law. Submission of requested information is voluntary, however, if information is not provided the permit application cannot be evaluated nor can a permit be issued. One set of original drawings or good reproducible copies which show the location and character of the proposed activity must be attached to this application (see sample drawings and/or instructions) and be submitted to the District Engineer having jurisdiction over the location of the proposed activity. An application that is not completed in full will be returned.

STATEMENT OF AUTHORIZATION

11. I hereby authorize, _____ to act in my behalf as my agent in the processing of this application and to furnish, upon request, supplemental information in support of this permit application.

_____ _____
SIGNATURE OF APPLICANT DATE

NAME, LOCATION, AND DESCRIPTION OF PROJECT OR ACTIVITY

12. PROJECT NAME OR TITLE (see instructions)
R-2241A US 501 from NC 49 in Roxboro to SR 1602 (Jesse Banks Road)

13. NAME OF WATERBODY, IF KNOWN (if applicable)	14. PROJECT STREET ADDRESS (if applicable)
Marlowe Creek and its UTs, UTs to Mitchel and Mill Creek	Address
15. LOCATION OF PROJECT Latitude: °N Longitude: °W	City - State- Zip-

16. OTHER LOCATION DESCRIPTIONS, IF KNOWN (see instructions)
State Tax Parcel ID Municipality
Section - Township - Range -

17. DIRECTIONS TO THE SITE
See Permit Drawings

18. Nature of Activity (Description of project, include all features)
The North Carolina Department of Transportation (NCDOT) proposes to improve US 501 to a multilane facility from Roxboro to the Virginia State line. This project has 3 sections, A, B and C. Section A has independent utility from the others so it is being permitted separately. Sections B and C are post year lets.Section A of this project (4.46 miles) will provide a small amount of widening along NC 49 then will take off on new location until it merges with Halifax Road (SR 1521) and then with US 501 to SR 1602 (Jesse Banks Road). The widening section of NC 49 will be a 5-lane curb and gutter. The new location segment and widening of Halifax Road and US 501 to SR 1602 will be 4 lane divided with a shoulder section.

19. Project Purpose (Describe the reason or purpose of the project, see instructions)
The purpose and need as stated in the document is still applicable to Section A of this project. The need for the project was to address industrial traffic, separate local and regional traffic and lessen traffic congestion on Madison Boulevard. The purpose of the project was to provide relief to the increased traffic demands along this northern portion of US 501 in Roxboro and to provide an adequate transportation system for the area by completing the "missing link" of this regional system by providing multilane from Roxboro to the Virginia line.

While completing just Section A of the project does not fully address completing the "missing link" of the transportation system from Roxboro to Virginia, it does address the other aspects of the purpose and need. It will still help separate local and regional traffic. With the additional through lanes, it will also still improve safety of the facility by reducing competition between tractor-trailers, passenger cars and school buses.

E. L. Lusk for Gregory J. Thorpe, PhD — Jan 20, 2012

SIGNATURE OF APPLICANT — DATE — SIGNATURE OF AGENT — DATE

The Application must be signed by the person who desires to undertake the proposed activity (applicant) or it may be signed by a duly authorized agent if the statement in block 11 has been filled out and signed.

18 U.S.C. Section 1001 provides that: Whoever, in any manner within the jurisdiction of any department or agency of the United States knowingly and willfully falsifies, conceals, or covers up any trick, scheme, or disguises a material fact or makes any false, fictitious or fraudulent statements or representations or makes or uses any false writing or document knowing same to contain any false, fictitious or fraudulent statements or entry, shall be fined not more than $10,000 or imprisoned not more than five years or both.

Ecosystem Enhancement PROGRAM

January 17, 2012

Mr. Gregory J. Thorpe, Ph.D.
Manager, Project Development and Environmental Analysis Branch
North Carolina Department of Transportation
1548 Mail Service Center
Raleigh, North Carolina 27699-1548

Dear Dr. Thorpe:

Subject: EEP Mitigation Acceptance Letter:

R-2241A, Improvements to US 501 from NC 49 in Roxboro to SR 1602 (Jesse Banks Road), Person County

The purpose of this letter is to notify you that the Ecosystem Enhancement Program (EEP) will provide the compensatory stream and riparian wetland mitigation for the subject project. Based on the information supplied by you on January 12, 2012, the impacts are located in CU 03010104 of the Roanoke River basin in the Central Piedmont (CP) Eco-Region, and are as follows:

Roanoke 03010104 CP	Stream			Wetlands			Buffer (Sq. Ft.)	
	Cold	Cool	Warm	Riparian	Non-Riparian	Coastal Marsh	Zone 1	Zone 2
Impacts (feet/acres)	0	0	3,196	2.38	0	0	0	0

This mitigation acceptance letter replaces the mitigation acceptance letters issued on November 22, 2011 and January 3, 2012. EEP commits to implementing sufficient compensatory stream and riparian wetland mitigation credits to offset the impacts associated with this project in accordance with the N.C. Department of Environment and Natural Resources' Ecosystem Enhancement Program In-Lieu Fee Instrument dated July 28, 2010. If the above referenced impact amounts are revised, then this mitigation acceptance letter will no longer be valid and a new mitigation acceptance letter will be required from EEP.

If you have any questions or need additional information, please contact Ms. Beth Harmon at 919-715-1929.

Sincerely,

James B. Stanfill for

Re: Report on Phase II Archaeological Testing, Site 31PR89&89**, US 501, Person County, Federal-Aid Project MASTP-501(1), State Project 8.1380501, TIP Project R-2241, ER 93-7903, ER 99-7576

Dear Mr. Graf:

Thank you for your letter of October 7, 1998, transmitting the archaeological testing report by Gerold Glover of the North Carolina Department of Transportation concerning the above project.

For purposes of compliance with Section 106 of the National Historic Preservation Act, we concur that the following property is not eligible for inclusion in the National Register of Historic Places under Criterion D:

31PR89&89**

This site lacks undisturbed deposits and is unable to yield information important to history or prehistory. We do not recommend additional archaeological investigation in connection with this project as currently proposed.

In general the report meets our office's guidelines and those of the Secretary of the Interior. However, an updated site form for 31PR89&89** including information on the Phase II testing should be submitted to our office as soon as possible.

The above comments are made pursuant to Section 106 of the National Historic Preservation Act and the Advisory Council on Historic Preservation's Regulations for Compliance with Section 106 codified at 36 CFR Part 800.

Thank you for your cooperation and consideration. If you have questions concerning the above comment, please contact Renee Gledhill-Earley, environmental review coordinator, at 919/733-4763.

Sincerely,

Renee Gledhill-Earley

Travis Wilson – NCWRC (Present)
Gary Jordan – USFWS (Absent)
Chris Militscher – EPA (Present)
Jackie Obediente – NCDOT PDEA (Present)

Participants:
Marshall Clawson – NCDOT Hydraulics
T N Parrott – NCDOT Division 5 Construction
Ben Upshaw – NCDOT Division 5 Construction
John Alford – Ralph Whitehead Assoc.
Frank Fleming – Sungate Design
Chris Murray – NCDOT Division 5 DEO
Brett Feulner – NCDOT ONE
John Frye – NCDOT Structure Design
Robert Stroup – NCDOT Design Services
Clayton Walston – NCDOT Design Services
Dan Duffield – NCDOT Hydraulics
Christina Breen - NCDWQ

The project is the Roxboro bypass

The meeting began at 8:30pm.

Marshall Clawson (MC) Opens meeting allows for introductions, notes that the 4A was held 5/13/04

Sheet 4

Frank Fleming (FF) – Begins with an overview of the drainage and culvert. We are out letting close to the stream.

Nikki Thomson (NT) – No Direct Discharge

MC – No buffers

NT – Still no direct discharge per the 401 certification

FF – We have a short ditch right before entering the stream

Chris Militscher (CM) – What's the velocity?

FF – We will get it and enter it into the minutes. The velocity out of the pipe is 4.6'/sec. The outlet ditch is flat. The drainage area is .17 acre. For treatment, the grass swale requirement is 17'. We have 17.5' from the end of the pipe to the channels waters edge. The velocity in the channel is 1.5'/sec.

Sheet 5

FF – Overview, next site is 15+40 – L- Lt – wetlands

CM – Wetlands on both sides?

FF – No just on the one, continue with overview

CM – Proposed Equalizer Pipe?

FF – No existing pipe

CM – an outfall?

FF – Yes, that's were its going now, the outlet pad is in the wetlands

CM – Can we pull it back?

Eric Alsmeyer (EA) – How about angling the pipe?

FF – Not desirable, would erode the bank

CM – Wetland limits?

FF – Don't know how far they extend

- Discussion

EA – Not a whole lot of flow, not a lot we can do

CM – velocity

FF – 3 m/s 9.8 ft/sec Q10

CM – As long as there is no draining effect to the wetland

FF – Ditch is steep – will not affect the wetland

FF – Next site station 19+20 JD stream

T N Parrott (TP) – Does this flow in roadside ditch to the culvert?

FF – Yes

EA – Will look at my notes, I think this was supposed to be thrown out.

CM – Does not look like a JD call

EA – If Brett could check with ONE's consultant and double check their notes

FF – It is not on the soils or quad maps

FF- Next site sta 21+00 overview of culvert. Note missing wetlands area. FF will send wetland files to Project Services. RWA(prime) has sent the files to Project Services.

CM – Extend culvert or new culvert?

FF – New culvert, roadway is raising the grade and currently we have relief and had to resize the structure. We are burying it also.

CM – What's the Name of stream?

FF – UT to Marlow Creek

CM – As long as it is not perched

FF – It won't be perched, we are burring it 1.0'

Travis Wilson (TW) – Any sills?

FF –No, Size of the culvert matches the stream channel pretty good in the location of the inlet and outlet.

TW – As long as you are not over widening the stream

FF- We can put a note on the plans that states "NO Extra Channel Work"

<u>Sheet 8 right of sta 25+00</u>

FF – Overview of plans

NT – Is there a pipe in the stream?

FF – Yes

CM – Straightening the channel?

FF – No

Sheet 11 next site

FF – Last culvert site – overview

Brett Feulner (BF) – Is that a stream?

FF - Yes, from ONE's wetland file

CM – Total take?

FF – Yes

CM – What about a PSH?

FF – Yes

CM – What about the Rip Rap?

FF – It's toe protection. This is where we had an alignment shift

TW – What about the outlet velocity?

FF – 15 ft/sec

FF – continue the overview

CM – Fill Slopes?

FF – 2:1

TW – Outlet Protection?

FF – Only on the banks?

TW – Sills?

FF – Yes, we will add sills to hold the material in place

Chris Murray (CM-DEO) Could we get some rip rap at the inlet, say 5-10 ft at the ends of the wing walls? This is to help stabilize the fill slope

FF – We will add 5-10 ft of rip rap at the inlet of all three box culverts.

TP – Pipe or culvert at station 37+40 ?

FF –Pipe

Next Site Sta 40+40

FF – Overview of 60" pipe – JD stream

Sheet 14 Next Site Sta 11+60 Y3
FF - Overview of wetland which leads to a JD stream – 2 existing pipe converge to one stream.

CM – PSH outside of Wetlands?

FF – yes

Sheet 15

FF- Overview JD station 50+80 - 48" Pipe

- Discussion

Sheet 16

FF JD stream and wetland 30" pipe

CM – Existing channel at outlet? Can you put rip rap in the channel?

FF – Only on the banks

CM – Headwall?

FF – No, only on 30" and larger

EA – Move pipe

FF – 53+60 – The outlet end will be adjusted with a base channel connecting to the existing channel.

EA – This maybe a cross pipe we might not want to bury

CM & EA – Do not bury

CM-DEO – The remaining wetland is not going to function, it should be a total take. Therefore bury the pipe.

FINAL Call by EA, CM, CM-DEO total take

Next sheet 17 Sta 57+60

FF-Overview Discussion

Sheet 18 Next Site Sta 65+00

NT – Total take?

FF – Yes, total take

CM – What about the pond?

FF – The actual Dam portion of the pond is located within the R/W – we are taking the pond

FF – Continue with overview, ditch to 54" pipe and ditch at outlet to tie to existing channel

Sheet 20 next site Sta 68+80 JD stream

FF – Overview Replacing all with a 54" pipe

Sheet 22 Next site sta 76+60 JD stream

FF – Overview – 2 pipes at sta 76+00 and 77+00

EA – Question, where does JD start?

BF – I will get up with our consultants

CM-DEO – Impact during construction?

NT – All Stream impacts / enhancements need accounted for

EA – Not much of a stream (Brett you need to check this site as I think there was some question as to where the JD call starts).

NT – Stream U/S of 450 at Sta 77+00 ?

FF – No, no JD upstream.

Next site – wetlands on the matchline

BF – Will check to see if the channel at the end of the project is JD

- Discussion over project tie

General from CM-DEO Fill slopes in wetlands, could we get toe protection on the fill slopes in wetland areas?

FF – Yes, well add it to the plans.

The meeting adjourned at 10:15

Minutes from the Interagency 4C Hydraulic Design Review Meeting
R-2241A in Person County
May 18, 2011
9:00 am – 10:30 am

Team Members:	
Eric Alsmeyer, USACE	(absent)
Gary Jordan, USFWS	(absent)
Travis Wilson, NCWRC	(absent)
Rob Ridings, NCDWQ	(present)
Chris Militscher, EPA	(absent)
Felix Davila, FHWA	(present)
David Harris, REU	(present)
Ron McCollum, Roadway	(absent)
Betsy Cox, Structures	(present)
D. Linwood Stone, PDEA	(absent)
Rachelle L. Beauregard, NEU	(present)
Dennis Jernigan, Division 5	(present)

Participants:
Marshall Clawson, Hydraulics
Dan Duffield, Hydraulics
Will Hines, Sungate Design
James Pflaum, NEU
John Nigro, Utilities
Eugene Tarascio, PDEA
Mark Eatman, TPB
Phil Harris, NEU
Elizabeth Lusk, NEU
Mark Staley, Roadside Environmental
David Clodgo, Roadway Design
Ron McCollum, Roadway Design
Bernadette Cloninger, STV/RWA
Chris Murray, Division 5
Heather Montague, Division 5

Minutes:

General Introduction was initiated by Marshall Clawson. Introductions were made by all in attendance.

General Comments:

(Division) For culvert crossings, permanent impacts to be shown to end of riprap and temporary impacts to be show from end of riprap to R/W or easement line.

(Hydraulics) On the Summary Sheet, temporary existing channel impacts will be separated out of the permanent existing channel impacts. Stream Bank Stabilization will also be separated out.

(NEU) Mechanized Clearing impacts should be taken to the R/W or easement line.

(Division) Bury cross-pipes 20% if there is a significant channel. If no significant channel, then do not bury.

(Division) For cross-pipes with headwalls, add riprap (on banks only) at inlet. Include tonnage and linear feet.

Ditch Detail Sheet

(Division) For Detail 2, show PSRM.

(Division) Revise Toe Protection Detail to show riprap keyed in 2-feet when used in wetlands.

(Division) Update Preformed Scour Hole Detail to current Detail.

(Division) Revise Energy Dissipator Detail to show Class II Riprap.

(Division) Place note on Plan to see CSR for Riprap Detail. Also, Detail needs to show Filter Fabric under the riprap.

Sheet 4:

No Comments.

Sheet 5:

Site 1: (Division) Shorten 375 RCP to outlet at top of riprap.

(Team Member Comment) Need to add Temporary Impacts to Legend.

Sheet 6:

Site 3: (NEU) Note on Summary Sheet that stream impacts are non-mitigatable.

Site 3: (Team Member Comment) Provide Blow-up of site.

Sheet 7:

Site 4: (Division) Lateral ditch located upstream of culvert needs to be shown connecting to the channel.

Site 4: (Team Member Comment) Investigate whether Energy Dissipator is needed. If it is, then rotate Dissipator as needed.

Site 5: (Division) Currently, the stilling basin on the construction sequence has been shown in the wetland located in the southeast quadrant. Look into moving in order to reduce impacts.

Sheet 8:

Site 6: (Division) Realign Energy Dissipator. (EPA) Look at using a drop box in the 600 CSP in order to eliminate the Energy Dissipator.

Site 6: (Division) Do not bury the outlet of the 900 RCP cross-pipe.

Site 6: (Division) Use Class I Riprap at outlet of 900 RCP cross-pipe instead of Class B.

Site 6: (NEU) Note on Summary Sheet that stream impacts are non-mitigatable.

(EPA) He asked if there were any pictures. (Hydraulics) Typically, pictures are only brought to the 4B Meeting.

Sheet 11:

Site 7: (Division) On the inlet end of RCBC, extend riprap to beyond the intersection with the diversion ditch.

Site 7: (Team Member Comment) Label RCBC with Sills.

Site 7: (Division) Concern about the Preformed Scour Hole located at Station 35+10 -L- right and the possibility of stormwater flowing against fill. (Hydraulics) Suggested that storm drainage system be taken to the lateral ditch located at Station 35+20 -L- left and the Preformed Scour Hole eliminated.

Site 7: (NEU) Note on Summary Sheet that stream impacts for the short stream located at Station 35+40 -L- left are non-mitigatable.

Site 7: (NEU) Delete stream shown at Station 35+70 -L- left in order to prevent any confusion.

Site 8: (USACE by e-mail): Asked whether or not this should be a total take. (Agencies) After some discussion, it was decided that this site should not be a total take.

Sheet 12:

Site 9: (Division) Look at realigning or eliminating the Energy Dissipator.

Site 9: (Division) Why is there an endwall proposed at the outlet of the 1500 RCP cross-pipe? (Sungate) Do not know.

Site 9: (Division) Place riprap at inlet around headwall and outward for about 5 feet along banks.

Sheet 14:

Site 10: (Division) Use Class I Riprap at outlet of both 900 CSP cross-pipes instead of Class B.

Site 10: (NEU) Note on Summary Sheet that stream impacts are non-mitigatable.

(Team Member Comment) Delete the "Denotes Mechanized Clearing" symbol since there is none at this site.

Sheet 15:

Site 11: (Division) Remove the Preformed Scour Hole located at Station 50+80 -L- left. (Hydraulics) Suggested that the Preformed Scour Hole be eliminated and replaced with a ditch to pipe outlet.

Site 12: (Hydraulics) Based on the contours, it does not appear that the cross-pipe is located in the natural channel. (Sungate) The alignment will be investigated and compared with survey shots.

Sheet 16:

Site 13: (Division) He asked if the tail ditch at the outlet is shown as Fill in Wetland. (Sungate) It is difficult to see on the Permit Drawing, but it is actually shown as Excavation in Wetland.

Site 13: (Division) He asked if the headwall is located in the wetland. (Sungate) It is difficult to see on the Permit Drawing, but it is located in the wetland.

Sheet 17:

Site 14: (Team Member Comment) He asked if the JD streams were shown correctly. (NEU) Said the JD was shown correctly.

Sheet 18:

No Comments.

Sheet 19:

(Division) Confusion of which impacts belonged to Site 15 and which belonged to Site 16. (Sungate) Additional Site labels will be added to the Permit Drawing.

Site 15: (USACE by e-mail) The stream impact is missing from the Summary Sheet. (Sungate) The impact was inadvertently left off. It will be corrected.

Site 15: (USACE by e-mail) It is unclear where the stream impact ends on the downstream end and what the impact is downstream of the riprap shown on the banks. (Sungate) We will try to make the impacts more visible.

Sheet 20:

Site 17: (USACE by e-mail) The lateral ditch in the wetland located at Station 68+80 -L-right may have a lateral drainage effect on the remaining wetland; therefore, recommend eliminating the lateral ditch and take the storm drainage system out at Station 68+60 -L-left. This will eliminate the lateral drainage effect and reduce the wetland impact.

Site 17: (Division) Extend the riprap at the outlet to just past where the lateral ditch connects to the JD stream.

Sheet 22:

Site 18: (Division) Asked if the outfall ditch can be straightened and if it is possible to obtain more TDE. (Sungate) We will investigate. (Hydraulics) Hydro obtained information after the meeting that the TDE has not been obtained at this time.

Site 18: (Team Member Comment) Impact from constructed outfall ditch will be temporary. Temporary Impacts will be added to the Legend.

Site 18: (Division) He discussed the possible use of coir fiber matting and live staking along outfall. (Hydraulics) A note will be added to the Plan to see Erosion Control Plans for live staking and reforestation.

Site 18: (NEU) Note on Summary Sheet that stream impacts are non-mitigatable.

Sheet 23

Site 19: (USACE by e-mail) The wetland impact at this site should be calculated to include all (total take) of the sliver remnants of the wetland located at Station 78+50 -L-right that do not have a footprint impact.

Site 19: (Ron McCollum) Can this impact be reduced or eliminated by a roadway realignment? (Roadway) This area is currently being looked at and there will be some realignment that may reduce or eliminate the impact.

Site 19: (NEU) Note on Summary Sheet that stream impacts are non-mitigatable.

Meeting adjourned.

NCDOT Highway Stormwater Program

Released: July 2010 (DRAFT)

North Carolina Department of Transportation

Highway Stormwater Program

STORMWATER MANAGEMENT PLAN

Version 1.1

General Project Information

Project No.:	R-2241A		**Date:**	10/11/2011		
City/Town:	Roxboro		**Designer:**	SDG		
County(ies):	Person County		**Project Manager:**	WHW		
River Basin(s):	Roanoke		**CAMA County?**	no	**TVA County?**	no
Primary Receiving Water:	Marlowe Creek, Mitchell Creek, Mill Creek		**NCDWQ Stream Index:**	22-58-12-6, 22-58-12-6-3, 22-58-15-2		
NCDWQ Surface Water Classification for Primary Receiving Water		**Primary:**	Class C			
		Supplemental:				
Other Stream Classification:						
303(d) Stream?	yes	**Type(s) of Impairment:**	Marlowe Creek	Ecological/ Biological	Integrity Benthos	
State Stormwater Permit Required?	no	**If yes, why?**				
Could the Project Impact Threatened or Endangered Species?			no			
Description:						
Anadromous Fish Present?	**no**					
Description:						
Buffer Rules in Effect?	no		**Buffer Rules:**			

Existing Site

HYDROLOGY:

- Stream or Body of Water
- Hydro, Pool or Reservoir
- Jurisdictional Stream — JS
- Buffer Zone 1 — BZ 1
- Buffer Zone 2 — BZ 2
- Flow Arrow
- Disappearing Stream
- Spring
- Swamp Marsh
- Proposed Lateral, Tail, Head Ditch
- False Sump

RAILROADS:

- Standard Gauge — CSX TRANSPORTATION
- RR Signal Milepost — MILEPOST 35
- Switch — SWITCH
- RR Abandoned
- RR Dismantled

RIGHT OF WAY:

- Baseline Control Point
- Existing Right of Way Marker
- Existing Right of Way Line
- Proposed Right of Way Line
- Proposed Right of Way Line with Iron Pin and Cap Marker
- Proposed Right of Way Line with Concrete or Granite Marker
- Existing Control of Access
- Proposed Control of Access
- Existing Easement Line — E
- Proposed Temporary Construction Easement — E
- Proposed Temporary Drainage Easement — TDE
- Proposed Permanent Drainage Easement — PDE
- Proposed Permanent Utility Easement — PUE

ROADS AND RELATED FEATURES:

- Existing Edge of Pavement
- Existing Curb
- Proposed Slope Stakes Cut — C
- Proposed Slope Stakes Fill — F
- Proposed Wheel Chair Ramp — WCR
- Curb Cut for Future Wheel Chair Ramp — CCFR
- Existing Metal Guardrail
- Proposed Guardrail
- Existing Cable Guiderail
- Proposed Cable Guiderail
- Equality Symbol
- Pavement Removal

VEGETATION:

- Single Tree
- Single Shrub
- Hedge
- Woods Line
- Orchard
- Vineyard — Vineyard

EXISTING STRUCTURES:

MAJOR:

- Bridge, Tunnel or Box Culvert — CONC
- Bridge Wing Wall, Head Wall and End Wall — CONC WW

MINOR:

- Head and End Wall — CONC HW
- Pipe Culvert
- Footbridge
- Drainage Box: Catch Basin, DI or JB — CB
- Paved Ditch Gutter
- Storm Sewer Manhole
- Storm Sewer — S

UTILITIES:

POWER:

- Existing Power Pole
- Proposed Power Pole
- Existing Joint Use Pole
- Proposed Joint Use Pole
- Power Manhole
- Power Line Tower
- Power Transformer
- U/G Power Cable Hand Hole
- H-Frame Pole
- Recorded U/G Power Line — P
- Designated U/G Power Line (S.U.E.*) — P

TELEPHONE:

- Existing Telephone Pole
- Proposed Telephone Pole
- Telephone Manhole
- Telephone Booth
- Telephone Pedestal
- Telephone Cell Tower
- U/G Telephone Cable Hand Hole
- Recorded U/G Telephone Cable — T
- Designated U/G Telephone Cable (S.U.E.*) — T
- Recorded U/G Telephone Conduit — TC
- Designated U/G Telephone Conduit (S.U.E.*) — TC
- Recorded U/G Fiber Optics Cable — T FO
- Designated U/G Fiber Optics Cable (S.U.E.*) — T FO

WATER:

- Water Manhole
- Water Meter
- Water Valve
- Water Hydrant
- Recorded U/G Water Line — W
- Designated U/G Water Line (S.U.E.*) — W
- Above Ground Water Line — A/G Water

TV:

- TV Satellite Dish
- TV Pedestal
- TV Tower
- U/G TV Cable Hand Hole
- Recorded U/G TV Cable — TV
- Designated U/G TV Cable (S.U.E.*) — TV
- Recorded U/G Fiber Optic Cable — TV FO
- Designated U/G Fiber Optic Cable (S.U.E.*) — TV FO

GAS:

- Gas Valve
- Gas Meter
- Recorded U/G Gas Line — G
- Designated U/G Gas Line (S.U.E.*) — G
- Above Ground Gas Line — A/G Gas

SANITARY SEWER:

- Sanitary Sewer Manhole
- Sanitary Sewer Cleanout
- U/G Sanitary Sewer Line — SS
- Above Ground Sanitary Sewer — A/G Sanitary Sewer
- Recorded SS Forced Main Line — FSS
- Designated SS Forced Main Line (S.U.E.*) — FSS

MISCELLANEOUS:

- Utility Pole
- Utility Pole with Base
- Utility Located Object
- Utility Traffic Signal Box
- Utility Unknown U/G Line — ?UTL
- U/G Tank; Water, Gas, Oil
- A/G Tank; Water, Gas, Oil
- U/G Test Hole (S.U.E.*)
- Abandoned According to Utility Records — AATUR
- End of Information — E.O.I.

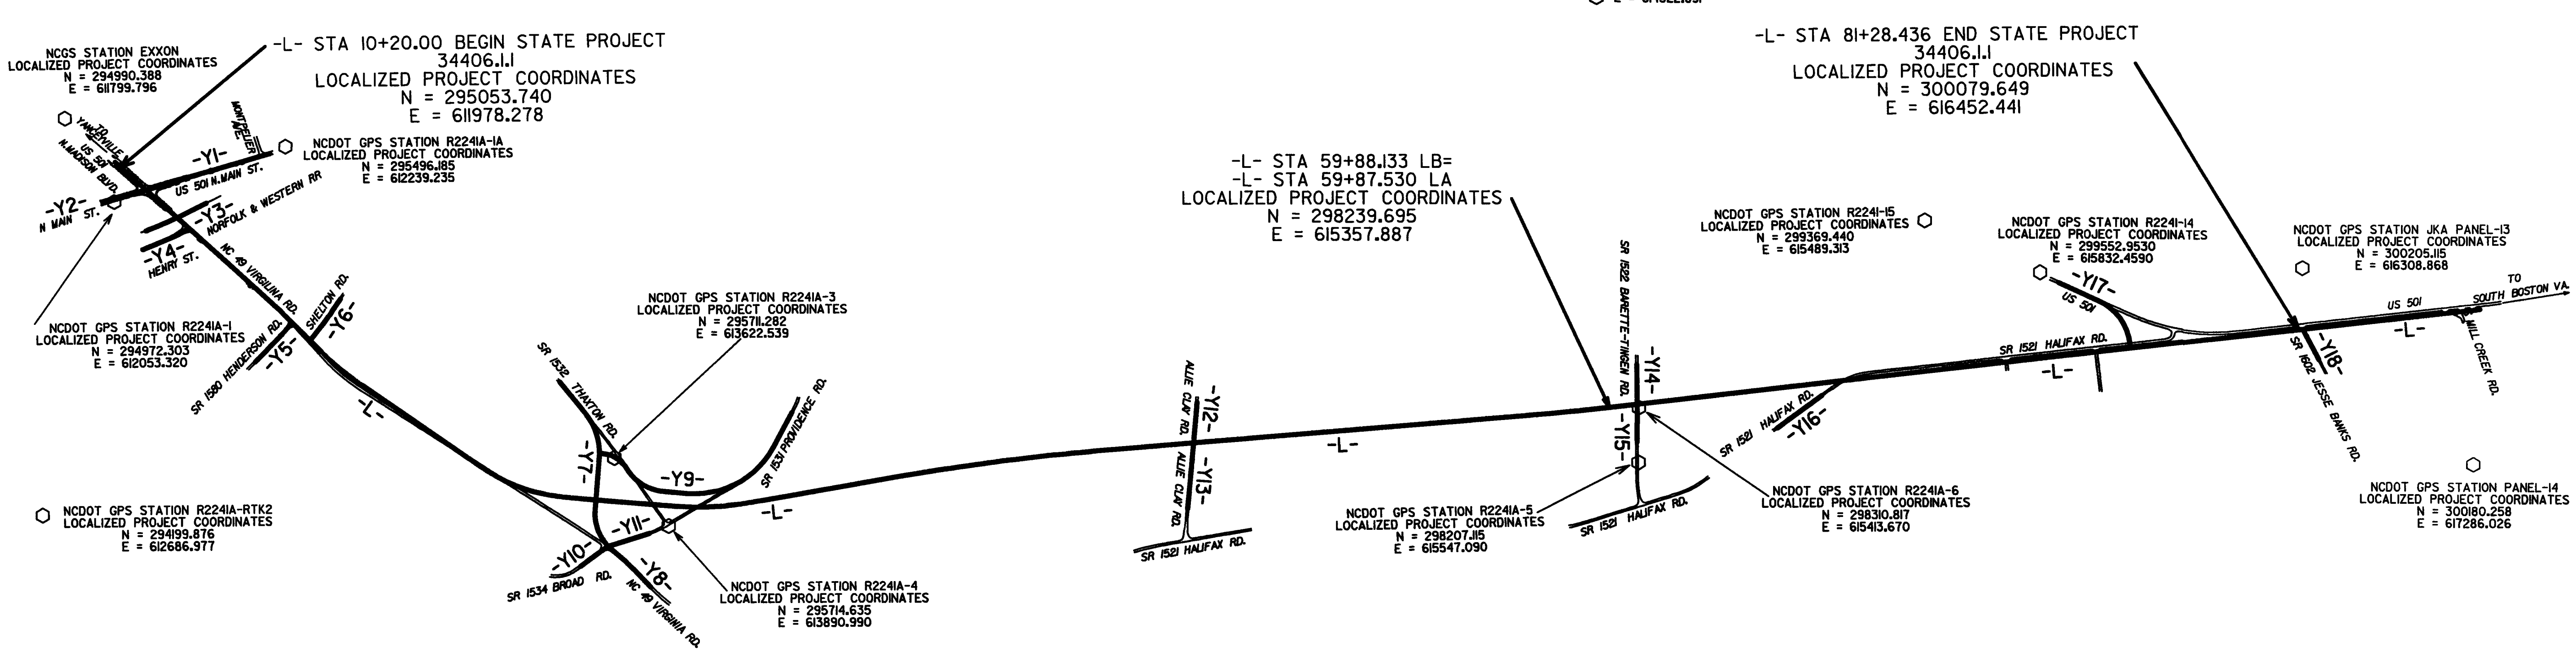
GPS CONTROL NETWORK

NOT TO SCALE



DATUM DESCRIPTION

THE LOCALIZED COORDINATE SYSTEM DEVELOPED FOR THIS PROJECT IS BASED ON THE STATE PLANE COORDINATES ESTABLISHED BY NCDOT FOR MONUMENT "JKA PANEL 13" WITH NAD 83 STATE PLANE GRID COORDINATES OF NORTHING: 300205.115(m) EASTING: 616308.868(m)

THE AVERAGE COMBINED GRID FACTOR USED ON THIS PROJECT (GROUND TO GRID) IS: 1.000077057

THE N.C. LAMBERT GRID BEARING AND LOCALIZED HORIZONTAL GROUND DISTANCE FROM "JKA PANEL 13" TO -L- STATION 10+20.000 IS S40°03'09.54"W 6729.835

ALL LINEAR DIMENSIONS ARE LOCALIZED HORIZONTAL DISTANCES

VERTICAL DATUM USED IS NGVD 29

NOTE: DRAWING NOT TO SCALE

NOTES:

THE CONTROL DATA FOR THIS PROJECT CAN BE FOUND ELECTRONICALLY BY SELECTING PROJECT CONTROL DATA AT:

HTTP:\WWW.NCDOT.ORG/DOH/PRECONSTRUCT/HIGHWAY/LOCATION/PROJECT

Distance Units Meters
Height Units Meters

LOCAL SITE INFORMATION
Localized around
Latitude 36727'21.65218"N
Longitude 78755'30.64699"W
Site Scale Factor 0.9999229490
Height ?

The North Carolina Department of Transportation uses a Localized Coordinate System which is very similar to North Carolina Zone 3200 from which it is derived. Please take care in utilizing these coordinates to eliminate confusion of the two systems. This file is to aid in the use of Real Time Kinematic (RTK) GPS during construction layout.

Datum Transformation Parameters

Datum Transformation computation not requested

Updated Default Projection (Transverse Mercator) Definition

Updated default projection not requested

Horizontal Adjustment Parameters

Northing coordinate of rotation center 298012.185m
Easting coordinate of rotation center 614319.267m
Rotation about the center point 0°00'01"
Translation north 0.011m
Translation east -0.014m
Scale factor 1.00000246

Vertical Adjustment Parameters

Northing coordinate of origin point 304242.368m
Easting coordinate of origin point 616411.587m
Vertical seperation at origin -0.027m
Slope north 0.974ppm
Slope east 0.981ppm

DATUM DESCRIPTION

THE LOCALIZED COORDINATE SYSTEM DEVELOPED FOR THIS PROJECT IS BASED ON THE STATE PLANE COORDINATES ESTABLISHED BY NCDOT FOR MONUMENT "JKA PANEL 13" WITH NAD 83 STATE PLANE GRID COORDINATES OF NORTHING: 300205.115(m) EASTING: 616308.868(m) THE AVERAGE COMBINED GRID FACTOR USED ON THIS PROJECT (GROUND TO GRID) IS: 1.000077057 THE N.C. LAMBERT GRID BEARING AND LOCALIZED HORIZONTAL GROUND DISTANCE FROM "JKA PANEL 13" TO -L- STATION 10+20.000 IS S40°03'09.54"W 6729.835 ALL LINEAR DIMENSIONS ARE LOCALIZED HORIZONTAL DISTANCES VERTICAL DATUM USED IS NGVD 29

NOTES

1. THE SITE CALIBRATION SHOWN IS BASED UPON A NETWORK TIED TO THE HARN (HIGH ACCURACY REFERENCE NETWORK) NAD 83/95 ADJUSTMENT. THIS CALIBRATION WILL ALLOW THE END USER TO WORK WITHIN THE SAME COORDINATE SYSTEM WHEN USING RTK (REAL TIME KINEMATIC) GPS AND A LOCAL BASE STATION. IF ANOTHER SYSTEM SUCH AS VRS (VIRTUAL REFERENCE STATION) IS USED, ADDITIONAL FIELD TIES MAYBE NEEDED TO REDUCE POSSIBLE ERRORS, OR BIASES.

2. THE CONTROL DATA FOR THIS PROJECT CAN BE FOUND ELECTRONICALLY BY SELECTING PROJECT CONTROL DATA AT HTTP://WWW.NCDOT.ORG/DOH/PRECONSTRUCT/HIGHWAY/LOCATION/PROJECT/

   THE FILES TO BE FOUND ARE AS FOLLOWS:

   R2241A_LS_GPSCALIB_050112.HTML
   R2241A_LS_WGS84_050112.TXT
   R2241A_LS_LOCAL_050112.TXT
   R2241A_LS_CONTROL_070420.TXT

   THE WGS84 AND LOCAL FILES ARE COMMA DELIMITED AND CAN BE USED TO REPRODUCE THE SITE CALIBRATION FOR THE END USER'S GPS EQUIPMENT. IF FURTHER INFORMATION IS NEEDED, PLEASE CONTACT THE LOCATION AND SURVEYS UNIT.

DATUM DESCRIPTION

THE LOCALIZED COORDINATE SYSTEM DEVELOPED FOR THIS PROJECT IS BASED ON THE STATE PLANE COORDINATES ESTABLISHED BY NCDOT FOR MONUMENT "JKA PANEL 13" WITH NAD 83 STATE PLANE GRID COORDINATES OF NORTHING: 300205.115(m) EASTING: 616308.868(m) THE AVERAGE COMBINED GRID FACTOR USED ON THIS PROJECT (GROUND TO GRID) IS: 1.000077057 THE N.C. LAMBERT GRID BEARING AND LOCALIZED HORIZONTAL GROUND DISTANCE FROM "JKA PANEL 13" TO -L- STATION 10+20.000 IS S40°03'09.54"W 6,729.835 ALL LINEAR DIMENSIONS ARE LOCALIZED HORIZONTAL DISTANCES VERTICAL DATUM USED IS NGVD 29

NOTES

1. THE SITE CALIBRATION SHOWN IS BASED UPON A NETWORK TIED TO THE HARN (HIGH ACCURACY REFERENCE NETWORK) NAD 83/95 ADJUSTMENT. THIS CALIBRATION WILL ALLOW THE END USER TO WORK WITHIN THE SAME COORDINATE SYSTEM WHEN USING RTK (REAL TIME KINEMATIC) GPS AND A LOCAL BASE STATION. IF ANOTHER SYSTEM SUCH AS VRS (VIRTUAL REFERENCE STATION) IS USED, ADDITIONAL FIELD TIES MAYBE NEEDED TO REDUCE POSSIBLE ERRORS, OR BIASES.

2. THE CONTROL DATA FOR THIS PROJECT CAN BE FOUND ELECTRONICALLY BY SELECTING PROJECT CONTROL DATA AT HTTP://WWW.NCDOT.ORG/DOH/PRECONSTRUCT/HIGHWAY/LOCATION/PROJECT/

   THE FILES TO BE FOUND ARE AS FOLLOWS:

   R2241A_LS_GPSCALIB_050112.HTML
   R2241A_LS_WGS84_050112.TXT
   R2241A_LS_LOCAL_050112.TXT
   R2241A_LS_CONTROL_070420.TXT

   THE WGS84 AND LOCAL FILES ARE COMMA DELIMITED AND CAN BE USED TO REPRODUCE THE SITE CALIBRATION FOR THE END USER'S GPS EQUIPMENT. IF FURTHER INFORMATION IS NEEDED, PLEASE CONTACT THE LOCATION AND SURVEYS UNIT.

CENTERLINE COORDINATE LIST

Disclaimer: This coordinate list is provided for the convenience of interested contractors and is intended for use during the project bidding process only. Coordinates are localized to this particular project and any conversion to state grid coordinates or other formats will be the responsibility of the recipient. While every effort has been made to provide up-to-date, accurateinformation, NCDOT makes no express guarantee as to the validity or potential for revision of this information prior to project letting.

REVISIONS

08-02-11-	PARCEL 16: PROPERTY LINE MODIFIED & REMOVED SHED, ADDED UNDERGROUND DRAIN LINE & MANHOLES PARCEL 16A: ADDED NEW PARCEL BETWEEN 16 & 17 REVISED OWNER NAME ON PARCELS 4,9,11,16 PARCEL 10: REVISED DRIVEWAY CONNECTION & MODIFIED PROPOSED CHAIN LINK FENCE
08-16-11-	PARCEL 12: 10.8M DRIVEWAY SHIFTED TO WEST SIDE OF PROPERTY
09-09-11-	PARCELS 8 & 8A COMBINED, REVISED OWNER NAME
10-07-11-	REVISED PARCEL BOUNDRIES FOR PARCEL 16 AND 16A
10-07-11-	ADDED SUBSURFACE DRAINAGE FOR PARCEL 16 AND 16A
10-27-11-	PARCEL 11: ADDED PDE FOR DRAINAGE STRUCTURE
10-31-11-	PARCEL 7: ADDED R/W AND MODIFIED TEMPORARY EASEMENTS

DATUM DESCRIPTION

THE LOCALIZED COORDINATE SYSTEM DEVELOPED FOR THIS PROJECT IS BASED ON THE STATE PLANE COORDINATES ESTABLISHED BY NCDOT FOR "JKA PANEL 13"
WITH NAD 83 STATE PLANE GRID COORDINATES OF NORTHING: 300205.115(m) EASTING: 616308.868(m)
THE AVERAGE COMBINED GRID FACTOR USED ON THIS PROJECT (GROUND TO GRID) IS: 1.00007057
THE N.C. LAMBERT GRID BEARING AND LOCALIZED HORIZONTAL GROUND DISTANCE FROM "JKA PANEL 13" TO -L- POT STATION 10+20.000 IS
S 40° 03' 09.53" W 6729.835 (m)
ALL LINEAR DIMENSIONS ARE LOCALIZED HORIZONTAL DISTANCES
VERTICAL DATUM USED IS NGVD 29
