U. S. Army Corps of Engineers
Regulatory Field Office
3331 Heritage Trade Drive, Suite 105
Wake Forest, NC 27587

ATTN: Mr. Andy Williams
NCDOT Coordinator

SUBJECT: **Application for Section 404 Individual Permit, Section 401 Individual Water Quality Certification, and Randleman Lake Buffer Authorization** for the proposed widening from SR 1003 (North Main Street) and SR 1820 (Skeet Club Road) to NC 68 in High Point, Guilford County; Division 7; TIP U-3615; Federal Aid Project No. STP-1820(2); WBS Element No. 34962.1.1

Debit $570.00 from WBS Element No. 34962.1.1

Dear Sir:

The North Carolina Department of Transportation (NCDOT) proposes to widen and improve Skeet Club Road to a multi-lane facility from SR 1003 (North Main Street) and SR 1820 (Skeet Club Road) between US 311 to NC 68 and reconfigure the intersection at North Main Street and Skeet Club Road in High Point.

In addition to this cover letter, the application package consists of an ENG Form 4345, the North Carolina Ecosystem Enhancement Program (NCEEP) acceptance letter, September 27, 2010 North Carolina State Historic Preservation Office (NCSHPO) Eligibility Memorandum, Mitigation Plan, Small whorled pogonia Survey Reports for Sections A and B, U-3615B Interagency Hydraulic Design Review Concurrence Points 4B and 4C meeting minutes, U-3615B Stormwater Management Plans, permit drawings, half-size roadway plan sheets and U-3615B Natural Stream Design Plans.

Project Schedule

For construction purposes this project has been divided into two sections: U-3615A – SR 1003 (North Main Street) and SR 1820 (Skeet Club Road) between US 311 and east of SR 1818 (Johnston Street) and U-3615B – SR 1820 (Skeet Club Road) from west of SR 1818 (Johnson Street) to NC 68 (East Chester Drive).

Permit drawings for the proposed project have been prepared based on final design for U-3615B and preliminary design for U-3615A. The NCDOT will apply for any relevant permit modifications for U-3615A when final design is complete for that section. Construction will not commence on

U-3615A until permit modifications have been received based on final designs.

The project has a review date of August 27, 2013 and a letting date of October 15, 2013 for U-3615B and post year date for U-3615A. However, letting of project may advance as funding becomes available.

Purpose and Need

The purpose of this project is to increase the traffic carrying capacity, reduce accident rates, and to relieve traffic congestion in the area surrounding Skeet Club Road.

NEPA DOCUMENT STATUS

An Environmental Assessment (EA) was approved in December 2002. A Finding of No Significant Impact (FONSI) was approved in May 2004. The EA and FONSI have been provided to regulatory review agencies. A Right of Way Consultation to update the EA and FONSI was completed in February 2009 (see attached). Additional copies will be provided upon request.

INDEPENDENT UTILITY

The subject project is in compliance with 23 CFR Part 771.111(f), which lists the Federal Highway Administration (FHWA) characteristics of independent utility of a project:

(1) The project connects logical termini and is of sufficient length to address environmental matters on a broad scope;
(2) The project is usable and a reasonable expenditure due to both sections being constructed at the same time;
(3) The project does not restrict consideration of alternatives for other reasonably foreseeable transportation improvements.

RESOURCE STATUS

Wetland delineations within the U-3615 construction footprint followed the field delineation method outlined in the *1987 Corps of Engineers Wetland Delineation Manual* (Environmental Laboratory, 1987). Stream identification and classification followed the *Identification Methods for the Origins of Intermittent and Perennial Streams* (North Carolina Division of Water Quality [NCDWQ]).

Within the U-3615 construction footprint, sixteen streams, Oak Hollow Lake, and six wetlands sites were identified. Jurisdictional areas were originally verified by USACE Regulatory Specialist John Thomas and NCDWQ representative Sue Homewood. Jurisdictional features were re-verified by USACE Regulatory Specialist Andy Williams and conceded by NCDWQ representative Amy Euliss on September 17, 2008. Also, during this verification two wetlands (W3 and W4) previously determined to be isolated were deemed to be connected to a stream via a natural depression and were no longer considered isolated. No written Jurisdictional Determination (JD) was received from the USACE for the re-verification.

IMPACTS TO WATERS OF THE UNITED STATES

The project lies within the Piedmont Physiographic Province in the Cape Fear River Basin in Guilford County, HUC 03030003. Jurisdictional features within the construction footprint that will be impacted by this project include Oak Hollow Lake (NCDWQ Classification WSIV; CA; NCDWQ Index No. 17-3-(0.7) and ten unnamed tributaries (UTs) to West Fork of Deep River (NCDWQ Classification WS-IV; NCDWQ Index No.17-3-(0.3). There are three riparian wetlands located within the project area that will be impacted.

There are no designated Outstanding Resource Waters (ORW), High Quality Waters (HQW), Water Supply I (WS-I), or Water Supply II (WS-II) waters within 1.0 mile of the project area. None of the streams within the project area are listed on the 2012 303(d) List of Impaired Waters of North Carolina. However, there is one water source within a mile of the project area that is listed on the 2012 303(d) List that is connected with waters in the project area: Rich Fork. Rich Fork is listed as impaired due to ecological/biological integrity for benthos and/or fish community.

Utility Impacts

There will be no impacts from utilities to jurisdictional sites on Section U-3615B. Utility impacts for Section U-3615A will be evaluated during the permit modification process.

Surface Waters

U-3615B

Total surface water impacts for U-3615B are 2,099 linear feet of permanent stream impacts and 117 linear feet of temporary stream impacts. There are also 0.04 acres of surface water impacts for the rock fill in Oak Hollow Lake and a pond along with 0.29 acres of temporary surface water impacts for bents of the bridge at Oak Hollow Lake. The jurisdictional stream impacts are summarized below in Table 1.

Table 1. U-3615B Surface Water Impacts (Final)

Site	Stream JD ID	Classification	Impact Type	Impact Length (lin. ft.)	Pond/Lake Impact Area (acres)	Proposed Mitigation Ratio	Proposed Mitigation Required (lin. ft.)	Temporary Impacts (lin. ft.)
1	UT 3-2/UT 4 W. Fork of Deep River	Perennial	2 x 66" RCP	119		2:1	238	16
2	UT 3-3 W. Fork of Deep River	Perennial	Relocate Channel	594		1:1	594	10
2A	Pond to W. Fork of Deep River	Perennial	Rockfill		0.02			
3	UT 3-3 W. Fork of Deep River	Perennial	Relocate Channel	699		1:1	699	10
3A	UT 5 W. Fork of Deep River	Perennial	2 X 54" RCP	38		2:1	76	10
3B	UT 6 W. Fork of Deep River	Perennial	48" RCP	109		2:1	218	4
			Bank Stabilization	10		0[2]	0	
3C	UT 15 W. Fork of Deep River	Intermittent	Natural Stream Design	63		1:1	63	
5	UT 12 W. Fork of Deep River	Intermittent	30" RCP	131		1:1	131	16
5A	S-7 (Oak Hollow Lake)	Perennial	Rockfill		0.02			
7	UT 9 W. Fork of Deep River	Intermittent	42" RCP	49		1:1	49	19
8	UT 8 W. Fork of Deep River	Perennial	8'X 8' RCBC	186		2:1	372	32
			Bank Stabilization	101		0[1]	0	
Total Impacts:				**2,099**	**0.04**		**2,440**	**117**

[1] Mitigation for bank stabilization not required by USACE and NCDWQ mitigation requirement met under the USACE 2:1 ratio for stream mitigation. [2] Does not meet mitigation threshold of <150 feet (NCDWQ).

* Note: There are 0.29 acres of temporary surface water impact for the bridge for Oak Hollow Lake. Impacts not included in surface water impact total.

U-3615A

Total preliminary surface water impacts for U-3615A are 439 linear feet of permanent stream impacts and 33 linear feet of temporary stream impacts. The jurisdictional stream impacts are summarized below in Table 2.

Table 2. U-3615A Surface Water Impacts (Preliminary)

Site	Stream JD ID	Classification	Impact Type	Impact Length (lin. ft.)	Proposed Mitigation Ratio	Temporary Impact Length (ft.)
2	UT 1 Hiatt Branch	Perennial	36" RCP	148	1:1[1]	10
3	UT 2 Hiatt Branch	Intermittent	48" RCP	132	1:1[1]	13
4	UT 14 W. Fork Deep River	Intermittent	24" RCP	159	0[2]	10
Total Impacts				**439**		**33**

[1]USACE on the field visit 4/9/02 determined mitigation ratio to be 1:1. [2]USACE on a field visit on 9/17/08 and NCDWQ on field visit on 7/20/05 determined UT 14 to be unimportant and no mitigation required.

Wetlands

U-3615B

There will be a total of 0.82 acres of permanent riparian wetland impacts associated with this section. These impacts will result from 0.14 acres of permanent fill, 0.67 of excavation, and 0.01 acres of mechanized clearing. Wetland impacts are summarized below in Table 3.

Table 3. U-3615B Wetland Impacts (Final)

Site	Wetland JD ID	Impact Type	Permanent Impacts (acres)
3C	Wetland WF	Excavation	0.67
4	Wetland 3	Excavation	<0.01
		Permanent Fill	0.13
5	Wetland B	Mechanized Clearing	0.01
		Permanent Fill	<0.01
6	Wetland D	Mechanized Clearing	<0.01
		Permanent Fill	<0.01
Total Impacts			**0.82***

*Total impacts due to rounding.

U-3615A

There are no wetland impacts for this section.

Randleman Lake Water Supply Watershed Buffers

This project impacts buffers in the Randleman Lake water supply watershed. Section U-3615B has final design impacts and Section U-3615A has preliminary impacts. Buffer impacts are summarized in Tables 4–5 for U-3615B and in Tables 6-7 for U-3615A below.

Table 4. U-3615B Randleman Lake Watershed Buffer Impacts (Final)

	Road Crossing	Road Crossing	Impacts Other Than Road Crossings (Parallel Impacts)	Other Impacts (Exceptions*)
Zone 1 Impact (sq. ft.)	31,767	13,765	90,736	2,437
Zone 2 Impact (sq. ft.)	19,572	7,825	64,268	1,947
Mitigation requirements	Allowable	Allowable with mitigation	Allowable with mitigation	Allowable

*No mitigation required if treatment is provided prior to buffers under new Randleman rules.

Table 5. U-3615B Total Buffer Impacts Requiring Mitigation (Final)

	Zone 1 Impacts (sq ft)	Zone 2 Impacts (sq ft)
Buffer Impacts requiring mitigation	104,501	72,093

Table 6. U-3615A Randleman Lake Watershed Buffer Impacts (Preliminary)

	Road Crossing	Road Crossing	Impacts Other Than Road Crossings (Parallel Impacts)
Zone 1 Impact (sq ft)	8,648	17,375	5,898
Zone 2 Impact (sq ft)	5,780	9,175	3,605
Mitigation requirements	Allowable	Allowable with mitigation	Allowable with mitigation

Table 7. U-3615A Total Buffer Impacts Requiring Mitigation (Preliminary)

	Zone 1 Impacts (sq ft)	Zone 2 Impacts (sq ft)
Buffer Impacts requiring mitigation	26,550	12,780

FEDERALLY PROTECTED SPECIES

Plants and animals with a Federal classification of Endangered (E) or Threatened (T) are protected under provisions of Section 7 and Section 9 of the Endangered Species Act (ESA) of 1973, as amended. As of September 22, 2010, the U.S. Fish and Wildlife Service (USFWS) list one federally protected species for Guilford County: Small whorled pogonia (*Isotria medeoloides).* A species description and biological conclusion for the small whorled pogonia was not stated in either the EA or FONSI because the species was not added to the USFWS county list of protected species until after the documents were completed. The project area was later surveyed in May 2008 by NCDOT biologists for habitat for the small whorled pogonia. Section U-3615A does not have habitat for the small whorled pogonia, but section U-3615B does have habitat. A plant by plant survey in the areas

with habitat was done and no small whorled pogonia plants were found. Species survey reports were done for the small whorled pogonia for both sections of U-3615. A search of the North Carolina Natural Heritage Database on December 17, 2012 revealed no known occurrences of any federally protected species within 1.0 mile of the limits. A biological conclusion of "No Effect" was given for both sections. Copies of the survey reports are attached. Due to the last survey date of May 2008 for small whorled pogonia, NCDOT plans to do a re-survey on U-3615B in May 2013. If NCDOT finds a biological conclusion other than No Effect, we will request USFWS consultation.

Since the EA and FONSI the bald eagle has been delisted for Guilford County. The bald eagle has been delisted as of August 2007 and is not subject to Section 7 consultation and a biological conclusion is not required. However, the bald eagle remains protected by the Bald and Golden Eagle Protection Act. Habitat in the vicinity of U-3615B is limited to areas surrounding Oak Hollow Lake. Surveys conducted on February 23, 2007 found no nests within 660 feet of the project limits. No habitat exists for bald eagle in the vicinity of U-3615A.

MITIGATION OPTIONS

The USACE has adopted, through the Council on Environmental Quality (CEQ), a wetland mitigation policy that embraces the concept of "no net loss of wetlands" and sequencing. The purpose of this policy is to restore and maintain the chemical, biological, and physical integrity of the waters of the United States. CEQ has defined mitigation of wetland and surface water impacts to include: avoiding impacts, minimizing impacts, rectifying impacts, reducing impacts over time, and compensating for impacts (40 CFR 1508.20).

The NCDOT is committed to incorporating all reasonable and practicable design features to avoid and minimize jurisdictional impacts, and to provide full compensatory mitigation of all remaining, unavoidable jurisdictional impacts. Avoidance measures were taken during the planning phase and minimization measures were incorporated as part of the project design. Minimization includes the examination of appropriate and practicable steps to reduce the adverse impacts.

Avoidance and Minimization

Avoidance and minimization has been employed in the project area to the maximum extent practicable. The following measures were implemented each section of the project:

U-3615B

- NCDOT's Best Management Practices (BMPs) for the Protection of Surface Waters will be enforced;
- Where possible, drainage systems were designed to outlet away from surface waters to allow time for infiltration in ditches or natural areas;
- Rip-rapped ditches and rip-rap along stream banks will be used where warranted to control erosion;
- Bank stabilization activities will not place rip-rap on the stream bottom;
- Best fit alignment has allowed wetland impacts to be reduced;
- Grass swales will be utilized where appropriate;
- Ten Hazardous Spill Basins: Stations 183+00 (RT), 202+00 (LT), 222+00 (LT), 234+50 (RT), 242+00 (RT), 267+00 (LT), 272+00 (RT), 306+00 (RT), 314+50 (RT), and 191+50 (LT) will be constructed. The project is located within 0.5 miles of the Oak Hollow Lake Critical Area;
- Pre-formed scour holes will be constructed at five locations: Stations Y30 17+98 (LT), 176+40 (LT), Y34 11+34 (LT), 242+81 (RT), and Y35 13+18 (LT);
- Five level spreaders will be utilized: Stations 202+00(LT), 222+00 (LT), 242+00 (RT), 267+00 (LT), and 272+00 (RT) and

- Side slopes of 2:1 and 1.5:1will be used in jurisdictional areas along the roadway.

For additional avoidance/minimization for U-3615B see attached Stormwater Management Plan. Despite these best efforts of NCDOT, stream impacts and wetland impacts for U-3615 did increase from the impacts reported in the FONSI. Stream impacts reported in document were 2,200 feet and wetland impacts were 0.03 acres. Total stream impacts for this application are 2,099 feet and total wetland impacts are 0.82 acres. ~~The increase of 101 feet of stream impacts is due to addition of "Y" line streams, bank stabilization, a stream relocation, and additional intermittent streams~~. The increase of 0.79 acres of wetland impacts is mainly due to a newly formed wetland delineated after natural stream design was completed. D.R.

Compensatory Mitigation

Compensatory mitigation requirements for U-3615B are summarized below in Table 8. Due to the status of Section U-3615A being currently unfunded and letting more than 5 years out, NCDOT is not proposing mitigation for Section U-3615A at this time. The U-3615B section will permanently impact a total of 2,099 feet of warm water streams. Of these 2,099 feet, there are 111 feet of bank stabilization that do not require mitigation by the USACE, resulting in 1,988 feet of stream impacts requiring USACE mitigation. The total buffer impacts will be 104,501 square feet (Zone 1) and 72,093 square feet (Zone 2).

Streams/Wetlands

The USACE is requiring 2:1 mitigation for 452 feet and requiring 1:1 mitigation for 1,536 feet of stream impacts. NCDOT is providing onsite mitigation of 760 feet of warm water stream by relocating a section of UT 3-3 at Site 3 (see attached Natural Stream Design Plans). The remaining mitigation requirements of 1,680 feet of permanent warm water stream impacts will be provided by the NCEEP for U-3615B (Table 8). NCEEP will also provide mitigation for the 0.82 acres (2:1 ratio) of permanent riparian wetland impacts resulting from roadway fill, excavation, and mechanized clearing.

Buffers

NCDOT is also providing onsite mitigation of 75,639 square feet (45,810 : Zone 1 and 29,829 : Zone 2) of buffers by relocating a section of UT 3-3 at Site 3 (see attached Natural Stream Design Plans). The remaining buffer mitigation requirements for the 58,691 square feet in Zone 1 and 42,264 square feet in Zone 2 impacts will be provided by the NCEEP for U-3615B.

Table 8. U-3515B USACE Required Compensatory Mitigation Summary

	Stream Impacts in Length (ft)	Riparian Wetland Impacts (ac)	Buffer Zone 1 Impacts (sq ft)	Buffer Zone 2 Impacts (sq ft)
Impacts Requiring Mitigation	1,988*	0.82	104,501	72,093
Onsite Mitigation Credits	760 @ 1:1		45,810	29,829
Total Mitigable Impacts Less Onsite Mitigation	1228	0.82	58,691	42,264
Required Mitigation	452 @ 2:1 776 @ 1:1	0.82 @ 2:1	58,691 @ 3:1	42,264 @ 1.5:1
Total Mitigation	**1,680**	**1.64**	**176,073**	**63,396**

*Does not include the 111 feet of bank stabilization. Total USACE stream mitigation requirements of 2,440 feet is greater than the NCDWQ stream requirements of 2,099 feet.

CULTURAL RESOURCES

The NCSHPO reviewed the project regarding the identification of archaeological sites. The NCSHPO stated in a memorandum dated December 8, 1999 that no archaeological investigation be conducted in connection with this project. See EA for memorandum mentioned above.

A concurrence form for assessment effects was signed by NCDOT, NCSHPO, and FHWA on July 22, 2003. The only identified property within the area of potential effect is the Mendenhall House and it is listed on the National Register of Historic Places (NRHP). However, it was concluded during a merger meeting on March 11, 2004 that this project will have no adverse effect on property with Alternate 1; 3:1 or flatter slopes will be used. See FONSI for memorandums mentioned above. An eligibility memorandum update was issued by NCSHPO in September 24, 2010 (see attached Memorandum). No change has occurred for identifying the property as historic.

FEMA COMPLIANCE

There are streams within the project limits that are within Federal Emergency Management Agency (FEMA)-designated flood zones. Coordination between the NCDOT Hydraulics Unit and FEMA will occur prior to Let to ensure that NCDOT is in full compliance with applicable floodplain ordinances.

INDIRECT AND CUMULATIVE EFFECTS

Although TIP U-3615 is only a widening of an existing facility, its location within a rapidly urbanizing area, the substantial amount of available land that is serviced by public water and sewer, its proximity to major urban centers, and numerous roadway construction projects that will be added to an already efficient transportation system (including Piedmont Triad International Airport), should allow it to accelerate already planned development and generate additional development pressure within the Growth Impact Study Area (GISA) upon its completion. In addition to TIP U-3615 the proposed improvements to Barrow Road, the Sandy Ridge Road feasibility study, and the Hartley Road extension could cumulatively impact residential and commercial growth within the GISA. However, with the water supply watershed regulations that are currently in place, as well as the fact that TIP U-3615 is consistent with all currently adopted plans and ordinances for affected jurisdictions, it is unlikely that growth resulting from the project will further degrade or impair the water resources within and surrounding the GISA."

Additionally, since the Indirect Cumulative Effects (ICE) Assessment was completed (November 2004), Guilford County has updated its Land Use Plan (adopted September, 2006). Davidson County has also adopted a new Zoning Ordinance (adopted June, 2011) and has amended its existing Land Development Plan. The Land Development Plan already contained specific water quality policies to address Abbotts Creek and High Rock Lake. The new amendments are based on the completed Rich Fork Creek Watershed Assessment but are to be implemented county-wide. Stormwater retrofits, riparian buffer restoration, land protection, improved site design, and improved rule enforcement are all covered in the new amendments

WILD AND SCENIC RIVERS

This project will not impact any designated Wild and Scenic Rivers or any rivers included in the list of study rivers (Public Law 90-542, as amended) or North Carolina Natural and Scenic Rivers.

ESSENTIAL FISH HABITAT

The project will not impact any essential fish habitat afforded protection under the Magnuson-Stevens Act of 1996 (16 U.S.C 1801 *et seq.*).

REGULATORY APPROVALS

Application is hereby made for a Department of the Army Section 404 Individual Permit as required for the above-described activities for the proposed T.I.P. Project U-3615 A and B. The NCDOT understands that a permit modification will be required for Section U-3615A after final design is complete and prior to construction.

We are also hereby requesting a Section 401 Individual Water Quality Certification and Randleman Lake Buffer Authorization from NCDWQ. In compliance with Section 143-215.3D (e) of the NCAC, we will provide $570.00 to act as payment for processing the Section 401 permit. We are providing two copies of this application to the North Carolina Department of Environment and Natural Resources (NCDENR), NCDWQ, for their review and approval.

A copy of this permit application and its distribution list will be posted on the NCDOT website at http://www.ncdot.org/doh/preconstruct/pe/neu/permit.html. Thank you for your time and assistance with this project. Please contact Deanna Riffey at either driffey@ncdot.gov or (919) 707-6151 if you have any questions or need additional information.

Sincerely,

E. L. Lush

U.S. ARMY CORPS OF ENGINEERS

APPLICATION FOR DEPARTMENT OF THE ARMY PERMIT

33 CFR 325. The proponent agency is CECW-CO-R.

OMB APPROVAL NO. 0710-0003
EXPIRES: 28 FEBRUARY 2013

Public reporting for this collection of information is estimated to average 11 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of the collection of information, including suggestions for reducing this burden, to Department of Defense, Washington Headquarters, Executive Services and Communications Directorate, Information Management Division and to the Office of Management and Budget, Paperwork Reduction Project (0710-0003). Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to any penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number. Please DO NOT RETURN your form to either of those addresses. Completed applications must be submitted to the District Engineer having jurisdiction over the location of the proposed activity.

PRIVACY ACT STATEMENT

Authorities: Rivers and Harbors Act, Section 10, 33 USC 403; Clean Water Act, Section 404, 33 USC 1344; Marine Protection, Research, and Sanctuaries Act, Section 103, 33 USC 1413; Regulatory Programs of the Corps of Engineers; Final Rule 33 CFR 320-332. Principal Purpose: Information provided on this form will be used in evaluating the application for a permit. Routine Uses: This information may be shared with the Department of Justice and other federal, state, and local government agencies, and the public and may be made available as part of a public notice as required by Federal law. Submission of requested information is voluntary, however, if information is not provided the permit application cannot be evaluated nor can a permit be issued. One set of original drawings or good reproducible copies which show the location and character of the proposed activity must be attached to this application (see sample drawings and/or instructions) and be submitted to the District Engineer having jurisdiction over the location of the proposed activity. An application that is not completed in full will be returned.

STATEMENT OF AUTHORIZATION

11. I hereby authorize, _____ to act in my behalf as my agent in the processing of this application and to furnish, upon request, supplemental information in support of this permit application.

_____ _____
SIGNATURE OF APPLICANT DATE

NAME, LOCATION, AND DESCRIPTION OF PROJECT OR ACTIVITY

12. PROJECT NAME OR TITLE (see instructions)
U-3615

13. NAME OF WATERBODY, IF KNOWN (if applicable)	14. PROJECT STREET ADDRESS (if applicable)
Oak Hollow Lake and UTs to West Fork Deep River	Address
15. LOCATION OF PROJECT Latitude: °N 36.0393 Longitude: °W 80.0011	City - State- Zip-

16. OTHER LOCATION DESCRIPTIONS, IF KNOWN (see instructions)
State Tax Parcel ID Municipality
Section - Guilford County Township - High Point Range -

17. DIRECTIONS TO THE SITE
See attached vicinity map and cover letter.

18. Nature of Activity (Description of project, include all features)
The North Carolina Department of Transportation (NCDOT) proposes to widen and improve Skeet Club Road to a multi-lane facility from US 311 to NC 68 and reconfigure the intersection at North Main Street and Skeet Club Road in High Point.

19. Project Purpose (Describe the reason or purpose of the project, see instructions)
The purpose of this project is to increase the traffic carrying capacity, reduce accident rates, and to relieve traffic congestion in the area surrounding Skeet Club Road.

USE BLOCKS 20-23 IF DREDGED AND/OR FILL MATERIAL IS TO BE DISCHARGED

20. Reason(s) for Discharge
Impacts will result from widening the roadway and shoulders, construction of roadway and bridge construction.

21. Type(s) of Material Being Discharged and the Amount of Each Type in Cubic Yards:

Type Amount in Cubic Yards	Type Amount in Cubic Yards	Type Amount in Cubic Yards

See attached cover letter & permit drawings.

22. Surface Area in Acres of Wetlands or Other Waters Filled (see instructions)

Acres See attached cover letter and permit drawings.
or
Linear Feet See attached cover letter and permit drawings.

23. Description of Avoidance, Minimization, and Compensation (see instructions)
See attached cover letter.

24. Is Any Portion of the Work Already Complete? ☐ Yes ☒ No IF YES, DESCRIBE THE COMPLETED WORK

25. Addresses of Adjoining Property Owners, Lessees, Etc., Whose Property Adjoins the Waterbody (if more than can be entered here, please attach a supplemental list).

AGENCY	TYPE APPROVAL*	IDENTIFICATION NUMBER	DATE APPLIED	DATE APPROVED	DATE DENIED

* Would include but is not restricted to zoning, building, and flood plain permits

27. Application is hereby made for permit or permits to authorize the work described in this application. I certify that this information in this application is complete and accurate. I further certify that I possess the authority to undertake the work described herein or am acting as the duly authorized agent of the applicant.

E.L. Lusk for Gregory J. Thorpe, PhD — Apr 25, 2013

SIGNATURE OF APPLICANT — DATE — SIGNATURE OF AGENT — DATE

The Application must be signed by the person who desires to undertake the proposed activity (applicant) or it may be signed by a duly authorized agent if the statement in block 11 has been filled out and signed.

18 U.S.C. Section 1001 provides that: Whoever, in any manner within the jurisdiction of any department or agency of the United States knowingly and willfully falsifies, conceals, or covers up any trick, scheme, or disguises a material fact or makes any false, fictitious or fraudulent statements or representations or makes or uses any false writing or document knowing same to contain any false, fictitious or fraudulent statements or entry, shall be fined not more than $10,000 or imprisoned not more than five years or both.

STATE OF NORTH CAROLINA
DIVISION OF HIGHWAYS

CONVENTIONAL PLAN SHEET SYMBOLS

BOUNDARIES AND PROPERTY:

- State Line
- County Line
- Township Line
- City Line
- Reservation Line
- Property Line
- Existing Iron Pin — EIP
- Property Corner
- Property Monument — ECM
- Parcel/Sequence Number — 23
- Existing Fence Line
- Proposed Woven Wire Fence
- Proposed Chain Link Fence
- Proposed Barbed Wire Fence
- Existing Wetland Boundary — WLB
- Proposed Wetland Boundary — WLB
- Existing Endangered Animal Boundary — EAB
- Existing Endangered Plant Boundary — EPB

BUILDINGS AND OTHER CULTURE:

- Gas Pump Vent or U/G Tank Cap
- Sign — S
- Well — W
- Small Mine
- Foundation
- Area Outline
- Cemetery
- Building
- School
- Church
- Dam

HYDROLOGY:

- Stream or Body of Water
- Hydro, Pool or Reservoir
- Jurisdictional Stream — JS
- Buffer Zone 1 — BZ 1
- Buffer Zone 2 — BZ 2
- Flow Arrow
- Disappearing Stream
- Spring
- Wetland
- Proposed Lateral, Tail, Head Ditch — FLOW
- False Sump

RAILROADS:

- Standard Gauge — CSX TRANSPORTATION
- RR Signal Milepost — MILEPOST 35
- Switch — SWITCH
- RR Abandoned
- RR Dismantled

RIGHT OF WAY:

- Baseline Control Point
- Existing Right of Way Marker
- Existing Right of Way Line
- Proposed Right of Way Line
- Proposed Right of Way Line with Iron Pin and Cap Marker
- Proposed Right of Way Line with Concrete or Granite Marker
- Existing Control of Access — CA
- Proposed Control of Access — CA
- Existing Easement Line — E
- Proposed Temporary Construction Easement — E
- Proposed Temporary Drainage Easement — TDE
- Proposed Permanent Drainage Easement — PDE
- Proposed Permanent Utility Easement — PUE
- Proposed Temporary Utility Easement — TUE
- Proposed Permanent Easement with Iron Pin and Cap Marker

ROADS AND RELATED FEATURES:

- Existing Edge of Pavement
- Existing Curb
- Proposed Slope Stakes Cut — C
- Proposed Slope Stakes Fill — F
- Proposed Wheel Chair Ramp — WCR
- Existing Metal Guardrail
- Proposed Guardrail
- Existing Cable Guiderail
- Proposed Cable Guiderail
- Equality Symbol
- Pavement Removal

VEGETATION:

- Single Tree
- Single Shrub
- Hedge
- Woods Line
- Orchard
- Vineyard — Vineyard

EXISTING STRUCTURES:

MAJOR:

- Bridge, Tunnel or Box Culvert — CONC
- Bridge Wing Wall, Head Wall and End Wall — CONC WW

MINOR:

- Head and End Wall — CONC HW
- Pipe Culvert
- Footbridge
- Drainage Box: Catch Basin, DI or JB — CB
- Paved Ditch Gutter
- Storm Sewer Manhole — S
- Storm Sewer — S

UTILITIES:

POWER:

- Existing Power Pole
- Proposed Power Pole
- Existing Joint Use Pole
- Proposed Joint Use Pole
- Power Manhole — P
- Power Line Tower
- Power Transformer
- U/G Power Cable Hand Hole — HH
- H-Frame Pole
- Recorded U/G Power Line — P
- Designated U/G Power Line (S.U.E.*) — P

TELEPHONE:

- Existing Telephone Pole
- Proposed Telephone Pole
- Telephone Manhole — T
- Telephone Booth
- Telephone Pedestal — T
- Telephone Cell Tower
- U/G Telephone Cable Hand Hole — HH
- Recorded U/G Telephone Cable — T
- Designated U/G Telephone Cable (S.U.E.*) — T
- Recorded U/G Telephone Conduit — TC
- Designated U/G Telephone Conduit (S.U.E.*) — TC
- Recorded U/G Fiber Optics Cable — T FO
- Designated U/G Fiber Optics Cable (S.U.E.*) — T FO

WATER:

- Water Manhole — W
- Water Meter
- Water Valve
- Water Hydrant
- Recorded U/G Water Line — W
- Designated U/G Water Line (S.U.E.*) — W
- Above Ground Water Line — A/G Water

TV:

- TV Satellite Dish
- TV Pedestal — C
- TV Tower
- U/G TV Cable Hand Hole — HH
- Recorded U/G TV Cable — TV
- Designated U/G TV Cable (S.U.E.*) — TV
- Recorded U/G Fiber Optic Cable — TV FO
- Designated U/G Fiber Optic Cable (S.U.E.*) — TV FO

GAS:

- Gas Valve
- Gas Meter
- Recorded U/G Gas Line — G
- Designated U/G Gas Line (S.U.E.*) — G
- Above Ground Gas Line — A/G Gas

SANITARY SEWER:

- Sanitary Sewer Manhole
- Sanitary Sewer Cleanout
- U/G Sanitary Sewer Line — SS
- Above Ground Sanitary Sewer — A/G Sanitary Sewer
- Recorded SS Forced Main Line — FSS
- Designated SS Forced Main Line (S.U.E.*) — FSS

MISCELLANEOUS:

- Utility Pole
- Utility Pole with Base
- Utility Located Object
- Utility Traffic Signal Box — S
- Utility Unknown U/G Line — ?UTL
- U/G Tank; Water, Gas, Oil
- A/G Tank; Water, Gas, Oil
- U/G Test Hole (S.U.E.*)
- Abandoned According to Utility Records — AATUR
- End of Information — E.O.I.

NCDOT Project No. 34962.1.1 (U-3615B)
Guilford County
Widening of Skeet Club Road from west of Johnson Street to NC 68

NATURAL STREAM DESIGN

Unnamed tributary to Oak Hollow Lake
From Sta. 197+70 to Sta. 200+25 –L- Lt.
From Sta. 200+65 to Sta. 205+40 –L- Lt.

Introduction

The construction of this widening project will require the relocation of approximately 760' of stream that currently parallels the existing roadway. The relocation and restoration will be done with the analysis and design incorporating the principles of the Rosgen Classification System. There are two sites that will be restored. A total of 760' of stream will be restored, with a 50' or greater wooded buffer preserved within a Permanent Drainage Easement.

The two sites are located on the project as follows: from Sta. 197+70 to Sta. 200+25 –L- Lt. and from Sta. 200+65 to Sta. 205+40 –L- Lt.

The drainage areas for these sites range from 262 acres to 370 acres, and is predominantly rural, but urbanizing. Land use in the vicinity of the stream ranges from natural woods to residential subdivisions. Future development in the watershed is anticipated. Soils are generally classified as fine sandy loam, with 2-6% slopes. The streambed is predominantly sand and gravel.

No comparable hydraulic gage data exists on this stream nor on nearby streams. Discharges were estimated using Regional Curves for Southeast Pennsylvania.

Existing Stream

The stream relocations begin and end at culvert locations. Some culverts are to remain and some will be upgraded in size during this roadway widening project. The entire stretch of stream was straightened into a roadside ditch during the original road construction and has been in place for many years. The stream channel in this area does not exhibit good morphological data (due to its manmade channelization). No bedrock is evident in the stream near this site, which is a characteristic of riffle-pool morphology. Bed material distribution is defined as fine gravel with a d_{50} of approximately 7 mm. Grass, weeds, and small woody vegetation contribute to the stability of the stream. Average slope is 0.7%.

Reference Reaches

The reference reach was selected from the NCDOT Reference Reach Database with a classification based on the presumed natural condition of the stream in an urbanized location. In addition to profile and planimetric data, cross-sections were taken of the existing stream. Bankfull indicators were examined and noted, but not used in the design due to the unnatural nature of the existing stream. Indicators surveyed included riffles, pools, point bars, vegetation lines, and bankfull shelves. A bed material sample was obtained and a sieve analysis was completed.

Proposed Stream

The proposed streams were designed to closely match the stable B4c/1 stream classification of the reference reach. The proposed stream alignment was laid out proportionately to match the ratios (see Morphological Measurement Table). Cross vanes were used to provide grade control and reduce the channel grade to a more stable reach in the riffles. Since natural bed material reclamation will be difficult, constructed riffles have been designed for use in the proposed section. The constructed riffles will have a mix ratio of 10% Class B Rip Rap, 60% Class A Rip Rap and 30% No. 57 Stone.

Bed shear stress computations were performed in lieu of entrainment calculations. Streambanks will be stabilized with grass, and the floodprone area (and other disturbed areas) will be planted with woody vegetation according to the reforestation plan.

Bankfull bed shear stress was computed for the riffle sections. The permissible shear stress for the constructed riffle mix (d_{50} = 4") is 1.70 #/s.f. In riffle sections the bed shear stress (0.32 #/s.f.) does not exceed the permissible for the proposed bed material. Additionally, velocity and bed shear stress for a 10-yr. event were checked and found to be acceptable. The average velocity during a 10-yr. event is 4.3 fps, and the bed shear stress is 0.46 #/s.f. for the same event.

Comparison of proposed and existing stream power shows that the proposed stream will effectively move the current sediment load. Proposed and existing stream power are 0.33 lb/ft-s and 0.36 lb/ft-s respectively.

FILE SPEC.:

Skeet Club Road Stream Mitigation Plan
Widening of Skeet Club Road from West of Johnson Street to NC 68
Guilford County, NC

U-3615B
34962.1.1
ONE ID# 041-018

01/12/2013

1.0 Baseline

The North Carolina Department of Transportation (NCDOT) will perform onsite mitigation for stream impacts associated with State Transportation Improvement Project (STIP) U-3615B, in Guilford County. The widening of Skeet Club Road will impact 699 feet of an unnamed tributary (UT) to West Fork Deep River. NCDOT will relocate the UT using natural stream design north of the existing stream location. The existing UT runs parallel to Skeet Club Road within a low density residential area. The UT has an unstable, incised G4/C channel with a sparse buffer consisting mainly of small trees and blackberry. All stream work will take place within the Hydrologic Cataloging Unit (HUC) 03030003 within the Cape River Basin in sub basin (03-06-08). Channel dimensions, substrate type and stream type are listed below in Table 1. Additional information can be acquired from the NRTR dated March 9, 2001.

Table 1

Stream Reach	Stream Channel Width	Channel Depth	Channel Substrate	Jurisdictional Status
UT 3-3 UT W Fork Deep R.	6 feet	2 feet	Silt, sand	Perennial

2.0 Site Selection

STIP U-3615B involves the widening and improvements of North Main Street (Old US 311/SR 1003) from the existing 5-lane, curb-and-gutter section north of US 311 to Skeet Club Road. Skeet Club Road will also be widened from North Main Street to the existing 5-lane, curb-and-gutter section just west of Eastchester Drive (NC 68). Permanent stream impacts

associated with this project are 2120 linear feet. These impacts include 699 feet of UT to West Fork Deep River that will be filled during construction and therefore will be relocated. The stream relocation will vary from 30 to 100 feet north of the existing location. The mitigation site is located between -L- Sta. 197+70 to Sta. 205+40. The stream between Sta. 200+25 and Sta. 200+65 is not included in the proposed mitigation due to an access to existing dwelling (see Appendix A)

3.0 Site Protection Instrument

The mitigation area is located within the NCDOT Right of Way that was acquired for the U-3515B. NCDOT will manage the proposed mitigation site to prohibit all use inconsistent with its use as mitigation property, including any activity that would materially alter the biological integrity or functional and educational value of the site, consistent with this mitigation plan. The site will be placed on the NES mitigation geodatabase, have annual field visits during the monitoring period, and then be placed in the NCDOT Stewardship Program for long term maintenance and protection.

4.0 Objectives

The project involves the relocation of 699 feet of the UT to West Fork Deep River, resulting in 760 feet of natural stream design to mitigate for impacts associated with STIP U-3615B. The functional restoration of the stream will be accomplished using natural stream design and buffer restoration. Buffer restoration will consist of planting trees over an area a minimum of 50 feet on both sides of the relocated channel (approximately 76,000 square feet total). NCDOT proposes a 1:1 mitigation ratio for the 760 foot UT to West Fork Deep River stream relocation and for the 76,000 square feet of buffer restoration.

5.0 Mitigation Work Plan

The mitigation site will be constructed in conjunction with STIP U-3615B. Construction activities related to the mitigation site involve floodplain excavation, stream channel grading, structure installation, and native vegetation planting. The design involves the relocation of an unstable, incised channel (G4C stream type) with the Rosgen Priority Level II approach, in which a new stream channel (B4C stream type) will be constructed through a newly established floodplain. In-stream structures will consist of (9) rock cross vanes to provide stability (See Appendix B). The stream banks and adjacent floodplain areas will be planted with native vegetation that are moderately to highly tolerant of flooded conditions.

Following the successful completion of site grading and stabilization, the vegetation plan for the site includes the planting of live stake trees along the face of the stream banks. A minimum 50

foot buffer (from top of bank) will also be established using bare root trees. Tree species commonly found in the piedmont area will be planted across the site No less than four native species appropriate for the site conditions, such as river birch (*Betula nigra*), green ash (*Fraxinus pennsylvanica*), sycamore (*Platanus occidentalis*), and overcup oak (*Quercus lyrata*), will be used. Final species selection will be based on availability.

Two small areas within the buffer restoration area will be planted with low growing shrubs such as silky dogwood (*Cornus amomum*) and button bush (*Cephalanthus occid*entalis*)* because of existing utility easements.

Native grass seeding and mulching will be performed on any disturbed areas along the stream relocation for stabilization purposes according to the guidance and standard procedures of NCDOT's Roadside Environmental Unit. An as-built report will be submitted within 60 days of completion of the project.

6.0 Performance Standards

Buffer vegetation success criteria are based on the survival of at least 260 stems per acre at year five. Stream channel relocation success will be based on channel stability, vegetation survival, and placement of structures.

7.0 Monitoring Requirements

NCDOT will visually monitor the stream relocation as well as established vegetation plots. These monitoring activities will be conducted bi-annually for a five year period and documented in an annual report distributed to the regulatory agencies.

8.0 Other Information

No additional pertinent information available.

9.0 Determination of Credits

Per NCDOT plans and 401/404 permit application for STIP U-3615B; NCDOT proposes to relocate 699 feet of UT West Fork Deep River. The proposed mitigation will result in 760 linear feet of stream relocation to be used as on-site mitigation for associated stream impacts for U-3615B at a 1:1 ratio. An as-built report will be submitted within 60 days of completion of the project to verify actual linear feet constructed and buffer acreage planted. The success of the mitigation area and determination of final credits will be based upon successful completion of the mitigation plan and closeout of the monitoring period.

9.1 Credit Release Schedule

NCDOT proposes immediate, full release of the proposed 760 feet of stream at a 1:1 ratio as on-site mitigation for the impacts associated with STIP U-3615B.

10.0 Geographic Service Area

The proposed geographic Service Area (GSA) for the mitigation is composed of the 8 digit Hydrologic Cataloging Unit (HUC) 03030003. It is anticipated that the entire 760 linear feet will be used on-site at a 1:1 ratio to offset stream impacts associated with U-3615B.

11.0 Maintenance Plan

The site will be held by NCDOT and placed on the NES mitigation geodatabase. Once monitoring is completed and the site is closed out, it will be placed in the NCDOT Stewardship Program for long term maintenance and protection.

If an appropriate third party recipient is identified in the future, then the transfer of the property will include a conservation easement or other measure to protect the natural features and mitigation value of the site in perpetuity.

12.0 Long Term Adaptive Management Plan

The site will be managed by NCDOT according to the mitigation plan. In the event that unforeseen issues arise that affect the management of the site, any remediation will be addressed by NCDOT in coordination with the Interagency Review Team.

13.0 Financial Assurances

The site will be managed by NCDOT with its own distinct cost center number within the NCDOT budgeting and financial tracking system. Therefore, all accounting for revenues, contract encumbrances, fund transfers, and expenses will be performed and reported independently from other capital budget or operating budget accounting.

Ecosystem Enhancement PROGRAM

April 23, 2013

Mr. Gregory J. Thorpe, Ph.D.
Environmental Management Director
Project Development and Environmental Analysis Unit
North Carolina Department of Transportation
1548 Mail Service Center
Raleigh, North Carolina 27699-1548

Dear Dr. Thorpe:

Subject: EEP Mitigation Acceptance Letter:

U-3615B, SR 1820 (Skeet Club Road) from East of SR 1818 (Johnston Street) to West of NC 68, Guilford County

The purpose of this letter is to notify you that the Ecosystem Enhancement Program (EEP) will provide the stream and riparian wetland mitigation and buffer mitigation for the subject project. Based on the information supplied by you on April 19 and 23, 2013, the stream and riparian wetland impacts are located in CU 03030003 of the Cape Fear River basin in the Central Piedmont (CP) Eco-Region, and are as follows:

Stream and Wetlands	River Basin	CU Location	Eco-Region	Stream			Wetlands		
				Cold	Cool	Warm	Riparian	Non-Riparian	Coastal Marsh
Impacts	Cape Fear	03030003	CP	0	0	1,228.0	0.82	0	0

*Some of the stream and wetland impacts may be proposed to be mitigated at a 1:1 mitigation ratio. See permit application for details.

EEP's willingness to accept payment for the above impact is conditional and subject to the approval of the use of alternative mitigation options by the Division of Water Quality. All buffer mitigation requests and approvals are administrated through the Riparian Restoration Buffer Fund. The NCDOT will be responsible to ensure that appropriate compensation for the buffer mitigation will be provided in the agreed upon method of fund transfer. Upon receipt of the NCDWQ's Buffer Authorization Certification, EEP will transfer funds from the NCDOT 2984 Fund into the Riparian Restoration Buffer Fund. Upon completion of transfer payment, NCDOT will have completed its riparian buffer mitigation responsibility for TIP Number U-3615B. Subsequently, EEP will conduct a review of current NCDOT ILF Program mitigation projects in the river basin to determine if available buffer mitigation credits exist. If there are buffer mitigation credits available, then the Riparian Restoration Buffer Fund will purchase the appropriate amount of buffer mitigation credits from NCDOT ILF Program.

Buffer	River Basin / CU	Watershed	Eco-Region	Buffer		
				Zone 1	Zone 2	TOTAL
Impacts	Cape Fear / 03030003	Randleman	CP	58,691.0	42,264.0	100,955.0

EEP commits to implementing sufficient compensatory stream and riparian wetland mitigation credits and mitigation for the buffer impacts to offset the impacts associated with this project as determined by the regulatory agencies in accordance with the N.C. Department of Environment and Natural Resources' Ecosystem Enhancement Program In-Lieu Fee Instrument dated July 28, 2010. If the above referenced impact amounts are revised, then this mitigation acceptance letter will no longer be valid and a new mitigation acceptance letter will be required from EEP.

If you have any questions or need additional information, please contact Ms. Beth Harmon at 919-707-8420.

Sincerely,

James B. Stanfill
EEP Asset Management Supervisor

SECRETARY

December 17, 2012

MEMORANDUM TO: M. Penney, Project Development Engineer

FROM: Deanna Riffey, Environmental Specialist

SUBJECT: Protected Species Update for U-3615 A
Guilford County: SR 1820 (Skeet Club Rd) from US 311 to East of SR 1818 (Johnston St.)

This memo serves to update the status of the federally protected species for the above referenced project.

Species: Small whorled pogonia, (*Isotria medeoloides*)

Survey Date: 5/21/08

Habitat Description/ Survey Information: Suitable habitat was not present within this section of the project. Suitable habitat consists of forested areas with north and east facing slopes with little to no understory with occasional breaks in the canopy allowing sunlight to reach the forest floor. South and west facing slopes could potentially provide habitat as well. Habitat was not suitable within this section of project study area due to areas having a densely populated forest floor or being early successional forests lacking available sunlight on the forest floor and manicured lawn areas. In addition to the survey, a review of NCNHP (updated July 1, 2010) revealed no known occurrences of this species within 1.0 mile of the project. Based on the lack of habitat and the lack of known occurrences within 1.0 mile of the project, a biological conclusion of No Effect has been rendered for this species.

Length of Survey: 2 Person Hours

Biological Conclusion: No Effect

Principal Investigators (please see attachment for qualifications):

December 17, 2012

MEMORANDUM TO: M. Penney, Project Development Engineer

FROM: Deanna Riffey, Environmental Specialist

SUBJECT: Protected Species Update for U-3615 B
Guilford County: SR 1820 (Skeet Club Rd) from East of SR 1818 (Johnston St) to West of NC 68 (Eastchester Dr.).

This memo serves to update the status of the federally protected species for the above referenced project.

Species: Small whorled pogonia, (*Isotria medeoloides*)

Survey Date: 5/21/2008

Habitat Description/ Survey Information: As of January 31, 2008, the U.S. Fish and Wildlife Service (USFWS) lists one federally protected species for Guilford County: Small whorled pogonia (Isotria medeoloides). A species description and biological conclusion for the small whorled pogonia was not stated in either the EA or FONSI because the species was not added to the USFWS county list of protected species until after the documents were completed. A survey was done for the small whorled pogonia by NCDOT biologists in May 2008. Suitable habitat was present within the project area. Habitat consisted of forested areas with north and east facing slopes with little to no understory with occasional breaks in the canopy allowing sunlight to reach the forest floor. However, south and west facing slopes were also surveyed if preferred habitat conditions were present. Small whorled pogonia was not found within in the project area and a biological conclusion of No Effect was given. A search of the North Carolina Natural Heritage Database (NCNHP; updated August 2011) revealed no known occurrences of the federally protected species within 1.0 mile of the limits of this project. Therefore, the biological conclusion of No Effect remains valid for the small whorled pogonia.

Length of Survey: 4 Person Hours

Biological Conclusion: No Effect, but Habitat Present
Principal Investigators (please see attachment for qualifications):

MEMORANDUM

To: Mary Pope Furr, Architectural Historian
NCDOT/PDEA/HEU

From: Peter Sandbeck

Re: Intensive evaluation of the Elihu and Abigail Mendenhall House, Improvements to US 311, U-3615, High Point, Guilford County, CH03-0404

Thank you for your letter of September 8, 2010, transmitting the above referenced evaluation for the Mendenhall House. Members of my staff reviewed the updated evaluation and visited the site on September 22, 2010 to get a better understanding the property and its setting. Based on the report and site visit, we reaffirm our concurrence with the North Carolina Department of Transportation (NCDOT) that the property is eligible for listing in the National Register of Historic Places under Criterion B for it association with prominent Quakers Elihu and Abigail Mendenhall and under Criterion C for it Greek Revival-style architecture. We also believe that it is eligible for listing under Criterion D as the spring house site is likely to yield information important to a better understanding of this early building type and its contribution to the history of the property. The proposed boundaries appear appropriate for this property.

We are also in receipt of a September 14, 2010, letter from the City of High Point's Mayor Rebecca Smothers, inviting us to participate in a meeting to discuss the boundaries of this property. As NCDOT and the Federal Highway Administration are the agencies responsible for identifying historic properties as part of the planning process for federally-funded transportation improvements, we would appreciate your responding to Mayor Smothers and arranging such a meeting, if appropriate. We will be happy to attend the meeting, if requested.

The above comments are made pursuant to Section 106 of the National Historic Preservation Act and the Advisory Council on Historic Preservation's Regulations for Compliance with Section 106 codified at 36 CFR Part 800.

Thank you for your cooperation and consideration. If you have questions concerning the above comment, contact Renee Gledhill-Earley, environmental review coordinator, at 919-807-6579. In all future communication concerning this project, please cite the above referenced tracking number.

The Honorable Rebecca Smothers, Mayor
City of High Point
PO Box 230
High Point, NC 27261

RE: Historic Site Boundaries for Elihu and Abigail Mendenhall House, Skeet Club Road, High Point, Guilford County, ER03-0404

Dear Mayor Smothers:

Thank you for your September 14, 2010, letter concerning the above referenced property. We recently responded to the North Carolina Department of Transportation's reevaluation of the Mendenhall property's National Register eligibility and enclose a copy of our memorandum for your review.

As the proposed improvements of Skeet Club Road are a federally-funded undertaking, the Federal Highway Administration and North Carolina Department of Transportation are the agencies responsible for carrying out the regulatory process related to historic properties. We have asked them to discuss this matter with you and set up the requested meeting, if appropriate. We will be happy to attend any such meeting once scheduled.

Sincerely,

Renee Gledhill-Earley

Form Revised 6-10-92

North Carolina Department of Transportation
PROJECT ENVIRONMENTAL CONSULTATION FORM
I.D. No. U-3615

I. GENERAL INFORMATION

a.	Consultation Phase:	Right of Way	
b.	Project Description	SR 1820 (Skeet Club Road) – SR1003 (North Main Street) US 311 to NC 68 (Eastchester Drive), in Guilford County	
c.	WBS: State Project: Federal Project:	34962.1.1 8.2494701 STP-1820(2)	
d.	Document Type:	EA	December 2002 Date
		FONSI	May 2004 Date

II. CONCLUSIONS

The above environmental document has been reevaluated as required by 23 CFR 771. It was determined that the current proposed action is essentially the same as the original proposed action. Proposed changes are noted below in Section III. It has been determined that anticipated social, economic, and environmental impacts were accurately described in the above referenced document(s) unless noted otherwise herein. Therefore, the original Administration Action remains valid.

III. CHANGES IN PROPOSED ACTION AND ENVIRONMENTAL CONSEQUENCES

Property owned by the City of High Point at Oak Hollow Lake was purchased with grants from the US Department of Interior. That property is protected by Section 6(f)(3) of the Land and Water Conservation Fund (LWCF) Act of 1965. Right of way needs of this property for this project will be a LWCF Conversion. NC Department of Environment and Natural Resources, Division of Parks and Recreation, must approve mitigation by replacement with property of equal value. This project commitment has been added to the green sheets.

There are no significant changes that affect the FONSI. The Finding of No Significant Impact remains valid.

IV. LIST OF ENVIRONMENTAL COMMITMENTS

D.O.T. will implement all practical measures and procedures to minimize and avoid environmental impacts. (See attached project commitments.)

V. COORDINATION

Project Development and Environmental Analysis Branch personnel have discussed current project proposals with others as follows:

Design Engineer:	David Scheffel	February 3, 2009 Date
FHWA Engineer:	Felix Davila	December 19, 2008 Date
Permits Section:	Deanna Riffey	June 20, 2008 Date

VI. NCDOT CONCURRENCE

SR 1003 (North Main Street)-
SR 1820 (Skeet Club Road)
US311 To NC 68 (Eastchester Drive), Guilford County
Federal Aid Project No. STP-1820(2)
State Project No. 8.2494701
WBS Project No. 34962.1.1
T.I.P. Project No. U-3615

Structure Design Unit / Roadside Environmental Unit / Division Construction Engineer

For the removal of bridge #65 over Oak Hollow Lake, Best Management Practices will be employed to minimize sediment distribution downstream in the lake. Care will be taken in the removal of the bridge, and the removal of erosion control or sediment control devices so that sediment is not released downstream in the lake.

This is a standard operating procedure.

Roadway Design Unit

The Elihu Mendenhall property, a 4(f) resource, will be impacted with temporary easements. These easements will be needed only during the construction of the project. The easements will not cause permanent or adverse physical impacts, or interfere with the activities or purposes of the Farmstead. A note will be added to the roadway design plans and/or project special provisions instructing the contractor to fully restore each easement area to a condition equal to or better than what existed prior to the project. As specified in 23 CFR 771.135, the temporary easements will not constitute a use of property from the Farmstead within the meaning of Section 4(f), and a Section 4(f) Evaluation is not required. However, if modifications during final design result in any of the above conditions not being met, then a 4(f) evaluation will be required.

A note instructing the contractor to fully restore each easement in the area of Elihu Mendenhall property to a condition equal to or greater than what existed prior to the project was not included on the Right of Way Plans or in the Project Special Provisions. Roadway agreed the note will be added to the plans.

Hydraulics Unit / Project Development and Environmental Analysis Branch

Any impacts to wetlands, streams, and buffers must comply with the Randleman Buffer Rules, 404/401 regulations, water supply regulations (15A NCAC 2B .0216), and any other required federal, state, and local regulations.

This is a standard operating procedure.

Geotechnical Unit
It is anticipated that the proposed widening of Skeet Club Road will encroach on one property identified as an underground storage tank (UST) site. This impacted site will be further evaluated prior to right of way acquisition.

There are three (3) UST sites identified by NCDOT Geotechnical Unit that may be impacted by the proposed widening. 1) Bizzy Bee Grocery II at 3802 North Main Street 2) Dixon Produce at 3300 North Main Street 3) Former Tan Safeway at 3301 North Main Street. All three sites will be evaluated prior to acquisition.

Hydraulics Unit
Hazardous spill basins will be required on any part of the project that falls within a 0.5 mile of the Critical Area of the Water Supply Watershed.

Hazardous spill basins have been included in the Right of Way Plans as needed.

Hydraulics Unit / Structure Design Unit
In association with the replacement of Bridge #65, no deck drains will be allowed to discharge directly into Oak Hollow Lake.

Bridge design of Bridge #65 is complete and does not have deck drains.

Project Development and Environmental Analysis Branch
The noise analysis in this report assumed a worst-case scenario of a 4-lane median divided typical section. It is anticipated that the final recommendation on the typical section may reduce the number of impacted noise receptors. Once the typical section recommendation has been determined, the number of impacted noise receptors will be re-calculated and reported in the final environmental document.

A revised noise report has been completed and is summarized in Section V of the FONSI.

Project Development and Environmental Analysis Branch
In the area of the Historic Spring House, in order to accommodate for the widening of the road and avoid impacts to the Spring House ruins, two avoidance alternatives have been developed. Until final designs are complete, it cannot be determined at this time which alternate will be used. The State Historic Preservation Officer issued a determination of "no effect" for Alternative 1 (1:1 slope), and a determination of "adverse effect" for Alternative 2 (retaining wall) (see pages B-1 and B-2 in Appendix B for concurrence forms). Once more detailed survey and soils information is obtained, an alternative will be selected, and the project's impact on this 4(f) resource will be re-evaluated. If the "adverse effect" alternative is selected, a Memorandum of Agreement (MOA) will have to be issued. Impacts associated with the selected alternative will be included in the final environmental document.

After investigating the soils in the area of the Spring House Ruins, it was determined that a 2:1 slope could be utilized. After presenting this information to the SHPO, it was determined that the slope alternative would result in "no adverse effect" on the historic property, and the retaining wall alternative (which includes a handrail and guardrail) would result in an "adverse effect". Although the slope would impact the site, it would act as a protective covering for the Spring House. This decision was made with the condition that archaeological monitoring be provided during fill and construction of the project (see Appendix B in the FONSI, pages B-1 and B-2 for concurrence form). The retaining wall alternative was seen as a least desirable alternative due to the fact that the guardrail, handrail, and size and appearance of the retaining wall would not be consistent with the historic and rural nature of the National Register Property.

Right of Way Unit

Properties owned by the City of High Point at Oak Hollow Lake were purchased with grants from the US Department of Interior. That property is protected by Section 6(f)(3) of the Land and Water Conservation Fund (LWCF) Act of 1965. Rights of way needs of this property for this project are a LWCF Conversion. NC Department of Environment and Natural Resources, Division of Parks and Recreation, and the US Department of Interior have approved of the mitigation by replacement with property of equal value.

See the City of High Point Conversion attachment to the Consultation for U-3615 of February 2009.

The above referenced properties of Oak Hollow Lake are protected by Section 4(f). They are qualified as Deminimus.

See the City of High Point Letter of March 15, 2007 and the published Public Notice of January 2, 2009 attached to the Consultation of February 2009.

North Carolina Department of Environment and Natural Resources
Division of Parks and Recreation

Beverly Eaves Perdue, Governor | Dee Freeman, Secretary | Lewis Ledford, Director

February 2, 2009

Mr. Allen Oliver
High Point Parks and Recreation Department
1560 North Main Street, Suite 201
High Point, North Carolina 27262

SUBJECT: Section 6(f)(3) Conversion Approval for Oak Hollow Park Park, LWCF # 37-00174, Amendment # 19

Dear Mr. Oliver:

The State of North Carolina has received approval from the National Park Service (NPS) for the city's request to convert 6.36 acres at Oak Hollow Park and to replace it with 1.23 acres located along the eastern border of the park. The conversion will allow the N.C. Department of Transportation to widen Skeet Club Road in order to increase traffic capacity and to improve safety.

To complete the conversion process, the city will be require to place an "affidavit/notification of limitation of use" statement as part of the deed for the replacement property. The statement should include language such as "the property identified has been acquired with federal Land and Water Conservation Fund assistance from the National Park Service and pursuant to the requirements of that program must be used for public outdoor recreation purposes only in perpetuity."

Once the property have been transferred and the notice of limitation of use statement placed on the deed, three (3) copies of the deed are required to be sent to the State.

The conversion will be officially completed once the deeds are received by the State. We have enclosed a copy of the approved NPS conversion amendment for the city's Oak Hollow Park LWCF project file.

If you have any questions, please contact your regional consultant Vonda Martin at (336) 771-5065.

Sincerely,

John C. Poole
Grants Program Manager

Project Amendment No. 19

AMENDMENT TO PROJECT AGREEMENT

(OMB No. 1024-0033, August 31, 2010)

THIS AMENDMENT To Project Agreement No. 37-00174 is hereby made and agreed upon by the United States of America, acting through the Director of the National Park Service and by the State of North Carolina pursuant to the Land and Water Conservation Fund Act of 1965, 78 Stat. 897 (1964).

The State and the United States, in mutual consideration of the promises made herein and in the agreement of which this is an amendment, do promise as follows:

That the above mentioned agreement is amended by adding the following:

In accordance with Section 6(f)(3), N.C. DENR requests to delete 6.36 acres valued at $ 87,200 and to replace the land with 1.23 acres valued at $ 93,000.

In all other respects the agreement of which this is an amendment, and the plans and specifications relevant thereto, shall remain in full force and effect. In witness thereof the parties hereto have executed this amendment as of the date entered below.

Estimated Burden Statement: The public reporting burden for this collection of information is estimated to average 3 hours per response including time for reviewing instructions, gathering and maintaining data, and completing and reviewing the form. Direct comments regarding this burden estimate or any aspect of this form should be sent to the National Park Service, State and Local Assistance Programs Division, 1849 C Street NW, Washington, DC 20240.

Paperwork Reduction Act Statement: This form is necessary to provide data input into an NPS project database which provides timely data on projects funded over the life of the program. Such data is used to monitor project progress and to analyze program trends. A Federal Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. Any comments on the burden estimate or other aspects of this collection of information may be addressed to the National Park Service, State and Local Assistance Programs Division, 1849 C Street NW, Washington, DC 20240.

Raleigh, NC 27699-1548

Subject: Finding of No Adverse Affect to the recreational use of Oak Hollow Lake Recreation Park by NCDOT TIP Project U-3615B

Dear Mr. Thorpe:

The City of High Point confirms the finding that the proposed Skeet Club Road widening project will have no adverse affect on the Oak Hollow Lake Recreation Area. We agree that the impacts from the proposed project to be *de minimis*.

This letter will satisfy the requirement of Section 4(f) of the U. S. Department of Transportation Act of 1966.

If you or your staff needs additional information concerning this project, you can contact, me by email at allen.oliver@highpointnc.gov or by phone at (336) 883-3473.

Yours truly,

Allen Oliver, Director
City of High Point
Parks and Recreation Department

PUBLIC NOTICE OF OAK HOLLOW PARK PROPERTY CONVERSION AT SKEET CLUB ROAD IN HIGH POINT

TIP Project No. U-3615 Guilford County

The North Carolina Department of Transportation (NCDOT) is acquiring 3.39 acres of land adjacent to existing Skeet Club Road at Oak Hollow Park from the City of High Point. This property will be used as a part of the proposed improvements to Skeet Club Road. Improvements include widening Skeet Club Road to a multi-lane facility.

The purpose of this public notice is to allow the public an opportunity to comment on the use of the acquired property for the highway improvements. Right of Way acquisition is currently scheduled to begin in 2009 with construction scheduled to begin in 2011.

Comments will be received for 30 days from the first publishing date of this notice. Please send comments to Richard Helms, Project Development and Environmental Analysis Branch at 1548 Mail Service Center, Raleigh, NC 27699-1548. Anyone desiring additional information may contact Richard Helms by mail as noted above, by email at rhelms@ncdot.gov, or by phone at (919) 733-3141.

Minutes of the 30% Hydraulic Design Review (4b) Meeting on September 21, 2005 for U-3615B, Guilford County

Participant:

Team Members:
Randy Henegar, NCDOT Hydraulics (present)
John Thomas, USACE (present)
Sue Homewood, NCDWQ (present)
Eric Midkiff, NCDOT PD&EA (absent)
Travis Wilson, NCWRC (present)
Gary Jordan, USFWS (absent)
Chris Militscher, EPA (absent)
Deanna Riffey, NCDOT NEU(present)
Brad Wall, NCDOT Division 7 (absent)
David Scheffel, NCDOT Roadway (present)
Donnie Brew, FHWA (present)

Other Attendees
John Frye, NCDOT Structures
John Hennessy, NCDWQ
Paul Fisher, NCDOT Hydraulics
Shawn Harris, NCDOT Hydraulics

It should be noted that the Concurrence Points 2A and 4A meetings for this project have been held on 3/11/04. Concurrence was reached and a signed concurrence form was sent out to attendees with minutes from this meeting. The 4B meeting commenced at approximately 2:30 p.m. Randy Henegar (NCDOT Hydraulics Unit) began by providing an overview of the project noting that this was a continuation of U-3615A, but that most of this project would have Hazardous Spill Basins due to the proximity to Oak Hollow Lake (which is the City of High Point's water supply source.) Comments were as follows:

U-3615B

1. Plan Sheet #4: John Hennessy made the general comment that if NCDOT is going to use a splitter box before a level spreader, they should document the full design length of the level spreader without a splitter box and a reason why that was impractical to construct.

2. Plan Sheet #5: No Comments.

3. Plan Sheet #6: NCDOT will use 1.5:1 fill slopes at the pond near –L- Rev. Sta. 189+00 (LT) to minimize surface water impacts.

4. Plan Sheet #7: Add Buffer limits on UT-6.

5. Plan Sheet #8: Two small wetlands shown on plans are "isolated wetlands".

6. Plan Sheet #9: No Comments.

7. Plan Sheet # 10: There are no buffers around the pond near –L- Rev. Sta. 248+50 (RT).

8. Plan Sheet #11: Although the system has not yet been designed, Randy Henegar described the intention of keeping the off-site water in a separate system and discharging it directly into the stream inside the Transportation Facility. Everyone was in general agreement with this concept, which applies throughout the project.

9. Plan Sheet # 12: Since this part of the project has not yet been designed, NCDOT agreed to notify Sue Homewood of any potential conflicts before the 4C Meeting. Everyone in attendance was in agreement that there would be no buffers on the existing stormwater pond near –L- Sta. 275+00 (RT).

10. Plan Sheet # 13: No Comments.

11. Plan Sheet # 14: Everyone in attendance was in agreement that there would be no buffer on the stormwater outfall near –L- Sta. 305+50 (RT).

12. Plan Sheet # 15: Deanna Riffey and Sue Homewood agreed to investigate the buffer status of the stormwater outfall near –L- Sta. 315+00 (RT), and report back to NCDOT Hydraulics Unit.

13. Plan Sheet # 16: No Comments.

14. Plan Sheet # 17: NCDOT Hydraulics Unit indicated that they were going to try and treat their water from Skeet Club Road prior to discharging into UT-13, which is classified as Perennial.

No further comments were recorded, and the meeting adjourned at 3:45 p.m.

Minutes of the Interagency Hydraulic Design Review (4c) Meeting on September 12, 2012 for U-3615B, Guilford County

Participant:

Team Members:
Randy Henegar, NCDOT Hydraulics (present)
Thomas Brown, USACE (present)
Amy Euliss, NCDWQ (present)
Michael Penney, NCDOT PD&EA (present)
Travis Wilson, NCWRC (absent)
Gary Jordan, USFWS (absent)
Chris Militscher, EPA (telephone conference call)
Deanna Riffey, NCDOT NEU(present)
Brad Wall, NCDOT Division 7 (absent)
Tatia White, NCDOT Engineering Coordination(present)
Felix Davila, FHWA (present)

Other Attendees
Ting Fang, NCDOT Structures
Rachelle Beauregard, NCDOT NES
Paul Fisher, NCDOT Hydraulics
Shawn Harris, NCDOT Hydraulics
Barney Blackburn, NCDOT REU
Jennifer Parish, NCDOT REU
LeiLani Paugh, NCDOT NEU
Jason Elliott, NCDOT NEU

It should be noted that the 30% Hydraulic Design Review (4b) meeting for this project was held on 9/21/05. The 4C meeting commenced at approximately 10:30 a.m. Randy Henegar (NCDOT Hydraulics Unit) began by noting that this was a continuation of U-3615A, but that most of this project would have Hazardous Spill Basins due to the proximity to Oak Hollow Lake (which is the City of High Point's water supply source.) Comments were as follows:

U-3615B

1. Cover Sheet: The Let Date on the plans, October 15, 2013 is the current scheduled Let Date. The Engineer has changed from Wang Engineering to Wetherill Engineering.

2. Plan Sheet #5: The area between Sites 1 & 2 that encompasses the stream buffers and is in the Right-of-Way will be a Preservation Site.

3. Plan Sheet #6: Designate the pond impacts as Site 2A. This will help separate stream impacts from open water pond impacts.

4. Plan Sheet #7: Show impacts at the inlet of the 2 @ 54" and add a Site number for this.

5. Plan Sheet #8: Do a "total take" on the wetlands near –L- Sta. 219+00.

6. Plan Sheet #9: Do a Blow-Up to better show impacts near –L- Sta. 232+00. Have Location and Surveys extend the JS line from the inlet of the 30" pipe to the south. Separate the stream impacts from the open water impacts. Note on plans that there will be no direct discharge from the bridge to the water.

7. Plan Sheet # 10: There are no buffers around the pond near –L- Rev. Sta. 248+50 (RT).

8. Plan Sheet #11: Randy Henegar described the separate systems for off-site water and project water. The off-site system will discharge directly into the stream inside the Transportation Facility. Everyone was in general

agreement with this concept, which applies throughout the project. Provide a Blow-Up of the 8' x8' box culvert impacts for clarity.

9. Plan Sheet # 12: The stream at the outlet of the 24" pipe should be shown as a JS. There would be no buffer on the existing stormwater pond near –L- Sta. 275+00 (RT).

10. Plan Sheet # 13: No Comments.

11. Plan Sheet # 14: Everyone in attendance was in agreement that there would be no buffer on the stormwater outfall near –L- Sta. 305+50 (RT.) The stormwater pond near –L- Sta. 307+50 (LT.) is not a JS.

12. Plan Sheet # 15: There are no buffers on the stormwater outfall near –L- Sta. 315+00 (RT.)

13. Plan Sheet # 16: Remove the JS symbol on the stormwater pond near –L- Sta. 333+00 (RT.)

14. Plan Sheet # 17: NCDOT Hydraulics Unit indicated that they were going to tie the new storm drainage syster in Skeet Club Road into the existing storm drainage system prior to discharging into UT-13, which is classified as Perennial. The buffers on this stream begin at the end of the rip rap outlet.

The Corps of Engineers questioned whether a new Environmental assessment was required since the original is over five (5) years old. Michael Penney will coordinate this with the COE.

No further comments were recorded, and the meeting adjourned at 12:00 p.m.
