STATE OF NORTH CAROLINA
DEPARTMENT OF TRANSPORTATION

BEVERLY EAVES PERDUE
GOVERNOR

EUGENE A. CONTI, JR.
SECRETARY

May 7, 2010
Revised May 28, 2010

Mr. Brad Shaver
U. S. Army Corps of Engineers
Regulatory Field Office
69 Darlington Ave.
Wilmington, NC 28403

Subject: **Application for a Section 404 Individual Permit and Section 401 Water Quality Certification,** for the proposed US 17 Improvements from the Jacksonville Bypass to Drummer Kellum Road Jacksonville, Onslow County, TIP U-4007, Debit $570 from WBS 35008.1.1

Dear Sir:

The North Carolina Department of Transportation (NCDOT) proposes to improve the existing US 17 from the Jacksonville Bypass to Drummer Kellum Road in Onslow County. This application package consists of the cover letter, ENG Form 4345, half size plan sheets, permit drawings, mailing labels, and the Hydraulic Design Concurrence meeting (4B, 4C) minutes for Sections A and B of U-4007.

Purpose and Need

The purpose and need of the project is to increase safety, provide route continuity and reduce congestion.

Summary of Impacts

Construction of the proposed project will necessitate impacts to Jurisdictional Waters of the U.S. There will be a total of 8.25 acres of permanent wetland impacts. Proposed construction will also permanently impact 3,039 feet of jurisdictional streams.

Summary of Mitigation

The proposed construction of U-4007 will impact 4.01 acres of riparian, 4.24 acres of non-riparian wetlands and 3,039 linear feet of stream that will require compensatory mitigation. NCDOT will utilize the NC Ecosystem Enhancement Program (EEP) for compensatory mitigation requirements for the unavoidable impacts to 4.24 acres of wetlands and 3,039 feet of jurisdictional stream. The remaining impacts of 4.01 acres of riparian impacts will be mitigated through a transfer of mitigation credits from NCDOT assets at the Croatan Mitigation Site in order to satisfy the federal Clean Water Act.

SUITE 116
RALEIGH NC 27604

Project Schedule

U-4007 has been divided into four sections, A (White Street Extension), B (Western Parkway), C (US 17 Expressway), and D (Piney Green Road Interchange). The limits and let dates (if applicable) are in Table 1 for these sections. Due to funding, section B will be constructed first with A to follow a year later. Construction for Section C (US 17 Expressway) has been delayed beyond Fiscal Year 2020 due to lack of funding. Likewise, construction for Section D (Piney Green Road Interchange) is also delayed beyond Fiscal Year 2020. The NCDOT will apply for any relevant permit modifications for U-4007 when final design is complete for sections C and /or D. Construction will not commence on either section until permit modifications have been received based on final design. The let dates, however, may advance as additional funds become available. Both the A and B sections have final design and final impacts.

Table 1. Project Sections and Scheduling

Section	Project Limits	Review Date	Scheduled Let Date
U-4007A	Begins on the east side of Bell Fork Rd. and ends at Huff Dr.	8/30/2011	10/18/2011
U-4007B	Begins from the Jacksonville Bypass north of US 17 and ends at the intersection with Western Blvd. Extension at Gateway North Drive.	8/31/2010	10/19/2010
U-4007C	Begins at the Jacksonville Bypass and end northeast of Drummer Kellum Road, at the bridge over Wolf Swamp.	Post year	Post year
U-4007D	Begins with Piney Green Rd. terminus with US 17 and terminates at Drummer Kellum Rd. Includes extension of Commerce Drive from terminus to Piney Green Rd.	Post year	Post year

NEPA Document Status

An Environmental Assessment (EA) and a Finding of No Significant Impact (FONSI) for U-4007 were approved by the Federal Highway Administration (FHWA) on October 30, 2006 and February 12, 2008 respectively and circulated to the appropriate agencies.

Independent Utility

The subject project complies with 23 CFR Part 771.111(f), which lists the FHWA characteristics of independent utility of a project:

1) The project connects logical termini and is of sufficient length to address environmental matters on a broad scope;
2) The project is usable and a reasonable expenditure, even if no additional transportation improvements are made in the area;
3) The project does not restrict consideration of alternatives for other reasonably foreseeable transportation improvements.

Resource Status

Wetlands and surface waters within the U-4007 Preferred Alternative corridor were originally delineated in 2002 and re-evaluated in July 2005 and August 2007 using the field delineation method outlined in the 1987 Corps of Engineers Wetland Delineation Manual. The North Carolina Division of Water Quality's (DWQ) Identification Methods for the Origins of Intermittent and Perennial Streams was used to make stream determinations. All streams are in the White Oak River Basin, Hydrologic Unit 03030001. Jurisdictional features were verified by Dave Timpy and Jennifer Frye of the US Army Corps of Engineers (USACE) on May 9, 2006 and August 8, 2007, respectively.

Impacts to Jurisdictional Resources

Impacts to jurisdictional streams for U-4007A are summarized below in Table 2 and U-4007B in Table 3.

Table 2. Jurisdictional Streams (U-4007A)

Stream Name	Permit Site	Stream Classification	Permanent (ft.)	Temporary (ft.)
Scales Creek (SA 30)	2	Perennial	680 640	80
UT Scales Creek (SA 12)	6	Perennial	420	0
UT Scales Creek (SA 08)	10	Intermittent	0	35
		Total:	1,740	115

Table 3. Jurisdictional Streams (U-4007B)

Stream Name	Permit Site	Stream Classification	Permanent (ft.)	Temporary (ft.)
Sandy Run Branch*	1	Perennial	290	0
Deep Gully (SA 17)	4	Perennial	301	0
UT Mill Creek (SA 15)	6	Perennial	260	0
Mill Creek (SA 01)	7	Perennial	326	0
UT Deep Gully (SA 18)	9	Intermittent	122	0
		Total:	1,299	0

*The inlet extension is proposed to be on a 0.0% grade and will be at bed level.

Impacts to jurisdictional wetlands for U-4007A are summarized below in Table 4 and U-4007B in Table 5.

Table 4. Wetland Impacts (U-4007A)

Wetland Name	Permit Site	Permanent (ac.)	Temporary (ac.)	Riparian/ Non-Riparian
WTL-V	1	<0.01	0	Riparian
WTL-T	2	0.52	0	Riparian
WA 42	3	2.72	0	Non-Riparian
WA 15	4	0.10	0	Non-Riparian
WA 30	5	0.39	0	Riparian
WA 40	6	0.16	0	Riparian
WA 14	7	1.52	0	Riparian
WA 12	8	0.12	0	Non-Riparian
WA 12	9	0.01	0	Non-Riparian
Total:		**5.55**	**0**	**2.59/2.95**

Table 5. Wetland Impacts (U-4007B)

Wetland Name	Permit Site	Permanent (ac.)	Temporary (ac.)	Riparian/ Non-Riparian
WA 09	2	0.35	0	Non-Riparian
WA 17	3	0.78	0	Non-Riparian
WA 19	4	0.65	0	Riparian
WA 19	5*	<0.01	0	Riparian
WA 22	6	0.29	0	Riparian
WA 03	7	0.37	0	Riparian
WA 16	8	0.16	0	Non-Riparian
WA 20	9	0.11	0	Riparian
Total:		**2.70****	**0**	**1.42/1.29**

* Site 5 impacts are less than 0.005 acre.

** Individual site impacts numbers are rounded to the nearest 0.01. The total impact number is taken from the individual site impacts before rounding. Therefore, due to rounding, total impacts are 2.70.

Impacts to Waters of the U.S.

Permanent Impacts: Proposed permanent impacts include which 4.02 acres to riparian wetlands and 4.24 acres to non-riparian wetlands resulting from fill, excavation, and mechanized clearing. Proposed permanent impacts for streams is 3,039 feet resulting from culvert installation, extension and roadway fill.

Utility Impacts: There will be no impacts to jurisdictional resources due to utilities for U-4007.

Protected Species

The USFWS list fourteen federally protected species for Onslow County as of the January 31, 2008 listing (Table 6).

Table 6. Federally protected species of Onslow County.

Scientific Name	Common Name	Habitat Present	Status	Biological Conclusion
Puma concolor couguar	Eastern cougar	No	E	No Effect
Trichechus manatus	West Indian manatee	No	E	No Effect
Lindera melissifolia	Pond berry	Yes	E	No Effect
Charadrius melodus	Piping plover	No	T	No Effect
Picoides borealis	Red-cockaded woodpecker	No	E	No Effect
Alligator mississippiensis	American alligator	No	T(S/A)	N/A
Caratta carretta	Loggerhead sea turtle	No	T	No Effect
Chelonia mydas	Green sea turtle	No	T	No Effect
Dermochelys coriacea	Leatherback sea turtle	No	E	No Effect
Carex lutea	Golden sedge	No	E	No Effect
Acipenser brevirostrum	Shortnose sturgeon	No	E	No Effect
Thalictrum cooleyi	Cooley's meadowrue	Yes	E	No Effect
Amaranthus pumilus	Seabeach amaranth	No	T	No Effect
Lysimachia asperulaefolia	Rough leaved loosestrife	Yes	E	No Effect

Note: E – endangered T – threatened T(S/A) -threatened due to similarity of appearance

Plant re-surveys will be conducted prior to let for the species that have habitat in the study area.

Cultural Resources

Archaeology and Historic Architecture

There are no known historic resources in the project's area of potential affect. The State Historic Preservation Office (HPO) and NCDOT concurred that the project will have no effect on any known historic architectural or archaeological resources and do not recommend further architectural or archaeological surveys.

FEMA Compliance

The project has been coordinated with appropriate state and local officials and the Federal Emergency Management Agency (FEMA) to assure compliance with FEMA, state, and local floodway regulations.

Mitigation Options

The NCDOT is committed to incorporating all reasonable and practicable design features to avoid and minimize jurisdictional impacts, and to provide full compensatory mitigation of all remaining, unavoidable jurisdictional impacts. Avoidance measures were taken during the planning and NEPA compliance stages; minimization measures were incorporated as part of the project design.

Avoidance and Minimization

All jurisdictional features were delineated, field verified and surveyed within the corridor for U-4007. Using these surveyed features, preliminary designs were adjusted to avoid and/or minimize impacts to jurisdictional areas. NCDOT employs many strategies to avoid and minimize impacts to jurisdictional areas in all of its designs. Many of these strategies have been incorporated into BMP documents that have been reviewed and approved by the resource agencies and which will be followed throughout construction. All wetland areas not affected by the project will be protected from unnecessary encroachment. Individual avoidance and minimization items are as follows:

- The project was designed to avoid or minimize disturbance to aquatic life movements.
- Crossings of jurisdictional areas were angled to cross as perpendicular as possible to minimize impacts.
- The use of 3:1 fill slopes in jurisdictional areas.
- The Western Parkway alignment will be shifted to avoid the relocation of the stormwater pond. The revised alignment will require the relocation of approximately 0.5 acre of an existing stormwater pond. The pond would be expanded at the existing site to compensate for the area taken. This revised alignment increases stream impacts by approximately 130 feet.
- Access along Western Parkway would be fully controlled with designated access points along the roadway.
- Design Standards in Sensitive Watersheds for portions of the project area that drain to Scales Creek.
- Use of pre-formed scour holes.

Compensation

The NCDOT has avoided and minimized impacts to jurisdictional resources to the greatest extent possible as described above. The unavoidable impacts to jurisdictional wetlands will be offset by compensatory mitigation provided by the NC Ecosystem Enhancement Program (EEP). A copy of the EEP acceptance letter will be forwarded upon receipt.

Indirect and Cumulative Effects

Per the U-4007, Indirect and Cumulative Effects Assessment Update, a re-examination of the data and conclusions from the 2006 document, as well as the updated analysis, both support the final determination that U-4007 has a low potential for inducing change in land use that would notably contribute to cumulative effects. No additional ICE study is recommended.

Regulatory Approvals

Section 404: Application is hereby made for a USACE Individual 404 Permit as required for the above-described activities.

Section 401: Application is hereby made for a Section 401 Water Quality Certification from the N.C. Division of Water Quality.

A copy of this permit application will be posted on the DOT website at: http://www.ncdot.org/doh/preconstruct/pe/neu/permit.html.

CAMA: A Consistency Certification will be submitted to the NC Division of Coastal Management under a separate cover.

If you have any questions or need additional information, please contact John Merritt at jsmerritt@ncdot.gov or (919) 431-6749.

Sincerely,

for Gregory J. Thorpe, Ph.D., Manager
Environmental Management Director, PDEA Branch

APPLICATION FOR DEPARTMENT OF THE ARMY PERMIT
(33 CFR 325)

OMB APPROVAL NO. 0710-003
Expires December 31, 2004

Public reporting burden for this collection of information is estimated to average 10 hours per response, although the majority of applications should require 5 hours or less. This includes the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Department of Defense, Washington Headquarters Service Directorate of Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington, VA 22202-4302; and to the Office of Management and Budget, Paperwork Reduction Project (0710-0003), Washington, DC 20503. Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to any penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number. Please DO NOT RETURN your form to either of those addresses. Completed applications must be submitted to the District Engineer having jurisdiction over the location of the proposed activity.

PRIVACY ACT STATEMENT

Authority: Rivers and Harbors Act, Section 10, 33 USC 403: Clean Water Act, Section 404, 33 USC 1344; Marine Protection, Research and Sanctuaries Act, 33 USC 1413, Section 103. Principal Purpose: Information provided on this form will be used in evaluating the application for a permit. Routine Uses: This information may be shared with the Department of Justice and other federal, state, and local government agencies. Submission of requested information is voluntary, however, if information is not provided the permit application cannot be evaluated nor can a permit be issued.

One set of original drawings or good reproducible copies which show the location and character of the proposed activity must be attached to this application (see sample drawings and instructions) and be submitted to the District Engineer having jurisdiction over the location of the proposed activity. An application that is not completed in full will be returned.

11. **STATEMENT OF AUTHORIZATION**

I hereby authorize, _____ to act in my behalf as my agent in the processing of this application and to furnish, upon request, supplemental information in support of this permit application.

APPLICANT'S SIGNATURE DATE

NAME, LOCATION, AND DESCRIPTION OR PROJECT OR ACTIVITY

12. PROJECT NAME OR TITLE (see instructions)
U-4007

13. NAME OF WATERBODY, IF KNOWN (if applicable)
Scales Creek, one UT to Scales Creek, Deep Gully Creek, one UT to Deep Gully Creek, Mill Creek and one UT to Mill Creek, and Sandy Run Branch

14. PROJECT STREET ADDRESS (if applicable)

15. LOCATION OF PROJECT
Onslow (COUNTY) NC (STATE)

16. OTHER LOCATION DESCRIPTIONS, IF KNOWN (see instructions) **Section, Township, Range, Lat/Lon, and/or Accessors's Parcel Number, for example**

17. DIRECTIONS TO THE SITE
Please see attached vicinity map and cover letter.

18. Nature of Activity (Description of project, include all features)

Proposed US 17 Improvements from the Jacksonville Bypass to Drummer Kellum Road.

19. Project Purpose (Describe the reason or purpose of the project, see instructions)

The purpose and need of the project is to increase safety, provide route continuity and reduce congestion.

USE BLOCKS 20-22 IF DREDGED AND/OR FILL MATERIAL IS TO BE DISCHARGED

20. Reason(s) for Discharge

Construction of roadway.

21. Type(s) of Material Being Discharged and the Amount of Each Type in Cubic Yards

Please see attached permit drawings

22. Surface Area in Acres of Wetlands or Other Waters Filled (see instructions)

There will be a total of 4.01 acre of permanent riparian wetland impacts, 4.24 acre of permanent non-riparian impacts and 0.58 acres (3,039 linear feet) of permanent surface water impacts. There will also be 0.02 acre (115 ft) of temporary surface water impacts.

23. Is Any Portion of the Work Already Complete? Yes ___ No _X_ IF YES, DESCRIBE THE COMPLETED WORK

24. Addresses of Adjoining Property Owners, Lessees, Etc., Whose Property Adjoins the Waterbody (If more than can be entered here, please attach a supplemental list).

Please see sheet attached list in the permit drawing package.

25. List of Other Certifications or Approvals/Denials Received from other Federal, State, or Local Agencies for Work Described in This Application.

AGENCY	TYPE APPROVAL*	IDENTIFICATION NUMBER	DATE APPLIED	DATE APPROVED	DATE DENIED

* Would include but is not restricted to zoning, building, and flood plain permits

26. Application is hereby made for a permit or permits to authorize the work described in this application. I certify that the information in this application is complete and accurate. I further certify that I possess the authority to undertake the work described herein or am acting as the duly authorized agent of the applicant.

E. L. Lusk 5.7.10

SIGNATURE OF APPLICANT DATE SIGNATURE OF AGENT DATE

The application must be signed by the person who desires to undertake the proposed activity (applicant) or it may be signed by a duly authorized agent if the statement in block 11 has been filled out and signed.

18 U.S.C. Section 1001 provides that: Whoever, in any manner within the jurisdiction of any department or agency of the United States knowingly and willfully falsifies, conceals, or covers up any trick, scheme, or disguises a material fact or makes any false, fictitious or fraudulent statements or representations or makes or uses any false writing or document knowing same to contain any false, fictitious or fraudulent statements or entry, shall be fined not more than $10,000 or imprisoned not more than five years or both.

Subject: Minutes from Interagency 4B Hydraulic Design Review Meeting
On August 20, 2008 for U-4007A in Onslow County

Team Members:

Brad Shaver-USACOE	(present)
David Wainright-NCDWQ	(present)
Travis Wilson-NCWRC	(absent)
Steve Sollod-NCDCM	(present)
Steven Lane-NCDCM	(absent)
Gary Jordan-USFWS	(present)
Kathy Matthews-EPA	(absent)
Chris Militscher-EPA	(present)
Donnie Brew-FHWA	(present)
Chris Rivenbark-NEU	(present)
John Merritt-NEU	(present)

Participants:

Marshall Clawson, NCDOT Hydraulics
Dan Duffield, NCDOT Hydraulics
Josh Dalton, Sungate Design Group
Brian Elam, Sungate Design Group
Mason Herndon, NCDOT Division 3
Timmy Zepeda, NCDOT Division 3
Brian Yamamoto, NCDOT PDEA
Jim Rerko, NCDOT Division 6
Omar Azizi, NCDOT Structures
Emily Murray, NCDOT Structures

General Comments:

Marshall Clawson started the meeting by introducing the project and stating that the purpose of the meeting was to review the 30% hydraulic designs and show that the commitments made at the 4A meeting were met. Mr. Clawson then handed the meeting over to Josh Dalton. Mr. Dalton proceeded through the project sheet by sheet explaining the proposed drainage design and fielding questions.

Plan Sheets 4:

There are no streams or wetlands on this sheet.

Plan Sheets 5:

Mr. Dalton noted that there is an existing culvert under US 17 Bypass that will be extended on both ends. Two jurisdictional streams converge just upstream of the existing culvert. The existing culvert is a double barrel 6' by 8' RCBC. The barrels of the culvert will be extended separately in the direction of the two channels.

Downstream of the existing culvert, Scales Creek will be conveyed under Loop A and Ramp A by double barrel 6' by 8' RCBC's. The culverts will be separated by approximately 220 feet of open channel. Photographs of Scales Creek and the UT to Scales were passed around and the extreme amount of garbage in the streams was noted.

A small portion of the wetland will be left in the gore area between Ramp A and Loop A. This wetland will be considered a total take.

A wetland will be impacted along Ramp B. Discussion occurred regarding the installation of an equalizer pipe to provide hydrology to the isolated wetland between Ramp B and Loop B. Chris Rivenbark will discuss with Lelani Paugh and inform us of the decision. If an equalizer pipe is installed and the wetland not considered a total take, a commitment will need to be added that this area is not mowed.

Plan Sheets 6:

Mr. Dalton noted that the road crosses the UT to Scales Creek. A 66-inch RCP buried 1-foot will be installed at this location. A small wetland will also be impacted at this location. Mr. Dalton mentioned that preformed scour holes will be used outside of the wetland areas.

Photographs of the stream were passed around and again the garbage and tires in the stream were noted.

Plan Sheet 7:

Mr. Dalton stated that a wetland exists right of stations 42+50 to 45+00 –L-. This area is currently shown as cut, but expressway gutter will be installed to remove the cut ditch from the wetland area.

Plan Sheets 8:

Mr. Dalton stated that a small wetland exists right of stations 55+00 to 58+00 –L-. This area is currently shown as cut, but the curb and gutter will be extended past the wetland to remove the cut ditch from the wetland area.

Mr. Dalton stated that there is a jurisdictional stream parallel to and north of Huff Drive. This stream enters an existing 36-inch RCP and exits the system from an existing 60-inch RCP on the west side of Western Boulevard. A portion of this system will be revised.

Additional Discussion

A layout of the culvert extension at US 17 was provided to Mr. Zepeda for constructability issues and input regarding construction phasing.

Meeting Adjourned

Subject: Minutes from Interagency 4C Permit Drawing Review Meeting
On April 15, 2009 for U-4007A in Onslow County

Team Members:

Brad Shaver-USACOE	(present)
David Wainright-NCDWQ	(present)
Travis Wilson-NCWRC	(absent)
Steve Sollod-NCDCM	(present)
Steven Lane-NCDCM	(present)
Gary Jordan-USFWS	(absent)
Kathy Matthews-EPA	(present)
Chris Militscher-EPA	(absent)
Ron Lucas-FHWA	(absent)
Chris Rivenbark-NEU	(present)
John Merritt-NEU	(present)

Participants:

Marshall Clawson, NCDOT Hydraulics
Josh Dalton, Sungate Design Group
Mason Herndon, NCDOT Division 3
Jackson Provost, NCDOT Division 3
Todd Murray, NCDOT Roadway Design
Kevin Bowen, NCDOT Construction Unit
Mark Staley, NCDOT REU

General Comments:

Marshall Clawson started the meeting by introducing the project and stating that the purpose of the meeting was to review the permit drawings. Mr. Clawson then handed the meeting over to Josh Dalton. Mr. Dalton proceeded through the project sheet by sheet explaining the proposed sites and impacts to streams and wetlands.

Site 1:

There is a small wetland impact at this site. No comments.

Site 2:

Mr. Dalton noted that there is a stream impact and wetland impact at this site. Ms.Matthews asked why the wetland between Loop A and Ramp A was hatched as 'mechanized clearing'. Mr. Dalton explained that after clearing 10 feet from the top of the proposed new channel and fill slopes there would only be a sliver of wetland left.

Site 3:

Mr. Dalton noted that there is a large wetland impacted by the proposed Ramp B. There was a discrepancy in the wetland limits. The plan sheet that contained the enlarged view of the site showed the wetland closed off adjacent to the proposed right-of-way line. The plan sheet that shows the entire interchange showed the wetland continuing away from the project limits. Mr. Rivenbark and Mr. Merritt stated they would verify the correct wetland limits. Mr. Shaver stated that if the wetland was closed off and did not continue away from the project, the remaining

wetland should be considered as a total take. If the wetland continues, then the impact was fine as depicted.

Several agency members asked if the wetland inside Ramp B would be protected. Mr. Shaver requested adding a commitment to the permit application that mowing would not occur inside the remaining wetland limits. Mr. Provost stated that current mowing guidelines are to mow 10 feet outside shoulder points and to ditch limits so this should not be an area that would be mowed. Mr. Herndon stated that blaze orange fencing would be used during construction to delineate the wetlands.

Site 4:

Mr. Dalton stated that Site 4 consisted of a small wetland impact. No comments.

Site 5:

Site 5 consists of a small wetland impact. This impact will now be included with Site 2 impacts.

Site 6:

Site 6 consists of a small temporary stream impact at the outlet of the existing box culverts. Impacts also include stream impacts to Scales Creek and UT to Scales Creek. Since these impacts are all part of Scales Creek, they will now be included with Site 2 impacts. No comments.

Site 7:

Site 7 consists of a large wetland impact. This site will now be referred to as Site 5. No comments.

Site 8:

Site 8 consists of jurisdictional stream and wetland impacts. This site will now be referred to as Site 6. Mr. Shaver requested that the small remaining portion of the wetland to the north be considered a 'take'.

Site 9:

Site 9 consists of a large wetland impact. This site will now be referred to as Site 7. Mr. Shaver requested that the small remaining portion of the wetland to the left of station 43+50 –L- be considered a 'take'. There also appears to be a stray wetland line bisecting the wetland.

Site 10:

Site 10 consists of a wetland impact right of station 56+50 –L-. There appears to be a stray wetland line that crosses the proposed roadway. Mr. Rivenbark and Mr. Merritt stated they would verify the wetland limits in this area. This site will now be referred to as Site 8.

Site 11:

Site 11 consists of a small pocket wetland impact left of station 58+50 –L-. Mr. Dalton stated that this small wetland has been included as a 'total take'. This site will now be referred to as Site 9. No comments.

Site 12:

Site 12 consists of a small temporary jurisdictional stream impact left of station 66+00 –L-. Mr. Wainright asked for an explanation of the stream path. Mr. Dalton stated that the stream flows from the east toward the west and enters an existing 36" RCP left of station 65+57 –L-. This pipe then flows to a blind junction box of which the location was unable to be determined. The flow eventually reaches the existing 60" RCP and outlets the system right of station 17+18 –Y5-. This site will now be referred to as Site 10. No comments.

Meeting adjourned.

Subject: Minutes from Interagency 4B Hydraulic Design Review Meeting

General Comments:

Marshall Clawson started the meeting by introducing the project and stating that the purpose of the meeting was to review the 30% hydraulic designs and show that the commitments made at the 4A meeting were met. After introductions, Mr. Clawson then handed the meeting over to Frank Fleming. Mr. Fleming proceeded through the project sheet by sheet explaining the proposed drainage design and fielding questions.

Plan Sheets 4:

There are no streams or wetlands impacted on this sheet. Mr. Fleming noted an existing ditch will be replaced right of the project in the vicinity of Scales Creek. The proposed ditch will tie to the existing ditch before impacting Scales Creek.

Plan Sheets 5:

Mr. Fleming noted that there is an existing 2 @ 6' X 7' box culvert under US 17 Bypass that will be extended on both ends. The jurisdictional stream is Sandy Run Branch. The two extensions will use bends to line the box culvert with the channel. The extensions cannot be buried the traditional 1.0' on either end. The inlet extension is proposed to be on a 0.0% grade and will be at bed level. The outlet will be extended on 0.3% grade, the same as the existing grade, and will be buried +/-0.7'. The inlet side cannot be buried because of the existing culvert elevation and existing channel elevation. DWQ requested a note be provided for not burying the extensions in the permit application.

Mr. Fleming stated the stormwater will be handled with pre-formed scour holes and grass swales.

Plan Sheets 6:

Mr. Fleming noted the wetland system that is conveyed from the right of -NBL-Ramp at +/- 48+00 through two crossing on the future construction of Loop-1A- to an extension of an existing system that runs south parallel to Marine Blvd. Mr. Jordan of USFWS asked will the system be a total take. NCDOT PDEA and Division requested clarification on why it would be a total take. Mr. Blair stated inside the loop would not be cleared. EPA and USACOE stated there may be water quality benefit. Mr. Jordan stated the system would not support habitat. There was an agreement that two small areas would be a total take. These areas are between –L- and Loop -1A- and the area between the loop and –Y-1A- (Marine Blvd.). Many suggestions from NCDOT were offered for the area inside the loop, from photo monitoring, additional floodplain pipes, and/or reduced mitigation ratios. There was no conclusion at this time. It was agreed that a decision should be made before the field inspection.

Ms. Matthews questioned the timing of the "future loop". Mr. Smith and Mr. Blair agreed the embankment would be constructed but not paved.

Mr. Fleming stated the stormwater will be handled with pre-formed scour holes and grass swales.

Plan Sheet 7:

Mr. Fleming stated that the wetland system and jurisdictional stream at +/- station 16+00 –L- will be conveyed with a 60" RC pipe buried 1.0'. Mr. Fleming stated the stormwater will be handled with pre-formed scour holes and grass swales.

Mr. Wainwright expressed concern about the wetland boundary that appears incomplete along -Y4-. Mr. Wainwright made it clear that he cannot "sign off" on –Y4- alignment until he receives documentation that the alignment minimizes wetland impact as previously agreed upon. Mr. Fleming stated a request for clarification of the boundary had been sent to Hydraulics. (9/26/08). NEU stated they had received the request and is looking into the situation.

Mr. Fleming stated that the wetland system at +/-26+00 –L- will be conveyed with a proposed 36" RC pipe. This system is a wetland with no channel. Mr. Fleming also proposes to use standard rip rap pads at the outlet of this pipe and others that convey flow in a wetland system with no channel. He expressed concern for using scour holes and/or energy dissipaters in wetlands. He expressed that the construction of these outlet protections would disturb the system more than a standard pad to dissipate the energy. Mr. Fleming explained that this is not an equalizer pipe but it's a crosspipe with discernable drainage area. Mr. Fleming there are equalizer pipes proposed on the project and they will be flat (0.0% grade) and require no outlet protection. Mr. Fleming explained the size of the stone proposed and the length of the proposed rip rap pads (std. 876.02 of *Roadway Standard Drawings*). Mr. Wilson stated that the pads are not a detriment to wildlife passage since the pipe sizes are relatively small. Mr. Lane expressed

concern over rip rap staying in place. Mr. Fleming stated there is a problem with the type of stone available in the area being light. Mr. Blair stated granite is being used in the area and it was agreed granite would be used for outlet protection.

Plan Sheet 8:

Mr. Fleming stated that the wetland system at +/-32+00 –L- will be conveyed with 2 proposed lines of 24" RC pipe. Mr. Fleming stated that a double line is being used for a reduction of storm elevation in a wide floodplain and should help wetland hydrology connectivity. This system also does not have a defined channel and they are not equalizer pipes.

Mr. Fleming stated the stormwater will be handled with pre-formed scour holes and grass swales.

Plan Sheet 9:

Mr. Fleming stated that the wetland system and jurisdictional stream at +/-40+00 –L- will be conveyed with a proposed 72" RC pipe buried 1.0'. This crossing is just downstream of the water quality pond behind Target and Lowes. The pond will be impacted by roadway fill but no runoff from the proposed –L- alignment will be discharged into these ponds. Mr. Fleming is proposing to minimize impact to the pond by utilizing rock-plated 1.5:1 fill slopes in the pond. Mr. Fleming stated a reduction in volume of the pond has not been finalized at this time. Mr. Wainwright stated NCDOT should notify the Stormwater Section of DWQ of the proposed construction, reduction in volume, and their process and proposal to mitigate the impact to the water quality pond. Mr. Fleming asked if that was Sungate's responsibility. Mr. Clawson stated that the process will occur during the R/W stage and will be considered apart of the property settlement. Sungate will supply NCDOT with the volume reduction of the pond(s). This data will be used to compensate the pond owner in regards to their existing stormwater permit. It will be the pond's owner responsibility to satisfy their permit with DWQ. Mr. Wainwright requested this information to be included in the permit application.

Mr. Fleming stated the stormwater will be handled with pre-formed scour holes and grass swales.

Plan Sheet 10:

Mr. Fleming stated that the wetland system and jurisdictional stream at +/-57+00 –L- will be conveyed with a proposed 42" RC pipe buried 1.0'. Also a stream that intersects with the previous stream south of the proposed alignment was discussed. This stream crosses –L- at +/-60+00. This stream is called jurisdictional beginning at +/- 30' south of the centerline. Mr. Fleming stated this stream is proposed to be conveyed with a 36'RC pipe and both pipes will be buried 20%. Mr. Sollod stated the pipes need to be buried 1.0' since the project is in a CAMA county if the stream is a "blue line" on the USGS Quad. Mr. Fleming stated he was unaware of this and will bury the pipes 1', if the streams are "blue-lines".

Mr. Fleming stated the stormwater will be handled with pre-formed scour holes and grass swales.

Plan Sheet 11:

Mr. Fleming stated there are no wetlands or jurisdictional streams impacted on this sheet.

Plan Sheet 12:

Mr. Fleming stated there is a wetland left of 100+00 Y-2 that may constitute as an impact. He noted there is an existing deep roadside ditch that runs along Marine Blvd. This ditch is proposed to be replaced in-kind at about the same elevation, but will move horizontally +/-40' to 50'. Mr. Fleming noted that the dimension stated was an estimate and needs to be verified once drainage is approved by NCDOT. Mr. Wainwright stated the "Skaggs Method" could be used to estimate the impact. Mr. Fleming stated he is familiar with the method but has never implicated it. Mr. Fleming expressed concern that past uses of the methods by others seem to over estimate the impact. Mr. Fleming also suggested that the proposed ditch will be at the same elevation as the existing. Mr. Shaver stated it seemed to be reasonable to estimate the impact by the horizontal distance the ditch will be moved. There was agreement among all.

Plan Sheet 13:

Mr. Fleming reiterated the wetland delineation problem on –Y4-.

Mr. Fleming stated the jurisdictional stream that crosses –Y4- at +/- 23+00 is proposed to be conveyed by 2 lines of 36" RC pipe. The pipe in the channel will be buried 1' if it's a "blue line", therefore the pipe size may increase.

Mr. Fleming stated there is a grade revision for Moosehaven Road that is not complete at this time and that the designers have been notified to reduce impacts to water quality ponds and the jurisdictional stream. This stream previously was not going to be impacted by Moosehaven Road. A discussion commenced upon which impact, to the pond or the stream, should be minimized the most. It was agreed to attempt to not impact the pond behind Ruby Tuesdays.

Mr. Fleming stated the pond at the SECU will be impacted. Again Mr. Wainwright requested the stormwater section of DWQ be notified.

Mr. Fleming also added that along –Y4- equalizer pipes are proposed. The number of pipes and their location will be determined once a complete wetland file is received.

Plan Sheet 14:

Mr. Fleming stated there are no wetlands or jurisdictional streams impacted on this sheet. The stormwater from the retail area will be discharged into the same water quality ponds as it does now.

Meeting adjourned.

Subject: Minutes from Interagency 4C Permit Drawing Review Meeting
On April 15, 2009 for U-4007B in Onslow County

Team Members:

Brad Shaver-USACOE	(present)
David Wainright-NCDWQ	(present)
Travis Wilson-NCWRC	(absent)
Steve Sollod-NCDCM	(present)
Steven Lane-NCDCM	(present)
Gary Jordan-USFWS	(absent)
Kathy Matthews-EPA	(present)
Chris Militscher-EPA	(absent)
Ron Lucas-FHWA	(absent)
Chris Rivenbark-NEU	(present)
John Merritt-NEU	(present)
David Harris-REU	(absent)
Bryan Taylor-Roadway	(absent)

Participants:

Marshall Clawson, NCDOT Hydraulics
Frank Fleming, Sungate Design Group
Jackson Provost, NCDOT Division 3
Mason Herndan, NCDOT Division 3
Kevin Bowen, NCDOT Division 3
Mark Staley, NCDOT-REU
Todd Murray, NCDOT Roadway

General Comments:

Marshall Clawson started the meeting by introducing the project and stating that the purpose of the meeting was to review the final hydraulic design and show that the commitments made at the 4A and 4B meeting were met. After introductions, Mr. Clawson then handed the meeting over to Frank Fleming. Mr. Fleming proceeded with discussion of site numbers for the interchange. The wetland system through the interchange on sheet #6 sites will be consolidated into one site. The site will be site #3. Mr. Fleming then proceeded by going through project site by site and fielding questions and comments for each site.

Plan Sheets 5-Site #1

Mr. Shaver asked if the impacts had increased from 4B. Mr. Fleming stated the impacts have not increased. The permits now show ditches that connect to the existing stream. Mr. Fleming stated that these ditches are replacing existing ditches that are being filled by the proposed widening. Ms. Matthews asked if any of these ditches are jurisdictional. Mr. Fleming responded that none of the ditches are jurisdictional.

Plan Sheet 6-Site #2

Mr. Fleming noted the wetland system that is located Right of Y2-SBL will considered a total take and impacted. There was agreement.

Plan Sheet 6-Site #3 (Old Site #3,#4,#5,#6)

This site is the wetland system that is being crossed by –L-, Loop 1A, Ramp 1A, and widening of Y1-SBL. Site #3 is now what was Site #'s 3, 4, 5, & 6. It was discussed to revise the site numbers but retain the station breakout and quantities in the summary sheet, as is. Mr. Fleming requested on an open issue concerning how to show and calculate impacts to Site #3 through the interchange. After Mr. Shaver, Mr. Rivenbark, and Division 3, discussed impacts and mitigation, it was decided the following. The areas between Y1-SBL (Marine Blvd.) and Ramp Y1 and the area inside the loop will not be a total take. The area between –L- and Loop 1A will be a total take. These areas will not be filled or cleared and no mitigation is required. The impact from roadway fill will be documented in the summary but the area not being filled will only be documented in the remarks on the summary. The area upstream of –L- also will not be a total take.

It was discussed to change the hatching for pavement and embankment removal on Hawkside Drive. Also add a note to "Remove Embankment to Natural Ground".

Plan Sheet 7: Site #4 and #5 (OLD Site #7 & Site #8)

Mr. Fleming discussed the combining of Site #7 & #8. It was decided to leave as is.
No other comments.

Plan Sheet 8-(No Site)

Mr. Shaver asked why there wasn't a sheet #8 in the permit package. Mr. Fleming stated that Sungate Design had received a new wetland file which eliminated any impact. Upon investigation, Sungate Design received the file on 3/27/09 from Dan Duffield of Hydraulics. There was discussion between Mr. Shaver and Mr. Rivenbark concerning verification. Mr. Rivenbark stated the area was verified by a co-worker of Mr. Shavers.

Plan Sheet 9-Site #6 (Old Site #9 & #10)

Mr. Shaver reminded Mr. Fleming that the ponds called Site #10 and Site #14 (Sheet #13) are not jurisdictional. There is no need for the sites. Mr. Fleming advised that DWQ needs to see this on the permit somewhere. It was decided to explain the filling of stormwater ponds in the remarks in the summary. Mr. Wainwright asked if these ponds have been discussed with the stormwater group of DWQ. Mr. Clawson stated that the ponds have been discussed with DWQ-Stormwater.

Mr. Herndon expressed that the sliver wetland on the right of –L- at Site #6 (old Site #9) should be a total take. There was agreement. The additional area will be shown in the remarks of the summary sheet.

Plan Sheet 10-Site #7 (Old Site #11)

No comments

Plan Sheet 12-Site #8 (Old Site #12)

Mr. Fleming discussed the procedure for drawing the limits of impact to the wetland left of 100+00 Y-1A. Mr. Fleming also stated the label will be revised to "Limits of Wetland **Impact** Drawn To Potential Effects Of Replacing Roadway Ditch." There was agreement.

Plan Sheet 13: Site #9 (Old Site #13 & #14)

No comments (Site #9)

As discussed before, Site #14 will be removed. This is an impact to a stormwater pond. Mr. Clawson stated that the impact has been coordinated with Stormwater Group of DWQ. The pond impact will be documented in the remarks of the summary.

BOUNDARIES AND PROPERTY:

- State Line
- County Line
- Township Line
- City Line
- Reservation Line
- Property Line
- Existing Iron Pin — EIP
- Property Corner
- Property Monument — ECM
- Parcel/Sequence Number — 23
- Existing Fence Line
- Proposed Woven Wire Fence
- Proposed Chain Link Fence
- Proposed Barbed Wire Fence
- Existing Wetland Boundary — WLB
- Proposed Wetland Boundary — WLB
- Existing Endangered Animal Boundary — EAB
- Existing Endangered Plant Boundary — EPB

BUILDINGS AND OTHER CULTURE:

- Gas Pump Vent or U/G Tank Cap
- Sign — S
- Well — W
- Small Mine
- Foundation
- Area Outline
- Cemetery
- Building
- School
- Church
- Dam

HYDROLOGY:

- Stream or Body of Water
- Hydro, Pool or Reservoir
- Jurisdictional Stream — JS
- Buffer Zone 1 — BZ 1
- Buffer Zone 2 — BZ 2
- Flow Arrow
- Disappearing Stream
- Spring
- Wetland
- Proposed Lateral, Tail, Head Ditch — FLOW
- False Sump

RAILROADS:

- Standard Gauge — CSX TRANSPORTATION
- RR Signal Milepost — MILEPOST 35
- Switch — SWITCH
- RR Abandoned
- RR Dismantled

RIGHT OF WAY:

- Baseline Control Point
- Existing Right of Way Marker
- Existing Right of Way Line
- Proposed Right of Way Line
- Proposed Right of Way Line with Iron Pin and Cap Marker
- Proposed Right of Way Line with Concrete or Granite Marker
- Existing Control of Access
- Proposed Control of Access
- Existing Easement Line — E
- Proposed Temporary Construction Easement — E
- Proposed Temporary Drainage Easement — TDE
- Proposed Permanent Drainage Easement — PDE
- Proposed Permanent Utility Easement — PUE
- Proposed Temporary Utility Easement — TUE
- Proposed Permanent Easement with Iron Pin and Cap Marker

ROADS AND RELATED FEATURES:

- Existing Edge of Pavement
- Existing Curb
- Proposed Slope Stakes Cut — C
- Proposed Slope Stakes Fill — F
- Proposed Wheel Chair Ramp — WCR
- Existing Metal Guardrail
- Proposed Guardrail
- Existing Cable Guiderail
- Proposed Cable Guiderail
- Equality Symbol
- Pavement Removal

VEGETATION:

- Single Tree
- Single Shrub
- Hedge
- Woods Line
- Orchard
- Vineyard — Vineyard

EXISTING STRUCTURES:

MAJOR:

- Bridge, Tunnel or Box Culvert — CONC
- Bridge Wing Wall, Head Wall and End Wall — CONC WW

MINOR:

- Head and End Wall — CONC HW
- Pipe Culvert
- Footbridge
- Drainage Box: Catch Basin, DI or JB — CB
- Paved Ditch Gutter
- Storm Sewer Manhole — S
- Storm Sewer — S

UTILITIES:

POWER:

- Existing Power Pole
- Proposed Power Pole
- Existing Joint Use Pole
- Proposed Joint Use Pole
- Power Manhole — P
- Power Line Tower
- Power Transformer
- U/G Power Cable Hand Hole — HH
- H-Frame Pole
- Recorded U/G Power Line — P
- Designated U/G Power Line (S.U.E.*) — P

TELEPHONE:

- Existing Telephone Pole
- Proposed Telephone Pole
- Telephone Manhole — T
- Telephone Booth
- Telephone Pedestal — T
- Telephone Cell Tower
- U/G Telephone Cable Hand Hole — HH
- Recorded U/G Telephone Cable — T
- Designated U/G Telephone Cable (S.U.E.*) — T
- Recorded U/G Telephone Conduit — TC
- Designated U/G Telephone Conduit (S.U.E.*) — TC
- Recorded U/G Fiber Optics Cable — T FO
- Designated U/G Fiber Optics Cable (S.U.E.*) — T FO

WATER:

- Water Manhole — W
- Water Meter
- Water Valve
- Water Hydrant
- Recorded U/G Water Line — W
- Designated U/G Water Line (S.U.E.*) — W
- Above Ground Water Line — A/G Water

TV:

- TV Satellite Dish
- TV Pedestal — C
- TV Tower
- U/G TV Cable Hand Hole — HH
- Recorded U/G TV Cable — TV
- Designated U/G TV Cable (S.U.E.*) — TV
- Recorded U/G Fiber Optic Cable — TV FO
- Designated U/G Fiber Optic Cable (S.U.E.*) — TV FO

GAS:

- Gas Valve
- Gas Meter
- Recorded U/G Gas Line — G
- Designated U/G Gas Line (S.U.E.*) — G
- Above Ground Gas Line — A/G Gas

SANITARY SEWER:

- Sanitary Sewer Manhole
- Sanitary Sewer Cleanout
- U/G Sanitary Sewer Line — SS
- Above Ground Sanitary Sewer — A/G Sanitary Sewer
- Recorded SS Forced Main Line — FSS
- Designated SS Forced Main Line (S.U.E.*) — FSS

MISCELLANEOUS:

- Utility Pole
- Utility Pole with Base
- Utility Located Object
- Utility Traffic Signal Box — S
- Utility Unknown U/G Line — ?U/L
- U/G Tank; Water, Gas, Oil
- A/G Tank; Water, Gas, Oil
- U/G Test Hole (S.U.E.*)
- Abandoned According to Utility Records — AATUR
- End of Information — E.O.I.
